Affirmative Action Statement

Governors State University is an affirmative action/equal employment opportunity university which administers its educational and employment programs in compliance with federal, state, and local laws and does not discriminate on the basis of race, color, national origin, religion, sex, age, or handicap.
The University
Governors State University was chartered in 1969, primarily in response to the
dramatic growth of the Illinois community college system. The state recognized the
need for an upper-division, commuter university designed to allow graduates of the
community college system and others in the southern Chicago metropolitan area ac­
tess to baccalaureate study in a convenient location and at a reasonable cost. Addi­
tionally, Governors State University was established to provide graduate education, at
the master’s degree level, for residents of the university’s region. An emphasis on con­
inuing education is a third thrust for the institution.

The university is situated on a 750-acre campus with three lakes and several nature
trails. The main building is a remarkable structure, nearly a quarter of a mile in length,
with large open areas which integrate the facility with the surrounding landscape. The
campus also boasts twenty-one exciting sculptures which have been described as
"perhaps the finest exhibition of monumental sculpture in the country."

In response to the needs of the region, the university provides educational oppor­
tunities in liberal arts, science, education, business, and health. Special emphasis is
given to programs in fields with growing employment opportunities at both the
undergraduate and graduate levels. The university also emphasizes liberal education to
provide a broad educational base for continued learning.

The university provides service to diverse clientele over a wide geographic area
through off-campus instruction at numerous sites in the region. Mediated instruction in
television and correspondence formats also is available. The provision of necessary
academic support services—student activities, counseling, learning assistance, advise­
ment, placement, and other special programs—is integral to the university’s commit­
ment to its unique student body.

The curricula of the university are offered through the College of Arts and Sciences, the
College of Business and Public Administration, the College of Education, and the Col­
lege of Health Professions. A special undergraduate liberal arts degree is offered
through participation in the Board of Governors Bachelor of Arts degree program.
Governors State University is accredited by the North Central Association of Colleges
and Secondary Schools.

The constitution of the university provides for a governance system to ensure involve­
ment of all constituencies in the policy-making process of the university. The constit­
tution established three senates; faculty, student, and civil service, to be assisted by a
coordinating council and charged to make policy recommendations to the president.

Governors State, Eastern Illinois, Western Illinois, Chicago State, and Northeastern Illi­
inois universities are responsible to the Board of Governors of State Colleges and
Universities. This board is responsible to the state legislature and governor through the
Illinois Board of Higher Education.
Academic Services
Admission and Recruitment

The Office of Admissions and Student Recruitment may be an individual's first contact with Governors State University. The office provides preadmission counseling, which includes current information about the university curricula, admission requirements, transcript evaluation, and the transfer of credit process as well as degree requirements. The office is responsible for the application and admission process for both undergraduate and graduate students, including receipt of applications and credentials, credential evaluation, and notification regarding decisions on admission, and for the identification and application of credits toward the liberal education policy requirements. The admission counselor for international students provides assistance to applicants in the areas of international credential evaluation and information regarding requirements of the Department of Immigration and Naturalization Services.

The office is open Monday through Thursday, 8:30 a.m. to 8 p.m.; Friday, 8:30 a.m. to 5 p.m.; and Saturday, 9 a.m. to noon.

Preadmission counseling is available during the following hours: Monday and Thursday, 1 p.m. to 8 p.m.; Tuesday and Wednesday, 9 a.m. to 5:30 p.m.; Friday, 1 p.m. to 5 p.m.; and Saturday, 9 a.m. to noon.

Persons wishing preadmission counseling are strongly advised to make an appointment. Persons without an appointment may not have the opportunity to see a counselor if those with appointments are waiting. In addition, admission counselors are normally not available for preadmission counseling (appointment or walk-in) on Monday and Thursday evenings and Saturday morning during registration periods.

NOTE: The Office of Admissions and Student Recruitment will be closed during the 1987-88 academic year on the following days:

The admissions office will also close at 5 p.m. between December 19 and 23, 1987.

Registration and Records

The Registrar's Office coordinates registration, add/drop, grade processing, and graduation activities at various times during the academic year. In addition to those major functions, the Registrar's Office maintains the official academic records of the university.

The Registrar's Office serves both currently enrolled and former Governors State University students. A variety of services are available including: providing registration information; registering students for courses; producing official transcripts; certifying enrollment; verifying degrees earned; processing changes of address, name, or residence classification; producing grade reports; certifying students for graduation; and providing information concerning commencement.

Staff members are available to assist students in understanding university policies and procedures and in interpreting academic regulations. The office is open from 8:30 a.m. until 8 p.m., Monday through Thursday, and from 8:30 a.m. until 5 p.m. on Friday.
University Library

The University Library is open with reference and information service provided 75 hours per week. Librarians are available to help students at three locations: the main reference desk, the documents/serials information desk, and the materials center information desk. The library staff offer tours of the library and provide bibliographic instruction to individuals and groups upon request.

The library maintains a comprehensive collection of print and audiovisual material. These materials are, with few exceptions, on open shelves, readily accessible to users. The collection encompasses over 240,000 volumes; 28,000 media items, including 16mm films, video cassettes, records, filmstrips, slides, and kits; over 600,000 microfiche/film; and 2,500 periodical subscriptions. The library is a depository for both U.S. and Illinois government documents.

Library resources and facilities include: the educational materials center collection containing curriculum materials, textbooks, and juvenile literature in support of the teacher education program; a pamphlet file for topical, ephemeral information; a test file, containing sample materials used for educational and psychological testing and measurement; video cassettes for the university telecourses; reserve materials assigned by faculty to support current courses; and a small collection of current fiction and non-fiction for recreational reading. The library provides student lounge areas, equipment for using audiovisual materials, and coin-operated photocopiers.

Material in the library is identified and located through LCS (Library Computer System), a database providing users with on-line access to the collection and its holdings by author, title, and classification number; traditional author/title and subject card catalogs; and various indexes and abstracts. Computer-assisted bibliographic searches are also available.

Books and journal articles not available in the GSU library can often be obtained for students through cooperative networks or interlibrary loans. The library also has cooperative agreements with other academic institutions which permit Governors State University students to use their libraries.

Testing

The Testing Office administers the university competency examination program and tests for some courses coordinated by Special Programs and Continuing Education. Other services include the administration of the U.S. and Illinois constitution examination required for Illinois teacher certification, a proficiency examination battery which uses the College Level Exam Program (CLEP) and the ACT Proficiency Exam Program (PEP), and the dissemination of information for national admissions examinations such as the Graduate Record Examination (GRE), the Graduate Management Admissions Test (GMAT), and the Law School Admission Test (LSAT).

Further information about services can be obtained from the office in room B1400. Office hours are Monday through Thursday, 8:30 a.m. to 8 p.m.; Friday, 8:30 a.m. to 5 p.m.; and Saturday, 9 a.m. to noon.
Learning Assistance

The Center for Learning Assistance is designed to provide tutorial assistance and support services to help students adjust to the learning environment of the university. Individual and/or group tutorials are offered free of charge and are intended to enhance basic academic and course related skills. In addition to these direct services, special workshops are offered each trimester to provide tutorial assistance to students taking the university competency examinations as well as in study skills and note taking techniques, writing research papers, and reducing test anxiety.

Contact the center for further information regarding these and other services. Office hours are Monday through Thursday, 9 a.m. to 7 p.m., and Friday, 9 a.m. to 5 p.m. The center is located in Room B1400.

Auxiliary Services for Handicapped Students

Services are available to handicapped students who require assistance to access the learning environment. Students may be required to submit current evidence of the impact of this handicap on his/her access to learning and/or to submit to diagnostic procedures to ascertain eligibility for auxiliary aids.

The provision of auxiliary aids is the primary responsibility of the state of Illinois Department of Rehabilitation Services (DORS). If a request for assistance is denied by DORS, Governors State University’s provision of auxiliary aids will be based on a case-by-case analysis of an individual student’s need and campus resources budgeted and available.

Students should apply to their local Department of Rehabilitation Services at least three months before attending the university to allow time for DORS funds to be allotted. Those who believe they will need some assistance to participate in coursework should also notify the Counseling Office in Student Development at least six (6) weeks before the first day of classes for the term in which they plan to enroll. Further information is available in the Counseling Office.

Continuing Education

The Office of Continuing Education coordinates and supports all courses offered at off-campus sites. These credit course offerings serve both degree and nondegree seeking students whose individual circumstances make commuting to campus difficult or impractical. Courses are currently offered at approximately 40 locations in the Chicago metropolitan area as well as in Kankakee, Joliet, and Chanute Air Force Base. Further information about the program may be obtained by calling the main campus, extension 2319.

Extended Learning

The Office of Extended Learning provides alternative access to university programs through independent study by correspondence courses and by telecourse and teleclass programming. These mediated credit courses provide instruction for the site-bound student and extend the university’s resources to underserved and/or inaccessible areas in Illinois and the greater Lake Michigan region. Further information about these courses may be obtained by calling the main campus, extension 2549 or 2213.
Assessment of Prior Learning

The Office of Assessment has responsibility for the review, evaluation, and award of credit for prior experiential learning and administers the Board of Governors Bachelor of Arts degree program. Governors State University, in part through its association with the Council for the Advancement of Experiential Learning (CAEL), has received significant recognition as a leader in this area.

Using the Credit through Evaluation of Experiential Learning (CEEL) process, students may earn credit for prior learning which may be applied toward bachelor's or master's degree requirements. (A student seminar on the development of a CEEL portfolio of credit requests is held on campus each trimester.) More information about the CEEL process can be found in the Academic Regulations section of this Catalog.

Board of Governors Degree Program

The Illinois Board of Governors of State Colleges and Universities offers through Governors State a special and unique type of bachelor of arts degree which is highly individualized and designed to meet the educational needs of many adults. More information about this program can be found in the Undergraduate Studies section of this Catalog.

Conferences and Workshops

The Office of Conferences and Workshops works closely with faculty, administrators, and staff as well as outside organizations and individuals in providing a wide variety of conferences and workshops both on and off campus. The office provides beginning planning advice plus full administrative and logistical support for credit and noncredit conferences, workshops, and seminars as well as training in a variety of areas.

Academic Computing Services

Academic Computing Services (ACS) provides access to computer terminals and microcomputers for students, faculty, and staff through the ACS demonstration classrooms and laboratory. Students enrolled at GSU may use the terminals and microcomputers to complete assignments. Terminal use requires an individual account which is assigned by the faculty member teaching the course in which the student is enrolled. Use of the microcomputers requires the student to provide a 5.25-inch floppy disk that can be formatted.

Current hardware includes Apple Ile, IBM PC, and Zenith 158 microcomputers; CRT terminals; a graphics terminal and plotter; and AutoCad stations for Computer Assisted Design. A Harris 1620 Remote Job-Entry station (RJE) using HASP provides access to a Control Data Cyber 170/730 using the Network Operating System (NOS) 2.4.3 and to an IBM 4381 using OS/MVS. Plans are underway to add interactive access to an IBM 4341, using the Virtual Machine (VM) operating system, during the 1987-1988 academic year. Current software includes APL, BASIC, BMDP, COBOL, FORTRAN, Minitab, Pascal, RNF, SAS, SPSSX, and XEDIT.

Lab hours are 8 a.m. to 10:30 p.m., Monday through Thursday; 8 a.m. to 8 p.m., Friday; 8 a.m. to 5 p.m. on Saturday (5 p.m. to 9 p.m. on Sundays during fall and winter trimesters). Student lab assistants are available during these hours to answer questions.
Instructional Communications

The most modern communications media are available in the Instructional Communications Center (ICC). Telecourses and other programming of broadcast quality are produced on location and in the two color television studios for distribution via broadcast and cable outlets in the Chicago area and throughout the United States. Production services also include computer typesetting, graphic design, color and black and white photography, and slide/tape production. Audio services include public address, studio and remote recording, and duplication.

Working closely with academic programs, the ICC provides necessary training for students in the communication arts and sciences through academic courses, individual work in the media lab, or student assistance to the professional staff in areas of the production process.

The Instructional Communications Center supports the university's teaching, research, and public service in several ways. Instructional developers design appropriate materials for faculty to be used in classrooms, for independent study, and in off-campus settings. The materials may include graphics, photographs, audiotapes, or television sequences.

Career Planning and Placement

The Office of Career Planning and Placement works closely with students, alumni, faculty, and employers, serving their mutual interests through a variety of services.

Career planning services help students identify appropriate career directions, translate their academic experiences into meaningful career options, and develop skills needed to gain professional employment upon graduation. In addition, career planning helps students make vocational decisions through individual career counseling, group workshops, occupational research, and vocational testing. Seniors, graduate students, and alumni learn resume-writing skills, interviewing techniques, and job search strategies. Emphasis is placed on self-help methods so that students develop the essential skills related to the job search and effective career management. The career resource center provides company literature, career information, job listings, and other reference materials and serves as a key element in student-oriented programs.

A job referral service has been designed to provide the employer access to qualified Governors State University candidates if on-campus recruiting is impossible or impractical. Through this system, employer needs are publicized, interested students submit credential files to the office, and placement services forwards them to the employer for review. The employer contacts candidates to arrange interviews either on campus or at the employer's office. To participate in the on-campus interview program, students submit credential files to the office and sign up for interviews. The credentials are then prescreened to ensure that applicants' qualifications match the needs of the recruiting company.

The office hours are Monday, Wednesday, and Friday, 8:30 a.m. to 5 p.m., Tuesday and Thursday, 8:30 a.m. to 8 p.m.
Student Life
When you enroll at Governors State University, you become a member of a larger community. Your life as a university student involves significantly more than "going to class." Your success as a student requires your involvement in all the activities that impact this community. Your student status is not defined by how you get to your classes, but rather by the importance of the decisions you make daily as a student. There is a bond among students because they pursue the same goal. The Office of Student Life has designed programs and services to enhance your life as a student at our institution.

**Student Resource Services**

This office has been designed to provide services that improve student life. Some of its services are:

1. Housing assistance provided to those seeking off-campus housing.
2. Photo identification cards.
3. Carpool Program.
4. Free use of electric typewriters.
5. Sign-making assistance.
6. Support production services to all student clubs and organizations.

**Child Care Center**

Students, staff, and faculty who are parents can use the campus Child Care Center which is subsidized and charges the lowest fees in the area. Licensed by the Department of Children and Family Services, the center provides programs for toilet-trained children two- to twelve-years-old. The center also participates in the state subsidized Child Care Food Program.

**Student Life Campus Center**

Whether you attend one class or several, there is a place for you on campus. Our center has been expanded and improved. You can find everything from a place to relax to a place to type your assignments. The center covers two floors. It houses:

- Office of Student Life
- Student Typing Center
- Recreational areas, including video games
- Lounge areas
- Food vending and eating areas
- Television lounges
- Student Resource Services
- Recreation and Intramural Office
- Student organizations and leadership offices
- Student Life Meeting Room
• Access to outdoor recreational areas
• Student Newspaper Office
• Campus Ministries

Intramural and Recreational Activities
The Office of Student Life coordinates the University Intramural and Recreation Program. Recreational equipment and programs are available in the following areas: (free to students)

• Camping
• Bicycling
• Cross-Country Skiing
• Table Tennis and Billiards
• Board Games
• Tennis, Badminton, Soccer, and Basketball Equipment
• Volleyball, Basketball, Table Tennis, Pool, and Softball Tournaments

Clubs and Organizations
Student clubs and organizations are an integral part of student life. Professional affiliations are active on campus. The Office of Student Life and its Student Organization Council charter all student groups. Students can form organizations with a variety of interests in mind. Current organizations and some previously chartered clubs are listed below:

• Accounting Club
• Alcoholism Sciences Association
• Alpha Kappa Alpha (Sorority)
• American College Health Care Executives
• American Marketing Association
• Art Students League
• Black Students Association
• Criminal Justice Club
• Computer Club
• English Club
• Entrepreneurs Club
• Film Video Society
• Finance and Real Estate Club
• Future Teachers Association
• Health Services Administration Club
• Human Services/Communication Science Club
• Infinity Photo Association
• International Students Association
• Kennel Club
• Malaysian Students Association
• Medical Technology Club
• Music Educators National Conference
• National Students Speech/Hearing/Language Association (NSSHLA)
• Naturalist Club
• Navigators Club
• Offbeat Club
• Professional Nurses Organization
• Psychology and Counseling Club
• Public Administration Club
• Ski Club
• Social Work Club
• Society for the Advancement of Management (SAM)
• Student Association of Alcoholism Sciences
• Union of African People
• Veterans Club
• Video Production Club
• Volleyball Club

Leadership Development
The Office of Student Life sponsors a leadership development program. This program includes individual assistance, peer group processing, workshops, seminars, and retreats. It is free and open to all students.

Music Performance Opportunities
The Division of Fine and Performing Arts offers music performance opportunities and activities for students throughout the university. There are presently six performing groups open for participation to all students, either for credit or noncredit.

The University Community Chorale is composed of both students and community members and features major works by master composers. This group meets one evening a week and performs two concerts a year.

The University Singers offers an opportunity to perform various forms of vocal literature including the music of Brahms, Waring, Schubert, and Bach. The singers meet twice a week during the day and annually present several concerts both on and off campus.

The GSU Community Symphonic Band performs two concerts annually in addition to participating in the university's commencement ceremony. This group meets one evening a week and is open to community members and students.
The University Jazz Ensembles offer students and community members the opportunity to participate in two jazz groups. A jazz combo meets during the day, and a jazz ensemble meets in the evening.

The jazz ensemble has traditionally participated in jazz festivals throughout the Midwest and has been featured with outstanding guest artists. Participation is determined by audition.

Cultural and Social Programs

The Office of Student Life and its Student Program Action Council bring outstanding special performances and events to campus each trimester. Students are admitted free. Special art and photography exhibits are offered all year long in the university Visual Arts Gallery as well as the Infinity Gallery. A variety of leadership training workshops are offered to student leaders each trimester.

Campus Student Media

The Student Communications Media Board approves all student media groups on campus that receive whole or partial funding through student fees. Students can petition for the establishment of various campus student communications media. The INNOVATOR is the biweekly student newspaper and is the main source of information about campus life.

Governance

Students are encouraged to participate in the decision-making processes affecting the university. Students share in the governance processes by serving as representatives on the Student Senate, the Board of Governors, and the Illinois Board of Higher Education.

Student Senate

Composed of 21 elected student representatives, the Student Senate is involved in all facets of student life on campus and acts as the official policy recommending body for students.

Board of Governors

Each year a qualified student is elected as the university's student member of the Board of Governors of State Colleges and Universities.

Illinois Board of Higher Education

A qualified student is also elected as a member of the Advisory Committee to the Illinois Board of Higher Education. An alternate for this position is also selected.

Women's Resource Center

The Women's Resource Center serves students and women in the community by providing information about education, employment, family, finance, health, legal questions, and other problems. The center maintains files of resource materials and books; presents speakers, workshops, and conferences; and serves as a drop-in center for the GSU community. The center is supported by funds from the Office of Student Life and
the Division of Humanities and Social Sciences in the College of Arts and Sciences. Hours vary each trimester. An answering service is always available at 534-5000, extension 2435.

Counseling Center

The University Counseling Center offers services to students who wish to talk with qualified persons about educational matters, personal concerns, and career-related issues in a confidential manner. The basic commitment of the center is to help students identify and meet individual needs; to assist in making adjustments in learning and living situations; and to enhance aspirational levels so that students may come to realize and accept their individual worth and potential. Among the various services offered are individual and/or group counseling as well as academic support and career workshops that provide information and insight to help change behavior, make decisions, and develop appropriate future plans.

The office hours are Monday through Thursday, 8:30 a.m. to 8 p.m., and Friday, 8:30 a.m. to 5 p.m.

Campus Ministries

The Campus Ministries offer students of any religious persuasion an opportunity to discuss and express their spiritual values. The primary commitment of the office is to foster and facilitate spiritual growth and development. Among the various activities is a weekly discussion forum, “Theology for Lunch,” and spiritual counseling and guidance.
Admissions Information
General Admission and Application Information

Applications for admission are accepted in the Office of Admissions up to one year in advance of the expected trimester of enrollment. Persons may apply and be admitted for the fall trimester (September through December); the winter trimester (January through April); the spring/summer trimester (May through August); or the summer session (July and August). Application and credential deadlines are approximately three weeks before registration for each trimester and the summer session. Specific deadline dates are published in the academic calendar and in the Schedule of Classes for each trimester.

Classification for Admission

Persons are admitted to Governors State University in one of the following three classifications:

- Degree-seeking student (undergraduate or graduate)
- Student-at-large (undergraduate or graduate)
- Special nondegree student (undergraduate only)

Degree-Seeking Students

Persons who plan to pursue a degree program at Governors State University should apply as degree-seeking students. These students are admitted to a specific major and are assigned an academic advisor at the time of admission. They are also eligible to participate in advance registration and are given registration priority.

Students-at-Large

Persons who plan to enroll in courses at Governors State, but who do not intend to earn a degree, may be admitted as students-at-large at the undergraduate or graduate level. Students-at-large are not assigned academic advisors. They receive registration assistance from counselors in the Office of Admissions. Coursework completed in this status does not automatically apply to a degree program. Students-at-large are not eligible to earn any GSU degree. If at some later date a student-at-large wishes to enter a degree program, formal application and admission to that program is required. The application of such courses to degree requirements is governed by policies established by the university, the deans and faculty of each college, and in effect at the time of admission to a degree program. Students may not apply more than fifteen (15) hours of credit earned as a student-at-large toward degree requirements.

NOTE: Students-at-large are not eligible for university administered financial aid. A person on an F-1 visa is not eligible to enroll as a student-at-large unless the sponsoring university verifies enrollment in a degree program.

Special Nondegree Students

Persons who have not earned 60 semester hours of college credit, but who have had equivalent specialized experiences, and intend to enroll in a course, workshop, seminar, or other university activity for credit, are eligible to become special nondegree students.
Undergraduate Admissions Information

All baccalaureate programs offered by the university are planned for students who have successfully completed two years of college, including a well-developed program of general education. Admission policies of the university are formulated to assure an admitted student's reasonable opportunity for success in the chosen field of study.

Degree-Seeking Students

Criteria for Admission to an Undergraduate Major

Persons will be admitted as undergraduates on a first-come, first-served basis to a specific major. Persons are eligible for undergraduate admission if they:

1. Have earned (or will have earned by the term they wish to enroll) an Associate of Arts (A.A.) or an Associate of Science (A.S.) degree from a regionally-accredited institution of higher education; or

2. Have earned (or will have earned by the term they wish to enroll) at least 60 semester hours (or 90 quarter hours) of credit from a regionally-accredited institution of higher education with at least a "C" average (2.0 on a scale of 4.0) in any 60 semester hours (or 90 quarter hours) of the total collegiate hours;

3. Were in good standing at the last institution attended; and

4. Have satisfied any collegial and/or major admission criteria if applicable for undergraduate study in the specific major to which they apply.

NOTE: Applicants should refer to the information related to their areas of interest in this publication for special collegial and/or major admission criteria and additional credentials which may be required.

Credentials/Procedures Required for Admission to an Undergraduate Major

1. Complete an undergraduate application available through the Office of Admissions. Submit the application to the Office of Admissions before the application and credential deadline for the term in which enrollment is desired.

2. Request that all previous institutions attended forward complete and official transcripts to the Office of Admissions. These materials must be received before the application/credential deadline for the term desired.

3. Submit additional documentation, if required by the specific major to which application is being made, to the Office of Admissions.

Notification Regarding Admission Status

Undergraduate degree-seeking students will receive a Certificate of Admission from the Office of Admissions upon being admitted to the university and will be assigned an academic advisor. Degree-seeking applicants are not eligible to register until they have received a Certificate of Admission. Students may be admitted conditionally. All conditions of admission are stated on the Certificate of Admission. Failure to meet stated conditions by the date specified may result in the student not being allowed to register for future terms and not being allowed to receive academic records from Governors State University.
Students-at-Large

Criteria for Admission as an Undergraduate Student-at-Large

Persons will be admitted as undergraduate students-at-large only if they:

1. Have earned an Associate of Arts or an Associate of Science degree from a regionally-accredited institution, or
2. Have earned at least 60 semester hours (or 90 quarter hours) of credit with at least a "C" average (2.0 on a scale of 4.0) from a regionally-accredited institution.

Credentials/Procedures for Admission as an Undergraduate Student-at-Large

1. Students-at-large are NOT required to submit an application for admission before the registration period.
2. During registration on dates specified in the Schedule of Classes, or at any time during the add/drop and late registration period, persons planning to enroll as students-at-large should go directly to the student-at-large check-in area. At this time they will complete both the application and registration forms.

Special Nondegree Students

Persons who have not earned 60 semester hours of college credit, but who have had equivalent specialized experiences and intend to enroll in a course, workshop, seminar, or other university activity for credit, are eligible to apply for admission as special nondegree students. Students may earn a maximum of fifteen (15) hours of credit in this status.

Credit earned as a special nondegree student will be at the upper-division level and cannot be used toward meeting minimum criteria for admission as an undergraduate degree-seeking student or student-at-large.

Applications for admission as a special nondegree student are available from the Office of Admissions.

Graduate Admission Information

Degree-Seeking Students

Criteria for Admission to a Graduate Major

Persons will be admitted as graduate students on a first-come, first-served basis to a specific major if they:

1. Have earned (or will have earned by the term they wish to enroll) a bachelor's degree from a regionally-accredited college or university;
2. Were in good standing at the last institution attended;
3. Have satisfied collegial and/or major criteria if applicable for graduate study in the specific major to which they apply. Such criteria may require additional documentation, letters of recommendation, a minimum grade point average at the undergraduate level, and/or a minimal score on a graduate examination, a
performance audition, portfolio evaluation showing graduate level competency, or other evaluative data. Applicants should refer to the information related to their areas of interest in this publication for specific collegial and/or major criteria and additional credentials which may be required.

**Credentials/Procedures Required for Admission to a Graduate Major**

1. Complete a graduate application available through the Office of Admissions. Submit the application to the Office of Admissions before the application and credential deadline for the term in which enrollment is desired.
2. Request that all previous institutions attended forward complete, official transcripts to the Office of Admissions. (These materials must be received before the application/credential deadline for the term in which enrollment is desired.)
3. Submit additional documentation, if required by the specific major to which application is being made, to the Office of Admissions.

**Notification Regarding Admission Status**

Graduate degree-seeking students will receive a Certificate of Admission from the Office of Admissions upon being admitted to the university and will be assigned an academic advisor. Degree-seeking applicants are not eligible to register until they have received a Certificate of Admission. Students may be admitted conditionally. All conditions of admission are stated on the Certificate of Admission. Failure to meet stated conditions by the date specified will result in the student not being allowed to register for future terms and not being allowed to receive academic records from Governors State University.

NOTE: Admission to a degree program does not carry with it, nor guarantee, admission to degree candidacy.

**Students-at-Large**

**Criteria for Admission as a Graduate Student-at-Large**

Persons will be admitted as graduate students-at-large if they have a bachelor's or graduate degree from a regionally-accredited institution.

**Credentials/Procedures for Admission as a Graduate Student-at-Large**

1. Graduate students-at-large are not required to submit an application for admission before the registration period.
2. During registration, on dates specified in the Schedule of Classes or at any time during the add/drop and late registration period, persons wishing to enroll as students-at-large should go directly to the student-at-large check-in area. At this time they will complete both application and registration forms.

**Supplemental Admission Information**

**Special Admissions**

1. Applicants not meeting one or more of the published minimum university criteria for admission and who fall into one or more of the categories cited below must petition for admission to a major under the Policy on Readmissions and Special Admissions:
Admissions Information

a. Applicants who are not in good standing at the last institution attended. (Applicants who have been suspended [dismissed] may petition for admission for a trimester no earlier than one year from the date of suspension [dismissal].)
b. Undergraduate applicants with less than a 2.0 grade point average on a 4.0 scale for at least 60 semester hours of earned college credit, regardless of academic standing at the last institution attended.
c. Undergraduate applicants who have earned at least 54, but less than 60 semester hours of college credit.
d. Applicants seeking admission based on credit/degree(s) earned from a nonregionally-accredited institution(s).

2. Applicants who meet minimum university criteria for admission, but who do not meet more selective criteria established by the desired major, should petition the appropriate division chairperson through the Office of Admissions, which will make a recommendation to the dean of the appropriate college.
3. Applicants not in good conduct standing at the last institution attended must petition for admission to the dean of student affairs and services.

Additional information regarding special admission opportunities and petitions for admission are available from the Office of Admissions.

Readmissions

Reapplication and readmission to the university is required in the following instances:

1. If a student has completed a degree at Governors State University and wishes to reenter as a degree-seeking student in another major or wishes to take classes as a student-at-large.
2. If a student has been admitted as a student-at-large or special nondegree student and is seeking admission to a major.
3. If a degree-seeking student has lost continuing status as defined by university policy and is seeking admission either to a major or as a student-at-large.
4. Degree-seeking students who have lost continuing status while on academic probation at Governors State and are seeking admission to a major and any student who has been academically suspended from GSU, must petition for readmission under the Policy on Readmissions and Special Admissions and Procedures established by the university and the Office of Admissions.

Students readmitted to the university who are on academic probation at Governors State University return under the same status unless they invoke their right of academic amnesty.

Students readmitted to the university who have been academically suspended will be placed on academic probation extended status for their first trimester after readmission unless they have invoked their right of academic amnesty.

A student twice suspended from the university for academic reasons will not be considered for readmission to the university at any later date.

Applications and additional documentation, if required for readmission to a specific major, must be submitted in advance of the application/credential deadline for the trimester in which enrollment is desired.

Additional information regarding procedures for readmission and petitions for admission is available from the Office of Admissions.
English Language Proficiency

This policy is intended to ensure that students whose primary (native) language is not English have attained sufficient mastery of the English language to maximize the probability of the successful completion of their degree program.

All applicants for degree programs whose primary (native) language is not English or who submit credentials from any country other than the United States to meet admission requirements, must provide evidence of having attained a minimum acceptable score of 500 for undergraduates and 550 for graduates on the Test of English as a Foreign Language (TOEFL). This TOEFL requirement does NOT take the place of the university testing requirement or the language proficiency requirements for specific majors as stated in this Catalog.

The TOEFL requirement may be waived by the director of admission and student recruitment (or designee) under certain conditions as follows:

1. If the applicant has a degree from a regionally-accredited college or university in the United States with a program of study which included both a basic English composition course and an oral communication course.
2. If the applicant presents credentials documenting minimum criteria for admission from a country whose official language is solely English as cited in the 1986 edition of The World Almanac, Newspaper Enterprise Association (International Standard Book Number 0-385-2329-6).

TOEFL Information

For applicants not living in the United States, information on testing dates and locations and the TOEFL Bulletin of Information and registration form may be obtained at the American embassies and consular offices of the United States information services, at United States education commissions and foundations abroad, and at binational centers. Applicants may also contact the Educational Testing Service, Box 89, Princeton, New Jersey 08540, U.S.A., if they are unable to secure the TOEFL Bulletin of Information and registration form in their native country.

International students living in the U.S.A. can obtain this information by contacting ETS in Princeton or by writing the admission counselor for international students in the Office of Admissions.

Verification of U.S. Residency for Non-U.S. Citizens

All applicants who identify themselves as holding resident, refugee, parolee, or conditional entrant status in the United States are required to complete and submit to the Office of Admissions and Student Recruitment the Certification of Immigration Status Form (ASR:FL 323) and supporting documentation: alien registration card, passport stamp, Arrival-Departure Record (Form I-94) stamped parolee or refugee with an alien registration number, Memorandum of Creation of Record of Lawful Permanent Residence (Form I-181), or Authorization for Parolee or Conditional Entry of an Alien to the United States (Form I-512). These materials are required so that a student may be considered for Illinois resident status for the purpose of tuition assessment at Governors State University.

The Certification of Immigration Status Form may be obtained from the Office of Admissions and Student Recruitment and must be submitted before the application and
credential deadline for the term in which enrollment is desired. Admission will not be granted until this requirement has been fulfilled.

Admission to a Degree Program—Non-U.S. Credentials

Admission Criteria

1. Before admission to a major at either the undergraduate or the graduate level, applicants who have earned college level credits and/or graduated from academic institutions outside the United States and who are seeking to demonstrate admissibility based on evaluation of these credentials, must have their credentials evaluated to determine if they have the equivalent academic preparation to that stated previously in this publication.
2. All applicants for admission as defined above must comply with the University Policy on English Language Proficiency.

Credentials/Procedures

A completed application for admission should be sent to the Office of Admissions in addition to the following documents and academic credentials:

1. Summary of your Educational Experience by Years Form, obtained from the Office of Admissions;
2. Official TOEFL score report (see English Language Proficiency Policy);
3. Credentials for evaluation:
   a. national examination results;
   b. diplomas and/or certificates;
   c. complete records of all college, university, or other post-secondary work, including diplomas and/or certificates;
   d. college or university transcripts, if applicable.

Official (original) documents must be furnished and accompanied by certified English translations. These records must be certified by an official of the educational institution issuing them or by an appropriate United States or national government official.

All credentials cited above must be in the Office of Admissions two months before the application/credential deadline for the term for which the student is applying.

NOTE: Applicants on F-1 or J-1 visas should also see the section Admission Information for International Students which follows.

Admission Information for International Students

An international student is defined as anyone who is studying in the United States under an F-1 or J-1 visa as specified by the Department of Immigration and Naturalization.

Admission Requirements

Academic Preparation

To be considered for undergraduate admission, an international student applicant must have completed the equivalent of two years of university-level work at a regionally-accredited institution of higher education in the United States. International student applicants to graduate majors must have completed a level of education equivalent to the
baccalaureate degree from a regionally-accredited institution of higher education in the United States.

The admission counselor for international students will evaluate the applicant’s credentials and determine if the applicant has met eligibility requirements for admission.

Language Proficiency

All international student applicants for admission must comply with the University Policy on English Language Proficiency.

Financial Statement

All international student applicants for admission must certify that adequate funds are available to meet all financial needs for the length of time necessary to complete a full-time course of study leading to a degree.

The applicant must review the Financial Statement and complete the Certification of Finances Form on the reverse side. The completed form, with required supporting documentation, must be submitted to the Office of Admissions. No admission decision will be made until this certification process has been completed.

NOTE: The Financial Statement-Certification of Finances Form is available from the Office of Admissions.

Procedures for Application and Admission

1. The completed application for admission should be submitted to the Office of Admissions, Governors State University, University Park, IL 60466, with the following documents:
   a. a completed Certification of Finances form with supporting documentation;
   b. an official TOEFL score report;
   c. academic credentials for evaluation

   (1) All students seeking admission based solely or partially on academic work completed outside the United States must have on file in the Office of Admissions all credentials needed for admission at least two months before the application and credential deadline for the term of enrollment desired.

   (2) All students seeking admission based at a United States college(s) must have on file in the Office of Admissions complete, official transcripts and other required credentials needed for admission before the published application credential deadline for the trimester for which the student has applied.

2. Unless the sponsoring university verifies enrollment in a degree program, applicants on F-1 visas are not eligible to enroll as students-at-large.

3. In general, applicants on F-1 or J-1 visas are not eligible to be classified as residents of the state of Illinois for tuition purposes, regardless of actual length of residence in the state of Illinois. However, a nonresident student with an F-1 visa may be reclassified as resident student under the Board of Governors Regulations, if that student files a declaration of residency with the university and demonstrates marriage to an individual who qualifies for resident status under the Board of Governors Regulations. (For a complete statement on the residency requirement, see Appendix.)
Federal Authorization

This institution is authorized under Federal Law—Act 101 (A) (15) (F); 18CFR2143—to enroll nonimmigrant alien students.

Although applicants on J-1 visas may enroll, the university does not participate in the Exchange Visitor Program and is not authorized to issue Form DSP-66, which is required to extend the J-1 visa status.

NOTE: Governors State University does not have an international student office and most special services traditionally offered by such offices are not available. The admission counselor for international students in the Office of Admissions is available to assist students in obtaining visas and legal documents and to evaluate credentials.

Since the university is a commuter institution, there are no dormitories or student housing facilities on campus. Students are responsible for arranging their own housing and transportation to and from the campus. Many students live in the immediate area or in Chicago and commute either by car or train to Governors State.
University Degree Requirements
Bachelor's or master's degrees are awarded to students who have completed degree programs that include a major and, in some cases at the undergraduate level, a concentration or a minor.

The following general requirements for bachelor's and master's degrees are minimum standards established by the university. Colleges and/or individual majors determine additional, more specific requirements that will be incorporated into an approved student study plan.

Student Study Plan
Every degree-seeking student is required to develop a student study plan in consultation with an assigned academic advisor during the first trimester of enrollment. The student study plan will detail the requirements for the degree sought which are in effect at the time of admission as a degree-seeking student. It will specify the amount of transfer credit, proficiency credit, and credit for experiential learning applied toward the degree requirements; the total credit hour requirement for the degree; required and elective courses; and the maximum number of credit hours and/or courses which can be taken off campus and applied toward the degree.

Whenever a student applies for acceptance of additional transfer credit from another regionally-accredited institution or seeks modification to the study plan, it must be reviewed and updated. When a student changes majors or is readmitted, a new study plan must be developed and approved. The student will be subject to the admission and degree requirements in effect for the major at the time of transfer or readmission. Students choosing to take courses not specified in the study plan may find that such credit may not apply toward the degree requirements.

Residency Requirements
All degree-seeking students are required to earn a minimum of 24 credit hours of coursework from Governors State University prior to the award of each degree sought. In completing the requirements for a degree, students must earn at least 50% of the credit hours required for their degree (as specified on their individual study plans) through on-campus work.

For the purpose of this policy, on-campus work is defined as all Governors State coursework taken at the GSU main campus at sites within the Prairie State Community College district or degree-granting sites approved by the governing boards.

Grading and Academic Standing
The grading policy and the academic standing policy established by the university set minimum requirements for satisfactory progress toward degree requirements. They are detailed in the Academic Regulations section and the Appendix of this Catalog.

Teacher Certification
Programs of Study
Governors State University has been approved by the Illinois State Board of Education (ISBE) to offer programs of study leading to the corresponding certificate (or endorsement) as follows:
### ISBE Approved Program

#### Undergraduate
- Bilingual/Bicultural Education
- Biology
- Chemistry
- Elementary Education
- English Education
- Music Education

#### Graduate
- Chief School Business Official
- Communications Disorders
- Educational Administration
- Multicategorical Special Education
- School Counseling
- Psychology

### Certificate/Endorsement
- Transitional Bilingual Certificate
- Standard High School Certificate
- Standard Elementary Certificate
- Standard High School Certificate
- Standard Special Certificate Endorsed in Music
- Administrative Certificate Endorsed for Chief School Business Official
- Standard Special Certificate Endorsed in Speech and Language Impaired
- Administrative Certificate Endorsed for General Administration
- School Service Personnel Certificate Endorsed in School Counseling
- School Service Personnel Certificate

### Certification through Approved Programs
To be recommended by Governors State University for any of the above certificates (or endorsements), an applicant must:

- have earned the required degree from an institution recognized by ISBE for teacher education;
- have acquired requisite experience for the Administrative Certificate;
- have completed a Governors State University state approved program leading to the desired certificate (or endorsement);
- have passed the university examinations in writing and basic mathematics for an Elementary or High School Certificate or a Standard Special Certificate endorsed in Music;
- be at least 19 years of age;
- be in good health;
- possess good character;
- be a U.S. citizen or have filed a declaration of intent to become a citizen, except in the case of a transitional bilingual certificate

Applicants for certificates or endorsements based on completion of approved programs must seek and receive the recommendation of the university within one calendar year
of completing an approved program and must meet any applicable requirements established by Illinois statute or rules and regulations during this one year period.

NOTE: Individuals applying for any of these certificates or endorsements after June 30, 1988, must successfully pass examinations required by the Illinois State Board of Education to receive the certificate or endorsement.

**Certification through Transcript Evaluation**

Nondegree students pursuing a certificate (or endorsement) by transcript evaluation must possess a valid statement of deficiencies from ISBE (except for the supervisory endorsement on the Standard Special and School Service Personnel Certificates). When this statement indicates a deficiency in student teaching, admission to student teaching will be reviewed individually by the coordinator of field experiences in the College of Education; students may be required to satisfactorily complete additional coursework before enrolling in student teaching.

**High School and Standard Special Certificates: Requirements**

NOTE: *Standard Special Certificate in Speech and Language Impaired: See Catalog pages describing the M.H.S. in communication disorders.

**General Education Requirements**

In addition to any applicable university or major requirements, students seeking the Standard High School or Standard Special Certificate (or any endorsement on this certificate) through completing an approved program must present evidence of coursework meeting the following requirements in the area of general education. These requirements apply to all students admitted or readmitted to approved programs beginning fall 1987.

Coursework for meeting these requirements must be college level work and may not include remedial courses even if college credit is granted. Generally, this coursework must be at the 100 level or higher and applicable toward a degree at the institution providing the instruction. Courses with grades below “C” will not be applied toward general education requirements for teacher certification.

**General Education Area and Required Semester Hours**

### Professional Education Requirements

To be eligible for a Standard High School Certificate or a Standard Special Certificate endorsed in Learning Disabilities, Educable Mentally Handicapped, and Social/Emotional Disorders, students must complete professional education requirements in addition to requirements for the major and general education.

In addition to degree requirements, students enrolled in the **M.A. in Multicategorical special education** must complete the following professional education requirements or present equivalent work from another institution:

#### M.A. in Multicategorical Special Education

<table>

* Before enrolling in EDUC499 Student Teaching, an application for admission to student teaching must be submitted to the coordinator of field experiences in the College of Education; the application must be submitted by March 1 for the fall trimester or by June 1 for the winter trimester (student teaching is not offered in the spring/summer trimester). This application for student teaching will certify that the student applying has or will have met the following requirements:

1. completed at least 42 hours of general education requirements with a GPA of 2.75 or better in courses taken at Governors State University;
2. completed professional education course requirements, except EDUC499, including 100 hours of field experience with a GPA of 3.0 or better (no grade below a "C");
3. have no more than six hours remaining to be completed in the major in which he/she is enrolled; and
4. met all state qualifications applicable to areas of student teaching assignments as outlined in the "Illinois Program for Evaluation, Supervision, and Recognition of Schools, Part I, Subpart G: Staff Qualifications."

### Transitional Bilingual Certificate: Requirements

The bilingual education program leading to the Transitional Bilingual Certificate (Spanish) requires the following: (1) possession of a valid Illinois Early Childhood, Elementary or High School Certificate; (2) successful completion of the following courses with no grade below a "C": BBED51A, 520, 525, 530, 538, and ENGL508; and (3) meeting Illinois State Board of Education language proficiency requirements in English and Spanish.
Undergraduate Requirements

Transfer Credit for Undergraduate Students

In general this statement applies to credits being transferred from regionally accredited institutions to majors, except the Board of Governors bachelor of arts. The BOG/BA policies are described in the section on Undergraduate Studies in the Catalog.

The decision to accept credit earned prior to admission toward degree requirements is made by the academic advisor during the first trimester of enrollment when the student study plan is developed. The student study plan will detail the requirements for the degree including the number of transfer credits accepted toward those requirements. (No more than 15 credit hours earned as an undergraduate student-at-large may be included in a program-approved undergraduate student study plan.)

Generally, no more than 60 semester hours of lower-division credit, used as the basis of admission to GSU, will be applied toward degree requirements. Ordinarily only credits earned with a grade of "C" or better or "P" (pass) will be considered for transfer credit at the lower division level. Credits with grades of "D" may be considered for transfer if the cumulative grade point average for transfer credit is at least 2.00 (on a 4.00 scale) or if the credit was accepted for the associate's degree.

Credits earned at the upper-division level and evaluation of lower-division level prerequisite/corequisite requirements are applied toward specific degree requirements on a course-by-course basis by the academic advisor. Only work completed with a grade of "C" or better or "P" (pass) will be considered for transfer credit or satisfactory completion of a course prerequisite or corequisite.

Upon approval by the provost, individual degree programs may establish published requirements on transfer credit limiting the time period within which specific course credit must have been earned to be applied toward degree requirements.

After admission to a degree program, additional transfer credit will not be accepted from another institution unless permission to apply such credit toward degree requirements was obtained from the dean before taking course(s) at the other institution(s). Only courses with grades of "C" or better will be accepted in transfer after matriculation to a degree program.

Applicants seeking admission based on credit/degree(s) earned at nonregionally-accredited institutions must petition for admission to the University Committee on Readmissions and Special Admissions. Applicants seeking to transfer credit from non-regionally-accredited institutions toward degree requirements must petition the dean of the college in which the major is offered.

Graduation Requirements for a Bachelor's Degree

To graduate with a bachelor's degree, an undergraduate student must meet the following minimum university degree requirements:

1. Complete a minimum of 120 credit hours, including lower-division credit hours for admission and any upper-division level transfer credit accepted for a bachelor's degree.

2. Complete a minimum of 60 upper-division credit hours, including any upper-division transfer credit accepted toward degree requirements. (No more than
15 credit hours earned as an undergraduate student-at-large may be applied toward degree requirements.)

3. Satisfy the liberal education requirements.
4. Satisfy the residency requirements.
5. Demonstrate that all degree requirements have been met as defined in the student's study plan approved in the college.
6. Be in academic good standing.
7. Remove all grades of incomplete (I or E) by the graduation processing date.
8. Satisfy the requirements of the university writing and basic mathematics testing policy.
9. Meet all financial obligations to the university.
10. Complete the collegial and university procedures which cover implementation of the above requirements.

NOTE: Graduation requirements for students in the Board of Governors baccalaureate program are stipulated in the BOG/BA Administrative Guidelines and are included in the Undergraduate Studies section of this Catalog.

Undergraduate Minors

Various academic divisions within the university offer minors which may be elected by students wishing to pursue coursework in a discipline that supplements and/or complements the major/concentration. A minor is defined as a limited course of study in a designated subject area at the undergraduate level. Students may not take a major and minor in the same discipline. However, a student may complete more than one minor. A minor may be awarded only at the time of completion of the bachelor's degree.

To earn a minor, a student must:
1. Meet all university and collegial requirements for the baccalaureate degree.
2. Complete a minimum of 18 credit hours (and a maximum of 24 hours) of graded coursework in a designated subject area where a minor has been approved by the university's governing boards.
3. Complete the specific course requirements for the minor as described in the Catalog and detailed in a study plan approved by a minor advisor.
4. Satisfy all applicable collegial requirements, including minimum grade requirements for courses to be applied to the minor.
5. Complete and apply for the minor at the time of degree completion by submitting an approved student study plan for each minor with the application for graduation during the trimester of expected graduation, in accordance with application procedures and deadlines described in the Catalog and in the trimester Schedule of Classes.

Liberal Education

All undergraduate, degree-seeking students are required to complete the following general education requirements before graduation:
Requirements

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication (Written or Oral)</td>
<td>6</td>
</tr>
<tr>
<td>Humanities and Arts</td>

<td><strong>39</strong></td>
</tr>
</tbody>
</table>

All students who transfer to Governors State University from a regionally-accredited Illinois community college, having earned an A.A. or A.S. degree, will have fulfilled the requirements of this policy. All students pursuing the Board of Governors Bachelor of Arts Degree Program are exempt from this policy.

Information on specific courses applicable to GSU liberal education requirements may be obtained from the Admissions Office or from collegial academic advisors.

Writing and Basic Mathematics Testing

Undergraduate, degree-seeking students must take, during their first trimester of enrollment, university approved examinations to assess their proficiency in writing and mathematics. Students will not be allowed to register for another trimester unless both examinations have been taken.

Students will not be permitted to register for more than a cumulative total of 20 credit hours until they have either passed the examination or satisfactorily completed one or the designated equivalent Governors State University courses for each area. No student will be permitted to take an examination more than twice. After two unsuccessful attempts, students must complete the equivalent course(s) to register beyond 20 cumulative credit hours. In monitoring this 20-hour limit, all credit hours attempted trimester 1984 or thereafter will be counted regardless of admission classification at the time of enrollment. In calculating hours attempted for this policy, courses in which a student receives a status code of "W", "X", or "V" will not be included.

To graduate an undergraduate student must have either passed the examinations or satisfactorily completed the designated equivalent Governors State courses.

Examinations will be offered periodically throughout the academic year.

Requirements for a Subsequent Bachelor’s Degree

A student having earned a baccalaureate degree may earn a subsequent bachelor’s degree at Governors State University by:

1. Applying and being admitted to the undergraduate degree program.
2. Meeting requirements of the University Residency Policy for the subsequent degree. Hours applied toward the first degree may not be included in hours required to meet residency requirements.
3. Completing all requirements of the subsequent degree program as stipulated in the student study plan.
4. Meeting university, college, and/or major degree requirements for the subsequent degree.
Graduate Requirements

Transfer Credit for Graduate Students

This policy is intended to apply only to credits being transferred from regionally-accredited institutions to Governors State University graduate majors.

The decision to apply transfer credit, which has been earned at regionally-accredited institutions before admission, toward degree requirements for graduate majors is made by the academic advisor during the first trimester of enrollment when the student study plan is developed. The student study plan will detail the requirements for the degree including the number of transfer credits accepted toward the requirements.

Transfer of graduate credit hours shall not exceed twenty-five percent of the total number of credit hours required in any major. Only work from regionally-accredited institutions completed with a grade of “B” or better or “P” or equivalent will be considered for transfer credit.

Transfer credits earned ten or more years before the student’s acceptance into a degree program will NOT be accepted toward the degree requirements unless approved by the appropriate academic dean.

No more than 15 credit hours taken as a graduate student-at-large shall be transferable towards the requirements of any degree. The application of such courses to degree requirements is governed by policies established by the university, the deans, and faculty of each college and in effect at the time of admission to a degree program.

Undergraduate students in the last trimester of their studies may elect to enroll for graduate credit but are limited to a maximum of nine credit hours beyond the bachelor’s requirements which may be applied toward graduate degree requirements. However, undergraduates may enroll in “graduate only” (800-level) courses only with written permission of the course instructor and the dean of the college in which the course is offered.

After admission to a degree program, additional transfer credit will not be accepted from another institution unless permission to apply such credits toward degree requirements was obtained from the dean before taking courses at another institution. Only credits with grades of “B” or better will be accepted in transfer after matriculation to a graduate degree program.

Colleges may establish more stringent requirements subject to review by the Graduate Studies Council and approval by the provost before implementation.

Graduation Requirements for a Master’s Degree

To graduate with a master’s degree, a student must meet the following minimum university degree requirements:

1. Complete at least 32 credit hours in graduate-level courses of which at least two credit hours are designated as a master’s final project. (No more than 15 credit hours earned as a graduate student-at-large may be included in a program-approved, graduate student study plan.)
2. Complete a minimum of 12 graded credit hours in graduate-only courses (numbered 800-999).
3. Complete no more than 17 credit hours from the same faculty member, including credit hours related to the master's final project.

4. Apply to degree requirements no more than eight graduate credit hours awarded for experiential learning through the established procedures.

5. Be admitted to master's degree candidacy at least one trimester before the trimester in which the degree is to be awarded. Degree-seeking students will be granted degree candidate status upon:
   a. completion of an approved graduate study plan;
   b. completion of specific major candidacy requirements;
   c. verification of academic good standing at the time of award of candidacy status and maintenance of this status thereafter;
   d. submission of an application for admission to candidacy and approval of the application; and
   e. filing, with the Registrar's Office, of the date of program approval for inclusion in the candidate's academic record.

6. Complete a master's final project which can include a thesis, project, practicum/internship, or in some other way demonstrate an integration of graduate work that is accepted by a committee of three approved faculty. Each major shall provide students with a copy of detailed procedures and specify appropriate manuals of style for the final project alternatives required in the major.

7. Complete all coursework for the degree, except the final project, within four years of admission to candidacy. The final project must be completed within five years of admission to candidacy.

8. Demonstrate that all degree requirements have been met as defined in the approved study plan. Credit for any course with a grade of "D" will not apply toward degree requirements.

9. Satisfy the residency requirements.

10. Be in academic good standing.

11. Remove all grades of incomplete (I or E) by the graduation processing date.

12. Meet all financial obligations to the university.

13. Complete the college and university procedures which cover implementation of the above requirements.

Requirements for a Subsequent Master's Degree
A student having earned a master's degree may earn a subsequent master's degree at Governors State University. The student must:

1. Apply and be admitted to the graduate degree program.

2. Meet requirements of the University Residency Policy for the subsequent degree. Credit earned and applied toward any degree previously earned may not be applied toward a subsequent degree and may not be included in hours
required to meet residency requirements for a subsequent degree.

3. Complete all requirements of the subsequent degree program as stipulated in the student study plan.

4. Meet university, college, and/or major degree requirements for the subsequent degree.

Application for Graduation

The application process for graduation should begin within the first month of the term of expected graduation. Students should complete an Application for Graduation and a Student Progress Report Form which are available in the Registrar's Office. Upon completion of these forms, students must meet with their assigned academic advisor to review the student study plan and verify expected completion of degree requirements. Students should have no more than 16 credit hours outstanding toward degree requirements, either as incomplete work or as current enrollment at the time of application.

Upon approval of the advisor, the division chairperson, and the dean, the application is forwarded to the Registrar's Office by the beginning of the third month of the trimester of expected graduation. Should, for any reason, a student not complete necessary requirements for graduation during the expected term, a subsequent application and approval process is required.

Commencement

Commencement takes place once a year in early June. Participation is optional. Students who have graduated in August or December of the previous year or are candidates for graduation in April of the current year will have the opportunity to participate in commencement.

Diplomas

Diplomas are awarded only upon verification of completion of all degree requirements and satisfaction of all financial obligations to the university.

A replacement diploma will be issued to the original holder, upon notarized affidavit certifying to the loss or damage of the original diploma and upon payment of a $15 fee. Replacement diplomas will be inscribed with the degree program, major, date, and student name on record at the time the degree was conferred. Duplicate diplomas are ordered only three times a year and require eight weeks for printing.
Academic Regulations
The major academic regulations and requirements related to grading, satisfactory progress, and registration are contained in this section. Students should refer to the Student Handbook for policies and procedures related to student conduct and grievances.

Student Responsibility

Each student is responsible for knowledge of and adherence to all university requirements and regulations. Each student is also responsible for knowing the degree requirements for the major in which he/she is enrolled and enrolling in courses which meet those degree requirements. Students are strongly encouraged to seek information and assistance from appropriate staff should they have any questions regarding requirements or regulations.

Grading

Upon completion of a course, a grade will be assigned by the instructor. Grades provide academic evaluation and are the basis for determining academic standing.

Grade Point Average

The following grades, with assigned grade points, will be used to compute a student's grade point average:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Point Value (Per Credit Hour)</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
</tbody>
</table>

The grade point average is computed by dividing the total number of grade points by the total number of credit hours attempted on both a term and a cumulative basis, as illustrated below:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Credit Hours</th>
<th>Grade Point Value</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>3</td>
<td>4</td>
<td>12</td>
</tr>
<tr>
<td>B</td>
<td>3</td>
<td>3</td>
<td>9</td>
</tr>
<tr>
<td>C</td>
<td>3</td>
<td>2</td>
<td>6</td>
</tr>
<tr>
<td>D</td>
<td>3</td>
<td>1</td>
<td>3</td>
</tr>
<tr>
<td>F</td>
<td>3</td>
<td>0</td>
<td>0</td>
</tr>
</tbody>
</table>

Totals 15 30

Grade Point Average: \( \frac{30}{15} = 2.00 \)
Pass/No Credit Option

Undergraduate students may apply a maximum of 12 credit hours of elective coursework taken on a pass/no credit basis toward bachelor's degree requirements.

Upon approval, a specific major may designate courses to be taken on the pass/no credit option only.

A grade of "P" (pass) is assigned upon satisfactory course completion. A grade of "NC" (no credit earned) is assigned based upon unsatisfactory performance. These grades are not used in calculating the grade point average.

Incomplete Coursework

Students may request and may be granted an "I" (incomplete) grade for a given course based on requirements established by the university and the instructor. At the time of approval of the request for the incomplete, a deadline for completion and submission of work will be established not to exceed the twelfth week of the subsequent trimester. After the deadline for submitting work has passed, an "I" or an "E" (extended incomplete) will become an "F" (for graded coursework) or an "NC" (for courses taken on the pass/no credit option).

Repetition of Courses

A student may reenroll in a course. After completion of the repeated course, the most recent grade earned will be included in the grade point average calculation. A grade of "R" (repeat) will be reflected for the prior attempt(s).

Other Codes

Other codes may be used to identify a student's status in a course: "W" (withdrawal); "V" (visitor/auditor); and "X" (administrative withdrawal).

The complete university grading policy appears in the Appendix of this Catalog.

Academic Credit Reporting

General Information—Academic credit is reported in three ways: (1) student grade report, (2) Grade Resubmittal Form, and (3) official transcripts (issued per student request).

Student Grade Reports—Approximately one week after the end of each trimester, the Registrar's Office mails a grade report to each student indicating courses taken, grades received, credits earned, and grade point average. Also included in the report is a cumulative record for coursework completed at Governors State University.

Grade Resubmittal Forms—In cases where "I" (Incomplete) or "M" (missing grade at the time of grade processing) have been assigned to students for specific courses, a Grade Resubmittal Form is printed and distributed to the faculty member immediately after student grade reports are mailed. Upon completion of the coursework, the faculty member submits the Grade Resubmittal Forms to the Registrar's Office. The Registrar's Office sends one copy of this form to the student indicating the grade assigned.

Official Transcripts—Official transcripts are issued by the Registrar's Office upon the student's written request. Transcripts are $2 each.
Transcripts are not issued for students with outstanding financial obligations to the university or for students who have an Admissions Office hold.

Academic Standing

Academic Standing is defined as follows:

**Good Standing**—Undergraduate students who maintain a minimum cumulative grade point average of 2.0 and graduate students who maintain a minimum cumulative grade point average of 3.0 are in good standing.

**Probation I**—A student who does not meet the cumulative minimum grade point average for the first time will be placed on Probation I for the next trimester.

**Probation II**—If a student on Probation I enrolls for credit and does not achieve the minimum cumulative grade point average, the student will be placed on Probation II for the next trimester.

**Suspension**—If a student on Probation II enrolls for credit and does not achieve the minimum cumulative grade point average, the student will be academically suspended from the university for one year.

Students who are suspended and plan to enroll will be subject to the provisions of the Policy on Readmissions and Special Admissions (see Admissions Information section). Students may appeal the length of the suspension under the provisions of this policy.

A student suspended twice for academic reasons will not be considered for readmission at any later date.

**Probation Extended**—Students who are readmitted after being suspended and, in some exceptional cases, students readmitted after losing continuing student status while on probation are readmitted on Probation Extended.

These students will remain on Probation Extended each trimester of enrollment as long as they meet the required minimum grade point average each trimester. Upon achieving the minimum cumulative grade point average, they are back in good standing.

Students on Probation Extended who do not meet the minimum requirements for a trimester will be academically suspended. Students on Probation Extended who receive a grade of "I" (incomplete) will not be permitted to register for a subsequent trimester until the incomplete grade has been removed.

Honors

**Dean’s List**—Each trimester, undergraduate students who have achieved outstanding academic performance will be recognized by appearing on the Dean’s List providing they meet the following conditions:

1. The student has been admitted to a degree program.
2. During the trimester the student has earned at least six credit hours of graded coursework without any grades of incomplete.
3. The student is in academic good standing.
4. The student has a trimester grade point average of 3.70 or higher for all graded coursework attempted.
Graduation with Honors—Upon completion of baccalaureate degree requirements, students will be awarded “honors” or “high honors” if they have:

1. completed at least 24 graded credit hours in GSU coursework and
2. a cumulative GSU grade point average of 3.80-3.94 (“honors”) or
3. a cumulative GSU grade point average of 3.95-4.00 (“high honors”).

The achievement of “honors” or “high honors” will be designated on the student’s transcript and diploma.

Academic Amnesty

Academic Amnesty, if granted at the time of readmission, allows students to have their grade point average calculated from the point of reentry for the purpose of establishing academic standing. Applicants must request amnesty at the time of application for readmission under provisions of the Readmissions and Special Admissions Policy. The following restrictions apply:

1. Academic amnesty may be granted only to students who have previously been placed on probation or suspended and have not been enrolled at Governors State University for at least three (3) trimesters before application for readmission.
2. Application and readmission must be to a major other than the major in which the student was previously enrolled.
3. Upon readmission with amnesty, the academic record of courses and grades will not be changed. The transcript will indicate that academic amnesty has been granted.
4. Governors State coursework taken before readmission with amnesty with a grade of “C” or better for undergraduates or “B” or better for graduates may be applied to the requirements of the new major upon approval of the appropriate division chairperson and dean. These grades will not be included in the calculation of the grade point average after readmission with amnesty.
5. Undergraduate students readmitted with amnesty must complete a minimum of 24 graded credit hours after readmission before graduation in the new major.
6. Graduate students readmitted with amnesty must complete at least one-half of the number of credit hours required for the degree in the new major after readmission before graduation in the new major.
7. Academic amnesty may be granted to a student only once.

Continuing Student Status

A continuing student at Governors State University is defined as any degree-seeking student whose enrollment at Governors State has not been interrupted for more than one consecutive trimester. Enrollment is defined as registration for one or more credit hours or audit (noncredit programs/courses are excluded). Degree-seeking students are subject to the curricular requirements in effect at the time of their initial admission provided they maintain continuing student status.

Degree-seeking students who lose continuing status must reapply and be readmitted. They will be subject to admission and curricular requirements of the university, college, and specific major in effect at the time of readmission.
Intra-University Major Changes

Any continuing, degree-seeking student applying for a change from one college, major, and/or concentration to another college, major, and/or concentration is subject to the admission and degree requirements in effect in the new college, major, and/or concentration at the time of the change.

Academic standing at the time of application for transfer will be computed in accordance with the grading and academic standing policies.

Academic Honesty

Students are expected to fulfill academic requirements in an ethical and honest manner. This expectation pertains to the following: use and acknowledgment of the ideas and work of others, submission of work to fulfill course requirements, sharing of work with other students, and behavior during examinations.

These ethical considerations are not intended to discourage people from studying together or from engaging in group projects. The university policy on academic honesty appears in the Student Handbook.

Independent Study

Independent study is defined as all individualized coursework, planned and developed by the student and accepted by a faculty sponsor, with the exception of a master’s thesis, a master’s final project, internships, or practica.

The following restrictions apply to independent study:

1. written proposals must be approved by the division chairperson in consultation with the faculty sponsor,
2. a student may enroll for a maximum of three credit hours of independent study in any one trimester,
3. a maximum of nine undergraduate credit hours and six graduate credit hours of independent study may be applied to degree requirements, and
4. independent study credit may be used to meet elective credit only.

Exceptions to the above restrictions are subject to the approval of the dean upon request from the division chairperson. Individual majors may establish more restrictive limits.

Independent study credit hours may be applied toward residency requirements.

CEEL (Credit through Evaluation of Experiential Learning)

Governors State University recognizes the fact that many university students are mature and bring a wealth of experience to the academic arena. An assumption is made that some students may acquire competencies by experiential means, that is, through work, noncredit inservice training, and/or through a variety of learning experiences and that these competencies are relevant, useful, and verifiable. The univer-
Academic Regulations 51

Academic credit is granted by the University for prior learning and/or proficiency examination scores which are equal to or higher than acceptable levels. This credit may be used to meet admissions requirements or as credit toward a degree. The CEEL process is an option open only to students enrolled in or seeking admission to a degree program at Governors State. For further information, including applicable limitations or restrictions, see the CEEL policy in the Appendix.

To initiate the process, the student contacts an admission counselor if applying for admission or advisor if application is being made for credit toward a degree. CEEL application forms may be obtained from collegial offices or the Office of Assessment. An assessment fee of $30 is charged for all assessments except proficiency test and military experience credit. The gathering of necessary documents and the study and assessment of the experiences by faculty are often time consuming. Therefore, students should begin the process at least six months before admission is desired or during their first trimester at Governors State University if the credit is to be used for completing graduation requirements. Undergraduate credit may be awarded at both the lower and upper division levels.

The Office of Assessment conducts a special CEEL seminar each trimester to provide directions in preparing the prior learning portfolio. All students desiring to use the process are encouraged to attend the seminar. Additional information may be obtained from the Office of Assessment.

The CEEL process is not a part of the BOG/B.A. degree program and applicants to and/or students in this program do not use this process for evaluation of experiential learning. (See the section on Board of Governors Bachelor of Arts Degree Program in this Catalog.)

Special Registration Permission

Special registration permission is required when a student wishes to enroll for more than sixteen hours during any trimester or more than nine hours in either block 2 or 3. Students planning to enroll for block 2 (courses in the first half of the trimester) or block 3 (courses in the last half of the trimester), in addition to block 1 courses (full trimester courses), should contact the Registrar's Office to determine if special registration permission is required.

Special registration permission must be authorized in writing on the registration form by the dean or authorized designee.

Audit Registration

Enrolled students or others wishing to attend the meetings of a course without earning academic credit may register as auditors.

