Course Title: MIS 301 Introduction to Mgmt Information Systems

Instructor: Richard D. Gray

Session: Fall 1990, Block 1
Sections D & E

Phone: (708)534-5000 Ext. 2244

Office Hours: M & W 2:30 - 4:30p.m.
W 7:30 - 9:00p.m.

Description:
Provide an overview of business data processing and management information systems. Covers introductory concepts of computer technology, nature of computer applications in business, system analysis techniques, and problems in business-related problems.

Performance Objectives:
Upon completion of this course, the student will:

1. have gained an overview of the relevance of computers with specific references to business applications.

2. study the structure and basic elements of MIS.

3. have gained an understanding of the role of microprocessors/microcomputers in the modern business environment.

4. have gained an understanding of the organization of computers, specific types of computers and the role of communication systems in the context of business data processing.

5. have studied problem structuring approaches, especially program flowcharting.

6. have studied the BASIC programming language and solved several simple business problems using GSU Computer systems.

Textbooks:
Required: Stallings, Hutchinson, Sawyer, Computers: The User Perspective, 2nd edition Times Mirror Mosby

Requirements:
Assignments will normally be accepted only on "due dates." All assignments must be completed. Grades of INCOMPLETE will not be given except under extenuating circumstances.
Evaluation:
