Course Title: MGMT 810 Problems in Organizational Behavior

Instructor: Henry Lowenstein, Ph.D.

Session: Spring/Summer 1992 Trimester, Block II
Parkland College Campus

Telephone: (708) 534-5000, ext. 2261

Office Hours: At least forty-five minutes before class and
at other times by appointment

Prerequisites: Completion of MGMT 301, MGMT 501 or
equivalent or by permission of Instructor

Textbook: Lau, James B. and Shari, A.B., Behavior in
Organizations: An Experimental

Course Overview:

A corporation engages in a massive reorganization to improve
productivity only to find results disappointing - it blames the
economy. An organization installs a new incentive program to
improve sales, but finds sales declining - it blames Japanese
competition. A bank cuts expenses, freezes budgets, and lays-off
employees to improve profits. Service declines, as does business
- it blames the Federal Reserve Board. All of these are examples
that point out common misconceptions in organizations of the
relationship of people, their behavior and "results" within an
enterprise or agency.

One of the most important and least recognized functions of
management is the role of a manager in positively affecting the
behavior of individuals within the organization. While managers
are typically focused on financial/production data as a measure
of accomplishment, few clearly recognize the short and long term
impact of their policies, structure, culture and leadership style
on the processes that lead to results. Human behavior continues
to be a frustrating "imponderable" within the management process.

In this course, we will examine individual and group behavior
within the organization. We will focus on such topics as
motivation, perception, control, leadership, groups and group
dynamics and communication. Since many of you already work
within organizations, the class will have an inventory of diverse
experiences to share within the class discussion.
Competencies

Some of the key competencies students should achieve from the course are:

1. Ability to understand and identify organizational situations and analyze their implications from a management perspective.

2. Ability to conceptualize organizational behavior as a critical strategic factor in policy formulation within organizations.

3. Ability to understand, identify, and more effectively utilize (among others) communication, leadership, motivation and analytic skills within organizations to improve effectiveness.

Organizations by definition involve individuals put together into groups (at random) to work together and achieve results. Accordingly, this class is constructed with a strong emphasis on group work in both class discussion and class work. In this way students achieve greater experience and understanding of the organizational behavior concepts.

Requirements and Grading

- Individual Cases (2) 12%
- Team Cases (3) 18%
- Organization/Team Project 30%
- Individual Paper on Team 30%
- Class Participation 10%

Course Work

The class will be divided into teams during the first session. A discussion of the team concept may be found in the text, Appendix A and B.

- Team Cases

Case studies are assigned for many of the class sessions and are noted on the schedule. For each case assigned and marked with "*", the team will prepare a short report or case analysis. The format will be: a) a short concise statement of the key underlying issue or problem; b) a short analysis of key issues contributing to the problem; c) proposed solutions to the case. These should be typed and be no longer than 2 pages.
-Individual Cases

These follow the same format and rules as Team Cases (above) but involve individual rather than group work.

-Organizational Team Project

The team project represents a subject or topic with organizational behavior implications which the group studies in depth. Each group is to prepare a proposal of no more than three pages to be submitted by the 4th class session. (Note: the entire 3rd class session will be devoted to team meetings).

The final team project paper will be typed and should be no longer than 12 pages. It is due June 24, 1992.

-Individual Paper on Teams

The individual paper on teams is described in the text, Appendix C. In addition pp. 572-573 provides a good list of subtopics to be covered in the paper. The paper should be typed and is limited to no more than 10 pages. It is due session #13.

Date dates for all assignments are noted on the class schedule. The instructor will strive to provide time for team meetings within the class time.

Class Methods:

The class will primarily be lecture and discussion, with a heavy emphasis on discussion. Exercises and videotapes will also be used as appropriate throughout the course.

General Class Policies

1. There will be no smoking in the classroom.

2. You must follow proper registration procedures to be enrolled in the class and receive proper credit. This is your responsibility.

3. Attendance Policy:
   a. To get the maximum benefit from the course, it is important that you attend every class.
   b. From time to time, I may introduce material into the class not available in the text.
c. By the end of the term, I know who you are.

d. A substantial portion of your grade is determined by
team work and class participation.

e. There is a direct correlation between the frequency of
student absences and lower grades.

4. Never assume. When in doubt, ask the instructor.

5. Written work is accepted only before or on the due date.

Schedule

The following schedule is a guide to you on the content and
timing of the course. Unless changed by the instructor, all due
dates remain as listed. Discussion topics may vary, based on
topic interest of the class. Furthermore, videotapes or other
material may be substituted by the instructor, as appropriate,
and will be announced in advance. Thus, you should keep up to
date at all times on readings and be aware of changes in the
course schedule, which may occur over the term.