Because the courses offered at Governors State University are primarily intended for students registering for academic credit, auditors may register only during the add/drop and late registration period. Audit registration requires the approval of the instructor. All attendance and work is voluntary.
Auditors pay only a $5 service fee, and no late fee is assessed. A change from audit registration to credit registration or vice-versa must be accomplished by the end of the add/drop and late registration.

University Hold List

The University Hold List, administered by the Registrar's Office is a means of identifying students with unsatisfied financial or academic obligations to the university. Students on the Hold List may not register and may not have their diplomas, transcripts, or other academic records released.

Accommodation for Students’ Religious Observances

Governors State University policy makes reasonable accommodation for student observance of religious holidays. The individual student must notify the appropriate GSU administrator or faculty member in writing at least three class periods in advance of the religious observance.

Requests which necessitate modifications of academic standards or create undue hardship for the university or its staff are considered unreasonable. If a student feels he/she has been discriminated against, redress can be sought through the Student Grievance Procedure.
Tuition and Fees
Tuition rates for academic year 1987-1988 have been adopted by the Board of Governors of State Colleges and Universities. These rates are subject to change.

* Non-Refundable

† Students registering only for block 2 must purchase a trimester parking permit for $11; they may redeem the permit at the end of a block 2 for a partial refund. Annual and daily fees also available.

‡ This amount is for basic plans for single students and is subject to change. Rates for major medical and/or coverage for additional individuals are variable.
Description of Fees

Student Activity Fee
These fees are placed in a special account called the Student Activity Fund. This fund is used to support co-curricular student activity programs. Some of the activities and programs receiving funding support are:

- Child Care Center
- GSU Jazz Band and Chorale
- INNOVATOR
- Short Term Loans
- Special Cultural Entertainment
- Student Activities Resource Center
- Student Clubs and Organizations
- Student Senate
- Women's Resource Center

Collection of this student activity fee is required by the Board of Governors for all schools in the system.

Audit Fee
The audit fee is assessed for students who wish to attend meetings of a course but do not wish to receive academic credit.

Health Insurance Fee
Participation in the health insurance program is optional. Information on the health insurance plan is available in the Student Development Office.

Late Fee
This applies to students who register and pay fees during late registration for any trimester (or block 3) and to students paying tuition via the installment method who do not pay the balance due on time.

Off-Campus Service Fee
All student registering for off-campus credit courses, telecourses, and correspondence courses are assessed a $5 per credit hour fee.

Graduation Fee
Every applicant for graduation pays this fee to cover the cost of application processing, diploma, cap and gown rental, and commencement.

Parking Fee
Students paying this fee receive automobile decals for unlimited parking during a trimester.

Installment Payment Fee
This fee is charged to eligible students who choose to pay on the installment method.

Transcript Fee
This fee is charged for every university transcript.
Payment of Tuition and Fees

Tuition and applicable fees must be paid prior to but no later than the specified dates for each academic term. Registration and official enrollment in courses is not complete until all tuition and fees have been paid.

Installment Method
Students registering for nine or more credit hours and having no scholarship allowance may take advantage of the installment payment method at the time of initial registration. Fifty percent of tuition and all fees must be paid during registration. The balance of tuition must be paid not later than the Friday before the start of block 3.

Students must pay their tuition and fees as stipulated or their registration will be canceled and all their classes will be dropped.

Payment Via Credit Card
As a convenience to students, the university accepts tuition and fee payment via MasterCard or VISA credit cards.

Undergraduate and Graduate Status
Undergraduate tuition rates apply to all undergraduate students, including those admitted to a specific major, undergraduate students-at-large, and special nondegree students.

Graduate rates apply to all students holding a baccalaureate degree, including those admitted to a specific major at either the undergraduate or graduate level. Students-at-large who have earned a baccalaureate degree must be admitted and enroll as graduate students regardless of the level of the coursework in which they intend to enroll.

At the time of fee assessment, students will be billed for tuition based on their current status (undergraduate or graduate). However, if delayed posting or retroactive changes to a student's record affect this status, then the student will be reassessed and billed or refunded any difference in tuition for the current term. Tuition adjustments for previous terms will not be made.

Residency Classification Rules
To be considered residents, students must have lived in Illinois for a period of at least six consecutive months immediately preceding the beginning of any term for which they register at the university and must continue to maintain bona fide residence in the state.

To establish resident status, a person who is not a citizen of the United States of America generally must have a permanent resident status with the United States Immigration and Naturalization Service and must also meet and comply with all other applicable requirements of these regulations. Please refer to the Supplemental Admission Information section of this Catalog for procedures on verification of U.S. residency for non-U.S. citizens.

In requesting a change of their nonresident status, students will be required to provide satisfactory evidence to the Registrar's Office of in-state residence in compliance with the above residency classification rules.
For complete regulations regarding resident status, see the Appendix of this Catalog.

Refunds
The university is authorized to grant refunds in accordance with Board of Governors Regulations.
Specific board approval is required for any refund of mandatory fees other than those listed below. The term "refund" may mean the cancellation of an unpaid obligation as well as an actual refund of amounts paid previously.

100% Refunds
Students who drop courses on or before the tenth day of regularly scheduled classes for a trimester or block are entitled to a full refund of tuition and fees.

50% Refunds
Students who withdraw completely from the university (withdrawal from all courses) after the tenth day but before the twenty-first day of regularly scheduled classes for a trimester or block are entitled to a 50% refund of tuition and fees.

Additional Information
Students may receive a refund of mandatory fees if:
1. a scholarship is awarded which covers those fees, and an application for refund is made no later than 60 calendar days after the close of the term;
2. declared ineligible by the university for enrollment before the first day of scheduled classes; or
3. the student changes from full-time to part-time status on or before the tenth day of regularly scheduled classes (those fees not applicable to part-time status will be refunded).

Upon receiving such a refund the student will not be eligible for activities and benefits covered by such fees.

The president or the president's designee may authorize the refund of a part or all of a student's mandatory fees because of the student's death or disability, extreme hardship, or institutional error. Board of Governors approval is required to refund fees established by the board.

Refund periods are listed in the Schedule of Classes for each trimester. Refunds are mailed via check approximately three weeks from the request date. Both VISA and MasterCard refunds are processed for account credit within three days of the request date.
Financial Assistance
The primary purpose of any financial aid program is to assist students in obtaining the financial resources necessary to cover increasing educational costs. The Office of Financial Aid provides information, counseling, and direct financial assistance to students who experience financial difficulty in pursuing a university education.

Financial aid programs are based on the premise that the primary responsibility for paying college expenses rests with the student and parents. The analysis of a student's or family's financial strength includes consideration of current income, assets, family size, number of children and number in college, retirement allowance, uninsured medical/dental expenses, and any other factors which seriously alter a student's or family's financial situation. Financial aid programs are designed to supplement student or family resources by bridging the gap between costs and the student's or family's measured ability to pay. "Need" is the difference between the costs of attending the university and the total of the resources an applicant has available.

The Office of Financial Aid attempts to meet the full need of all eligible applicants by "packaging" funds from various sources.

Eligibility Criteria

In general, a student is eligible for aid based on meeting the following requirements.

The student:

1. has "need" if applying for need-based aid;
2. is a U.S. citizen or a permanent resident;
3. is not in default on a National Direct Student Loan, Guaranteed Student Loan, or PLUS loan;
4. does not owe a refund on a Pell Grant or a Supplemental Educational Opportunity Grant;
5. is registered for Selective Service if applicable;
6. is a degree-seeking student;
7. is enrolled on at least a half-time basis; and
8. is making satisfactory progress in a degree program. Satisfactory progress, for the purpose of determining eligibility for financial aid means:
   a. enrolling for and earning a minimum of six credit hours each trimester and
   b. being in good academic standing.

Students not in compliance with both the above standards for the first trimester will receive a letter notifying them of their status. Upon failure to comply for a second consecutive trimester, eligibility for all state, federal, and institutional aid will be withdrawn. Eligibility may be restored by the Director of Financial Aid if the student meets both required standards for a subsequent trimester. Students may appeal withdrawal of eligibility through policies and procedures established by the university and the Office of Financial Aid.
Programs Available

The Office of Financial Aid administers and coordinates aid funds from federal, state, university, and private sources. The various aid programs available may be divided into four broad categories: grants/scholarships, loans, student employment, and other benefits. Grants are gift assistance and are usually based on need. Scholarships are also gift aid based on need, academic achievement, or other specific criteria. Loans are generally low interest notes which must be repaid with interest at a future date, usually commencing six months after leaving school. Student employment is often available during the academic year either on or off campus. Other types of aid include veterans educational benefits and vocational rehabilitation assistance.

Grants/Scholarships

Pell Grant
The Pell Grant Program is a federal aid program designed to provide financial assistance to undergraduate students who demonstrate financial need under the guidelines of the program. Once a student is determined eligible, the amount of the award is based on the cost of education at the school attended for enrollment on a half-time, three-quarter time, or full-time basis.

Supplemental Educational Opportunity Grant (SEOG)
The SEOG is a federally-sponsored program for undergraduate students with exceptional financial need. Grants cannot exceed one-half of the total assistance provided the recipient.

Illinois State Scholarship Commission Monetary Award (ISSC)
This is a need-based scholarship for undergraduates which pays either full or partial tuition and fees. Applicants must have no other conflicting tuition scholarship/grant.

Illinois General Assembly Tuition Waiver
Tuition waivers are available for undergraduate and graduate students at state-supported colleges or universities. Applications are processed by state senators' and representatives' offices in the resident's legislative district.

Alumni Academic Award
A stipend of $300 over two trimesters for undergraduate or graduate degree-seeking students with a 3.75 GPA enrolled for a minimum of nine hours.

Community College Scholarship
A two-year scholarship is awarded annually to one student from each of the participating community colleges. Awards are based on merit, and students must be recommended by an official of the applicant's community college. The scholarship covers tuition and fees plus an allowance for books, supplies, and transportation expenses. Participating colleges are Richard J. Daley College, College of DuPage, Joliet Junior College, Kankakee Community College, Kennedy-King College, Moraine Valley Community College, Morton College, Olive-Harvey College, Prairie State College, and Thornton Community College.
GSU Endowed Scholarships
The following are GSU endowed scholarships: American Logistics Association Scholarship, Donald and Margaret Dolan Scholarship, Kimberly Edwards Scholarship in Nursing, Dr. William E. Engbreton Sculpture Scholarship, Lowell E. Goldberg Scholarship, M.D. Memorial Scholarship, Gerald Myrow Music Scholarship, Keith W. Smith Memorial Scholarship, Percy and Elizabeth Wagner Real Estate Scholarship, Donald W. Hansen Memorial Scholarship. Contact the Office of University Relations for information about these endowed scholarships.

GSU Tuition Waiver
This tuition waiver is available for financially disadvantaged students as determined by the Governors State University Office of Financial Aid. Waivers are provided for undergraduate and graduate students.

GSU Talent Waiver
A tuition waiver (in-state rate) is available to undergraduate and graduate students who exhibit extracurricular talent in leadership and service, communication arts, and creative and performing arts. It is not restricted by financial need. Contact the Office of Financial Aid for application procedures.

Senior Citizen Tuition Waiver
Tuition and fee payment is available to undergraduate or graduate students who meet eligibility requirements. Contact the Office of Financial Aid for further information.

Illinois National Guard/Naval Militia Scholarship
Tuition and fee scholarships are available to undergraduate and graduate students who are currently enlisted members (for at least one year) of the National Guard or Naval Militia.

Division of Rehabilitative Services Scholarship
Scholarships are available to undergraduate students having a handicap to employment. The amount of assistance is determined by the Division of Rehabilitative Services. Students should apply to the Division of Rehabilitative Services in Springfield.

Loans
Perkins Loan (formerly NDSL)
Need-based, low-interest (currently 5%) loans are available. Undergraduate and graduate students may borrow up to $9,000 cumulative total (for undergraduates) or $18,000 cumulative total (for graduates).
Repayment begins nine months after graduation or upon dropping below half-time status.

Illinois Guaranteed Loan Program
Low-interest (currently 8%) loans are available to undergraduate and graduate students. An academic year loan limit of $2,625 for freshmen and sophomores, $4,000 for juniors and seniors, and $7,500 for graduate students applies. Students should contact local lending institutions for applications.
GSU Short-Term Loan
Loans of up to $150 are available for undergraduate and graduate students in temporary financial distress. This loan must be repaid within one month.

PLUS/SLS Loan
Loans not based upon need may be obtained through lending institutions for educational expenses. Current rate is 12% and repayment begins 60 days after disbursal.

Student Employment
College Work-Study Program (CWS)
Student employment is available to undergraduate or graduate students based on financial need. The total CWS award depends on need and the availability of funds.

GSU State-Funded Part-Time Job
Part-time jobs are available to undergraduate and graduate students without Work-Study, National Direct Student Loan, or Supplemental Grants. The amount varies dependent on the job.

Graduate Assistantship
Assistantships are available to graduate students admitted to and enrolled in a degree program at least half-time. The average salary is $400 to $600 per month, and a tuition waiver may also be offered. Interested applicants should contact the dean of the college in which they are enrolled.

Other Assistance
Student-to-Student Scholarship
Funds are available for emergency situations which could not be anticipated. This aid is intended primarily for undergraduates and is administered through the Financial Aid Office. Monies are donated by Governors State University students and matched by state funds.

Education Scholarships
Numerous programs are available to students wishing to enter the teaching field and for women and minorities in administration. Contact the College of Education at GSU for details.

Illinois Baccalaureate Nursing Assistance Program
Assistance is available to nurses wishing to pursue an undergraduate degree in nursing. There is an obligation after graduation to practice in Illinois. Contact the Illinois Department of Public Health in Springfield for information.

Other Information
Students seeking information on specialized grants or funding from private sources of financial aid should contact the Office of Financial Aid for listings of available fellowships and loans.
Application Procedures

All applicants must submit financial information concerning themselves and/or their parents. This information is submitted by completing the Financial Aid Form (FAF) which is processed by the College Scholarship Service (CSS). All applicants must file a Financial Aid Form. The forms are available at college counseling offices and the GSU Office of Financial Aid. CSS does not award financial aid. The information received from CSS is used in determining need and eligibility for funds. All information is held in confidence.

In addition to the CSS Form, all applicants must complete a Governors State University Application for Financial Aid. Additional information will also be requested and is explained on the application. The application is not complete until all required documents are on file. Incomplete files are not processed. Applicants whose financial aid files are complete by May 1 will receive priority consideration for financial aid. Applications received and/or completed after that date will be processed on a first-come, first-served basis. The following credentials are required to complete the application file:

1. a Financial Aid Form Need Analysis Report (FAFNAR), which is the College Scholarship Service (CSS) analysis of your Financial Aid Form (FAF);
2. a completed GSU Financial Aid Application with proper documentation attached, including 1040’s, W-2’s, and other income documents;
3. an affidavit of parental nonsupport, if necessary;
4. a financial aid transcript(s) returned from the college(s) you previously attended;
5. verification of registration with Selective Service, if applicable; and
6. additional data necessary to clarify or verify the financial information submitted.

Requests for additional data are sent by the university when deemed necessary.

Governors State University financial aid applications and CSS Financial Aid Forms are available in the Office of Financial Aid. The process of applying for financial aid requires time and attention. You must apply early to receive full consideration. It is helpful if students or parents complete the IRS 1040 or 1040A income tax form as early as possible since the applications and financial statements require income and tax data.

Remember to retain copies of all forms sent to all agencies and institutions for future reference. Also, keep all notifications, award letters, and other financial aid correspondence from all agencies and institutions. These are important documents and may be needed for reference by university officials, prospective employers, and others.

Veterans Affairs

The Office of Veterans Affairs administers all veteran-related services and programs and serves the student veteran by providing advising and counseling. All veterans intending to enroll at Governors State University should contact the Veterans Office before their registration so that eligibility for veterans benefits can be established and the proper paperwork can be initiated. Veterans who are unsure of their benefit status should also contact the office since changes in entitlement and legislation could make them eligible for benefits of which they are not aware.
Financial Assistance

G.I. Bill
The G.I. Bill is a federally-funded program administered by the Veterans Administration. The eligibility requirements include:

1. the veteran must have served on active duty for more than 180 continuous days, any part of which occurred after January 31, 1955, but before January 1, 1977;
2. the veteran must either have been released under conditions other than dishonorable or have continued on active duty; and
3. benefits must be used within ten years of release from active duty.

Each eligible person is entitled to educational assistance for a period of one and one-half months for each month of service on active duty up to a maximum of 45 months. Rates are as follows:

<table>
<thead>
<tr>
<th></th>
<th>0 Dep.</th>
<th>1 Dep.</th>
<th>2 Dep.</th>
<th>Each Add.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full-time</td>
<td>$376</td>
<td>$448</td>
<td>$510</td>
<td>$32</td>
</tr>
<tr>
<td>3/4 time</td>
<td>283</td>
<td>336</td>
<td>383</td>
<td>24</td>
</tr>
<tr>
<td>1/2 time</td>
<td>188</td>
<td>224</td>
<td>255</td>
<td>17</td>
</tr>
</tbody>
</table>

Less than 1/2 time = reimbursement of tuition and fees.

*Rates listed are those in effect at time of printing and are subject to change.

To qualify for these benefits, veterans must provide a certified copy of their DD214 (Report of Separation) and necessary documents to establish eligibility for dependents (i.e., marriage licenses, divorce decrees, birth certificates, records of adoption, etc.). These should be submitted to the Veterans Office at least one month before the beginning of the student’s first trimester of enrollment.

Veterans Education Assistance Program (VEAP)
Veterans and service persons currently serving are eligible for this program if they:

1. entered active duty after December 31, 1976;
2. were released under conditions other than dishonorable or continue on active duty; and
3. have satisfactorily contributed to the program.

Benefits must be used within ten years of discharge from active duty. Benefit rates vary depending on the amount the veteran contributed to the program. Payments are received for the number of months the veteran contributed to the program or for 36 months, whichever is less. No additional benefits are paid for dependents. A certified copy of the veteran’s DD214 must be submitted to the Veterans Office at least one month before the veteran’s first trimester of enrollment.

Reserve GI Bill (Chapter 106)
The Reserve GI Bill is available to members of the Reserves and National Guard who enlist, reenlist, or extend an enlistment for at least six years beginning July 1, 1985, through June 30, 1988. To apply, 180 days of service must have been completed. Pay rates are dependent on enrollment.
New GI Bill (Active Duty)
The New GI Bill is available to veterans who first entered on active duty between July 1, 1985 and June 30, 1988. Veterans must have contributed while on active duty. The benefit amount varies depending on length of service and amount of contribution from the military.

Illinois Veterans Grant
The Illinois Veterans grant, funded by the state of Illinois, provides scholarships to veterans attending state-supported colleges, universities, and community colleges in Illinois. The eligibility requirements include:

1. One year or more of continuous active duty if discharged after August 11, 1967 (less than one year if before that date);
2. A discharge other than dishonorable;
3. Illinois residency before entering military service and return to Illinois within six months after discharge; and

Active duty personnel are also eligible for this scholarship if they would otherwise meet the above requirements if discharged.

Eligible veterans are entitled to 120 semester hours of tuition and payment of most required fees. The student has twelve years from the initial term of use to complete his/her course of study (or 120 hours whichever comes first).

Veterans must present a DD214 (Report of Separation) to the Illinois State Scholarship Commission. An eligibility letter will be issued which should be presented to the university's Veterans Affairs Office before registration. If the applicant is currently on active duty, he/she should submit a statement from his/her commanding officer indicating length of service, current military status, and home of record at time of original entry into service. Application forms and mailing address of the Illinois State Scholarship Commission can be obtained from the GSU Office of Veterans Affairs.

Other programs and services include the VA work-study program, discharge upgrading, and liaison services between the veteran and the VA. Forms and applications for all of the veterans benefit programs are available in the Office of Veterans Affairs.

Air Force ROTC Program
Students at Governors State University may enroll in the Air Force ROTC program through a "cross-town" agreement between Governors State, Illinois Institute of Technology, and Air Force ROTC. The two-year program allows a qualified student the opportunity to earn a commission as second lieutenant in the U.S. Air Force upon graduation and completion of the program.

The Air Force ROTC courses are taught on the IIT campus. Federal and state of Illinois scholarships for full tuition are available to qualified students. All members of the Professional Officer Course also receive subsistence allowances. For more information, call (312) 567-3525/3526 or inquire in person at the IIT Science Building, 3201 S. Michigan Avenue, Chicago, Illinois.
Army ROTC Program

Students at Governors State University may enroll in the Army ROTC program through a "cross-town" agreement between Governors State, Chicago State University, and the Army ROTC. Military Science Studies are available to undergraduate and graduate students through classes conducted on the Chicago State University campus. Army ROTC scholarships are available to qualified students. For further information and details, contact GSU's Office of Financial Aid (312) 534-5000, extension 2161 or:

Army ROTC Office
Chicago State University
Douglas Library, Room 330
95th and King Drive
Chicago, IL 60620

Undergraduate Studies
The goal of undergraduate programs is to encourage the development of the individual's values and talents which may be employed in solving the problems of a complex society. Special emphasis is directed to the development of the student's capacity for independent judgment and creative thought. Undergraduate study combines both theory and practice to educate students and to prepare them for the world of work.

Governors State University is a senior-level university offering transfer students from community colleges as well as those from four-year institutions the opportunity to further their education. The fundamental charge for undergraduate study at Governors State University is to extend the educational opportunities of students who have completed the equivalent of two or more years of college work. Baccalaureate degree programs build on this foundation and offer an integrated two years of study to fulfill degree requirements. Degree candidates should approach their academic careers with a sense of what they have already accomplished as well as that which remains to be achieved.

Articulation Agreements
To minimize transfer problems for students, Governors State University and area community colleges have developed articulation agreements which help students plan a four-year degree program beginning at the community college and finishing at Governors State. These agreements assure smooth transition from lower-division study to upper-division study and completion of a bachelor's degree.

Undergraduate Student Status
Undergraduate degree-seeking students are those who meet the established admission requirements of the university and college as well as those for the specific bachelor's degree sought.

Undergraduate students-at-large are those who have earned from a regionally-accredited institution either a minimum of 60 semester hours with an overall 2.0 grade point average or an A.A. or A.S. degree and who are taking courses but not pursuing a bachelor's degree in a specific major at the time of admission.

Special nondegree students are those who have not earned 60 semester hours of college credit but who have had equivalent specialized experiences and enroll in a course, workshop, seminar, or other university activity for academic credit.

Liberal Education and Writing and Basic Mathematics Testing
To ensure the continued quality of undergraduate degree programs, the university has implemented a liberal education policy and testing policy for writing and mathematics skills. All undergraduate students must comply with these policies as a part of the requirements for a bachelor's degree. Further information is available in the section on Degree Requirements in this Catalog.

The College of Arts and Sciences provides a wealth of educational opportunities founded upon the traditions of the liberal arts. The curricula are concerned with the development of an awareness of one's place in the historical, cultural, and intellectual experience of humanity. In addition to providing the background necessary to enter into a variety of careers, the specific degree programs offered by the college seek to develop a student's ability to discover new knowledge and prepare for the future.

Courses in the natural and physical sciences provide students with a traditional conceptual background in science while emphasizing the skills and techniques required to apply these concepts to the solution of problems in areas such as the environment. In addition to the courses which support a major and a minor in computer science, computer courses are offered to assist students throughout the university in gaining familiarity with this increasingly important tool.

Courses offered in the social sciences encourage students to explore the problems connected with individuals and groups living together in the modern world. The humanities and fine arts focus on values and perspectives as they are expressed in intellectual and artistic works. The college also provides learning experiences which encourage students to apply the liberal arts tradition to the world of work. Students have the opportunity to study in such growing fields as media, photography, and communication.

Students benefit from extensive facilities including: computer, biology, chemistry, and environmental science laboratories, as well as music, art, photography, film, and television studios, and art and photography galleries.

A continuing series of events including jazz, electronic, symphonic, and choral concerts, media symposia and workshops, and photography and visual arts exhibits are sponsored by the college. Throughout the year the intellectual life of the university community is enriched by workshops and conferences on such diverse topics as global studies, language and culture, race, communication, energy, science, and science education.
Certification

The college offers state approved programs for teacher certification in the areas of biology, chemistry, English, and music.

General Admission and Degree Requirements
All applicants must meet university admission and degree requirements. (See Admissions and Degree Requirements sections.) It is recommended that students complete courses in communications, humanities and arts, science and math, and social science before admission to meet liberal education requirements within the 120 credit hour minimum required for a bachelor's degree.

Specific Major Requirements
Following are detailed requirements for the undergraduate majors, sequences, minors, and concentrations in the College of Arts and Sciences. Some majors have special admission requirements in addition to university requirements. The special admission requirements for each major are noted where they apply. The specific degree requirements for each major and concentration are noted as well.

Presentation of Curricular Information
The information presented for each major and/or concentration reflects the total hours required for the baccalaureate degree. Students will develop a study plan during the first term of enrollment. Credits earned before admission will be applied toward degree requirements where equivalencies exist, or as elective credit, as outlined in the policy on transfer credit. After application of transfer credit, proficiency credit, and/or experiential learning credit, the study plan details the courses/credits remaining which are required to graduate with the specific major/concentration.

Art

The undergraduate major provides art students with instruction and exposure to all of the media of studio art: painting/drawing, sculpture/ceramics, printmaking and graphic design. The curriculum also provides a historical foundation for both Western and non-Western areas.

Special Admission Requirements
Besides meeting the university's criteria, applicants must have completed, before admission, the following lower division coursework: nine hours in art history and twelve hours in art studio.

Total 120
Biology

The curriculum for the bachelor of science in biology provides a strong background in the basic concepts of molecular, organismic, and population biology. In addition, laboratory courses provide the training needed for highly developed laboratory skills. Upon graduation, students are prepared for advanced studies in medical, dental, or veterinary school. The student also has the necessary preparation for masters or doctoral level graduate work in biology. The curriculum supplies all the requirements for admission into the master of science degree program in environmental biology at Governors State University. Students are qualified for a wide range of careers as biologists in areas such as pharmaceutics, genetic engineering, microbiology, or the environment. A teacher education sequence is available for the student who is interested in a career in science teaching at the secondary level.

Recommended Preparation
Before admission, students should have completed the following minimum hours of lower division coursework with a grade of “C” or better: eight hours of general biology with laboratory, three hours of botany with laboratory, three hours of zoology with laboratory, eight hours of general chemistry with laboratory, eight hours of organic chemistry with laboratory, and three hours of college algebra. Deficiencies must be completed during the first three trimesters of enrollment. Some courses may not be available at Governors State University.

Teacher Certification
In addition to the recommended preparation specified above, students seeking teacher certification to teach at the secondary level should complete as much coursework as possible that is applicable to the general education requirements listed under Teacher Certification elsewhere in this Catalog. The curriculum as displayed below under Degree Requirements—Major with Teacher Education Sequence is approved by the Illinois State Board of Education and leads to the Standard High School Certificate and qualifies students to teach biology and general science. Students seeking teacher certification must meet additional requirements listed in the Teacher Certification section elsewhere in this Catalog.

Chemistry

The curriculum for the bachelor of science in chemistry provides a strong background in the basic concepts of analytical, organic, physical, inorganic, and environmental chemistry. Laboratory courses provide hands-on experience in the operation of a number of modern scientific instruments. Upon graduation the student is prepared for employment in government and industrial laboratories in a variety of entry level positions. The student also has the necessary preparation for graduate work in chemistry and meets all requirements for admission into the master of science degree program in analytical chemistry at Governors State. A teacher education sequence is available for the student who is interested in a career in science teaching at the secondary level.

Recommended Preparation

Before admission, applicants should have completed the following minimum hours of lower division coursework with a grade of "C" or better: eight hours of general chemistry with laboratory, eight hours of organic chemistry with laboratory, eight hours of physics with laboratory, and eight hours of calculus. Deficiencies must be completed during the first three trimesters of enrollment. Some courses may not be available at Governors State.

Teacher Certification

In addition to the recommended preparation specified above, students seeking teacher certification to teach at the secondary level should complete as much coursework as possible that is applicable to the general education requirements listed under Teacher Certification elsewhere in this Catalog. The curriculum as displayed below under Degree Requirements—Major with Teacher Education Sequence is approved by the Illinois State Board of Education and leads to the Standard High School Certificate and qualifies students to teach chemistry. Students seeking teacher certification must meet additional requirements listed in the Teacher Certification section elsewhere in this Catalog.

Computer Science

The bachelor of science degree in computer science provides a balance between theoretical and applied study and is intended for students who are primarily interested in the application of computers and information technology to problem solving.

The curriculum is designed to prepare students for entry-level positions in business and industry; government, at local, state and federal agencies; and research and technical organizations, as programmers, information analysts, systems designers, and software engineers. The curriculum also prepares students for graduate work in computer science.

Recommended Preparation

While a computer science or data processing background is strongly recommended, a student without the requisite background may enroll in the major. However, to enroll in a 400-level course in computer science or mathematics, a student must have earned a grade of "C" or better in the prerequisite(s) for that course. The recommended preparatory courses and credit hours are:

- Introduction to Computer Technology ..................................................... 3
- High-level programming languages (e.g., COBOL, FORTRAN, BASIC, PL/1, RPG, etc.) ................................................................. 6
- Computer Programming: Assembly Language ...................................... 3
- Systems Analysis ..................................................................................... 3
- College Algebra ..................................................................................... 3

In addition to specified prerequisite courses, students admitted without an A.A. or A.S. degree should have completed the following liberal education coursework before admission to graduate with 120 hours as noted:

- Physical/Biological Sciences ................................................................. 6
- Communications (oral and written) ....................................................... 6
- Social Sciences ..................................................................................... 6
- Arts and Humanities ........................................................................... 6

Computer Science Minor

An undergraduate minor in computer science is offered for students majoring in other fields who wish to supplement their preparation in a major discipline with a substantial amount of coursework in computer science. The minor in computer science is particularly appropriate for those students who anticipate significant use of a computer during the pursuit of their chosen majors or who would like to develop additional marketable skills to supplement and complement their major studies.

Recommended Preparation

The recommended preparatory courses and credit hours are:

- Introduction to Computer Technology ....................... 3
- High level programming languages such as COBOL, FORTRAN, PL/1, BASIC, RPG, etc. .......................... 3
To enroll in a "400-level" course in computer science or mathematics, the student must have earned a grade of "C" or better in the prerequisites for that course.

English

The undergraduate English major enables students to obtain a full appreciation and understanding of works of the imagination—the incomparable record of humanity's journey. In pursuit of this end, the student acquires the necessary skills of analysis and expression of the liberally educated person. The curriculum emphasizes a variety of approaches to a wide range of literature and relates the works studied in social, political, and historical contexts and to the evolution of the English language. The study of English is presented as perhaps the most personally enriching endeavor the individual can undertake, a study which can and does affect all aspects of life. The English major also equips the student with the breadth of knowledge and basic skills increasingly in demand by a complex and rapidly changing world. With this major students may pursue coursework in literature, writing, English education, or related interests in the humanities. A teacher education sequence is available for the student who is interested in a career in teaching English at the secondary level.

Recommended Preparation

To graduate with 120 hours, a student should have completed the following coursework before admission: six hours in composition, six hours in arts/humanities, six hours in social science, and six hours in science/mathematics. A background in literature and composition is encouraged.

Teacher Certification

Before admission, students seeking teacher certification to teach at the secondary level should complete as much coursework as possible that is applicable to the general education requirements listed under Teacher Certification elsewhere in this Catalog. The curriculum as displayed below under Degree Requirements—Major with Teacher Education Sequence is approved by the Illinois State Board of Education and leads to the Standard High School Certificate and qualifies students to teach English. Students seeking teacher certification must meet additional requirements listed in the Teacher Certification section elsewhere in this Catalog.

Media Communications

Students in the undergraduate media communications major have an opportunity to develop writing and production skills as well as a practical and theoretical understanding of the processes and impact of media on individuals, groups, and society.

Within a broad and flexible program, media communications students prepare themselves for jobs in newspapers and publishing; commercial, non-commercial, and corporate television; cable systems; and in institutional and corporate public relations. Job opportunities include writing, editing, reporting, producing, directing, managing, teaching, and research. Students may apply for internships in Chicago area media or in the university's Instructional Communications Center. The university is interconnected live and by tape distribution to area cable television systems.

**Recommended Preparation**

Before admission, students should have completed at least six hours of coursework in media skills (including production and media writing). Other recommended preparation includes communication skills, social sciences, humanities, and science and mathematics.
Degree Requirements
In addition to university requirements, students are expected to take a production, history, or effects/theory course in a medium outside their specialization. Students must maintain a "C" grade point average in their major.

