METHOD OF INSTRUCTION

This class is conducted using a combination of lecture, discussion and problem-solving techniques. Students are expected to solve problems using computational and written skills.

Text problems are discussed in class to the extent time allows. Class instruction is meant to complement and clarify the written text and neither should be considered a substitute for the other. All students are expected to participate in class discussions and activities. It is expected that the student will attend all classes.

It is the intention of the institution to support full participation of all students, regardless of physical ability level. Therefore, if any student needs consideration of his/her physical abilities in order to complete the course, please notify the instructor as soon as possible.

STUDENT RESPONSIBILITY

Problems provide the student with the opportunity to use critical thinking to solve management and accounting problems. All accounting courses require a large amount of work. This course is no exception. Be prepared to spend many hours mastering the material. There is no substitute for solving problems in accounting.

The assigned chapters are to be read BEFORE attending class so that the student can intelligently participate in the class discussion.

Each chapter in the text starts with a list of learning objectives. These learning objectives are identified again where covered in the chapter. You should pay close attention to these learning objectives. You will be expected to master these objectives and they will be the basis for questions in exams and quizzes.

A schedule of class meetings and material to be covered on that date is provided. The scheduled dates of quizzes and exams are also listed. Homework assignments are included in the schedule. The homework assignments are a minimum amount of work needed to familiarize the student with the material. The student should complete as many other problems as needed in order to master the learning objectives. Students are required to complete the exercises listed on the assignment schedule. Do all assignments in pencil.

EVALUATION

Periodic examinations will be given in order to measure the student's progress in the course. This course will involve a paper, and three (3) examinations.

No make-up exams or quizzes will be given. No exams can be taken late or early. Be on time for all exams as additional time cannot be added to the test period. Students may use calculators for the exams and quizzes.

<u>MEETING</u>	<u>TOPIC</u>	<u>ASSIGNMENT**</u>
1. 1/10/00	INTRODUCTION THE ACCOUNTANTS ROLE IN THE ORGANIZATION COST TERMS AND PURPOSES COST SYSTEMS	CHAPS. 1 & 2
