COLLECTIVE BARGAINING & THE FY77 BUDGET... recommendations were the two major topics discussed at the January meeting of the BOG. Following up on its November 1975 decision to allow collective bargaining on campuses, the Board is working on a draft of guidelines. Additional time for consideration is needed to propose final action since faculty groups have submitted informational memoranda which are being given careful consideration. The Board will distribute a document following their final action.

A review of FY 77 budget recommendation made by the IBHE revealed a recommended increase of 12% (including a tuition increase) or 9% (without a tuition increase) based on an IBHE decision not to fund new enrollments. Mr. Lardner, Chairman, asked the BOG staff to develop a resources-enrollment plan for informed consideration of the possibility of capping enrollment. The Board agreed not to take any action on a tuition increase for the Fall of 1976, and directed the staff to develop information for discussion of future policies.

HAPPY NEW YEAR...
"GOD AND EPA"

In the beginning God created heaven and earth.

He was then faced with a class action lawsuit for failing to file an environmental impact statement with EPA (Heavenly Environmental Protection Agency), an angelically staffed agency dedicated to keeping the Universe pollution free.

God was granted a temporary permit for the heavenly portion of the project, but it was issued on the condition of a cease and desist order on the earthly part, pending further investigation by HEPA.

Upon completion of his construction permit application and environmental impact statement, God appeared before the HEPA Council to answer questions.

When asked why he began these projects in the first place, he simply replied that he liked to be creative.

This was not considered adequate reasoning and he would be required to substantiate this further.

HEPA was unable to see any practical use for earth since "the earth was void and empty and darkness was upon the face of the deep."

Then God said, "Let there be light."

He should never have brought up this point since one member of the Council was active in the Sierrangel Club and immediately protested asking, "How is the light to be made? Would there be strip mining? What about thermal pollution? Air Pollution?" God explained the light would come from a huge ball of fire.

Nobody on the Council really understood this, but it was provisionally accepted assuming (1) there would be no smoke or smoke resulting from the ball of fire, (2) a separate burning permit would be required, and (3) since continuous light would be a waste of energy it should be dark at least one-half of the time.

So God agreed to divide light and darkness and he would call the light Day, and the darkness Night. (The Council expressed no interest with in-house semantics.)

When asked how the earth would be covered, God said, "Let there be firmament amidst the waters; and let it divide the waters from the waters."

One ecology radical Council member accused him of double talk, but the Council tabled action since God would be required first to file for a permit from the ABLM (Angellic Bureau of Land Management) and further would be required to obtain water permits from appropriate agencies involved.

The Council asked if there would only be water and firmament and God said, "Let the earth bring forth the green herb, and such as may seed, and the fruit tree yielding fruit after its kind, which may have seen itself upon the earth."

The Council agreed, as long as native seed would be used.

About future development God also said: "Let the waters bring forth the creeping creature having life and the fowl that may fly over the earth."

Here again, the Council took no formal action since this would require approval of the Game and Fish Commission coordinated with the Heavenly Wildlife Federation and Audobongelic Society.

It appeared everything was in order until God said he wanted to complete the project in six days.

At this time he was advised by the Council that his timing was completely out of the question...HEPA would require a minimum of 180 days to review the application and environmental impact statement, then there would be the public hearings. It would take 10 to 12 months before a permit could be granted.

God said, "To Hell with it!"