Music

The courses in the music core include theory, history/literature, ensembles, applied studies, and piano. Combining the highest standards of academic study with performance, the music curriculum examines the elements of music from the vantage points of past and present musical styles, offers traditional and modern compositional procedures, and examines the music of a broad spectrum of European and American composers. Upon completing the core requirements, students are able to either focus their studies on theory/composition or performance or choose the concentration in music education. A teacher education sequence is available for the student who is interested in a career in teaching music.
Special Admission Requirements
In addition to meeting university criteria, applicants must have completed the following lower-division coursework before admission: eight hours in music theory, four hours in music history/literature, four hours in applied music studies, four hours of piano proficiency, four hours in ensemble performance, and four hours in minor instrument.

Teacher Certification
As well as the special admissions requirements specified above, students seeking teacher certification from the State of Illinois should complete as much coursework as possible that is applicable to the general education requirements listed under Teacher Certification elsewhere in this Catalog. The curriculum as displayed below under Degree Requirements—Major with Teacher Education Sequence is approved by the Illinois State Board of Education and leads to the Standard Special Certificate endorsed in music. Students seeking teacher certification must meet additional requirements listed in the Teacher Certification section elsewhere in this Catalog.

Degree Requirements—Major Only
In addition to university requirements, students must complete 61 hours in the major core, 21 of which must be upper division, and attend a minimum of eighty percent of the Governors State University music program concerts each trimester for at least four trinesters.

All music majors with an applied area other than piano or organ must satisfy the four credit hour piano proficiency requirement. The two course sequence (MUS311 and MUS312) should begin at the time of the student's first enrollment in the music degree program. The proficiency requirements may be satisfied, in whole or in part, by passing the placement examination which is normally given during the first week of each trimester by appointment with the piano faculty. If the student passes a part of the examination, the piano faculty will determine the remaining coursework to be completed to satisfy the proficiency requirement.

Degree Requirements—Major with Teacher Education Sequence

In addition to university requirements, students must complete 21 hours in courses at the upper division level and attend a minimum of eighty percent of the Governors State University music program concerts each trimester for at least four trimesters.

All music majors with an applied area other than piano or organ must satisfy the four credit hour piano proficiency requirement. The two course sequence (MUS311 and MUS312) should begin at the time of the student’s first enrollment in the music degree program. The proficiency requirements may be satisfied, in whole or in part, by passing the placement examination which is normally given during the first week of each trimester by appointment with the piano faculty. If the student passes a part of the examination, the piano faculty will determine the remaining coursework to be completed to satisfy the proficiency requirement.

Additionally, students seeking teacher certification must (1) have an overall GPA of at least 2.5 with no individual course grade below “C” in professional education courses; (2) have at least a 3.0 GPA in music courses; (3) complete a minimum of 100 hours of supervised pre-student teaching experiences; (4) provide evidence of successful completion of the Illinois and U.S. Constitution examinations; and (5) complete coursework meeting general and professional education requirements listed under Teacher Certification elsewhere in this Catalog.

Photography

The photography major offers a professional curriculum providing study in the art and application of photography. Students can emphasize fine art or commercial approaches to photography, or can work in both areas concurrently. Undergraduate studies provide a comprehensive foundation in photographic technique, history, and aesthetics which, depending upon selective coursework, can prepare students for employment in the field or for further study of photography at advanced levels.

The photography major is supported by excellent facilities including a large exhibition gallery, a newly expanded darkroom, and a well-equipped photographic studio. Monthly guest lecturers, exhibitions, and numerous other extracurricular activities supplement the offered courses and enhance the student's educational experience.

Recommended Preparation

Applicants should have completed the following coursework: three hours of basic photographic and three hours of advanced photographic techniques.

**Social Sciences**

Students who major in social sciences at the undergraduate level are exposed to an interdisciplinary core curriculum drawn from and bridging several of the disciplines in social sciences. The curriculum is designed to provide the students with a basic understanding of social behavior, problem-solving skills related to a wide variety of human activities, and the ability to conduct, analyze, interpret, and apply social research in its many settings. In addition, the student has the opportunity to specialize in one of several social sciences or related fields, drawing upon the resources of the entire university, or to continue to pursue a program of interdisciplinary studies. Consequently, graduates of the program, depending upon their career goals and objectives, may acquire a diverse portfolio of skills that are highly in demand in government, public service, education, industry, and business.

**Recommended Preparation**

Before admission, a student should have completed the following coursework to graduate with 120 hours: three hours in Introduction to Anthropology and twelve hours from among the following: six hours in written or oral composition; six hours in humanities and arts; and six hours in science and mathematics.

Speech-Communication Studies

Students in the undergraduate speech-communication studies major learn communication theories and concepts, and develop a more accurate perception of self and others through effective speaking and listening. The major demonstrates how people communicate face-to-face, in small groups, in organizations, public settings, and in relation to technology. Students also gain an understanding of how people of various social and cultural backgrounds communicate.

The primary focus of the undergraduate major is to prepare students in the basic principles of communication leading toward the development of specialized interests in a particular career. The degree program enables students to develop career areas in business, government, education, personnel management, advertising, public relations, and human services, as well as preparing them for advanced study in communication and related areas.

Recommended Preparation
To graduate with 120 hours, a student should have completed the following coursework before admission: three hours in fundamentals of speech, three hours in another speech course, six hours in composition/rhetoric; and liberal education courses in humanities and arts (6 hours), social sciences (6 hours) and science/mathematics (6 hours).

Degree Requirements

College of Business and Public Administration

Business Administration (B.A.)
Business and Technology (B.A.)
Criminal Justice (B.A.)
Office Administration (B.A.)
Public Administration (B.A.)

The College of Business and Public Administration has designed its undergraduate majors to prepare students for careers in business, government, and industry. Because each of the functions of a complex business or government organization is interrelated, students are required to be familiar with the functional areas of business. The college offers majors leading to the bachelor of arts in business administration, business and technology, criminal justice, office administration, and public administration. The business administration major offers, as part of its curriculum, an opportunity for students to pursue an indepth study in one of the following concentrations: accounting, finance, management information systems, marketing, personnel management and labor relations, and production management. The business and technology major is intended to prepare students for careers which require both technical knowledge and basic business skills. The office administration major prepares students for careers as administrative managers of office operations. The public administration major is designed to prepare students for the problems and techniques needed for executive leadership in government. The undergraduate criminal justice major is planned to provide a broad awareness of the criminal justice system and prepares students for careers in law enforcement, corrections, and consumer protection.

College Policies

Proficiency Examinations
Students in the College of Business and Public Administration are strongly encouraged to review English composition and algebra before taking the university competency examinations. Moreover, students majoring in business administration must take an additional examination in intermediate algebra. If unsuccessful in passing either the university competency examinations or the intermediate algebra examination, students must successfully complete specified English and/or mathematics courses.

Student Study Plans
Student study plans are developed with the student advisors during the first trimester of enrollment. The advisor will explain the degree program and use the student’s transcripts to develop a study plan that will lead to degree completion in the major to which the student has been admitted. The study plan must be signed by an advisor. Students must have an approved study plan on file in the college office to register for a subsequent trimester.

Announcements
Students are responsible for checking the college bulletin board for announcements concerning scheduling, policies, and collegial procedures.
Residency Requirements
Undergraduate students in the College of Business and Public Administration must complete a minimum of 30 credit hours at Governors State University.

Internships
All internships will be coordinated by appropriate faculty in the College of Business and Public Administration after approval by the division chairperson and the dean. Internships are intended for degree-seeking students who meet specific guidelines. These guidelines are available in the college office. Students must apply in the academic term before enrollment.

Electives
All business, criminal justice, and public administration electives must be approved by the dean or his designee. University policy allows undergraduates to take a maximum of twelve elective credit hours on the pass/no credit grading option. Students will not be permitted to choose the pass/no credit option for core requirements, requirements beyond the core, or for business, criminal justice, and public administration electives.

Repeating Courses
Beginning with students admitted for the fall 1982 trimester, a student who has enrolled in the same course three times without receiving a passing grade is required to receive permission from the dean to register for that class a fourth time.

Course Substitution
Course substitution must be approved by the dean or his designee. The substitution is valid only for the term specified.

Independent Study
In addition to the faculty sponsor and division chairperson, the dean of the College of Business and Public Administration must approve an independent study. Students who have not successfully completed the competency examinations or successfully completed the required courses will not be allowed to register for independent study courses. Only CBPA degree-seeking students completing their last trimester should apply for independent study.

Limitations on Nontraditional Courses
Undergraduate students in the College of Business and Public Administration shall take a minimum of 54 upper-division undergraduate hours in regularly scheduled courses for fulfilling the degree requirements. Exceptions to this policy must be approved by the dean of the college.

Transfer Credit
At the undergraduate level, "D" grades earned at another institution are not transferable unless they were accepted for an associate's degree.

General Admission and Degree Requirements
All applicants must meet university admission and degree requirements. (See Admissions and Degree Requirements sections.) It is recommended that students complete courses in communications, humanities and arts, science and math, and social science
before admission to meet liberal education requirements within the 120 credit hour minimum required for a bachelor’s degree.

**Specific Major Requirements**
Following are detailed requirements for undergraduate majors and concentrations in the College of Business and Public Administration. Some majors have special admission requirements in addition to university requirements. Special admission requirements for each major are noted where they apply. Specific degree requirements for each major and concentration are noted as well.

**Presentation of Curricular Information**
The information presented for each major and/or concentration reflects the total hours required for the baccalaureate degree. Students will develop a study plan during the first term of enrollment. Credits earned before admission will be applied toward degree requirements where equivalencies exist or as elective credit, as outlined in the policy on transfer credit. After application of transfer credit, proficiency credit, and/or experiential learning credit, the study plan details the courses/credits remaining which are required to graduate with the specific major/concentration.

**Business Administration**
The bachelor of arts in business administration degree prepares students for positions of leadership in business. Students are prepared for the challenges of professional life through the study of the functional areas of business in the business core portion of the program. In addition, students in the program may select a concentration in one of the following fields: accounting, finance, management information systems, marketing, personnel management and labor relations, and production management.

**Recommended Preparation**
Before admission students should have completed courses in humanities and arts, science and math, and social science to meet the liberal education requirements. Students should have also earned at least eighteen hours of undergraduate coursework in business, three hours in algebra and calculus, and six hours of written communication to graduate with 120 hours as noted.

Business and Technology

The bachelor of arts in business and technology degree is a capstone program to the many varied technical programs offered at community colleges. It is intended to prepare students for careers which require both technical knowledge and basic business skills. It is ideal for technical program graduates interested in continuing their education in the business area.
The degree offers two specializations, one in small business management and retailing, and the other in industrial management and supervision. The small business management and retailing concentration provides students interested in becoming entrepreneurs with a better understanding of the problems and rewards of owning and operating a small business. The industrial management and supervision concentration prepares students to bridge the gap between technical employees and managers. Students applying to the industrial management and supervision concentration must have three years of approved industrial work experience for admission.

**Special Admission Requirements**
In addition to the university criteria, applicants must have earned an associate of applied science in a technical major from a regionally-accredited institution of higher education. Students not meeting the admission requirement of an A.A.S. in a technical program, but who have completed 27 or more hours in technical coursework and have met other university admission criteria, may be considered for admission.

**Recommended Preparation**
Before admission students should have completed three hours in communications, three hours in humanities and art, three hours in social science, and three hours in science or math, and six additional hours from any combination of these fields.

**Degree Requirements**

Industrial Management and Supervision Concentration

Special Admission Requirements
In addition to the university criteria and those for the business and technology major, applicants intending to elect a concentration in industrial management and supervision must have completed a minimum of three years of approved industrial work experience. A letter from current or previous employer(s) will be required to evaluate appropriate work experience. This information should be submitted with the admissions application.

Criminal Justice

Criminal justice as a field of study covers the traditional aspects of the criminal justice system: law enforcement, courts and the judiciary, corrections, and juvenile justice. It also recognizes the interdependence of social traditions, values and legal structures that necessarily impact on policy questions in a democratic society. The major focuses on the social problems of crime and delinquency and the methods of managing these problems for the social good.
The requirements for the degree include the development and effective use of interpersonal communication skills; a broad social behavioral approach to the understanding of crime, the process and issues relevant to each component of the criminal/justice system and its agencies, and crime prevention; supervisory and management skills, constitutional rights and restraints, substance abuse, alcoholism, and related curricular applications to criminal justice; the development of analytical skills through research, statistics, and computer applications; and lastly, a synthesis through an internship experience.

Recommended Preparation
Before admission students should have completed three hours of algebra, six hours of written communication, and nine hours of administration coursework to graduate with 120 hours as noted.

Notes:
* Students having had career experience in a criminal justice agency may substitute three hours of elective coursework in lieu of this requirement.
** Fifteen hours of business, public administration, and/or other related courses must be approved by the advisor.

Office Administration

The bachelor of arts degree in office administration prepares students for careers as administrative managers in private and public organizations. The curriculum includes those areas necessary for modern business office management: personnel management, space planning and design, communications, work flow, and measurement.
Moreover, the courses in the curriculum are designed so that students develop an understanding of the administrative functions in business. Thus, the areas of business, including accounting, finance, economics, management information systems, and marketing, form an integral component of the office administration major.

**Recommended Preparation**
Before admission students should have earned three hours of algebra, six hours of written communication, and nine hours in business courses to graduate with 120 hours as noted.

**Public Administration**

The bachelor of arts degree in public administration is designed to prepare students to deal with problems relevant to public policy, organization development, management, budgeting, planning, and personnel concerns. The major also contains courses in the areas of local government, political theory, management techniques, management information systems, and criminal justice. Students completing the undergraduate public administration major have a comprehensive understanding of the field of public administration and are prepared for administrative responsibility within a democratic political system.

**Recommended Preparation**
Before admission students should have completed courses in humanities and arts, science and math, and social science to meet the liberal education requirements. Students also should have earned fifteen hours from among the following courses: three hours of algebra; six hours of written communication; and six hours from statistics, economics, government, and/or public administration courses.

College of Education

Elementary Education (B.A.)
Psychology (B.A.)

Minor
Psychology

The College of Education offers two majors leading to the bachelor of arts degree: elementary education and psychology with a concentration in mental health.

The emphasis of the elementary education major is to prepare highly qualified teachers for kindergarten through middle school or junior high school. The curriculum focuses on teacher preparation necessary to meet the changing educational needs of society.

The psychology major presents a study of human behavior from a multidisciplinary perspective with an emphasis on systems of psychology and human development, as well as experiences in human relations development and training.

Certification
The Illinois State Board of Education has approved the elementary education program for purposes of teacher certification. Completion of the elementary program leads to the Standard Elementary Certificate.

Admission and Degree Requirements
All applicants must meet university admission and degree requirements listed in Admissions and Degree Requirements sections elsewhere in this Catalog. Students should complete courses in oral and written communications, humanities and arts, science and mathematics, and social science before admission to meet liberal education requirements within the 120 credit hour minimum required for a bachelor's degree.

Special admission requirements, if applicable, for each major are detailed below as are the specific degree requirements for each major and concentration.

Student Study Plans
Study plans will be developed for students during their first term at GSU. Credits earned before admission will be applied toward degree requirements where equivalencies exist, or as elective credit, as outlined in the policy on transfer credit. After application of transfer credit, proficiency credit, and/or experiential learning credit, study plans detail the courses/credits required for graduation in the specific major/concentration.

Elementary Education
The elementary education major prepares students for teaching grades K-9. Core courses provide professional preparation for teaching, and general education courses expand students' knowledge of areas included in elementary curricula. This curriculum provides a combination of classroom instruction, pre-student teaching field experiences, and student teaching.
Certification
This program is approved by the Illinois State Board of Education for recommendation of the Standard Elementary Certificate by entitlement. To be recommended for certification by Governors State University, students must complete at least 78 hours in general education and the core requirements in elementary education. General education courses may include both lower and upper division coursework. Students must earn a "B" or better in EDUC499, Student Teaching: Elementary. Students must also provide evidence of successful completion of the Illinois and United States Constitution examination and meet additional requirements listed in the Teacher Certification section elsewhere in this Catalog.

To be recommended by Governors State University, students must apply for the certificate within two years of completing the program.

Recommended Preparation
Before admission, students should complete 60 semester hours. The following distribution is recommended: six hours of composition, three hours of speech, three hours of American history, three hours of U.S. government, three hours of introductory psychology, three hours of introductory sociology, four hours of art and music, three hours of literature, biological, and physical sciences (including laboratory work) to total twelve hours, three hours of college algebra, three hours of mathematics concepts and structures, two hours of health or nutrition, three hours in computer education (equivalent to EDCP500) and nine hours in a teaching specialization.

Coursework for meeting these requirements must be college level work and may not include remedial courses even if college credit is granted. Generally, this coursework must be at the 100 level or higher and applicable toward a degree at the institution providing the instruction. Courses with grades below "C" will not be accepted toward the degree.

Admission to Student Teaching
Admission to student teaching is required before enrolling in EDUC499, Student Teaching: Elementary. To be admitted, students must complete at least 72 hours of general education requirements with a GPA of 2.75 or better in courses taken at Governors State University, complete all core requirements including 100 hours of field experience with a GPA of 3.0 or better (no grade below "C"), and complete at least fifteen hours in the teaching specialization with a GPA of 2.75 or better. An application certifying that these requirements have been met must be submitted by March 1 for fall or by June 1 for winter to the coordinator of field experiences. Student teaching is not offered in the spring/summer trimester.

Degree Requirements
In addition to university requirements, students must: (1) complete 42 hours of professional education (see core requirements) and 78 hours of general education with no grade below a "C" (see additional requirements); (2) maintain a GPA of 3.0 or better in core courses; 2.75 or better in all general education coursework taken at Governors State University; (3) no grade below a "C" in any coursework at Governors State University; and (4) complete all coursework requirements at Governors State University within five calendar years.

Each student's academic progress will be reviewed periodically by a committee of faculty appointed by the dean of the college. A student not maintaining satisfactory progress as defined in the Division of Education Undergraduate Student Handbook may be dismissed from the major.

Psychology

The undergraduate major in psychology provides students with a knowledge of the factors which affect human behavior and the techniques which treat behavioral and psychological disorders. The curriculum provides many opportunities for development of special interests, personal growth, and research in the behavioral sciences, under faculty supervision.

Undergraduate students who expect to do graduate study in psychology should, with the assistance of their advisor, carefully select the courses which will qualify them for admission to a graduate program. Graduate programs commonly require 24-30 hours in undergraduate psychology including statistics, research methodology, cognitive/learning, developmental psychology, experimental psychology, social psychology, and abnormal psychology.

Students with an interest in the area of mental health may pursue this concentration within the psychology major. The mental health concentration focuses on recent trends and legislation to provide services in the community, providing treatment in the least restrictive environment, and to broaden the perspective of mental health from servicing patients to servicing persons experiencing emotional difficulties because of economic hardships, family problems, or physical or social handicaps. Graduates are prepared for employment in both privately and publicly funded agencies providing mental health services.

## Psychology Minor

An undergraduate minor in the area of psychology is offered to students majoring in other fields. This minor is particularly appropriate for those students whose area of study relies heavily upon knowledge of psychology, as well as for those students who simply desire additional work in psychology.

The undergraduate degree programs in the College of Health Professions prepare students for a variety of employment opportunities in the health field or for further education in graduate programs. In addition to traditional lecture-discussion courses all programs provide extensive field experiences through a vast network of hospitals and medical centers in the Chicago region. The college offers a few courses of general interest to other students, but most courses are designed to meet the professional education needs of the various majors. The college also provides continuing education courses for health professionals at many off-campus locations throughout the metropolitan region.

Certifications and/or Accreditations
The medical technology major is fully accredited by the American Medical Association’s Committee on Allied Health Education and Accreditation (CAHEA). Graduates are eligible for certification offered by the Board of Registry, American Society of Clinical Pathologists (ASCP), and the National Certification Agency for Clinical Laboratory Personnel (NCA).

Nursing majors are approved by the Illinois Department of Registration and Education. The baccalaureate nursing program is accredited by the National League for Nursing.

General Admission and Degree Requirements
All applicants must meet university admission and degree requirements. (See Admissions and Degree Requirements sections.) It is recommended that students complete courses in communications, humanities and arts, science and math, and social science before admission to meet liberal education requirements within the 120 credit hour minimum required for a bachelor's degree.

Specific Major Requirements
Following are detailed requirements for the undergraduate majors and concentrations in the College of Health Professions. Some majors have special admission requirements in addition to university requirements. The special admission requirements for each major are noted where they apply. The specific degree requirements for each major and concentration are noted as well.

Presentation of Curricular Information
The information presented for each major and/or concentration reflects the total hours required for the baccalaureate degree. Students will develop a study plan during the first term of enrollment. Credits earned before admission will be applied toward degree requirements where equivalencies exist, or as elective credit, as outlined in the policy on transfer credit. After application of transfer credit, proficiency credit, and/or experiential learning credit, the study plan details the courses/credits remaining which
are required to graduate with the specific major/concentration. Once the student study plan has been approved and signed by the advisor and division chairperson, the advisor's signature will not be required on the registration form. (Courses which require permission of the instructor will require that instructor's signature on the "written permission" line of the registration form.) It is the responsibility of the student to enroll, in the proper sequence, in courses which fulfill the requirements of the approved study plan. Courses in which the student enrolls that are not on the study plan may not be applicable to degree requirements. Any changes in the study plan must be approved by the advisor and division chairperson. Students should consult advisors and this Catalog for prerequisite, specific major, and university degree requirements.

Communication Disorders

The undergraduate major in communication disorders offers preprofessional education in speech-language pathology and related areas. The curriculum includes courses in fundamental areas necessary to understand normal aspects of speech, language, and hearing. Coursework is also offered to give the student basic knowledge concerning disorders of speech, language, and hearing and approaches to their assessment and remediation. Education at this level is considered prerequisite to a graduate degree program.

As a preprofessional curriculum, the undergraduate major does not qualify students for state certification, but rather provides the foundation necessary for the graduate curriculum which leads to certification.

Recommended Preparation

Before admission students should complete as much as possible of the following lower division coursework to graduate with 120 hours as noted: written communication, six hours; oral communication, three hours; mathematics, three hours; biological and physical science, nine hours including laboratory; American history, three hours; U.S. government, three hours; humanities, nine hours; social sciences, three hours; and health, two hours. At least one three-hour course must be taken in non-Western or third world cultures from either the humanities or social sciences.

Degree Requirements

In addition to university requirements, students must provide evidence of successful completion of the Illinois and United States Constitution examination.

Health Administration

The undergraduate health administration major trains administrators who will be able to develop and manage health services organizations and programs. The curriculum is designed to be an educational mechanism through which students obtain the understanding and skills necessary for health administration. Specifically, the major is designed to train administrators for unit or department head positions in large and complex health care institutions such as hospitals and for executive director positions in small and/or less complex health care institutions such as clinics, nursing homes, and family service agencies. The undergraduate major has full membership status granted by the Association of University Programs in Health Administration (AUPHA).

Degree Requirements

In addition to meeting university requirements, students must achieve a grade of "C" or better in all core courses and selective upper-division courses.

Core Requirements

- HLAD 325 Health Care Organization .................................. 3
- HLAD 330 Medical Ethics ............................................. 3

- MIS 301 Introduction to Management Information Systems ........... 3
- HLAD 490 Health Administration Practicum .......................... 3
Medical Technology

This major is a two-year professional curriculum which prepares students for careers in a variety of clinical laboratory settings. The major seeks to provide instruction and evaluation based upon identified competencies which reflect both the needs within the profession and those of the student. The clinical laboratory experience gives students the opportunity to perform simple and complex laboratory analyses, to gain knowledge of clinical medicine, and to recognize the importance of quality assurance. Classroom material integrated with laboratory work helps students develop skill in data correlation, decision-making, and problem-solving. While developing technical competency, students are provided learning opportunities that introduce them to the expanding role of the medical technologist in the areas of administration, research, and education.

Accreditation and Certification
The medical technology major at GSU is accredited by the American Medical Association's Committee on Allied Health Education and Accreditation (CAHEA). Graduates are eligible for certification offered by the Board of Registry, American Society of Clinical Pathologists (ASCP) and the National Certification Agency for Clinical Laboratory Personnel (NCA). Students who seek certification from these agencies must successfully complete the program and pass an examination administered by the certifying agency. The agencies require that Governors State University verify successful completion of the academic program.

Special Admission Requirements
Normally twelve full-time students are admitted in the fall trimester. Additionally, a limited number of part-time students are admitted during the year. Applicants who meet all requirements for admission will be admitted on a first-come, first-served basis until the enrollment limit is reached.

In addition to university criteria, an applicant must:

1. have earned credit within the past seven years with a grade of "C" or better in the following prerequisite courses: eight semester hours of inorganic chemistry, four semester hours of organic chemistry, eight semester hours of general biology, four semester hours of microbiology, and three hours of college algebra.

2. submit two (2) standard written references from former science instructors, teaching assistants, faculty advisors, or employers and supervisors.

3. complete a personal interview with members of the admissions committee of the medical technology faculty. This is part of the admission process. The medical technology program director will schedule the interview with the applicant upon receipt of application. Every effort is made to arrange interviews at the convenience of applicants. The interview is designed to assess the following: commitment to career goals in medical technology, verification of academic records, and self-assessment of potential success in the field.
Applicants with credentials from countries other than the United States must have them evaluated through the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). A copy of the NAACLS evaluation should be sent with transcripts to the Office of Admissions.

Applicants who have completed a CAHEA approved medical laboratory technician program, or equivalent, may petition for credit by proficiency examination in selected 300 level medical technology courses.

Recommended Preparation
Before admission, the following lower division coursework is recommended to graduate with 125 hours as noted: six hours in English composition, three hours in literature, six hours in humanities, six hours in social science, and six hours in additional courses in the humanities, social sciences, or arts.

Nursing

The nursing major provides registered nurses who are graduates from either an associate’s degree or a diploma program an opportunity to obtain a baccalaureate degree in nursing. This major is designed to prepare nurses to practice as generalists in health care settings with clients of all ages and acquaints the nurse with the historical development of nursing and trends affecting nursing and health care delivery. Leadership abilities of the professional nurse are emphasized. The theoretical basis of nursing is explained as well as the changing scope of nursing practice. Beginning research activities are developed. This major also prepares students for future graduate nursing education.

Accreditation

This major is accredited by the National League for Nursing Council of Baccalaureate and Higher Degrees and is approved by the Illinois Department of Registration and Education.

Special Admission Requirements

In addition to meeting university criteria, applicants must:

1. Have earned at least 26 hours of lower division nursing credits with a grade of “C” or better. Applicants with an associate’s degree in nursing may transfer this credit; applicants who have graduated from a diploma program may receive this credit by taking the American College Testing (ACT) Proficiency Examinations in Maternal and Child Nursing (AA#453), Adult Nursing (AA#554), and Psychiatric/Mental Health Nursing (AA#503). These examinations must be passed with a standard score of 45 or better. Examination reports reflecting acceptable scores on each examination must be on file before admission to the major. These examinations are administered at GSU by the Office of Student Development.

2. Have earned at least 34 additional lower division hours as follows: four hours of anatomy and physiology, four hours of microbiology, four hours of general chemistry, four hours of organic chemistry, three hours of English composition, three hours of rhetoric, three hours in a humanities elective, three hours of general psychology, three hours of general sociology, and three hours in a social sciences elective. Applicants with an associate’s degree in nursing may be admitted conditionally pending completion of any identified deficiencies in these courses; diploma program graduates must have completed the coursework before admission to the program. Applicants lacking this credit are encouraged to take the College Level Examination Program (CLEP) tests in these areas. These examinations are administered at various institutions of higher education throughout the Chicago metropolitan area.

3. Have a minimum of two years experience as a registered nurse within the past five years or have graduated from an approved associate’s degree program or diploma school of nursing within the last two calendar years.
4. Successfully complete the Competency Assessment for Admission Test (CAAT) with a standard score of 53 (66th percentile) on the Test of Clinical Nursing Knowledge Base and a standard score of 23 (66th percentile) on the Test of Clinical Nursing Skills. These tests will be administered through the Division of Nursing.

5. Be currently licensed as a registered nurse in the state of Illinois.

Applicants with credentials from countries other than the U.S. must have their credentials evaluated through the Office of Admissions to determine eligibility for admission. These applicants will be required to take and pass the Test of English As a Foreign Language (TOEFL) with a score of 500 or better.

Applicants must assume all responsibility for fees associated with testing. All credentials must be submitted to the Office of Admissions. No applicant can be fully admitted to the program until all required credentials are on file in the Office of Admissions.

Degree Requirements
In addition to university requirements, a student must earn a grade of "C" or better in all nursing courses. A student may repeat a nursing course only once. If a nursing course is failed twice, the student is academically dismissed from the degree program.

Social Work
The social work major prepares students for entry level employment in various social work and social welfare positions. The student is equipped with an interdisciplinary foundation which taps disciplines such as communication, sociology, psychology,
economics, political science, research methods, anthropology, and history. While the curriculum is designed to provide the necessary requirements for a basic foundation, there is also an opportunity for social work students to explore individual areas of interest such as gerontology, corrections, or child welfare through their choice of electives.

Students in social work may select a concentration in alcoholism sciences* which prepares them to deal with the many manifestations of the abuse of alcohol in our society. The problems associated with the disease of alcoholism are present in virtually all arenas of social work and the individual who has studied this disease will be equipped to confront these problems directly in professional practice. Students selecting this concentration are required to complete a supervised field practicum in an alcoholism treatment agency.

* NOTE: At the time of publication, a request was pending before the governing boards to change the alcoholism sciences concentration to a minor in alcoholism and drug abuse sciences.

Recommended Preparation
Before admission, students should have completed the following 39 hours of lower division coursework to graduate with 120 hours: six hours of English composition, three hours of oral communication, six hours of mathematics and science, six hours of arts and humanities, and three hours each in American history, cultural or social anthropology, general psychology, macroeconomics, political science (American government), and general sociology. Deficiencies must be completed during the first three trimesters of enrollment.

Degree Requirements
In addition to university requirements, students must complete an approved clock-hour field practicum.

Board of Governors Degree Program

Bachelor of Arts (B.A.)

Governors State University, in cooperation with the four other universities which comprise the Board of Governors system, offers a unique program designed to meet the needs of mature adults with job and family commitments who wish to complete an undergraduate degree. A major characteristic of the program is the recognition that many adults through their personal and professional experiences have acquired a large amount of learning. The program is designed to assess the adult learner's experience and to equate it to academic credit where appropriate.

The Board of Governors system-wide program was the recipient of the Theodore G. Mitau award in 1982. The award was given by the American Association of State Colleges and Universities which chose the program as one of the top six innovative programs offered at state institutions throughout the United States. The Governors State University program, established in 1973, has enrolled more than 5,000 students and has graduated more than 1,500 students.

The individualized and flexible program permits the student to use regular Governors State University courses, transfer credits from regionally-accredited institutions, independent study courses through correspondence, telecourses, and extension courses taught at several sites. The student is also given the option of applying for academic credit through the preparation of a prior learning portfolio which documents specific prior learning gained through nonacademic pursuits and experiences. University faculty evaluate and recommend credit for prior learning. Students are also encouraged to use proficiency examinations such as the College Level Examination Program (CLEP) and the American College Testing Program Proficiency Examination Program (ACT-PEP) as an alternate method to acquire prior nonacademic learning credit.

Admission Requirements

A student begins the admission process by submitting an undergraduate application for admission, approved by the BOG office, to the Office of Admissions before the application and credential deadline for the term in which enrollment is desired. Students are admissible to the program on a first-come, first-served basis if they have a total of 60 semester hours of academic work from a regionally-accredited institution or the equivalent which may include credit for prior nonacademic learning. The student must request official transcripts from all previous institutions attended, which reflect all coursework attempted and earned, including grades. These transcripts should be forwarded to the Office of Admissions. If a student has left a previous college for academic reasons, he/she may not be admitted to the Board of Governors Degree Program for six months following academic suspension (dismissal). If assessment of prior experiential learning is required for admission, portfolio materials should be submitted directly to the BOG office.

Degree Requirements

Before graduation with a Board of Governors bachelor of arts degree, students must meet the following requirements:

Students must have earned:

- 120 total credit hours or equivalent;
— 40 credit hours or equivalent at the upper-division (junior-senior) level;
— 15 credit hours at one Board of Governors university or from a combination of
   Board of Governors universities;
— 12 credit hours each in social science, natural science/mathematics, and
   humanities earned in any combination or under any approved method.

Additional requirements include a ‘‘C’’ (2.0) overall grade point average with a ‘‘C’’ or
better grade in any coursework taken after admission to the degree program. Students
must meet the requirements of the university competency testing policy and a U.S. and
Illinois Constitution testing requirement.

