Hi Professor Shin,

Thank you for the note. We have your withholding request form on file with the capstone, but the form is vague as to time period. Perhaps we can discuss revising the form with CAS if needed.

In 2014, we seem to have implemented a 1 year embargo on this capstone. I am happy to extend the embargo until April 1, 2018 for you. Please contact us again if you need an additional embargo period.

The update should take effect later this afternoon.

Best wishes and good luck with publishing the article!

Paul

Subject: Capstone Project

Dear Professor Blobaum,

My name is Joong-Won Shin, assistant professor of chemistry at GSU.

My former student and I are currently working on a manuscript for publication based on her graduate capstone project, and I noticed that the capstone project is currently on GSU OPUS. Could you temporarily remove it from OPUS so that we do not get "scooped"?

The student's name is Bharathi Gannamani, and the project (# 87) was completed in December, 2014. At the time it was submitted to the library, I also provided a letter requesting to withhold it for 2 years.

Thank you.

Regards,

Joong-Won Shin
