

Governors State UNIVERSITY

**Celebrate the groundbreaking
of a new era at GSU**

When Governors State University opened its doors in 1969, it embarked on a journey to fulfill its mission by offering educational opportunities to the many deserving students in the region. We continue to fulfill our mission with the extensive renovation of laboratories and classrooms. Our students deserve to learn in state-of-the-art educational facilities, equipped with cutting edge technology.

The project will involve the renovation of 80,000 square feet of space, which includes 6 research labs, 11 teaching labs, 12 classrooms, 9 prep/store rooms, and a new lecture hall that seats 90 students. The new space will be used by students studying biology, chemistry, computer science, mathematics, nursing, occupational therapy, and physical therapy.

The new GSU science facility will enable the university to continue to provide competitive educational opportunities. Graduates are prepared with the knowledge and skills to succeed in their careers.

*The Governors State University
Board of Trustees
and
President Elaine P. Maimon
invite you to a breakfast
celebrating
the groundbreaking
for the E&F Building
Science Renovation
Project*