Governors State University offers undergraduate courses for BOG/B.A. students at
diverse sites throughout the Governors State University service region. In addition, in­
dependent study courses and telecourses are available in a variety of subjects.

Students may obtain additional information from the BOG Degree Program Office. Pro­
spective students who have not completed 60 semester hours of college work, and
who are applying for admission on the basis of credit for prior experiential learning or
credit based on proficiency examination scores, should contact the BOG program staff
at least six months before their desired term of admission. These students must attend a
special seminar which provides directions in preparing the prior learning portfolio. The
seminar is offered each trimester.
Graduate Studies
Graduate education is the pursuit of knowledge and the means to knowledge at an advanced level. Graduate education is distinct and different from basic levels of education both in kind and in degree. It demands of students greater intellectual maturity and autonomy, a deeper responsibility for their own learning, more intense study, and the mastery of different and more complex skills. An earned graduate degree is a distinction. Award of the degree symbolizes both the student's accomplishment and the university's endorsement. A student may judge his or her own achievement, but the university must decide what it will or will not endorse. Specifically, graduate education imposes the following obligations.

A student receiving a master's degree must have demonstrated:
- an in-depth knowledge of significant theories, issues and findings, and mastery of appropriate skills within a specific discipline;
- the ability to apply such knowledge and skills;
- the ability to read, interpret, and evaluate research literature and to relate results to selected areas of interest;
- the ability to analyze problems and to critique attempted solutions, especially within the student’s own discipline;
- the ability to integrate knowledge from a variety of disciplines;
- the ability to design and implement a research, scholarly, or creative project; and
- the ability to communicate scholarly thought to professional colleagues through writing and discussion.

Graduate Student Status

There are three categories of graduate students:

**Graduate Students-at-Large** are those who have earned a bachelor’s degree and are taking courses but not pursuing a graduate degree in a specific major at the time of admission. No more than fifteen credit hours taken as a graduate student-at-large shall be transferrable toward the requirements of any degree program and such transfer will be subject to the degree requirements in effect at the time of admission to the specific major. Graduate students-at-large may not take graduate level courses designated as reserved for master's degree candidates only.

**Graduate Degree-Seeking Students** are those who meet the established admission requirements of the university and college as well as those for the specific master's degree sought. Admission to a graduate major does not carry with it, nor guarantee, admission to degree candidacy in the major.

**Master's Degree Candidates** are those degree-seeking students who have completed an approved graduate study plan; completed the specified programmatic requirements; applied for and been admitted to candidacy; and have had the date of program approval filed with the Registrar's Office for inclusion in the candidate's academic record.
Master’s Final Project

A master’s degree candidate shall prepare a thesis or project, do a practicum/internship, or in some other way demonstrate an integration of his/her work (as described below) that is accepted by a committee of three approved faculty. Each major shall provide students a copy of detailed procedures and specify appropriate manuals of style for the final project alternatives required in the major.

Final alternatives will vary by major; however, each major shall require one or more of the following:

- **The master’s thesis** must present evidence of (a) a thorough review and understanding of the literature germane to the subject, (b) the ability to do independent research, and (c) the preparation of a manuscript which conforms to generally recognized standards of scientific and scholarly writing in the discipline.

- **The master’s project** is a sustained work that intellectually supports the degree program but which may not be, in its entirety, a written document (thesis) nor an internship (for example, creative projects in the fine and performing arts). However, it must provide evidence of the ability and effort to carry out a major application of theory or advanced methods relative to master’s level work in the profession or discipline.

- **The graduate practicum/internship** is designed to provide an important and new learning experience to the student that is in some way complementary to the academic coursework which it follows. The practicum/internship should provide an opportunity for the student to evaluate the relevance of theoretical and academic perspectives in the professional field.

**Additional Study and Examinations**, one or more graduate-only (numbered 800-999) courses and comprehensive examinations may be designated as a master’s final project alternative.

The graduate curricula of the College of Arts and Sciences provide a variety of opportunities for students seeking career advancement or personal enrichment. In general, the curricula consist of a combination of advanced coursework and research. Students have the opportunity to work closely, both in the classroom and on their research, with faculty who have distinguished records as teachers and scholars.

The college's facilities include a visual arts gallery, a photographic gallery, music studios, art studios, a photographic studio, a film studio, and a recital hall. Communication students have access to the university's professional color television studios and audio facilities. The science division features hands-on experience with scientific instrumentation and a variety of facilities such as chemistry laboratories, biology laboratories, plant growth chambers, a greenhouse, and field equipment including a mobile laboratory. In addition to the other university computer facilities, the college has a microcomputer laboratory for advanced studies and research.

Students in the College of Arts and Sciences also benefit from the numerous events sponsored by the college during the year in its role as a regional cultural resource. Speakers, performers, and artists who come to the campus for these events frequently visit classes and/or hold special workshops, clinics, or discussions open to students in their fields.

Advanced students in music perform as soloists and in the college's jazz, electronic, symphonic, and choral groups. Art and photography students have opportunities to exhibit their work. Students in other majors present research papers both on and off campus and participate in the various workshops, symposia, and conferences sponsored by the college. Social sciences and communication students are able to draw upon the diversity of the entire Chicago metropolitan region in their research, learning experiences, and application of their knowledge to occupational settings. These experiences enrich the intellectual life of the university and provide stimulating challenges for its graduate students.

General Admission and Degree Requirements
All applicants must meet university admission and degree requirements. (See Admission and Degree Requirements sections.)
Specific Major Requirements
Following are detailed requirements for all the graduate majors in the College of Arts and Sciences. Some majors have special admission requirements in addition to university requirements. The major admission requirements are noted where they apply. The specific degree requirements for each major are noted as well.

*NOTE: At the time of publication, an M.A. in Political Studies has been approved by the university's governing boards. The curriculum for the program will be available by July 1987. Students seeking additional information should contact the College of Arts and Sciences, extension 2441.

Analytical Chemistry
The Master of Science degree in analytical chemistry prepares students for employment as analytical chemists in a wide range of public and private laboratories that specialize in the application of wet chemical and instrumental procedure to problem-solving. This graduate major is designed to build upon an undergraduate background in chemistry or related field, providing a theoretical base in analytical chemistry while emphasizing practical experience with analytical instrumentation. Hands-on experience with instrumentation is the focus of the curriculum and is its most important asset. The curriculum also has a biochemistry component, recognizing the importance of future genetic engineering technology and the analytical techniques that will need to be developed.

In this curriculum, a student may choose a non-thesis or thesis option. In the non-thesis option a student completes coursework in an area of interest (e.g., computer science, science education) in addition to completing a master's project in conjunction with a faculty advisor. This option would be appropriate for secondary science teachers who desire to strengthen their background in chemistry and the teaching of science.

In the thesis option, a student completes a master's project, usually related to a faculty advisor's research, prepares a formal thesis manuscript, and presents the study in a seminar. The thesis option would be appropriate for students who have focused research interests or who intend to pursue doctoral study.

Faculty research interests range widely and include topics such as photochemistry, spectrochemistry, trace analysis of organic pesticides, chromatography and G.C./Mass Spectrometry, electrochemistry, analysis of metals in the environment, water analysis, biochemistry, computational chemistry, equations of state, and particular aspects of science education.

Recommended Preparation
Before admission, applicants should have completed the following coursework with a grade of "C" or better in each course: four hours of Analytical Chemistry (CHEM315) with lab (CHEM316), eight hours of Physical Chemistry with lab (CHEM366, CHEM367, CHEM368, CHEM369), eight hours of Organic Chemistry with lab (CHEM322, CHEM323, CHEM522, CHEM523), three hours of Biochemistry (CHEM544), three hours of Statistical Methods (STAT520), and three hours of Computer Programming (BASIC, FORTRAN, or Pascal—CPSC320, CPSC330, or CPSC340). Students lacking one or more of these courses or having less than a "C" in a course may be admitted to the program. However, they will have to take or repeat the appropriate course(s) at Governors State University.

Art

The graduate major in art is focused around a core so that students are able to obtain specific training within one of the five areas of specialization: painting/drawing, printmaking/design, sculpture, photography, and art history (Western and non-Western). Also included in the core are requirements for a master's project which, depending on one's area of specialization, will result in either a show or an historical thesis. The remaining courses in the graduate major are chosen within a specific area of specialization with the advisor's guidance.

Special Admission Requirements

Besides meeting university criteria, applicants must: 1) have an undergraduate major in one of the humanities; and 2) have submitted a proposal, acceptable to the degree program advisor, that outlines academic goals with supporting rationale and plan of study and includes examples of previous work (e.g., sculptures, research papers, drawings, prints, or paintings, etc.). Students will not be admitted to the art major until the proposal reflecting potential for graduate work has been approved by the degree program advisor.

The graduate degree program emphasizes an indepth, specialized understanding of communication theories and research, as well as applications and skills pertinent to various careers in social and professional situations. Beyond the core requirements, the program is adapted to the student's individual needs and academic background. Each student plans a program in consultation with an advisor and may enhance or develop communication knowledge and applications in such career areas as government, education, personnel management (administration), advertising, marketing/sales, public relations, counseling/health care and related helping professions. The program also prepares students for further graduate study in communication.

Recommended Preparation
While admission to the major does not require an undergraduate major in communication or a related field, students must have demonstrable competence in oral and written communication skills. Students who have not taken Concepts in Communication (COMS310) and Communication Research (COMS420) or equivalents must take these courses in addition to the degree requirements listed below.

Degree Requirements
Core Requirements
- COMS 810 Communication Theory ................................................. 3
- COMS 820 Graduate Communication Research ........................................ 3
- COMS 635 Interpersonal Communication ............................................. 3
- COMS 650 Organizational Communication, Change, and Development ........ 3
- COMS 860 Communication Training .................................................. 3

Select four hours from between:
- COMS 880 Internship ........................................................................ 4
- COMS 890 Graduate Thesis/Project .................................................. 4

Additional Requirements
In consultation with advisor, select at least thirteen hours from advanced communication courses or other courses outside the major that will serve to enhance or develop knowledge and applications related to the student's career area or personal interests.

Total 32

English
The master's degree in English leads to a concentrated knowledge and understanding of civilization and culture as manifested in literature. The curriculum explores and analyzes major works in their critical contexts, their social origins and implications, and their differing cultural, historical, and philosophical perspectives. The student gains not
only a comprehensive grasp of great literature in English, but also a variety of skills that can be applied to changing personal and societal conditions. This study of English is designed not only to meet the needs of persons involved in the teaching of English, but also for adult students to develop abilities that transcend any narrow specialization or particular career orientation. The program enriches the lives and improves the work of those who undertake it.

Special Admission Requirements
Besides meeting university criteria, applicants must have an undergraduate major in English, literature, language, linguistics, or a related field.

Recommended Preparation
Students without the following undergraduate prerequisite coursework will be required to complete any deficiencies as early as possible during graduate study: three hours in English Literature I, three hours in English Literature II, three hours in American Literature I, three hours in American Literature II, three hours in Shakespeare, and three hours in Literary Criticism. Completion of deficiencies is required in addition to graduate degree requirements noted.

Degree Requirements

Core Requirements 21
ENGL 590 Research Techniques ............................................ 3
ENGL 830 Seminar: Advanced Composition and Rhetorical Theory .......... 3
ENGL 840 Seminar: Philosophy in Literature ................................ 3
ENGL 845 Seminar: English Literature ...................................... 3
ENGL 850 Seminar: American Literature ...................................... 3
ENGL 870 Graduate Research .................................................. 3
ENGL 890 Graduate Thesis/Project .......................................... 3

Additional Requirements 12
With advisor’s approval, students will select at least four courses in literature, writing, linguistics, or closely related fields. Generally, the graduate thesis or project will not be done until after completing the other core courses and the four additional courses.

Total 33

Environmental Biology

The Master of Science degree in environmental biology prepares students as professional biologists with a strong environmental focus. The curriculum also is of interest to certified secondary school biology teachers who wish to develop an environmental focus. Required courses cover the spectrum of environmental biology from physiological and behavioral science to community ecology, while at the same time emphasizing the applied aspects of these disciplines. Students are trained in the application of quantitative methods and in the design of field projects and laboratory study.

In this curriculum, a student may choose a non-thesis or thesis option. In the non-thesis option a student completes coursework in an area of interest (e.g., computer science, science education) in addition to completing a master’s project in conjunction with a faculty advisor. This option would be appropriate for secondary science teachers who desire to strengthen their background in biology and the teaching of science.

In the thesis option, a student completes a master’s project, usually related to a faculty advisor’s research, prepares a formal thesis manuscript, and presents the study in a
seminar. The thesis option would be appropriate for students who have focused research interests or who intend to pursue doctoral study.

Faculty research interests range widely and include topics such as loon behavior, resource partitioning in aquatic communities, forest ecology, rodent population dynamics, avian physiology, peat formation in the Okefenokee Swamp, and particular aspects of science education. Graduates are qualified to assume a variety of professional roles in private or public environmental agencies, secondary schools, or to pursue advanced graduate studies.

**Recommended Preparation**

Before admission, applicants should have completed the following coursework with a grade of "C" or better in each course: eight hours of General Biology, eight hours of General Chemistry, three hours of Ecology: Basic Principles (BIOL 322), four hours of Animal Physiology (BIOL 450) with lab (BIOL 451), three hours of Ecology of Animal Behavior (BIOL 455), four hours of Plant Physiology (BIOL 460) with lab (BIOL 461), and three hours of Statistical Methods (STAT 520). Students lacking one or more of these courses or having less than "C" in a course, may be admitted into the program. However, they will have to take or repeat the appropriate course(s) at Governors State University. Prior coursework in human physiology may substitute for the animal physiology requirement. A course in organic chemistry and a course in computer science are strongly recommended.

Instructional and Training Technology

The instructional and training technology major is designed specifically for students who wish to obtain new or additional skills in: designing and developing training courses and materials, managing human resources, or producing the media component of training courses and materials. The major emphasizes the application of these skills in the private sector—business, industry, consulting firms, adult learning centers, continuing health education, and other settings.

The courses were designed in consultation with trainers, human resource developers, and instructional developers representing twenty-eight Chicago-based businesses and industries. Limited internships for qualified students are available with a variety of metropolitan Chicago firms.

Recommended Preparation
An undergraduate major in one of the following fields is recommended: business, education, media, audiovisual, communications, English, psychology, or liberal arts.

Total | 36
Media Communications

The graduate major in media communications prepares graduates to be sophisticated
and intelligent producers, managers/administrators, and analysts of media commu­
nications. The program combines theory and practice, conceptual courses, and profes­
sional courses in print and video media.

At the M.A. level, the emphases on critical thinking, on analysis, and on research
prepares graduates for careers involving research. Students can stress either media
management or production (i.e., for advanced professional positions at newspapers,
for television or cable systems). The program also serves teachers who need certifica­
tion to teach media communications.

Graduate seminars in contemporary issues are an essential ingredient of study and are
designed to explore the current concerns and theories of the discipline. Students may
include advanced production or graduate research in their individualized study plans.

Recommended Preparation

Admission to the graduate major in media communications does not require a specific
undergraduate major. However, students should have completed the following prerequisite
coursework: 1) MCOM420 Media and Society, or the equivalent; and either 2) undergraduate
production coursework or 3) COMS420 Communication Research, or the equivalent. Students
not having completed the appropriate undergraduate coursework must complete the necessary
prerequisites in addition to other degree requirements listed and before enrolling in the cor­
responding graduate courses; several management courses have prerequisites.

Degree Requirements

In addition to university requirements, students must maintain a “B” grade point average in the
core requirements.

Select nine additional hours of which at least six hours must be in media. 

**Total:** 33

### Music

The graduate music core consists of requirements in theory, music history, applied studies, and ensembles. Students can use the remaining hours required for graduation to focus their studies in theory/composition, pedagogy and methods, and/or performance. All students are required to complete a master's project, the form of which is determined by the programmatic focus—recital, research project, historical study, pedagogical study, etc. In addition to various recitals and concerts annually presented by the university's student organizations and individual students, the major also sponsors performances by the university string quartet, the faculty jazz quartet, solo faculty recitals, and performances by guest artists.

### Special Admission Requirements

Besides meeting university criteria, applicants must: 1) have earned an undergraduate major in music from a regionally accredited college or university; 2) have an undergraduate GPA of 3.0 on a 4.0 scale for all coursework in the music major; and 3) complete a performance audition and receive a quality rating of "B" or better from the music audition committee (This audition is used to determine placement in performance groups.).

Political Studies*

*NOTE: At the time of publication, an M.A. in Political Studies has been approved by the university's governing boards. The curriculum for the program will be available by July 1987. Students seeking additional information about the M.A. in Political Studies should contact the College of Arts and Sciences, extension 2441.

Sociology

The master's degree in sociology is designed to accommodate students from diverse backgrounds who seek to broaden or intensify their knowledge and understandings of the complex social realities within which they exist. The degree program seeks to provide adult and career-oriented students with an advanced understanding of social organization and institutions, social change and modernization, and the ability to conduct, analyze, interpret, and apply social research in a variety of settings. From a core focused on theory and methods, students are encouraged to develop their own program of study in concert with a faculty advisor.

Recommended Preparation

In addition to basic university admission requirements, an undergraduate major in sociology, social sciences, history, anthropology, political science, or coursework in social theory, methods, and research is strongly recommended. Students not having an undergraduate major in one of these fields may be required to take prerequisite coursework. Such prerequisite requirements will be based upon an individual evaluation of previous educational experience.

College of Business and Public Administration

Business Administration (M.B.A.)
Public Administration (M.P.A.)

The College of Business and Public Administration presents strong, theoretical and pragmatic programs at the graduate level which will prepare students for careers in business, government, and industry. The majors are designed with the understanding that students enrolled in the college are pursuing management degrees for careers in the public or private sector. Accordingly, the college offers rigorous programs of study which will challenge students and provide them with the preparation to assume positions of leadership and responsibility. To this end, the college emphasizes clearly defined instructional methods and a curriculum which reflects the growing sophistication of modern management techniques. Graduate majors are designed to accommodate those with undergraduate degrees in business as well as those with undergraduate degrees in liberal arts, sciences, engineering, education, and other disciplines. The college offers graduate courses leading to the master of business administration and master of public administration degrees.

College Policies

Competency Examinations
Competency examinations in written communication are required for all graduate students. M.B.A. students must also take elementary and intermediate algebra examinations. It is advisable for students to review English and/or algebra before testing. Examinations cannot be repeated. Students unsure of their status regarding these examinations should contact the college office. These examinations are administered by collegial personnel twice each trimester. Test dates will be published. Students are responsible for registering for the first available test date.

Students unsuccessful in passing the competency examinations will be required to enroll in appropriate courses during their next trimester of enrollment and must elect the pass/no credit option in these courses.

Transfer Credit
A maximum of nine hours with an earned grade of "B" or better will be approved for transfer from another institution. Graduate students will be expected to complete the M.B.A. and M.P.A. core (21 hours) in the College of Business and Public Administration. Credit earned more than five years before the request for transfer will not be accepted.

Readmission
Governors State University credit earned more than five years before readmission will not apply toward graduate degree requirements unless approved by petition to the dean.

Candidacy Requirement
After admission to the college as a degree-seeking student, graduate students must also apply for candidacy. Application forms are available in the college office. Candidacy status is granted if the following requirements have been met:
1. Satisfaction of any conditions of admission.
2. Satisfaction of the college policy on competency examinations.
3. Completion of all preparatory courses with at least a 'C' grade in each course.
4. GPA of at least 3.0 for all GSU coursework completed as a graduate student.
5. Completion of a minimum of nine credit hours of core requirements and no more than fifteen hours of degree requirements beyond any necessary preparatory coursework.

Students who complete more than fifteen hours of degree requirements before attaining candidacy status will be required to complete eighteen hours, approved by the dean, as a candidate before being approved for graduation by the college.

**Student Course Load**
Graduate students may not take more than twelve hours a trimester without obtaining permission from the dean of the college or his designee.

**Course Substitution**
Course substitution must be approved by the dean or his designee. The substitution is valid only for the term specified.

**Grading**
Students classified as graduate students must earn a "C" grade or better in all courses to receive credit towards graduation.

**Repeating Courses**
A student who has enrolled in the same course three times without receiving a passing grade is required to receive permission from the dean before registration for that course a fourth time.

**Electives**
All business and/or public administration electives must be approved by the dean or his designee.

**Nontraditional Coursework**
Students in the College of Business and Public Administration must take a minimum of 30 graduate hours in regularly scheduled courses to meet degree requirements. Exceptions to this policy must be approved by the dean of the college.

**Independent Study**
Students who have not successfully completed the competency examinations in algebra and written communication or who have not successfully completed the required courses will not be allowed to register for independent study courses. Only CBPA graduate students completing their last trimester should apply for independent study. The dean of the college, in addition to the faculty sponsor and the division chairperson, must approve all applications for independent study.

**Internships**
Internships will be available to all students. Graduate students will be allowed a maximum of three hours of internship toward completion of degree requirements. All internships will be coordinated by the designated faculty in the College of Business and Public Administration.
Credit for Experiential Learning
The College of Business and Public Administration does not grant or accept graduate credit for experiential learning toward graduate degree requirements.

Announcements
Students are responsible for checking the college bulletin board for announcements concerning scheduling, policies, and collegial procedures.

General Admission and Degree Requirements
All applicants must meet university admission and degree requirements. (See Admission and Degree Requirements sections.)

Specific Major Requirements
Following are detailed requirements for the graduate majors in the College of Business and Public Administration. Some majors have special admission requirements. The major admission requirements are noted where they apply. The specific degree requirements for each major are noted as well.

Business Administration
The College of Business and Public Administration offers a graduate major in business administration leading to the degree of Master of Business Administration (M.B.A.). The master of business administration major provides a student the opportunity to prepare for positions of executive leadership. The M.B.A. degree provides a general management program of study designed primarily, but not exclusively, for students with business undergraduate degrees. The major is also designed to accommodate those with undergraduate degrees in the liberal arts, sciences, engineering, education, and other disciplines by providing the necessary preparatory coursework. In the M.B.A. degree program, the student studies a broad core of courses designed to provide an understanding of business operations and management. In addition, elective courses may be used to undertake a modest degree of concentration in a single functional area if desired.

Special Admission Requirements
Besides meeting university criteria, applicants must have taken the Graduate Management Admissions Test (GMAT) before admission and attain at least 950 based upon the following formula:
Undergraduate GPA x 200 + GMAT score $\geq$ 950. A cumulative graduate G.P.A. can be substituted in the above formula for those students who have earned a graduate degree.
Applicants who have not taken the GMAT but who have a 2.75 or higher undergraduate grade point average will be admitted conditionally pending: 1) receipt of the GMAT score by no later than the end of the subsequent trimester, and 2) attainment of a score of 950 or higher based on the above formula. Applicants who have not taken the GMAT and who have less than a 2.75 undergraduate grade point average may be considered for conditional admission.
A conditionally admitted applicant who does not submit a GMAT score on time or who fails to attain a score of at least 950 using the above formula may be refused enrollment for subsequent trimesters.

Recommended Preparation
To ensure that students have a satisfactory command of business fundamentals before taking graduate level courses, at least 27 hours of undergraduate preparatory coursework or their equivalent are required of all M.B.A. students. Students with an undergraduate major in business may be prepared to enroll immediately in graduate level courses. Students who do not have an
undergraduate major in business are expected to complete the necessary prerequisite preparatory coursework. With permission of the dean, students can enroll in graduate level courses in areas for which they have completed the prerequisites before completing all of the preparatory coursework.

Degree Requirements

In addition to university requirements, students must successfully pass competency examinations in elementary and intermediate algebra and written communication or complete appropriate courses in algebra and/or written communication.

A thesis is optional for M.B.A. students. The thesis option provides an opportunity for intensive study of a problem chosen by the student. The thesis option is limited to outstanding students who have been recommended by a minimum of two faculty in the College of Business and Public Administration and approved by the dean. Each student selecting the thesis option will be required to submit a thesis proposal to a faculty member. If the proposal is approved, a thesis advisor and examining committee will be appointed by the dean or his designee. A candidate who is approved for the thesis option will be required to defend the thesis orally. If a thesis is presented in partial fulfillment of the requirements of the degree, the candidate must present a minimum of 27 graduate credit hours. The thesis must be completed within one year after it is approved.

Additional Requirements

Select twelve hours from among courses numbered 500 or above with approval of advisor. A graduate thesis may be elected with approval of dean.

Total 33

NOTE: Students with an accounting background must take ACCT850 instead of ACCT801 to satisfy the M.B.A. core requirement in accounting.

Public Administration

The College of Business and Public Administration offers a graduate degree program in public administration leading to the degree of Master of Public Administration (M.P.A.). The graduate public administration major prepares middle and upper level managers in the public sector with the techniques and methods of personnel work, budgeting, organizing, and other functions necessary for further promotion. Students pursuing a degree in public administration will acquire the skills and tools which can provide the perspective and base on which to build a successful administrative career.
Special Admission Requirements
Besides meeting university criteria, applicants must have an undergraduate GPA of at least 2.50.

Recommended Preparation
To ensure that students have a satisfactory command of public administration fundamentals before taking graduate level courses, at least twelve hours of undergraduate preparatory coursework or their equivalent are required of all M.P.A. students. Students with an undergraduate major in public administration may be prepared to enroll immediately in graduate level courses. Students who do not have an undergraduate major in public administration are expected to complete the necessary prerequisite preparatory coursework. With permission of the dean, students can enroll in graduate level courses in areas for which they have completed the prerequisites before completing all of the preparatory coursework.

College of Education

Counseling (M.A.)
Education (M.A.)
Educational Administration and Supervision (M.A.)
Multicategorical Special Education (M.A.)
Psychology (M.A.)
School Counseling (M.A.)

The College of Education prepares graduate students to be professionally competent in the areas of education, psychology, and counseling.

The college offers graduate majors in education, counseling, school counseling, psychology, and multicategorical special education. In addition, the college offers a master's degree and certification programs in educational administration and supervision in partnership with Chicago State University and Northeastern Illinois University.

Certification

State certification is available in the following areas: general administration, special education, school counseling, and school psychology.

Collegial Policies

Student Study Plan
All students are required to develop a student study plan during the first trimester of enrollment in the college; they may not engage in advance registration or enroll for courses after that time if they have not done so. The student should make an appointment with the advisor to develop a student study plan, preferably before the first enrollment, but not later than one month after the beginning of the first trimester.

General Admission and Degree Requirements
All applicants must meet university admission and degree requirements. (See Admission and Degree Requirements sections.)

Specific Major Requirements
Following are detailed requirements for all the graduate majors in the College of Education. Some majors have special admission requirements in addition to university requirements. The specific degree requirements for each major are noted as well.

Counseling

The counseling major prepares individuals to enter counseling and psychology-related professions with a special focus on urban community settings. Students may receive skill preparation for direct service to clients; for diagnostic, consultative, and evaluative services; and for community intervention. Possible employing agencies and institutions include mental health clinics and hospitals, corporations, governmental social agencies, public and private schools, community colleges, various community intervention programs, and correctional institutions. This major also prepares students for advanced graduate work at other institutions. A two-trimester practicum placement is required.
Recommended Preparation
Before admission, students should have completed the following undergraduate prerequisite courses with a grade of "B" or better: abnormal psychology, developmental psychology, and research methods or statistics.

Admission to Candidacy
Students may apply for degree candidacy only after they have earned at least a grade of "B" in prerequisite courses: abnormal psychology and a survey of developmental psychology—these courses may not be used to fulfill degree requirements and may be taken at the undergraduate level or at another institution (see Division of Psychology and Counseling Student Handbook for procedures). The award of degree candidacy status is contingent upon a student’s earning a grade of "B" or better in COUN810. Students must apply for candidacy within two weeks of the start of the trimester in which degree candidacy is sought. The candidacy committee will inform students of their candidacy status within six weeks. Students should refer to the Division of Psychology and Counseling Student Handbook for further details.

Degree Requirements
Beyond meeting university requirements, students must complete a practicum sequence* at an approved site and receive a positive recommendation. Enrollment in practicum requires prior admission to candidacy and meeting other requirements outlined in the Division of Psychology and Counseling Student Handbook which is available from the degree program advisor. Application deadlines for practicum are as follows: fall trimester, July 15; winter trimester, November 5; spring/summer trimester, March 15. Practicum is a two-trimester course sequence. Priority in assignments is based on date of achieving candidacy.

Core Requirements
- COUN 620 Counseling and Psychotherapy: Introduction 3
- COUN 810 Beginning Counseling and Human Relation Skills 3
- COUN 843 Advanced Theories in Counseling and Therapy 3
- COUN 847 Group Dynamics and Intervention 3
- COUN 868 Counseling Psychology Practicum I: Agency Systems 3
- COUN 869 Counseling Psychology Practicum II: Clinical Skills 3

Additional Requirements
- Select three hours from:
  - PSYC 605 Tests and Measurements 3
  - COUN 826 Research Literature in Counseling and Psychotherapy 3
- Select three hours from:
  - COUN 633 Community Counseling 3
  - COUN 636 Human Service Systems 3
- Select three hours from:
  - COUN 844 Individual Counseling and Therapy: Child/Adolescent 3
  - COUN 845 Individual Counseling and Therapy: Adult 3
- Select twelve hours from:
  - PSYC 827 Human Sexuality 3
  - COUN 850 Group Therapy in Transactional Analysis 3
  - COUN 852 Group Counseling: Child/Adolescent 3
  - COUN 853 Adlerian Family Counseling 3
  - COUN 854 Advanced Individual Therapy Techniques: Child 3
  - COUN 855 Advanced Individual Therapy Techniques: Adult 3
  - COUN 856 Group Counseling: Adult/Adolescent 3
  - COUN 857 Behavior Therapy 3
  - COUN 859 Family Therapy Techniques 3
  - COUN 860 Marriage and Couple Therapy 3

Total 39
NOTES: * A two course practicum sequence in college counseling (COUN848 and COUN863) is available to students with career interests in that area. Application to these practica follows the same procedure as the one for a practicum placement in an agency.

** The nonselected course may be chosen as part of the twelve hours of selectives listed below.

*** At least nine hours must involve direct student/client contact.

**Education**

This major provides for professional development of teachers at all levels, early childhood through adult education. Core courses are designed to broaden students' understanding of contemporary educational issues, curriculum development, research methods, and psychology applied in schools. Specializations provide students with in-depth study in one of these areas: computer education, early childhood education, instructional development, language arts, mathematics education, or reading.

Additional information is included in the *Graduate Programs in Education Handbook*, available in the division of education office.

**Certification/Endorsement**

Completion of the degree program does not lead to certification in the state of Illinois.

**Admission Requirements**

In addition to meeting university requirements, applicants must have earned a 2.75 GPA or better in the last 60 hours of undergraduate coursework and a 3.0 GPA in any graduate work attempted.

**Admission to Candidacy**

To qualify for degree candidacy, students must: 1) complete prerequisites for courses in the specialization; 2) complete twelve hours including EDUC630, Issues and Trends in Education, EDUC810, Educational Research, and six additional graduate hours with a GPA of 3.0 or better; and 3) pass a qualifying examination which is offered on Saturday of the eleventh week of each trimester. The qualifying examination must be passed before completion of fifteen hours.

Students who pass the exam will be admitted to candidacy and assigned to a faculty advisor in the appropriate specialization. Students who fail the exam may counsel with the coordinator of graduate studies about ways to improve the possibility of passing the exam on the next attempt. Qualifying exams can be retaken only once. Failure to pass this exam means that students will not be permitted to register in courses in the degree program.

Students must submit an application to take the exams by October 1 for fall, by March 1 for winter, or July 1 for spring/summer to the coordinator of graduate studies. The application certifies that all candidacy requirements have been met. Application forms are available in the office of the division of education.

**Transfer Credit**

Up to six hours of course credit from other accredited institutions may be applied toward the degree, subject to approval by the faculty advisor and the coordinator of graduate studies.

**Program Options**

Candidates for the degree, master of arts in education, may pursue one of two options. Both the thesis and the research project options require students to investigate an educational problem by applying research methods. Generally, theses take longer to complete than do research projects, due to the nature of the research problems in each type of study. Thesis students must complete
their projects within one calendar year, and research projects must be completed within six months. The thesis option is limited to students who have a 3.5 GPA or better in all graduate courses and are recommended by at least two faculty in the division of education and approved by the chair of the division of education. Additional information about these options is available from the coordinator of graduate studies.

Degree Requirements
1. All coursework, including transfer credits, must be completed within six (6) calendar years.
2. Students must maintain a GPA of 3.0 or better with no grade less than “C” in all coursework in the major.
3. Up to six hours earned as a student-at-large may be applied toward degree requirements, subject to approval by the faculty advisor and the coordinator of graduate studies.
4. All degree candidates must satisfy the appropriate exit examination requirements. Students in the research project option must pass written comprehensive exams on core and specialization requirements after completing 27 hours of coursework. Students in the thesis option will make an oral defense of their research acceptable to their respective committees.

