WHAT IS WORLD NEWS ON A CLICK?

• World News on a Click is an application which enables us to get updated with the latest news, it may be local, national or international. In this app we can also watch videos.
SCOPE

The scope of the project is limited to the creation of an Application for local, national and international news.

Will Do:

• Allows the users to track the latest news.
• Allows users to chat over facebook as platform.
OBJECTIVE

• The objective of the project is to create an app which provides reliable information to the users of the app.

• The other objective of our application is to increase user-friendly environment with the users.
HARDWARE REQUIREMENTS

- Pentium 4 Processor
- 1 GB Ram
- 80 GB HDD
- Internet Connectivity
SOFTWARE REQUIREMENTS

For Android App: (min)

- Android Studio
- Android OS version 4.0 and above
- Display size: 3.2 inch and above
SYSTEM CONCEPTUALIZATION

➢ EXISTING SYSTEM

➢ PROPOSED SYSTEM

➢ MODULES
EXISTING SYSTEM

• In existing system, the is application is just limited to a particular newspaper.
• But in a typical scenario the user can’t find the required information.
PROPOSED SYSTEM

• The user here can vote to the most reliable news and whenever a new user clicks on a particular news, directly it will connect to the most voted news.
• In proposed system we will try to overcome these problems by creating an application which has three newspaper feeds in it.
Technologies Used

Java is for the Logic Design and switching between multiple activities in the application.

XML is used to create Application User Interface and Configuration files.
USE CASE DIAGRAMS
CONCLUSION

• In this paper we investigated the problem associated with various apps.
Thank you!