Core Requirements 15 or 21
EDUC 630 Issues and Trends in Education 3
EDUC 810 Educational Research 3
EDUC 825 Curriculum Development 3
EDUC 816 Applied Educational Psychology 3

Select one of the following options:
Thesis Option
EDUC 845 Quantitative and Qualitative Design in Educational Research 3
EDUC 890 Thesis I in: (Specialization) 3
EDUC 891 Thesis II in: (Specialization) 3
Research Project Option
EDUC 869 Research Project in: (Specialization) 3

Additional Requirements 15 or 24
Specialization 15 or 18
Students selecting the research project option will select six or nine hours of additional coursework as approved by their advisor and the coordinator of graduate studies. 6 or 9

Total with Thesis Option 36
with Research Project Option 39

Specializations
Students selecting the thesis option are to complete fifteen hours in one of the specializations listed below. Students selecting the research project option are to complete fifteen hours in the computer education, early childhood education, or instructional development specialization OR eighteen hours in the language arts, mathematics education, or reading specialization.

Computer Education

**Educational Administration and Supervision**

The Educational Administration and Supervision program is a cooperative venture involving faculties from Governors State, Chicago State, and Northeastern Illinois Universities. The curriculum provides background and specific skills necessary for employment as a school business manager, an elementary or secondary school principal, a supervisor, a curriculum consultant, a department chairperson, or a community college administrator. The curriculum includes a number of courses that provide essential knowledge and skills for continued growth in positions of educational leadership.

Students admitted to the master of arts degree program must elect one of three concentrations: educational administration, chief school business official, or community college administration.

**Certification**

Completion of this program and compliance with other requirements presented in the section elsewhere in this Catalog titled, Teacher Certification, leads to the Illinois Administrative certificate with the General Administration or Chief School Business Official endorsement, depending on the concentration completed. Individuals applying for the certificate or the endorsement after June 30, 1988, will be subject to state testing requirements. Completion of the educational administration concentration meets the Chicago Board of Education course requirements for administrative and supervisory positions.

Individuals holding a master's degree from an institution recognized for teacher education seeking the administrative certificate should consult the Student Handbook for the Cooperative Program in Educational Administration.

Completion of the concentration in community college administration does not lead to certification.

**Special Admission Requirements**

In addition to meeting university admission requirements, applicants must have 1) a GPA of 2.75 (A = 4) for the last 60 hours of undergraduate study and a GPA of 3.0 in any graduate work attempted and 2) written recommendations from two school administrators or supervisors familiar with the applicant's work. Admission to the educational administration concentration requires written verification by a district superintendent or personnel officer that the applicant has completed two years of full-time teaching or school service personnel work in a school approved by the Illinois State Board of Education as listed in Illinois Public School Districts and Schools or in Non-Public Schools List, or a school approved by the Department of Education in another state. Admission to the chief school business official concentration requires written verification by a district
superintendent, personnel officer, or chief school business official that the applicant has two years
business management experience in schools meeting criteria listed above. (Note: Verification of
experience in District #299 must be provided by the Chicago board director of personnel.) Admis-
sion to the community college administration concentration does not require previous teaching
or administrative experience but such experience is highly recommended.

Degree Requirements
Students must complete two courses (six semester hours) of coursework applicable to the degree
offered by Chicago State or Northeastern Illinois University. In addition, students must successfully
complete supervised practica, a comprehensive examination, and the Illinois and United States
Constitutions examinations and must meet all other requirements presented in The Student Hand-
book for the Cooperative Program in Education Administration. The handbook is available from
the education advisor.

Additional Requirements 6

Select six hours of electives with advisor's approval from the following courses (or other courses approved by the Cooperative Educational Administration Coordinating Council):

- EDAD 601 Curriculum Development and Learning Theories
Multicategorical Special Education

The major prepares teachers to teach in special education programs for children with the following exceptionalities: learning disabilities, social/emotional disorders, and educable mentally handicapped. Graduates of the program are able to function effectively in special classrooms; resource rooms; and as consultants to educators, administrators, staff, and parents.

Additional information is included in the Graduate Programs in Education Handbook, available in the Office of the Division of Education.

Certification/Endorsement

The program is approved by the Illinois State Board of Education and leads to the Standard Special Certificate with endorsements in Educable Mentally Handicapped, Learning Disabilities, and Social/Emotional Disorders. All applicants for a certificate must complete the general and professional education requirements listed in the Teacher Certification section elsewhere in this Catalog.
Admission Requirements
In addition to meeting university requirements, applicants must: 1) possess a standard teaching certificate; 2) have a 2.75 GPA or better in the last 60 hours of undergraduate and a 3.0 GPA in all graduate work attempted; and 3) complete SPED510, Survey of Exceptional Students, PSYC420, Principles of Psychology, and PSYC430, Abnormal Psychology or equivalent courses.

Admission to Candidacy
To qualify for degree candidacy, students must: 1) complete prerequisites for courses in the major; 2) complete twelve hours that include: EDUCB10, Educational Research; SPED619, Psychological Diagnosis; SPED820, Learning Characteristics of Exceptional Students; and SPED831, Behavioral Characteristics of Exceptional Students, with no grade below “C” and a GPA of 3.0 or better; and 3) pass a qualifying exam which is offered on Saturday of the eleventh week of each trimester. The qualifying examination must be passed before completion of fifteen hours required in the program.

Students who pass the exam will be admitted to candidacy and assigned to a faculty advisor in special education. Students who fail the exam may counsel with the coordinator of graduate studies about ways to improve the possibility of passing exams on the next attempt. Qualifying exams can be retaken only once. Students failing the examination twice will not be permitted to register for courses in the degree program.

Students must submit an application to take the exam by October 1 for fall, by March 1 for winter, or July 1 for spring/summer to the coordinator of graduate studies. The application certifies that all candidacy requirements have been met. Application forms are available in the office of the Division of Education.

Transfer Credit
Up to six hours of course credit from other accredited institutions may be applied toward the degree, subject to approval by the faculty advisor and the coordinator of graduate studies.

Degree Requirements
1. All coursework, including transfer credits, must be completed within six (6) calendar years.
2. Students must maintain a GPA of 3.0 or better with no grade below “C” in all coursework in the major.
3. Up to six hours earned as a student-at-large may be applied toward degree requirements, subject to approval by the faculty advisor and the coordinator of graduate studies.
4. During their last semester, all degree candidates must pass written comprehensive exams covering all coursework.

Psychology

The College of Education offers a graduate degree program in psychology leading to the degree of master of arts. Students electing this major will be prepared for: 1) employment as researchers and evaluators in public and private settings; 2) teaching in community colleges and high schools (if appropriately certified); and 3) certification as a school psychologist in Illinois. The program requires study in the traditional areas of psychology and permits intensive study in students' area(s) of interest. Students pursuing goals other than school psychology prepare a thesis under close faculty supervision. Students pursuing preparation in school psychology follow a rigorous program of studies in traditional areas of psychology, assessment, and other selected areas to provide appropriate knowledge and skill to identify, evaluate, and assist in remediating problems exhibited by both "normal" and "handicapped" school children. In addition to specified coursework, students pursuing this option complete a practicum and a post-graduate internship. The school psychology option requires extensive preparation and typically requires a two and a half year commitment in addition to the year-long internship.

Certification

The school psychology option under this major is approved by the Illinois State Board of Education and leads to the School Service Certificate endorsed in school psychology. Recommendation for the certificate is contingent upon satisfactory completion of a post-graduate internship in school psychology (PSYC920).

Recommended Preparation

While an undergraduate major in psychology is strongly recommended, students without a psychology background may be admitted to the major and enroll for courses. All students must show evidence of having earned a grade of "B" or better in the following prerequisites (or their equivalent): Abnormal Psychology (PSYC430), Child Development (PSYC512), Learning Cognition (PSYC520), Personality Theory (PSYCS30), Social Psychology (PSYC535), Research Methods (PSYC560), and Statistics (STAT468).

Admission to Candidacy

Students may apply for degree candidacy only after they have earned at least a grade of "B" in prerequisite courses: PSYC430, PSYC512, PSYC520, PSYC530, PSYC535, PSYC560, and STAT468—these courses may not be used to fulfill degree requirements and may be taken at the undergraduate level or at another institution (see Division of Psychology and Counseling Student Handbook for procedures). The award of degree candidacy status for a student seeking certification as a school psychologist is contingent upon a student's earning a grade of "B" or better in PSYC605, COUN630, COUN810, and PSYC853. The award of degree candidacy status for a student selecting the thesis option is contingent upon a student's earning a grade of "B" or better in PSYC812, PSYC828, PSYC829, and STAT860. Students must apply for candidacy within two weeks of the start of the trimester in which degree candidacy is sought. The candidacy committee will inform students of their candidacy status within six weeks. Students should refer to the Division of Psychology and Counseling Student Handbook for further details.

Degree Requirements

In addition to university requirements, students must: 1) maintain at least a 3.0 GPA with no more than two "C's" in required courses; 2) if seeking certification as school psychologists, complete PSYC843 and PSYC865, or if not seeking such certification, complete STAT860 and PSYC890; 3) receive positive endorsement from the practicum supervisor or the thesis/project committee; and 4) if seeking certification as school psychologist, complete in addition COUN630, COUN649, COUN810, COUN844, COUN851, COUN853, and SPED510 or SPED805.

**NOTES:**

* Students seeking certification in addition to completing all asterisked courses must also complete the following courses: COUN630, COUN639, COUN810, COUN844, COUN851, COUN853, and SPED510 or SPED805 as well as meeting all other requirements as stated in the Division of Psychology and Counseling Student Handbook. After completing the degree, students must complete a post-graduate internship, PSYC920, to be eligible for state certification.

**Enrollment in practicum requires prior admission to candidacy and meeting other requirements outlined for these programs in the student handbook which is available from the program advisor. Application for practicum in the winter trimester must be made by November 15 and by July 15 for the fall trimester. Ordinarily, practicum is not offered in the spring/summer trimester. Practicum requires at least one full day per week at an assigned site during the trimester. Priority in assignments is based on the date of achieving candidacy.**
School Counseling

The major in school counseling (K-12) prepares professionals to work in elementary, middle, and secondary schools as counselors, guidance workers, career, and vocational counselors. The major provides an academic core in psychology and counseling. The coursework that leads to certification is prescribed to meet state requirements. All students must complete a practicum in a school setting for one trimester which is typically a minimum of one full day per week. School practica are available only during the fall or winter trimesters. Students are admitted from a variety of backgrounds, but experience in educational settings is extremely helpful in seeking employment.

Certification

This curriculum is approved by the Illinois State Board of Education and leads to the School Service Personnel Certificate with an endorsement in guidance. Applicants for this certificate must hold, or be eligible for, a standard Illinois teaching certificate.

Recommended Preparation

No specific undergraduate major is required. Before admission students should have earned a grade of at least a "B" in the following undergraduate prerequisite courses: three hours in statistics and three hours in research methodology. Qualification for Illinois State Teacher Certification is needed to obtain the Illinois School Service Personnel Certificate with Guidance Endorsement upon completion of the program.

Admission to Candidacy

Students may apply for degree candidacy only after they have earned at least a grade of "B" in prerequisite courses: statistics and research methodology—these courses may not be used to fulfill degree requirements and may be taken at the undergraduate level or at another institution (see the Division of Psychology and Counseling Student Handbook for procedures). The award of degree candidacy status is contingent upon a student's earning a grade of "B" or better in PSYC605, COUN630, COUN810 and COUN844. Students must apply for candidacy within two weeks of the start of the trimester in which degree candidacy is sought. The candidacy committee will inform students of their candidacy status within six weeks. Students should refer to the Division of Psychology and Counseling Student Handbook for further details.

Degree Requirements

In addition to university requirements, students must: 1) complete the approved practicum experiences; 2) obtain a positive recommendation from degree program faculty who will review work done at the practicum site; and 3) maintain at least a 3.0 grade point average with no more than two "C's" in required courses.

NOTE:* Enrollment in practicum requires prior admission to candidacy and meeting other requirements outlined in the student handbook for these programs which is available from the program advisor. Application for practicum in the winter trimester must be made by November 15 and by July 15 for the fall trimester. Practicum is not offered in the spring/summer trimester.

Practicum requires at least one full day per week at an assigned site during the trimester. Priority in assignments is based on the date of achieving candidacy.
College of Health Professions

Alcoholism and Drug Abuse Sciences (M.H.S.)
Communication Disorders (M.H.S.)
Health Administration (M.H.A.)
Health Professions Education (M.H.S.)
Nursing (M.S.)

The graduate degree programs in the College of Health Professions prepare students for a variety of employment opportunities in the health field, either through career changes or advancement within a profession. All majors provide extensive field experiences and exposure to, or participation in, research activities through a vast network of hospitals and medical centers in the Chicago region. Traditional lecture-discussion and seminar courses provide the theoretical bases for the clinical and research experiences. The college offers a few courses of general interest to students in the other colleges, but most courses are designed to meet the professional education needs of the various majors. The college also provides credit and noncredit continuing education courses and workshops for health professionals at many off-campus locations throughout the Chicago region.

Certifications and/or Accreditations

The graduate health administration major is accredited by the Accrediting Commission on Education for Health Services Administration.

The graduate communication disorders major is approved by the Illinois State Board of Education and leads to the Standard Special Certificate endorsed in Speech and Language Impaired. Graduates are eligible to apply for the Certificate of Clinical Competence in Speech-Language Pathology of the American Speech-Language-Hearing Association. Previous graduates have been extremely successful in obtaining this certification.

General Admission and Degree Requirements

All applicants must meet university admission and degree requirements. (See Admission and Degree Requirements sections.)

Specific Major Requirements

Following are detailed requirements for all the graduate majors in the College of Health Professions. Some majors have special admission requirements in addition to university requirements. The major admission requirements are noted where they apply. The specific degree requirements for each major are noted as well. Students must develop a study plan during their first trimester of enrollment. This is the first step toward achieving graduate candidacy status. Once the study plan has been approved and signed by the advisor and division chairperson, the advisor’s signature will not be required on the registration form. (Courses which require permission of the instructor will require that instructor’s signature on the “written permission” line of the registration form.) It is the responsibility of the student to enroll, in the proper sequence, in courses which fulfill the requirements of the approved study plan. Courses in which the student enrolls that are not on the study plan may not be applicable to degree requirements. Any changes in the study plan must be approved by the advisor and division chairperson. Students should consult advisors and this Catalog for prerequisite, specific major, and university degree requirements.
Alcoholism and Drug Abuse Sciences

The alcoholism and drug abuse sciences major is designed to prepare individuals as specialists and leaders in this developing professional career field. Students become familiar with theoretical and empirical knowledge on the use and abuse of alcohol and other drugs in society and also acquire skills necessary for preventing, intervening, and treating substance abusers and their collaterals. The curriculum is based on the premise that substance abuse is a complex phenomenon requiring a multidisciplinary approach. Therefore, as specialists and leaders in the field, students should gain a knowledge of biological, health, social, and behavioral science approaches to substance abuse; have an understanding of the political, legal, and historical development of the field; and be able to apply their knowledge and skills to the planning, management, delivery, and evaluation of alcoholism and drug abuse services.

Recommended Preparation
While two or more years experience in the alcoholism field and an undergraduate major in alcoholism sciences or a related field are strongly recommended, applicants without a background in alcoholism sciences may apply to the major; however, these applicants must complete the following undergraduate prerequisite coursework as early as possible during graduate study; Alcoholism: The Recovery Process (ALC305) and/or Alcoholism: A Systems Approach (ALC318).

Admission to Candidacy
In addition to university requirements, to qualify for degree candidacy in this major, a student must: 1) have completed the core courses ALC720, ALC815, ALC825 and ALC835 with no more than one grade of “C” and 2) have no more than two grades of “C” for all courses. Until degree candidacy status is attained, a student will not be permitted to enroll in Alcoholism: Internship Seminar (ALC865), Internship: (Alcoholism) (HLSC880), or Graduate Thesis/Project: (Alcoholism) (HLSC890).

Total 32
Communication Disorders

The graduate major in communication disorders prepares students to work as professional speech-language pathologists in a variety of settings, including schools, hospitals, mental health centers, and private practice. Preparation is accomplished through extensive academic and external practicum experience in both speech-language pathology and audiology.

Certification
Graduates are eligible for the Illinois Standard Special Teaching Certificate endorsed in Speech and Language Impaired. Students seeking teaching certification must meet additional requirements listed in the Teacher Certification section elsewhere in this Catalog. This program meets academic and practicum requirements for the Certificate of Clinical Competence in Speech-Language Pathology of the American Speech-Language-Hearing Association.

Special Admission Requirements
Besides meeting university criteria, applicants must: 1) have a GPA of 2.75 or better on a 4.0 scale for all undergraduate work attempted before receiving the baccalaureate degree; and 2) submit three letters of recommendation from faculty in the applicant’s undergraduate major indicating that they would accept the applicant into their own program, thereby providing an assessment of potential ability as a graduate student in the program and the ability to carry out work in the field.

All applicants will be admitted conditionally pending verification of adequate speech and hearing to function as a speech pathologist.

Any applicant without preprofessional preparation in communication disorders, who meets all other admission requirements, may enroll in the curriculum. All admitted students must complete all communication disorders undergraduate requirements, but may enroll in graduate courses after satisfactorily completing the prerequisites for those courses.

Admission to Candidacy
In addition to university requirements, to qualify for degree candidacy in this major, the student must: 1) apply for candidacy after earning a minimum of twelve, and a maximum of eighteen graduate credit hours, with an average grade of "B," from at least two faculty in the major; 2) demonstrate adequate oral communication abilities; 3) demonstrate adequate auditory discrimination ability; and 4) demonstrate adequate interpersonal skills. Skill levels noted in items 2), 3), and 4) above are evaluated based on the professional judgment of faculty and administrators through regular reviews of student progress. Unsuccessful applicants will not be permitted to complete the degree program. More detailed candidacy information is available through the communication disorders division.

Degree Requirements
Students must satisfactorily complete all practicum hour requirements in a variety of disorder areas. Information about these requirements is available through the Division of Communication Disorders.

Health Administration

The health administration major prepares students to assume middle management positions and, after the requisite years of experience, top executive positions in large health care institutions. The purpose of the major is to train administrators who will be able both to manage and develop various health service organizations and programs and also to facilitate improved health status and well being of individuals in their service area. Graduates of the master’s degree program find employment with hospitals, mental health institutions, and neighborhood health centers, as well as a variety of governmental and private health care programs, such as HHS offices, health insurers, and health related professional associations.

Accreditation
The graduate program has been accredited since 1978 by the Accrediting Commission on Education for Health Services Administration (ACEHSA).

Special Admission Requirements
In addition to meeting university criteria, applicants must: 1) have a GPA of 2.5 on a 4.0 scale for the last 60 hours of undergraduate coursework, or a minimum cumulative graduate GPA of 3.0 for nine or more hours of graduate credit; 2) must submit three standard evaluation forms which support the applicant for graduate study in health administration. Evaluations must be from previous academic faculty in the major and/or from current or previous supervisors if employed, or the applicant may petition for a waiver or substitution of references if unemployed or out of school more than five years. All students must submit a completed division questionnaire. The questionnaire is used for evaluation and advisement purposes.

Recommended Preparation
An undergraduate major in one of the following fields is recommended: health administration, business administration, allied health disciplines, behavioral sciences, or public administration. Students without appropriate background may enroll in the major but will be required to complete undergraduate prerequisite coursework as follows: three hours in Management Accounting for Health Care Organizations (ACCT402), three hours in statistics, three hours in economics (principles, micro, or foundations), and three hours in Foundations of Management (MCMG501) or three hours of an undergraduate principles of management course. Students may seek a waiver from prerequisites by submitting a written request with supporting documentation to their advisor for evaluation during their first trimester of enrollment. Consult the Health Administration Program Student Guide for specific suggestions and further details.

Admission to Candidacy
In addition to meeting university requirements in qualifying for degree candidacy in this major, the student must: 1) have earned a grade of "B" or better in three of the following four courses: HLAD801, HLAD805, HLAD810, and HLAD815; 2) apply for candidacy after earning a minimum of nine and a maximum of eighteen graduate-level credit hours; 3) have demonstrated adequate oral and written communication abilities appropriate for the profession; and 4) have demonstrated adequate interpersonal skills appropriate for the profession.
Skill levels noted in Items 3) and 4) above are evaluated based on the professional judgment of the faculty and administrators through regular review of student progress. Unsuccessful applicants to candidacy will not be permitted further registration in courses in the degree program. More detailed candidacy information is available through the division office or the student's advisor.

Degree Requirements
Beyond meeting university requirements a student: 1) may apply no more than one course with a grade of "C" toward degree requirements; 2) must earn a grade of "B" or better in the practicum course (HLAD865 or HLAD880); and 3) must successfully pass the comprehensive examination. In meeting degree requirements, a student may retake any course or the comprehensive examination only once.

Health Professions Education

Health professions education is a graduate level career advancement major that prepares students to assess the need for, design, implement, and evaluate programs in health. The major is designed to accommodate students from diverse academic and professional backgrounds who have a common interest in promoting health and allied health programs. The program is of interest to certified secondary teachers who wish to move into the health field, to instructors of allied health programs who wish to improve their training and program planning skills, and to individuals interested in promoting/evaluating health programs designed for specific clientele groups. The core of the curriculum provides the student with the skills necessary to plan, manage, and evaluate health programs. Because of the changing nature of the health field and the diversity of backgrounds of students seeking training in this area, the curriculum allows students to individualize their program through selective coursework. The program offers a Health Promotion Sequence designed to provide students with a foundation in health and wellness concepts. The Professional Training Sequence emphasizes learning theory and methods of instruction.
Eligibility for Endorsement in Health Education
The coursework necessary for an already certified teacher to obtain an additional endorsement to teach health through transcript evaluation is available. See advisor for further information.

Special Admissions Requirements
Besides meeting university criteria, an applicant must have a cumulative GPA of 2.5 on a 4.0 scale for all undergraduate coursework.

Recommended Preparation
Coursework in statistics and either educational psychology or learning theory is required. These courses, required as prerequisites to core courses, must be completed before taking the respective graduate courses. Recommended undergraduate majors include education, physical education, health education, social work, science, nursing, or one of the other health occupations. Additional prerequisites may be required depending upon the student's background and career goals.

Admission to Candidacy
In addition to university requirements, to qualify for degree candidacy in this major, a student must have completed twelve hours of required core courses with a GPA of 3.0 or better for those specific courses.

Nursing

The graduate nursing major provides a master's degree program for nurses who have a baccalaureate degree in nursing. The curriculum is designed for the commuting, full-time employed student who may complete the program on a part-time basis. The major prepares nurses to function as clinical specialists in restorative nursing, teachers of nursing, and administrators of nursing services. Students apply research concepts, theories, and skills in developing one of these functional roles in advanced nursing practice. Clinical specialists use clinical expertise to improve the quality of client care in acute, chronic, or community health care environments. Teachers are prepared to teach nursing in associate degree or baccalaureate programs. Nurse administrators are prepared to assume beginning administrative positions in nursing service organizations.

Special Admission Requirements
In addition to meeting university criteria, applicants must:

1. Have acquired a baccalaureate degree with a major in nursing in an approved nursing program from a regionally accredited college or university.
2. Students must have completed the following undergraduate coursework or their equivalent: three hours in Nursing Research (NURS400), three hours in Statistics (STAT468), and five hours in Nursing: Health Assessment (NURS330).
3. Have taken the GRE General Test. They should submit scores at the time of application. Students who have not taken the GRE before admission must do so during their first trimester of enrollment in the major.
4. Have verifiable employment as a registered nurse for at least two of the past five years, or have graduated from a baccalaureate nursing program within the last two calendar years. Students must have letter(s) verifying employment from employer(s) forward to the Office of Admissions.
5. Have current and valid licensure as a registered nurse in the state of Illinois.
6. Have a cumulative GPA of 2.50 (4.0 scale) in all undergraduate coursework and a 3.0 (4.0 scale) GPA with no grade less than “C” in all upper division nursing courses.
7. Carry current nursing malpractice/liability insurance.
8. Submit three letters of recommendation which provide evidence of leadership potential, work experience, and communication skills; two letters of recommendation must be submitted by the student's former college/university nursing instructors and one from a nonacademic source.
9. Submit a one-page biographical sketch and a statement of personal goals for pursuing a graduate degree in nursing.

Applicants who do not meet the GPA requirements or who have graduated from nongraded baccalaureate programs must take the following battery of ACT-PEP nursing examinations and must achieve a standard score of 45 or better in each of the following: Health Restoration: Area I (#425), Health Restoration: Area II (#477), Health Support: Area I (#530), Health Support: Area II (#577), and Professional Strategies, Nursing (#426).

Applicants whose credentials are from countries other than the United States must have their credentials evaluated through the Office of Admissions. These applicants will be required to take and pass the Test of English As a Foreign Language (TOEFL) with a score of 550 or above.

Applicants must assume all responsibility for fees associated with testing. All credentials must be submitted to the Office of Admissions. No applicant can be fully admitted to the program until all required credentials are on file in the Office of Admissions. Students not meeting admission criteria may petition for admission through the Office of Admissions. Admission to the program does not carry with it nor guarantee admission to degree candidacy.

Admission to Candidacy
In addition to university requirements to qualify for degree candidacy in this major, the student must have: 1) complied with all conditions of admission; 2) completed the courses NURS710, NURS720, NURS730, NURS740, and NURS800; and 3) filed an application for candidacy that has been completed in conjunction with their graduate nursing advisor.
Admission to candidacy is required to enroll for courses in the nursing functional areas.

**Degree Requirements**

Beyond meeting university requirements, students must: 1) pass, during the last trimester of the student's program, an oral comprehensive examination over the major area of study (this examination may be repeated only once) and 2) complete all degree requirements within a three-year period from the date on which the student formally enrolls for study after having been admitted. Candidates who are unable to meet this requirement may petition to have their credentials and degree plans reevaluated. Such candidates must expect to meet any additional requirements implemented after their initial enrollment. Students may repeat only once a graduate nursing course in which they receive an "F."

Course Descriptions
Course Numbering

Courses offered at Governors State University are identified by a three or four letter abbreviation of the academic discipline plus a three digit number (e.g., ACCT302 identifies an accounting course). Course descriptions are listed alphabetically by academic discipline and in ascending numerical order.

The first digit of a course indicates scholastic level and also provides information regarding restriction to undergraduate and/or graduate student enrollment:

- **300-499**: Upper division undergraduate courses;
- **500-599**: Courses open generally to both undergraduate and graduate students; credit awarded based on student level, and credit requirements differ for undergraduate versus graduate students;
- **600-799**: Graduate level courses, open to undergraduate students only by permission;
- **800-999**: Courses open to graduate students only.

The second and third digits are used to distinguish between courses within an academic discipline.

Course Listings

Samples:

- **ECON 810 Labor Economics (3)**
  Study of the development and structure of the labor movement, wage determination, and public policy toward labor. Prerequisites: ECON301 and ECON302. SPRING-SUMMER.

- **ART 541 Sculpture: 3-D Wood (2-4)**
  Entails both the applied technical overview and the analysis of theory of approach. Various works and artists will be observed through reading and slides. Emphasizes aesthetics of art form and design. For the student who has intermediate or advanced exposure in sculpture. Prerequisite: Permission. FALL, odd years.

- **COUN 868 Counseling Psychology Practicum I: Agency Systems (3)**
  Practice eight hours per week in an approved agency site. Development of critical analysis of the agency as a human service delivery system. Prerequisites: Candidacy, permission of instructor, and successful preapplication. FALL, WINTER, SPRING-SUMMER.

Each course listing has three or four elements:

1. **Boldface**—indicates course number, title, and credit hours. Credit hours are shown in parentheses following the course title. Where courses are offered for variable credit, the range of credit hours is shown. Credit hours followed by a ‘+’ are graded only on a pass/no credit basis. Courses marked with ☑️ may be offered in a televised format; those marked with ☐️ may be offered as correspondence courses; check the trimester schedule to determine the format in which sections are offered.

2. Following the title line of each course is a brief statement describing the content of the course.

3. Certain courses have special preparatory requirements; these are identified in italics following the word *prerequisite(s)*. Students lacking specified prerequisites are not eligible to enroll in that course.

4. The last element for each course listing identifies the TRIMESTER(S) in which the course is to be offered. Odd or even designations refer to the last digit of a calendar year.
Accounting

ACCT 301 Financial Accounting (3)
Emphasizes the beginning accounting cycle and integrates accounting principles and their applications to business objectives, financial statement preparation, flow of resources, noncurrent assets, theory of liabilities, equities, inventory evaluation, depreciation methods, budgeting, and a development of accounting principles. Emphasis is given to financial accounting information useful to investors, economists, the general public, and other external groups. FALL, WINTER, SPRING-SUMMER.

ACCT 302 Managerial Accounting (3)
Focuses on analysis of managerial accounting, an examination of the information needed for planning and controlling, and an investigation of the manner in which accounting can provide the information. Emphasizes accounting as a management information tool. Prerequisite: ACCT301 or equivalent. FALL, WINTER, SPRING-SUMMER.

ACCT 331 Cost Accounting I (3)
Includes exposure to a broad range of cost accounting concepts and their terminology. Measurement and accumulation of costs will include such topics as direct and indirect costs, the rationale behind the cost allocation procedures, cost-volume relationships, and the application of burden. Prerequisite: ACCT301 or equivalent. FALL, SPRING-SUMMER.

ACCT 332 Cost Accounting II (3)
An advanced study of cost accounting and decision-making concepts, objectives, and terminology essential to the cost accountant’s role in business. Includes cost-volume ratios, cost accumulation for product costing, job order and process costing, performance measurement, transfer pricing, internal control, subjective probabilities, CPA applications, and operations research. Prerequisite: ACCT331. FALL, WINTER.

ACCT 351 Intermediate Accounting I (3)
Focuses on the study of problems in financial accounting measurement including determination of periodic income, revenue recognition, cost allocation, flow of funds, inventory valuation, depreciation, liability recognition, and equity measurement. Prerequisite: ACCT301 or equivalent. FALL, WINTER.

ACCT 352 Intermediate Accounting II (3)
Continuation of Intermediate Accounting I. Prerequisite: ACCT351. WINTER, SPRING-SUMMER.

ACCT 355 Accounting Information Systems (3)
Introduction to the flow of accounting information in organizations. Emphasizes accounting control, database management and the role of computer facilities in bridging the gap between accounting information systems and electronic data processing systems. Prerequisites: M15390; ACCT301 and ACCT302 or equivalent. Not scheduled to be offered in AY87-88.

ACCT 370 Accounting Theory (3)
Provides a frame of reference for the basic objectives, postulates, and principles of financial reporting. Includes theories relating to income determination, measurement of cash, and other reserve flow. Emphasizes study of accounting statements and their form of presentation. Prerequisites: ACCT351 and ACCT352. Not scheduled to be offered in AY87-88.

ACCT 402 Management Accounting for Health Care Organizations (3)
Covers accounting concepts and their application to health care organizations. Includes cost finding and cost analysis, ratio analysis and elementary reimbursement theory. Designed for CHP health administration students and other students with an interest in this area. Prerequisite: ACCT301 for undergraduates. No prerequisites for graduate students. FALL, WINTER, SPRING-SUMMER.
ACCT 410 Advanced Accounting (3)
Application of accounting practice for an understanding of the complexities comprising business and finance. Examines corporate combinations and the special applications of measurement and realization principles in such matters as consolidations, conglomerates, pooling of interests, and international operations. Prerequisites: ACCT 351 and ACCT 352.
FALL, SPRING-SUMMER.

ACCT 421 Tax Accounting I (3)
The study of individual income taxation. Students obtain a broad appreciation of the tax structure and its role, both as a source of revenue and as a device to control the economy. Prerequisite: ACCT 301 or equivalent. FALL.

ACCT 422 Tax Accounting II (3)
The study of business taxation. Topics include the tax consequences of the formation, operation, consolidation, and termination of business organizations. Prerequisite: ACCT 421 or permission of instructor. WINTER.

ACCT 440 Audit Concepts and Standards (3)
Deals with the standards, concepts, objectives, techniques, reports, and ethics of both the independent and internal auditor. Special attention is given to statements on auditing procedures, statistical sampling, and EDP in auditing. Prerequisite: ACCT 301 or equivalent. WINTER.

ACCT 45A Advanced Auditing (3)
Sequel to ACCT 440. The study in greater depth and breadth of generally accepted auditing standards and their applications with emphasis on the use of statistical methods in auditing and on auditing EDP systems. Prerequisites: ACCT 440, MIS 301, STAT 361. Not scheduled to be offered in AY 87-88.

ACCT 450 Governmental Accounting, Budgeting, and Finance (3)
A study of fund accounting used in governmental units, hospitals, colleges, and universities. Includes the study of budgetary accounting, appropriations, encumbrances, internal checks and audits, yardsticks for performance, and public financing for effective administration of these units and organizations. Prerequisite: ACCT 301. Not scheduled to be offered in AY 87-88.

ACCT 470 Independent Study: . . . (3)
Independent study is intended to provide better students an opportunity to study a topic of their own choice in accounting under professional supervision. Only the student who is prepared to devote considerable time and effort should undertake an independent study. The student contemplating a course in independent study should first have in mind a definite area for investigation within accounting and an instructor to sponsor the work. Prerequisite: Permission of instructor and dean. Offered based upon demand.

ACCT 501 Foundations of Accounting (3)
Studies the concepts of financial and managerial accounting. Develops an ability to understand, interpret, and analyze financial data. Includes accounting systems and control and behavior of cost data. This course satisfies the accounting prerequisite in the M.B.A. program but does not apply as a graduate level course toward the M.B.A. degree. Prerequisite: Graduate student status. WINTER.

ACCT 530 Accounting and Computer Integration (3)
Uses computer programming and accounting principles for financial and managerial accounting applications. Specific applications include analysis of performance reports, break-even, job-order cost, and payroll. General system analysis of basic data processing, programming, and accounting records and their integrated applications are included. Prerequisite: ACCT 355. FALL, WINTER.

ACCT 801 Accounting for Administrative Control (3)
Offers an indepth exposure to the management control process, including organizing and evaluating data for decision-making under conditions of uncertainty. M.B.A. students with
Accounting 179

a cost accounting background must take ACCT850, Problems in Cost Accounting, to satisfy the M.B.A. accounting requirement. A student's requirement will be determined during advisement. Prerequisite: ACCT302 or ACCT501. FALL, WINTER.

**ACCT 810 Accounting for Health Service Organizations (3)**
Covers accounting applications as used in health service institutions. Includes contracting for goods and services, advanced reimbursement techniques, various applications of internal audit and control, performance reporting and analysis, and cost containment. Especially designed for CHP health administration students and other students desiring special knowledge in this area. Prerequisites: ACCT402, HLAD837, HLAD840, and completion of 25 or more graduate credit hours. SPRING-SUMMER.

**ACCT 820 Accounting Information Systems (3)**
Studies the information dimensions of the decision-making process throughout the organization and the role accounting plays. Emphasis is on the conceptual framework within which the system functions and the actual design and implementation of an accounting information system for managing the sole proprietorship, partnership, and corporation. Prerequisite: ACCT331 or equivalent. Not scheduled to be offered in AY87-88.

**ACCT 830 Financial Reporting Theory (3)**
The study of problems in financial accounting measurement including determination of periodic income, revenue recognition, cost allocation, flow of funds, inventory valuation, depreciation liability recognition, and equity measurement. Prerequisite: Open only to students in professional careers in accounting series. Offered in WINTER based upon demand.

**ACCT 840 Applied Financial Accounting (3)**
The study of the application of financial accounting principles to such topics as combinations, consolidations, conglomerates, pooling of interests, multinational operations. Governmental accounting will also be discussed. Prerequisite: Open only to students in professional careers in accounting series. Offered in SPRING-SUMMER based upon demand.

**ACCT 850 Problems in Cost Accounting (3)**
Exposure to a broad range of cost accounting concepts and cost accumulation. Includes cost accounting concepts for decision-making and terminology essential to the cost accountant's role in business. Prerequisite: ACCT331 or equivalent or permission. Offered in WINTER based upon demand.

**ACCT 855 Audit Theory and Philosophy (3)**
Deals with the standards, concepts, objectives, techniques, reports, and ethics of both the independent and internal auditor. Special attention is given to statements on auditing procedures, statistical sampling, and EDP in auditing. Prerequisite: ACCT501 or equivalent. WINTER; offered in SPRING-SUMMER based upon demand.

**ACCT 860 Problems in Tax Accounting (3)**
Offers a managerial approach to taxation through emphasis on tax problems as they affect business enterprise transactions. Considers the tax structure and its role, both as a source of revenue and as a device to control the economy. Prerequisite: ACCT501 or equivalent. Offered in FALL based upon demand.

**ACCT 870 Independent Study: ... (3)**
Independent study is intended to provide better students the opportunity to study a topic of their own choice in accounting under professional supervision. Only the student who is prepared to devote considerable time and effort should undertake an independent study. The student contemplating an independent study should first choose a definite area for investigation within accounting and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.
ACCT 890 Graduate Thesis/Project: ... (6)*
Provides an opportunity for intensive study of a problem chosen by the student. A candidate who is approved for the thesis option will be required to orally defend the thesis. The thesis option is limited to outstanding students who have been recommended by a minimum of two faculty in the College of Business and Public Administration and approved by the dean. Students interested in pursuing the doctorate degree in business should select the thesis option. Prerequisites: Permission; last trimester of M.B.A. student’s program of study. Offered based upon demand.

Alcoholism and Drug Abuse Sciences

ALC 340 Alcoholism: A Study of Addiction (3) *
Provides an overview of the far reaching problem of alcoholism in American society. Covers the causes, symptoms, manifestations and treatment of alcoholism. Prerequisite: Not open to students in alcoholism sciences. FALL, WINTER, SPRING-SUMMER.

ALC 50A Current Topics in Substance Abuse: A Lecture Series (1)
Provides both majors and non-majors an opportunity to participate in and discuss a variety of current topics relative to substance abuse. The presenters will be experts in the fields of substance abuse treatment and psychopharmacology. Offered based upon demand.

ALC 50C Alcohol, Drugs, and the Athlete (1)
Provides information regarding the particular types of denial that the athlete may exhibit, ways in which to detect problems, and alternate approaches for both parents and coaches to utilize in assisting the problem athlete. FALL; offered in other terms based upon demand.

ALC 50E Driving under the Influence (1)
Provides an overview of issues affecting the prevention and solution of problems related to driving under the influence of alcohol. Includes discussion of national and state policies; law enforcement; community action; and professional involvement in assessment, education, and treatment of affected individuals. Offered based upon demand.

ALC 50F Shame and Guilt in Treatment and Recovery (1)
Examines the phenomenology of shame and guilt, the differences between these concepts, and the importance of each to treatment and recovery. Reviews the twelve-step way of life and its therapeutic implications and examines them in the context of shame and guilt. Prerequisite: Knowledge of the A.A. twelve-step model. SPRING-SUMMER; offered in other terms based upon demand.

ALC 50G Children of Alcoholics (1)
Reviews research and theory related to the effects of parental substance abuse, particularly alcohol abuse, on the psychosocial development of children. Participation is useful in developing education, intervention, treatment, and aftercare plans for COAs. Prerequisite: Previous coursework in alcoholism sciences or family counseling. SPRING-SUMMER; offered in other terms based upon demand.

ALC 50H Substance Abuse: Current Concepts (3) *
Examines the physiological, psychological, and sociological aspects of drug abuse and includes historical and contemporary patterns. Examines past and present drug abuse treatment modalities and analyzes the factors and institutions at the local, state, and national level that affect the delivery of drug abuse services. Includes legal and ethical issues in drug abuse. FALL, WINTER, SPRING-SUMMER.

ALC 50I Alcohol and Subcultures (3) *
Prepares alcoholism counselors to work in a metropolitan area with persons from various cultures. Examines culturally determined values, lifestyles, and expectations underlying the behavior of clients. FALL, WINTER, SPRING-SUMMER.
ALC 502 Alcoholism Group Treatment Planning (1)
Studies definitions and goals of group treatment with alcoholics. Emphasizes the facilitator’s role in the process, with special attention to an innovative approach utilizing the group in the task of establishing treatment plans and subsequent accountability and evaluation. WINTER; offered in other terms based upon demand.

ALC 505 Alcoholism: Recovery Process (3)
The recovery process for the alcoholic is examined, tracing the stages from isolation through individual and group involvement. Within the context of the recovery process, the student learns the importance of human communication through enhanced awareness of self and others and has the opportunity to experience a simulated recovery process of the alcoholic. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

ALC 51A Drug Use among the Elderly (1)
Explores the nature of aging, the aging population, the use or misuse and abuse of alcohol and other drugs among the elderly. Focuses on prevention and treatment issues and programs related to working with the elderly with particular emphasis on development of service networks combining senior citizen and substance abuse services providers. Offered based upon demand.

ALC 51E Substance Abuse among the Handicapped (1)
Provides professionals who work with the handicapped with accurate information about substance use and abuse and provides substance abuse professionals with information on the special needs and problems of the handicapped client. Offered in FALL based upon demand.

ALC 51S Alcoholism: Self-Help Groups (3)
Focuses on the twelve steps and the twelve traditions of Alcoholics Anonymous as well as the knowledge and skills necessary to effectively refer family, friends, and/or clients to the appropriate self-help group. Other self-help groups will be reviewed briefly. FALL, WINTER.

ALC 518 Alcoholism: A Systems Approach (3)
Focuses on the knowledge, skills, and attitudes needed for intervening with alcoholics. Topics include tasks and objectives of alcoholism counseling, roles of counselors in a variety of service settings, and contemporary professional concerns of counselors. FALL, WINTER, SPRING-SUMMER.

ALC 52A Alcoholism/Employee Assistance Programs in Business and Industry (3)
Overviews alcohol problems affecting business and industry. Examines how to plan and implement a program designed to intervene before such problems become severe. Topics covered include work behaviors of drug and alcohol abusers, confrontation strategies, program development, supervisory training, and assessment and referral procedures. FALL, WINTER, SPRING-SUMMER.

ALC 520 Alcoholism and Sexuality (1)
Emphasizes the relationships among alcoholism, biological functions, personal attitudes, societal attitudes, and psychological/sexual problems. Self-awareness exercises and values clarification lead to personal or professional growth in preparation for alcoholism counseling. WINTER; offered in other terms based upon demand.

ALC 560 Sobriety Planning (1)
Focuses on development of a structured recovery program and teaching the patient recovery skills necessary in maintaining abstinence. Deals with responses and attitudes necessary for remission and the relationship between AA and the professional counselor. Offered based upon demand.

ALC 561 Counseling with Gay and Lesbian Alcoholics (1)
Examines information and attitude assessment about homosexuality and specific approaches needed when working with gay alcoholics; geared toward the alcoholism counselor. Offered based upon demand.
ALC 563  Impact of Alcoholism in the Work Place (1)
Provides an overview of employees' assistance programming and the many elements involved in this process. Emphasizes practical skills and applied knowledge as well as necessary supporting theory. Includes research and theories and their application in concrete organizational situations. FALL; offered in other terms based upon demand.

ALC 565  Women and Alcohol (1)
Examines women's cycles, divorce, fetal alcoholism syndrome, and other subjects related to female alcoholism. WINTER; offered in other terms based upon demand.

ALC 566  Milieu Therapy: Creative Therapy Techniques for Ongoing Treatment (1)
Provides the alcoholism counselor with tools to be used with talk therapy in working with the alcoholic and his family. Deals with both individuals and groups. Offered based upon demand.

ALC 567  Alcohol and Black Americans (1)
Focuses upon special problems leading to and resulting from alcoholism in black Americans. Includes special emphasis upon the counselor's role in working with black Americans. SPRING-SUMMER; offered in other terms based upon demand.

ALC 568  How to Talk to Children about Drinking (1)
Provides an approach to communicating with children about drinking problems. Concentrates on four areas: dealing with children's anger, how a parent can resolve conflict, getting children to listen, and being a consultant to your child. The parent effectiveness theory of Dr. Thomas Gordon forms the basis for this course. Offered based upon demand.

ALC 570  Diagnosing Alcoholism: Practical Guidelines (1,2)
Provides an understanding of diagnostic methods for differentiating physiological alcoholism in the early, middle, and chronic stages. Also, deals with nonphysiological alcoholism and diagnosis of alcoholism when accompanied by other diseases. FALL; offered in other terms based upon demand.

ALC 571  Alcoholism: Dysfunctional Families (3)
Examines the effects of alcoholism upon family relationships. Prerequisite: ALC504 or permission. WINTER; offered in other terms based upon demand.

ALC 572  Treating Alcoholism: Clinical Skills Training (1,2)
Develops counseling skills for use with alcoholism patients in a clinical setting. WINTER; offered in other terms based upon demand.

ALC 573  Counseling for Relapse Prevention (1,2)
Develops skills in alcoholism prevention and intervention for the professional counselor. FALL; offered in other terms based upon demand.

ALC 574  Counseling for Family Recovery (1,2)
Provides understanding of the family response to alcoholism. Explores methods to facilitate recovery in the alcoholic and change in individual family members, and the family unit. Offered based upon demand.

ALC 576  Workshop: Teenage Substance Abuse (1)
Focuses on understanding prevention and treatment of substance abuse in teenagers. FALL; offered in other terms based upon demand.

ALC 577  Alcoholism, Grief, and Recovery (1)
Explores the relationships of alcoholism to grief and loss. Examines the dynamics of grief and bereavement, in the experiences of both the active and recovering alcoholic and the alcoholic's family. Examines methods for treatment. Offered based upon demand.
ALC 578 Educating the Alcoholism Patient (1)
Identifies special learning needs of alcoholism patients and methods for meeting those
needs. Analyzes what an alcoholism patient needs to know and why. Develops skills for
designing and implementing patient education as a part of treatment. Offered based upon
demand.

ALC 579 Interpersonal Aspects of Alcoholism and Recovery (1)
Focuses on examining and evaluating the relationship between interpersonal experiences
and their relationship to the alcoholism recovery process. Offered based upon demand.

ALC 601 Alcoholism: Experimental Approaches to Treatment (1-3)
Covers a variety of experimental or controversial approaches being used in alcoholism
treatment. Examples include biofeedback, behavioral approaches, controlled drinking,
and nutritional approaches. Offered based upon demand.

ALC 610 Psychopharmacology (3)
Reviews the functions of the human nervous system before exploring the basic principles
of psychopharmacology. For each classification of psychoactive drugs, students examine
the historical patterns of use and development, the physiological mechanisms of action,
and the various effects resulting from drug use. Prerequisite: Permission. WINTER, SPRING-
SUMMER.

ALC 620 Alcoholism: Social Control Models (2)
Considers the role of society in the development and consequences of alcohol use and
alcoholism. Reviews various sociological perspectives on the use and abuse of alcohol.
Analyzes the social policy implications for the control of alcohol abuse and alcoholism. Of-
fered based upon demand.

ALC 701 Reality Therapy and Alcoholism Counseling (1)
Presents the principles of reality therapy and demonstrates skills that can be utilized in
alcoholism counseling. FALL; offered in other terms based upon demand.

ALC 71A Drugs in the School (3)
Examines the prevalence of substance use and abuse in the schools; the etiology of such
use/abuse; the pharmacology of abusable drugs as it relates to the physiological,
psychological, and social development of youth; and methods of preventing, intervening,
and/or treating substance use/abuse among youth and adolescents. Designed for teachers,
counselors, and administrators in K through 12 schools as well as parents and other in-
terested members of the community. SPRING-SUMMER; offered in other terms based
upon demand.

ALC 720 Substance Abuse Prevention (3)
Reviews historical developments in substance abuse prevention strategies. Deals with
planning, implementation, and evaluation of both school-based and community-based
prevention programs. Considers current prevention strategies and future prospects of
prevention programming. FALL, WINTER.

ALC 805 Workshop: Adolescents, Alcohol, and Abuse (2)
Helps school personnel deal with the issues of alcohol use and abuse and with the youth
for whom it is a problem. FALL; offered in other terms based upon demand.

ALC 815 Alcoholism: Treatment Issues (3)
Examines issues relative to treating alcoholics; common characteristic resistance
mechanisms and behavioral disorders. Focuses special attention on personal requisites of
counselors. Prerequisite: ALC 505 or ALC 518. FALL, WINTER, SPRING-SUMMER.

ALC 820 Alcoholism: Alcohol Dependency Workshop (2)
Emphasizes counseling and guidance for special health education personnel in dealing
with alcohol dependency. Will be conducted in nine weekly three-hour sessions plus six
months post training evaluation session. Offered based upon demand.

Offered based upon demand.</td>
</tr>
<tr>
<td>ANTH 80A</td>
<td>Visual Models in Anthropology (3)</td>
<td>Advanced survey of the major subfields of anthropology (physical, archaeological, cultural, and linguistic) designed to integrate state-of-the-art discoveries and theoretical insights within each of these specialties through concentration upon visual models (human form, cosmological schemes, sacred artifacts, semiotics, measures, maps). Prerequisite: A bachelor's degree in a discipline suitable to the pursuit of intercultural studies (e.g., political science, anthropology, sociology, history, international studies, ethnic studies). Offered in WINTER and SPRING-SUMMER based upon demand.</td>
</tr>
</tbody>
</table>
ANTH 870 Graduate Research: ... (1-4)
Individual reading, research, and/or project in anthropology under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

Art

ART 404 Ceramics (3)
Covers basic concepts of clay handling. Includes pottery and sculptural forms using handbuilding, casting, and wheel methods. Prerequisite: Not open to art majors. FALL, SPRING-SUMMER.

ART 410 Artforms (3)
Designed for those desiring an upper-division introduction or review of the concepts, media, norms of criticism, and economics of art. Includes studio tours and museum assignments in addition to readings and classroom lectures. Offered based upon demand.

ART 420 Design: Drawing for Graphic Impact (3)
Exploration of graphic drawing techniques using a wide range of materials such as pen and ink, ink and wash, and silver point through a series of drafting exercises, emphasis on developing dynamic drawing skills and personal style. Prerequisite: Permission. FALL.

ART 425 Design: 2-D Design Principles (3)
An examination of the principles and elements of design with a two-dimensional context. Studio assignments will focus on problem solving with the interrelated aspects of line, shape, color, form, value, texture, and space on an advanced level. Prerequisite: Permission. FALL, odd years.

ART 470 Independent Study: ... (1-4)
Individual reading, research, and/or project in art under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

ART 500 Topics in Art: ... (1-3)
In a series of presentations using outside resources, specific developments, and skills, new creative approaches and issues are considered. Series may be repeated for different subjects. Prerequisite: Specific prerequisite(s) will vary depending on particular series. Offered based upon demand.

ART 501 Drawing: Life Study (2-4)
Develops the student's ability to render the human form representationally and abstractly. Students will work in charcoal, various chalks, pencils, and inks. Course may be repeated with instructor's approval. Prerequisite: Permission. FALL.

ART 504 Graphic Design Production (3)
Exploration and manipulation of various graphic design production materials. Development of photographically produced transparencies and subsequent exposure of these transparencies onto graphic design transfer materials. Offered based upon demand.

ART 506 Graphic Design I (3)
Thorough investigation of graphic layout, different kinds of layouts and scaling. Familiarization with paste-up for a variety of formats and the student's individual solutions to a variety of layout problems. Prerequisite: Permission. Offered based upon demand.
ART 507 Graphic Design II (3)
Continuation of ART506 with focus on problems of graphic design. Discussion of unified design approaches with emphasis on the student's individual solutions. **Prerequisite:** ART506. Offered based upon demand.

ART 514 American Art and Architecture: . . . (3)
A survey of early colonial, 18th century, and 19th century architecture, painting, sculpture, decorative, and graphic arts. In addition to lectures and required readings, this course will include student research and oral presentations on selected topics. **FALL; offered in other terms based upon demand.**

ART 516 Great Artists: . . . (3)
Provides an in-depth analysis of a select group of master artists. Examines the lives and works of eminent artists and the social, political, and artistic climate in which they worked. Also analyzes thematic and stylistic development, theoretical concerns of the artists, and their influence on other artists. **FALL.**

ART 517 Art Since 1945 (3)
Examines artistic movements and theories of the Western world since 1945. Emphasizes the art of the European and American tradition with some attention to European cultures. Studies contemporary artists, their philosophies and the socio-political and intellectual climate of the period. Analyzes paintings, sculpture, graphic arts, and architecture cross-culturally. **WINTER.**

ART 518 Women Artists (3)
An historical survey of Western female artists with special emphasis on American female artists of the 19th and 20th centuries. Examines the lives and works of eminent female artists and the social, political, and artistic climate in which they worked. There will be an analysis of the thematic and stylistic development and theoretical concerns of female artists and a comparative analysis between male and female expressions in the visual arts. Offered based upon demand.

ART 519 20th Century Art and Architecture (3)
Surveys 20th century art and architecture and familiarizes the student with the art, philosophies, socio-political, and intellectual climate of the period. Analyzes paintings, sculpture, graphic arts, and architecture from different cultural perspectives. **WINTER.**

ART 520 Western Art Seminar: . . . (2,3)
Art objects from European tradition before the 19th century are selected for study with a view to artistic theories and an analysis of symbolic content. Not scheduled to be offered in AY87-88.

ART 521 Art of the South Pacific (2,3)
A survey of art from the South Pacific including the islands of Polynesia, Melanesia, Micronesia, and the island-continent of Australia. Examines the stylistic classifications and ethnographic contexts. Not scheduled to be offered in AY87-88.

ART 523 Pre-Columbian Art: . . . (3)
Survey of the art and architecture of ancient America with reference to archaeology and early historic descriptions. Emphasizes specific regions listed in course subheading. Students may repeat this course for up to six hours under different subheadings. **FALL.**

ART 525 Art of First Americans (American Indians) (2-4)
A survey of North American Indian art from prehistoric contexts to the 19th century with attention to eastern United States, greater southwest, prairies, plains, and Pacific coast. **WINTER even years.**

ART 526 Graphic Design Processes: . . . (2-4)
Offers students the opportunity to do individualized research in illustration and/or typography. **Course may be repeated with permission of instructor. Prerequisite: Permission. Offered based upon demand.**
ART 527 African Art: . . . (3)
Survey of art in African archaeology and the styles and functions of art in traditional societies of west or central Africa. Students may repeat this course for up to six hours under different subheadings. SPRING-SUMMER.

ART 530 Non-Western Art Seminar: . . . (2,3)
Art objects from the Far East or Indian Asia are selected for lectures, oral reports, and group discussion. The object's relation to specific contexts of human behavior is examined as well as the ramifications of style in noting uniqueness and commonality. May be repeated for up to six hours. WINTER even years.

ART 531 Sculpture: 3-D Design in Fabrication Processes (3)
Explores design of three-dimensional forms. Emphasizes the individual's ability to design forms that comply with the principle and requirements of the problems as they are stated and assigned. Deals with the major methods of shaping materials, modeling, constructing, carving, and manipulation. Prerequisite: Sculpture, ceramics, lower division 3-D design or sculpture or a minimum of three lower-division art studio courses. WINTER.

ART 533 Sculpture: Fiber, Clay, Metal (3)
Presents techniques of fabrication with combined materials. Deals with clay, metal, and wood in macrame and other fine art fabrication techniques. Students will complete a work. Prerequisite: Permission. FALL.

ART 535 Sculpture: Metal (3)
Explores the problems of small scale sculpture (even years) and jewelry art metals (odd years) in both nonferrous and ferrous metal forming and fabrication. Students will solve design problems using various joining methods. Prerequisite: Permission. FALL.

ART 539 Sculpture: Advanced Metal Workshop (2-4)
Varied metal problems are considered including fusion welding, soldering and casting. Student presents a written proposal indicating the area of metal work to be pursued. Prerequisites: ART535 and permission. WINTER.

ART 541 Sculpture: 3-D Wood (2-4)
Entails both the applied technical overview and the analysis of theory approach. Various works and artists will be observed through reading and slides. Emphasizes aesthetics of art form and design. For the student who has intermediate or advanced exposure in sculpture. Prerequisite: Permission. FALL odd years.

ART 543 Sculpture: Ceramics (3)
Intermediate treatment of hand-built clay projects. Combines the problems of sculpture and ceramics. Prerequisite: Permission. SPRING-SUMMER even years.

ART 545 Sculpture: Advanced Figure Modeling (3)
An advanced class in modeling from life. Emphasis is on the figure as a total form and sculptural whole. Consideration placed on structure and anatomy of figures and their relationship to sculptural form. Work proceeds from the building of the armature to the final molding. Prerequisite: ART531, ART533, or equivalent; permission. SPRING-SUMMER odd years.

ART 555 Painting Composition (2,3)
For advanced painting students. Specifically emphasizes the problems of composition. Formal concerns of painting as well as other concerns of painting such as content and stimulus will be emphasized. Allows each student to pursue the maximum individual instruction permitted in a formal group course. Course may be repeated with instructor's approval. Prerequisite: Permission. FALL.

ART 558 Painting and Drawing Composition (2,3)
For advanced undergraduate and graduate students in painting and drawing. Emphasizes the problems of composition and the relationship between painting and drawing. Students are expected to present a written proposal on the content of their paintings. Course may be repeated with instructor's approval. Prerequisite: Permission. WINTER.
ART 561 Painting: Development of a Theme (2-4)
Students select a theme and/or motif and create works to achieve a painting unified through the development of the theme. Prerequisite: Permission. Not scheduled to be offered in AY87-88.

ART 563 Painting: Special Problems (2-4)
Students express themselves visually in their works and demonstrate ability to analyze and criticize their works and the works of others. For advanced undergraduate and graduate students in painting. Not scheduled to be offered in AY87-88.

ART 571 Printmaking Processes: ... (3,4)
Offers students the opportunity to do individualized research in lithography and/or serigraphy. Course may be repeated for a total of nine hours with instructor's approval. Prerequisite: Permission. WINTER.

ART 573 Printmaking: Intaglio, Black-White/Color Woodcut (3,4)
Offers students the opportunity to do individualized research in intaglio, woodcut, and/or color woodcut. Course may be repeated for a total of nine hours with instructor's approval. Prerequisite: Permission. SUMMER.

ART 581 Printmaking: Advanced Studio (2-4)
Offers an opportunity for advanced printmaking students to practice and improve printmaking techniques. Individual proposals required from each student will determine the nature of the work to be undertaken for the course. Course may be repeated with instructor's approval. Prerequisites: ART571 and ART573. FALL; offered in other terms based upon demand.

ART 805 Art and Society (3)
Examines the behavioral aspects of artistic production and the use of art objects in various societies, including our own, with special emphasis on integrating historical data on the role and status of artists. WINTER; offered in other terms based upon demand.

ART 810 Studies in Art: ... (3)
Offers graduate students the opportunity to do individualized research in a particular area of art history or art studio. Prerequisite: Permission. FALL.

ART 820 Art Seminar: ... (3)
Focuses on research approaches, theory, techniques, and materials related to special topics. Designed to prepare students for a professional life and career in art. Prerequisite: Permission. Offered based upon demand.

ART 855 Graduate Painting Composition (2,3)
Specifically emphasizes the student's ability to employ compositional elements and painting. The development of painting compositions will be achieved by a number of preparatory studies and sketches; and final compositions are presented in the paintings. Course may be repeated with instructor's approval. Prerequisite: Permission. WINTER.

ART 860 Graduate Printmaking (2-4)
Allows the graduate student time to perfect skills from intermediate through advanced. Students are expected to work with the professor through class sessions and individual critiques to accomplish their printmaking goals. Individual student proposals will determine the nature of the work to be undertaken. Course may be repeated with instructor's permission. Prerequisite: Permission. Offered based upon demand.

ART 865 Sculpture: Graduate Studio (2-4)
Provides experience with studio problems the student would not ordinarily complete without special assistance. Offers opportunity to work on long-term projects unhampered by the restraints of a strictly formal class. Course may be repeated with instructor's approval. Prerequisite: Permission. Offered based upon demand.
ART 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in art under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

ART 890 Graduate Thesis/Project: . . . (1-6)
Provides the student in art the opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student’s interests in art. Prerequisite: Permission of advisor. Offered based upon demand.

Bilingual-Bicultural Education—See Education—Bilingual-Bicultural

Biology

BIOL 305 Biological Science Foundations I (3)
Covers animal classification, cell structure, the concept of the life cycle, and the operations of meiosis and mitosis. Cellular respiration is also covered. Examines animal biology including structure, function, and embryonic development from conception to birth. Designed for nonscience majors. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

BIOL 306 Biological Science Foundations II (3)
Covers plant classification and plant life cycles; photosynthesis, Mendelian genetics, the structure and operations of DNA, the structure and function of flowering plants, and the fundamental principles of ecology and evolution. Designed for nonscience majors. SPRING-SUMMER; offered in other terms based upon demand.

BIOL 307 Biological Science Foundations Laboratory (1)
Provides a series of laboratory and/or field activities appropriate to the topics covered in Biology 305 and 306. Emphasizes both knowledge and skills in laboratory operations. Designed for nonscience majors. Prerequisite: BIOL 305 or BIOL 306 or concurrent enrollment. Offered based upon demand.

BIOL 308 Human Evolution (3)
Covers the principles of evolution and the history of evolutionary thought. Considers the development of biological anthropology and the human fossil record. Presents an account of human evolution based on an interpretation of the fossil record. FALL, WINTER, SPRING-SUMMER.

BIOL 315 Animal Behavior (3)
Covers the study of animal behavior including evolution of behavior, animal perception, learning, reproductive ecology, and social behavior. Designed specifically for nonscience students—science students see BIOL 455. Open to all interested students. Offered based upon demand.

BIOL 316 Plant Diversity Lecture (2)
Covers the comparative life cycle adaptations found in the plant kingdom. Studies in detail all of the divisions, together with their associated classes and orders. Explores vegetative morphology of gametophytes and sporophytes, the processes of gametogenesis and sporogenesis, propagule dispersal, and methods of asexual reproduction. Illustrates and discusses in detail the life cycles of selected genera. Prerequisites: General biology or BIOL 305, BIOL 306, and BIOL 307. SPRING-SUMMER.

BIOL 317 Plant Diversity Laboratory (1)
Involves laboratory experiments and activities appropriate to the topics covered in BIOL 316. Specifically, prepared slides, preserved specimens, and live material are provid-
ed for laboratory study. These materials are comprised of selected genera representing the divisions, major classes, and orders of the plant kingdom. Prerequisite: Concurrent enrollment in BIOL316. SPRING-SUMMER.

**BIOL 320 Animal Diversity (2)**  
Covers the morphological diversity, life cycles, ecological relationships, and evolutionary adaptations found in the animal kingdom. Major animal phyla, together with their associated classes, are studied in detail. Prerequisites: General Biology or BIOL305, BIOL306, and BIOL307; and concurrent enrollment in BIOL321. WINTER.

**BIOL 321 Animal Diversity Laboratory (1)**  
Includes laboratory experiments and activities correlated with topics covered in BIOL320. Prepared slides, preserved specimens, and live material are provided for laboratory study. These materials are comprised of selected genera representing major phyla of the animal kingdom. Prerequisites: General Biology or BIOL305, BIOL306, and BIOL307; and concurrent enrollment in BIOL320 is required. WINTER.

**BIOL 322 Ecology: Basic Principles (3)**  
Examines the major principles of ecology as applied to the functioning of natural ecosystems. Emphasizes population processes, the organization of biotic communities, energy flow, and nutrient cycling in natural environments. Designed for science majors. Prerequisites: General Biology or BIOL305 and BIOL306. FALL.

**BIOL 340 Genetics (3)**  
Covers meiosis and mitosis, Mendelian genetics, sex determination, linkage, and crossing over. Explores in detail the molecular biology of gene structure and expression. Studies also the basic principles of population genetics. Prerequisites: General Biology, CHEM322, and CHEM323. WINTER odd years.

**BIOL 360 Comparative Anatomy (3)**  
Introduces the anatomy of the chordates, treating the structure and functioning of the major vertebrate organ systems from a comparative and evolutionary perspective. Prerequisites: Zoology, BIOL320, and BIOL321 or equivalent. WINTER.

**BIOL 361 Comparative Anatomy Laboratory (1)**  
Examines in detail the structure of the vertebrate body. Emphasizes the dissection of a series of vertebrate types. Prerequisite: Concurrent enrollment in BIOL360. WINTER.

**BIOL 370 Cell Biology (2)**  
Emphasizes the ultrastructure, biochemical composition, metabolism, and proliferation of cells and considers research techniques used to study cell structure and function. Prerequisites: General Biology (or permission of instructor), CHEM322, and CHEM323. SPRING-SUMMER.

**BIOL 371 Cell Biology Laboratory (1)**  
Covers laboratory experiments and demonstrations associated with BIOL370. Prerequisite: Concurrent enrollment in BIOL370. SPRING-SUMMER.

**BIOL 430 Microbiology (3)**  
Considers the function of bacteria and fungi in natural and disturbed environments. Primary emphasis on the techniques for detecting, culturing, and identifying bacteria. Introduces the basic morphology and physiology of fungi from soil, air, and water. Considers the function of bacteria and fungi in natural and disturbed environments, and introduces the basic morphology and physiology of algae found in soil, air, and water. Prerequisites: General biology and chemistry; concurrent enrollment in BIOL431. WINTER even years.

**BIOL 431 Microbiology Laboratory (1)**  
Covers laboratory experiments associated with BIOL430. Prerequisite: Concurrent enrollment in BIOL430. WINTER even years.
BIOL 444  Physiologic Systems I (2)
Includes cellular and chemical bases of physiology and the muscular, cardiovascular, and immunological systems. Prerequisites: three hours of general biology or anatomy and physiology; three hours general chemistry. Organic chemistry is strongly recommended. FALL, WINTER; offered SPRING-SUMMER based upon demand.

BIOL 445  Physiologic Systems I Laboratory (1)
Covers laboratory experiments associated with BIOL444. Prerequisite: Concurrent enrollment in BIOL444. FALL, WINTER; offered SPRING-SUMMER based upon demand.

BIOL 446  Physiologic Systems II (2)
Includes renal, pulmonary, nervous, and gastrointestinal functions. Prerequisite: BIOL444. FALL, WINTER; offered SPRING-SUMMER based upon demand.

BIOL 447  Physiologic Systems II Laboratory (1)
Covers laboratory experiments associated with BIOL446. Prerequisite: Concurrent enrollment in BIOL446. FALL, WINTER; offered SPRING-SUMMER based upon demand.

BIOL 450  Animal Physiology (3)
Emphasizes general physiological principles by examining the cell and organ physiology of major body systems including the nervous, musculoskeletal, immune, cardiovascular, respiratory, digestive, and excretory systems. Considers comparative physiological adaptations where appropriate among specific vertebrate and invertebrate animals. Prerequisites: BIOL370, BIOL371, CHEM322, and CHEM323. FALL.

BIOL 451  Animal Physiology Laboratory (1)
Covers laboratory experiments and demonstrations associated with BIOL450. Prerequisite: Concurrent enrollment in BIOL450. FALL.

BIOL 455  Ecology of Animal Behavior (3)
Introduction to the biology of animal behavior with focus on its evolutionary and ecological bases. Provides concepts necessary for more advanced study in the area. Prerequisite: General biology; open to science division students only. FALL.

BIOL 460  Plant Physiology (3)
Covers the functional anatomy of cells and tissues of flowering plants. Regarding cells, emphasis is placed on the ultrastructure and function of the plant cell wall. Gross anatomy stresses the functional tissues of roots, stems, and leaves. Also covers the physiology of water relations, mineral nutrition, photosynthesis, and hormonal regulation of growth and development. Prerequisites: BIOL370, BIOL371, CHEM322, and CHEM323. FALL.

BIOL 461  Plant Physiology Laboratory (1)
Involves laboratory experiments and activities appropriate to the topics covered in BIOL460. Prepared slides and preserved specimens will be provided for laboratory investigations of the functional anatomy of flowering plants. A variety of experiments on photosynthesis, water potential, mineral nutrition, and hormonal control of growth and development will be performed. Prerequisite: Concurrent enrollment in BIOL460. FALL.

BIOL 470  Independent Study: . . . (1-4)
Individual reading, research, and/or project in biology under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

BIOL 480  Internship: . . . (1-4)
Designed to provide students in biology with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

BIOL 516  Human Genetics (3)
This science course for nonscience majors considers the biological basis for human genetics, emphasizing mitosis and meiosis, Mendelian and sex-linked inheritance, mutations, inheritance disorders, genetic engineering, and genetic counseling. SPRING-SUMMER.
Biol 522 Ornithology (1)
Introduces ornithology, focusing on the basic morphology, physiology, ecology, and behavior of birds. Places particular emphasis on bird vocalizations, territoriality, life history data, and the structure of bird communities. Prerequisites: Zoology, BIOL320, and BIOL321, or equivalent; or permission of instructor. WINTER.

Biol 523 Ornithology Laboratory (2)
Focuses on the identification of birds in the field by both visual and auditory characteristics. Weekly field trips allow students to become familiar with the majority of resident and migratory birds of Northeastern Illinois. Prerequisites: Zoology, BIOL320, BIOL321, BIOL522, or equivalent; or permission of instructor. SPRING-SUMMER.

Biol 555 Mammalogy (2)
Emphasizes the common characteristics of mammals generally. Specific attention to the mammals of the Great Lakes region in terms of distribution, morphology, physiology, and behavior. Prerequisite: BIOL322 or equivalent. FALL.

Biol 556 Mammalogy Laboratory (1)
Provides laboratory experiences associated with BIOL555. Prerequisite: Concurrent enrollment in BIOL555. FALL.

Biol 560 Plant Systematics (2)
Covers various systems of classification from both modern and historical perspectives, the effect of evolutionary theory on systematics, for example, parallelism and convergence. Compares phylogenetic and natural systems. Introduces students to a variety of taxonomic keys covering broad and localized geographic areas. Prerequisite: General biology. SPRING-SUMMER even years.

Biol 561 Plant Systematics Laboratory (1)
A study of the flowering plants of the Chicago region with emphasis on identification, classification, and nomenclature. Prerequisite: Concurrent enrollment in BIOL560. SPRING-SUMMER even years.

Biol 601 Environmental Education: Biological Field Science (2)
Field course offered at Camp Sagawau. Uses field methods of investigation to compare habitats and study variations in plant communities and the effects of pollution. Offered based upon demand.

Biol 603 Environmental Education: Forest Investigations (2)
Field course offered at Camp Sagawau. Participants examine local forest communities using several methods of analysis including point-quarter transects, age classification by correlation with diameter class, variable and fixed plot sampling, and evaluating influences of microclimate. Prerequisite: Some fieldwork. Offered based upon demand.

Biol 604 Environmental Education: Investigations in Limnology (2)
An intensive week of field investigation based at Camp Sagawau comparing elements of real limnological systems including rivulets, creeks, marshes, ponds, and lakes of lentic and lotic environments. Emphasizes characteristic macro-invertebrates, vertebrates, chemical and physical properties of aquatic environment—whether natural or influenced by human activities. Prerequisite: BIOL601 or permission. Offered based upon demand.

Biol 605 Environmental Education: Terrestrial Biology (2)
Weekend field course taught at Camp Sagawau. Identification of plants and local communities is used to develop understanding of regional environments; teaching applications are made. Offered based upon demand.

Biol 620 Ecological Methods (2)
Emphasizes principles and techniques used in the collection and analysis of ecological data. Exposes students to a variety of field methodologies and statistical tools for data analysis. Prerequisites: BIOL322 and STAT520 or equivalent. FALL.
Biology 193

SIOl 621  Ecological Methods laboratory (1)
Provides students with extensive experience in the collection and analysis of ecological data. Thorn Creek Nature Preserve, a temperate, deciduous forest community, will be the principle study area. Prerequisite: Concurrent enrollment in BIOL620. FALL.

BIOl 632  Aquatic Ecology (2)
An integrated treatment of Aquatic Ecology, focusing on the chemical, physical, and biological processes which structure aquatic environments. Prerequisite: BIOL322 or equivalent. SPRING-SUMMER.

BIOl 633  Aquatic Ecology Laboratory (1)
Provides a selected set of laboratory and field exercises aimed at illustrating the major processes occurring in aquatic systems. Prerequisite: Concurrent enrollment in BIOL632. SPRING-SUMMER.

BIOl 64A  Toxicology (3)
Emphasizes toxicological principles by examining biological and chemical factors influencing toxicity, toxicologic quantitation and testing methods, the impact of natural and synthetic toxins on the environment and health, regulations, and risk assessment. Prerequisites: BIOL370, BIOL371, CHEM322, and CHEM323 and either CHEM544, CHEM545 or BIOL450, BIOL451. WINTER even years.

BIOl 655  Animal Behavior Field Studies I (2)
Covers basic concepts and techniques underlying the study of animal behavior in the field. Focuses on techniques and research methods relevant to animal conservation and management. Prerequisite: BIOL315 or BIOL455. WINTER.

BIOl 656  Animal Behavior Field Studies I Laboratory (1)
Provides field work experiences associated with BIOL655. Prerequisite: BIOL655. SPRING-SUMMER.

BIOl 666  Plant Microenvironments Lecture (2)
Covers environmental and endogenous mechanisms controlling the various phases typical of the flowering plant life cycle such as: seed germination, flowering, and fruit ripening. Studies the phenomenology of each phase together with the history and current state of research in each phase. Prerequisites: BIOL460 and BIOL461; CHEM322 and CHEM323 strongly recommended. WINTER.

BIOl 667  Plant Microenvironments Laboratory (1)
Students participate in a series of laboratory and/or field activities appropriate to the topics covered in BIOL666. Each laboratory activity centers on the physiology of a specific phase in the flowering plant life cycle. Prerequisite: Concurrent enrollment in BIOL666. WINTER.

BIOl 740  Comparative Animal Physiology (2)
Emphasizes the comparative physiology of specialized adaptations of major body systems including osmoregulation, thermoregulation, sensory physiology, altitude and diving physiology, endocrinology, navigation, communication, and energy expenditure. Prerequisites: BIOL450 and BIOL451; organic chemistry strongly recommended. WINTER.

BIOl 741  Comparative Animal Physiology Laboratory (1)
Covers laboratory experiments and demonstrations associated with BIOL740. Prerequisite: Concurrent enrollment in BIOL740. WINTER.

BIOl 755  Field Studies: Animal Ecology (3)
In-depth participation in ongoing research on animal ecology being conducted by faculty. Covers the range of practical considerations in doing field research plus extensive focused field experience. Topic rotates year-to-year among faculty involved in animal studies. See listed professor for specific details. Prerequisites: BIOL655 and BIOL656. SPRING-SUMMER.
BIOl 766 Field Studies: Plant Ecology (3)
Students develop an understanding of the history, vegetation, and geology of a natural wildlife habitat. The specific habitat is chosen by the instructor, and it may be terrestrial, aquatic, or marine. Emphasis is given to studies of plant ecology of the area, but its geology and human history are also examined. Prerequisite: Permission. SPRING-SUMMER.

BIOl 822 Population Biology (4)
Studies the major current hypotheses of animal population regulation. Readings cover population dynamics, ecology of predation/competition, and possible roles of internal physio-behavioral mechanisms such as stress and dispersal. Prerequisites: BIOl322 and BIOl455 or equivalents. WINTER.

BIOl 855 Experimental Design for Laboratory and Field (3)
Covers a broad range of research designs for simple to complex factorial. Deals with relationships between experimental design and statistics. Includes practice in deriving unique experimental designs for specific research problems. To be taken before thesis project work. Prerequisite: STATS20 or equivalent. WINTER.

BIOl 856 Seminar in Animal Ecology (2)
Reading and discussion of selected topics in animal ecology. Potential areas include evolution, population biology, behavior, or physiological ecology. Prerequisite: Permission. FALL odd years.

BIOl 866 Seminar in Plant Ecology (2)
Reviews the literature in various areas of plant ecology. Student selects a topic from among three broad areas: plant-plant interactions, plant-animal interactions, and plant-environment interactions and reviews the available literature. Student presents a synopsis of the literature in the form of a seminar and a written report. Prerequisite: Permission. FALL even years.

BIOl 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in biology under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

BIOl 880 Internship: . . . (1-4)
Designed to provide students in biology with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

BIOl 890 Graduate Thesis/Project: . . . (1-6)
Provides the student in biology the opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student's interests in biology. Prerequisite: Permission of advisor. Offered based upon demand.

BIOl 899 Thesis Presentation in Biology (1)
Students provide oral and written accounts of their theses. The oral accounts will be seminars on their research projects in a format similar to the presentation of papers at professional meetings. The written account will follow thesis guidelines for graduate level work. Students should enroll during the final trimester of their research or the following trimester. Prerequisite: Permission of advisor. FALL, WINTER, SPRING-SUMMER.

Business Education

BUED 360 Business Communication (3)
Presents a comprehensive treatment of basic principles of verbal and nonverbal business communications, including business letters, memoranda, reports, oral communication, and technical report writing. Prerequisite: ENCL381 or equivalent. FALL, WINTER, SPRING-SUMMER.
BUED 451 Principles and Problems in Business Education (3)
Designed to acquaint students with the evolution and philosophy of business education. Includes the status, structure, and problems related to the current business education curriculum. Offered based upon demand.

BUED 452 Methods of Teaching Basic Business (3)
Deals with methods and techniques of creating, facilitating, and administering effective teaching and learning experiences in basic business. Prerequisites: College coursework in accounting, business law, economics, marketing, and/or management. FALL.

BUED 453 Methods of Teaching Office Skill Subjects (3)
Deals with methods, arrangements, content, objectives, materials, standards, and techniques of teaching shorthand, typewriting, and other office education skills. Prerequisites: Typewriting and/or shorthand. WINTER.

BUED 454 Methods of Teaching Bookkeeping and Related Subjects (3)
Deals with methods and techniques of creating, facilitating, and administering effective teaching-learning experiences in bookkeeping, accounting, and the like. Prerequisite: Accounting, three credit hours. SPRING-SUMMER.

BUED 470 Independent Study: . . . (3)
Independent study is intended to provide better students the opportunity to study a topic of their own choice in business education under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should choose a definite area for investigation within business education and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

BUED 490 Field Experience: Business Education (3)†
Enables students to experience the ongoing office operations in educational institutions. Limited to undergraduate students in the business teacher education major. Prerequisites: BUED451 and BUED452. Offered based upon demand.

BUED 495 Practicum in Business Education (6)†
Synthesizing experience for business teacher education students. Provides the opportunity to gain new knowledge and insights in a secondary school setting. (Students must apply for the practicum no later than three months before the trimester in which they plan to enroll for the practicum.) Prerequisites: BUED451, BUED452, EDUC310, and PSYC320. Offered based upon demand.

BUED 835 Innovative Methods in Business Education (3)
Explores current research and teaching practices relating to the development and classroom use of individualized instruction, large-group and small-group methods, audiovisual techniques, games, and other modes of innovative instruction in business education. Assesses value and relevance of innovative methods in business education. Offered based upon demand.

BUED 840 Organization and Administration of Cooperative Business Education Programs (3)
Deals with designing and implementing a total cooperative business education program including curricula. Discusses vocational education laws, identifying and securing training sites, preparing an effective training plan, and implementing effective public relations. Offered based upon demand.

BUED 845 Coordinating Techniques of Cooperative Vocational Education Programs (3)
This is the second of two courses required for high school teacher-coordinators to be certified with the Illinois State Vocational Education Department. Focuses on the development of program policy, functioning with school and community personnel, and recruitment and selection of students. Also includes location and development of training stations, placement of students, and legal considerations and related instructions. Offered based upon demand.
Business Law

BLAW 320 Legal Environment of Administration (3)
Focuses on public law and the organization. Examines the organization's relationship to employees, customers/clients, competitors, governmental bodies, and the public interest. Discusses administrative law policy and procedure in such substantive areas as labor law, consumer protection, antitrust, securities law, and environmental protection. FALL, WINTER.

BLAW 325 Business Law I (3)  
An introduction to the American legal system followed by study of the following substantive areas of law: contracts, personal property, bailments, sales, agency. The principles discussed are applicable to personal as well as business use and, nonbusiness students wanting to become more knowledgeable "consumers of law" are encouraged to enroll. FALL, WINTER, SPRING-SUMMER.

BLAW 326 Business Law II (3)  
The study of law relating to business organization and the financing of transactions. Topics include partnerships, corporations, securities regulation, commercial paper, credit, secured transactions, and bankruptcy. Prerequisite: BLAW 325. FALL, WINTER, SPRING-SUMMER.

Chemistry

CHEM 306 Chemical Science Foundations I (3)  
Introduces the fundamental principles of chemical science and examines material changes in our universe that are the result of chemical processes. Designed for nonscience majors. Prerequisite: MATH 310. FALL; offered in other terms based upon demand.

CHEM 307 Chemical Science Foundations Laboratory (1)  
Covers basic laboratory techniques as performed on a variety of samples. Illustrates fundamental chemical principles and environmental analyses through laboratory experiments. Designed for education majors. Prerequisite: CHEM 306 or equivalent. Offered based upon demand.

CHEM 308 Chemical Science Foundations II (3)  
Continuation of CHEM 306. Covers chemical reactions, equilibrium, reaction rates, carbon chemistry, and introduction to the chemistry of living systems. Prerequisite: CHEM 306. WINTER; offered in other terms based upon demand.

CHEM 315 Analytical Chemistry (3)  
Covers fundamental methods of chemical analysis. Discusses acid-base, solubility and redox equilibrium, volumetric, gravimetric, potentiometric, and spectrophotometric analytical methods and separation techniques. Prerequisites: One year of freshman chemistry with laboratory, algebra, and concurrent enrollment in CHEM 316. SPRING-SUMMER.

CHEM 316 Analytical Chemistry Laboratory (2)  
Covers laboratory experiments associated with CHEM 315. Classical laboratory techniques including volumetric titrations, gravimetric analysis, potentiometry, spectrophotometric analysis, and chemical separations are performed. Prerequisite: Concurrent enrollment in CHEM 315. SPRING-SUMMER.

CHEM 322 Organic Chemistry Lecture (3)  
One trimester survey course in organic chemistry designed for students in related fields as well as those interested in chemistry. Organic functional groups are emphasized. Prerequisite: One year of general chemistry. FALL, WINTER; offered in SPRING-SUMMER based upon demand.
CHEM 322 Organic Chemistry Laboratory (1)
Covers laboratory experiments associated with CHEM322. Prerequisite: Concurrent enrollment in CHEM322. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

CHEM 366 Physical Chemistry I: Lecture (3)
Covers properties and theories of gases, mechanisms of atoms and molecules, molecular energies, and the laws of thermodynamics. Conducted in a lecture/problem solving format. Prerequisites: Differential and integral calculus, two semesters of general chemistry, and one semester of analytical chemistry. FALL.

CHEM 367 Physical Chemistry I: Laboratory (1)
Laboratory experiments are performed covering molecular weight determinations using a high vacuum line, heats of solution using a solution calorimeter, heats of combustion using a bomb calorimeter, and elementary laboratory glass blowing. Prerequisite: CHEM366 or concurrent enrollment. FALL.

CHEM 368 Physical Chemistry II: Lecture (3)
Continuation of CHEM366. Theory includes chemical equilibria, phase equilibria, and multi-component systems, elementary kinetics, elementary electrochemistry, and elementary photochemistry conducted in a lecture/problem-solving format. Prerequisite: CHEM366. WINTER.

CHEM 369 Physical Chemistry II: Laboratory (1)
Laboratory experiments are performed covering the determination of an equilibrium constant using a UV-VIS spectrophotometer, colligative properties using a freezing point depression and a boiling elevation apparatus and kinetics using a polarimeter. Prerequisite: CHEM368 or concurrently. WINTER.

CHEM 426 Instrumental Analysis (3)
Surveys basic instrumental analysis including gas chromatography, liquid chromatography, atomic absorption spectroscopy, infra-red and ultra-violet spectroscopy and nuclear magnetic resonance spectrometry. Prerequisites: One year each analytical chemistry and organic chemistry. FALL.

CHEM 427 Instrumental Analysis Laboratory (1)
Covers laboratory experiments associated with CHEM426. Prerequisite: Concurrent enrollment in CHEM426. FALL.

CHEM 433 Advanced Inorganic Chemistry (3)
Focuses on the structure and bonding of inorganic compounds, extension of acid-base theory, coordination chemistry, and the descriptive chemistry of selected elements. A systematic approach based on the theoretical and empirical generalizations inherent in the periodic table. Prerequisite: CHEM368. FALL even years.

CHEM 434 Advanced Inorganic Chemistry Laboratory (1)
An introduction to the experimental study of the synthesis, decomposition, and stability of a variety of inorganic compounds. Prerequisite: CHEM433 or concurrent enrollment. FALL even years.

CHEM 455 Chemical Literature (1)
Acquaints students with major sources in chemical information literature and provides guidance and practice in their efficient utilization. Includes use of indexes, abstracts, the card catalog, computer database searching, and other sources to identify specific information resources in chemistry. Studies how information is organized and stored for retrieval as well as specialized data compilations such as the Sadtler Standard Spectra. Includes online computer search of chemical abstracts. Prerequisites: One year each of general chemistry and organic chemistry; open to chemistry majors only. SPRING-SUMMER even years.
CHEM 470 Independent Study: . . . (1-4)
Individual reading, research, and/or project in chemistry under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

CHEM 480 Internship: . . . (1-4)
Designed to provide students in chemistry with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

CHEM 505 Environmental Chemistry Lecture (3)
Covers chemical principles and their application to environmental problems. Topics include: the source, chemical composition, nature, and effects of principal pollutants. Also covers the treatment and disposal of domestic and industrial waste and techniques for detecting and analyzing chemical pollutants. Prerequisites: CHEM323 and CHEM427. SPRING-SUMMER.

CHEM 506 Environmental Chemistry Laboratory (1)
Practical work with highly analytical chemistry content to monitor the environment. Analytical methods involve gathering and storage of environmental samples for chemical analysis; chromatographic and other techniques for the separation of chemical compounds; and computational methods for presenting analytical results and assessing their precision, accuracy, and significance. Prerequisite: CHEM505 or concurrent enrollment. SPRING-SUMMER.

CHEM 510 Water Quality Analysis (2)
Examines the application of chemical analysis techniques to determine the levels of beneficial and undesirable impurities in natural water systems. Focuses on the most common chemical analyses performed in the assessment of water quality and includes the study of sampling techniques, sample preservation measures, and laboratory procedures. Covers chemical reaction processes relevant to understanding both the analysis techniques and environmental significance of properties/constituents being measured. Prerequisite: Analytical chemistry. SPRING-SUMMER.

CHEM 511 Water Quality Analysis Laboratory (1)
Covers laboratory experiments associated with ESCI595. Prerequisite: Concurrent enrollment in CHEM510. SPRING-SUMMER.

CHEM 522 Advanced Organic Chemistry (3)
A one trimester advanced topic course in organic chemistry. Organic reaction mechanisms are emphasized. Prerequisite: CHEM322 or equivalent. WINTER; offered in SPRING-SUMMER based upon demand.

CHEM 523 Advanced Organic Chemistry Laboratory (1)
Covers laboratory experiments associated with CHEM522. Prerequisite: Concurrent enrollment in CHEM522. WINTER; offered in SPRING-SUMMER based upon demand.

CHEM 530 Physical Chemistry III (3)
An introduction to the quantum theory of atoms, molecules, and crystals, the quantum theory of valence, atomic and molecular spectroscopy, statistical mechanics and thermodynamics, and intermolecular forces. Prerequisite: CHEM368. SPRING-SUMMER even years.

CHEM 544 Biochemistry: Lecture (3)
An introduction to biochemistry, including enzymes, reaction sequences and control mechanisms. Prerequisite: One year organic chemistry or permission. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

CHEM 545 Biochemistry: Laboratory (1)
Laboratory component of CHEM544. Prerequisite: CHEM544 must be taken concurrently. FALL, SPRING-SUMMER; offered in WINTER based upon demand.
CHEM 550 Polymer Chemistry (3)
Introduction to polymer science covering basic concepts, basic structures, kinds of polymerization, copolymerization, stereochemistry, physical states and transitions, solubility, molecular weight, viscous flow, mechanical properties, structure-property relationships, degradation and stabilization, additives, analysis and identification, technology of plastics, fibers, elastomers, and coatings. Prerequisites: Organic and physical chemistry. SPRING-SUMMER odd years.

CHEM 622 Chromatography (3)
Examines the theory of chromatographic separations with basic experimental work with thin-layer chromatography, gas-liquid chromatography, and high performance liquid chromatography. Prerequisites: Analytical and organic chemistry. WINTER.

CHEM 623 Chromatography Laboratory (1)
Covers laboratory experiments associated with CHEM622. Prerequisite: Concurrent enrollment in CHEM622. WINTER.

CHEM 646 Radiochemistry (3)
The use of radioisotopes as tools for chemical, environmental, and biological studies has become widespread. This course is designed to familiarize the student with the necessary background in the field and also with the techniques and equipment used. Includes an introduction to radioactivity theory, interactions of radiation with matter, use of detection equipment and applications to chemical and environmental problems. Prerequisites: CHEM368 or analytical chemistry, physics, and calculus. FALL even years.

CHEM 647 Radiochemistry Laboratory (1)
Covers laboratory experiments associated with CHEM566. Equipment used includes geiger counters, liquid scintillation counter and a gamma ray detector. Prerequisite: Concurrent enrollment in CHEM646. FALL even years.

CHEM 655 Electrochemistry (3)
Introduces the theory and practice of electrochemical techniques with a focus on electroanalytical methods. Presents the techniques of potentiometry, conductance measurements, coulometry and voltammetry. Includes new developments in electrochemical detection, spectroelectrochemical studies, and chemically modified electrodes. Prerequisite: CHEM368. FALL odd years.

CHEM 656 Electrochemistry Laboratory (1)
Covers laboratory experiments associated with CHEM655. Prerequisite: Concurrent enrollment in CHEM655. FALL odd years.

CHEM 666 Spectrochemistry (3)
Covers modern optical methods of analysis from the microwave to the gamma ray region of the electromagnetic spectrum. Topics include spectroscopy associated with ultraviolet-visible, infrared, emission, flame, atomic absorption, atomic fluorescence, Raman, microwave, fluorescence, phosphorescence, refractometry, spectropolarimetry, circular dichroism, turbidimetry, nephelometry, x-ray, nuclear magnetic resonance, electron spin resonance, gamma ray, and Mossbauer techniques. Prerequisites: Analytical chemistry and one year of organic chemistry. WINTER.

CHEM 667 Spectrochemistry Laboratory (2)
Covers laboratory experiments associated with CHEM666. Hands-on experience with the A.A., UV-VIS, IR, NMR and fluorescence spectrometers are available through comprehensive laboratory experiments. Prerequisite: Concurrent enrollment in CHEM666. WINTER.

CHEM 744 Analytical Biochemistry (2)
Presents basic procedures for cell fractionation and for isolation and characterization of biopolymers. Prerequisite: CHEM544. FALL.

CHEM 745 Analytical Biochemistry Laboratory (1)
Covers laboratory experiments associated with CHEM744. Students isolate organelles and biopolymers and characterize them by techniques which include photomicrography, spectrophotometry, polyacrylamide electrophoresis, fluorometry, nephelometry, and ultracentrifugation. Prerequisite: Concurrent enrollment in CHEM744. FALL.
CHEM 801 Chemistry Models Workshop (1)
A workshop on the construction of molecular and ionic, atomic, and molecular orbital space-filling models. Designed for high school and college chemistry teachers. Prerequisite: Background in chemistry appropriate to high school and college chemistry teachers. Offered based upon demand.

CHEM 822 Gas Chromatography/Mass Spectra (3)
Examines the theory and practice of gas, liquid chromatography/mass spectrometry. Environmental samples are routinely used for analysis. Prerequisite: CHEM622. SPRING-SUMMER.

CHEM 862 Photochemistry (3)
A study of the laws and theory of photochemistry. Topics include the theory of the excited state, electronic spectra of excited states, transients and their behavior, experimental techniques, photochemical processes in the gas phase, mechanisms of organic photochemical reactions, photochromism, and industrial applications. Laboratory experiments give practical experience to the theory covered in class. NOTE: This is not a photography course—for that see PHOT510. Prerequisites: CHEM368 and CHEM666. SPRING-SUMMER.

CHEM 866 Chemical Equilibrium Theory (3)
Examines the chemical composition of aquatic systems, including interactions between constituents treated according to rigorous equilibrium, formulations, and graphical approximations. Emphasis on acid-base, redox, solubility, and complexation. Activities include instruction on the use of appropriate computer hardware and software, demonstrations of problem-solving techniques, and in-class problem solving. Prerequisite: CHEM368 or equivalent. FALL even years.

CHEM 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in chemistry under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

CHEM 880 Internship: . . . (1-4)
Designed to provide students in chemistry with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

CHEM 890 Graduate Thesis/Project: . . . (1-6)
Provides the student in chemistry the opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student's interests in chemistry. Prerequisite: Permission of advisor. Offered based upon demand.

CHEM 899 Thesis Presentation in Chemistry (1)
Students completing their graduate thesis will present a seminar on their research project in a format similar to a presentation of a paper at a professional meeting. Students should enroll during their final trimester of thesis research or for the following trimester. Prerequisite: Permission of advisor. FALL, WINTER, SPRING-SUMMER.

Communication Disorders

CDIS 304 Phonetics (3)
Studies the transcription of speech using the International Phonetic Alphabet and the manner, type, and place of articulation of each of the sounds of American speech. FALL.

CDIS 310 Introduction to Communication Disorders (3)
Study of the four major types of communication disorders, their effects on the communicatively impaired individual, and basic remediation programs. FALL.

CDIS 515 Neurological Bases of Speech and Language (1)
Covers the structure and function of the peripheral and central nervous systems. Relates those to the receptive and expressive processing of language. WINTER, SPRING-SUMMER.

CDIS 700 Clinical Observation in Communication Disorders (1)
Students will view 25-30 hours of videotapes of evaluation/management of communication disorders and will complete assignments and reports relating to the videotapes. Prerequisite: Permission of advisor. FALL, WINTER, SPRING-SUMMER.

CDIS 80A Nonspeech Communication: Comprehensive Program Planning (3)
Addresses the expanding field of communication systems for nonspeaking individuals. Stresses the areas of assessment, selection techniques, determination of symbol systems, design of communication aids, and the use of devices in the classroom and living environments. Designed for speech-language pathologists and special educators. Prerequisites: Either CDIS813 for speech-language pathologists, SPED510 for special educators, or equivalents. Offered based upon demand.

CDIS 80B Recent Developments in Fluency Disorders (3)
Emphasizes therapeutic applications of recent advances in research on stuttering. Designed for the practicing speech-language pathologist, it covers current clinical and scientific issues in dysfluency. Prerequisite: CDIS825 or equivalent. Offered based upon demand.

CDIS 80F Recent Developments in Adult Neurologic Speech and Language Disorders (3)
Focuses on recent research literature in aphasia, the dysarthrias, apraxia, and applied therapeutic intervention strategies. Designed for practicing speech-language pathologists, it explores current clinical and scientific issues in speech and language disorders resulting from neurological impairment. Prerequisites: CDIS833, CDIS836, or equivalents. Offered based upon demand.

CDIS 800 Current Trends in Public School Speech-Language Pathology (3)
Focuses on recent developments in diagnostic and therapeutic procedures as well as on professional issues such as Public Law 94-142. Designed for school speech pathologists. Prerequisite: Bachelor's or master's degree in speech pathology. Offered based upon demand.

CDIS 801 Recent Developments in Childhood Language Disorders (3)
Emphasizes current clinical practice in language disorders and related conditions. Review of recent literature and presentations will cover diagnostic and therapeutic procedures. Designed for speech-language pathologists. Prerequisite: Bachelor's or master's degree in speech pathology. Offered based upon demand.

CDIS 803 Recent Developments in Organic Speech Disorders (3)
Review of recent literature in craniofacial anomalies, laryngectomy, dysphagia, and myofunctional problems. Considers etiologies and therapeutic procedures for organic disorders. Prerequisite: Bachelor's or master's degree in speech pathology or audiology. Offered based upon demand.

CDIS 81A Topics in Phonologic Disorders (3)
Review and update of developments in assessment and therapeutic intervention with phonologically disordered children and adults. Prerequisites: CDIS401 and CDIS854 or equivalents. Offered based upon demand.

CDIS 81B Topics in Voice Disorders (3)
Review and update of developments in assessment and therapeutic intervention with vocally disordered children and adults. Prerequisites: CDIS810 and CDIS858 or equivalents. Offered based upon demand.

CDIS 81C Current Topics: . . . (3)
Explores current clinical and scientific issues in communication disorders. Designed for practicing speech-language pathologists and audiologists and focuses on significant topics in speech, language, and hearing. Topics will vary; may be repeated for credit. Prerequisites: Vary depending on topic. Offered based upon demand.
CDIS 81E Instrumentation in Hearing Science and Audiology (3)
Covers fundamentals of electrical circuit analysis and applications in hearing science and audiology. Describes acoustic signal measurement and analysis techniques and signal generation and control. Critically reviews currently used audiometric standards and calibration procedures. Facilitates proficiency in utilization and calibration of basic instrumentation in audiology through laboratory experience. Prerequisite: CDIS330 or equivalent. Offered based upon demand.

CDIS 810 Voice Disorders (3)
Covers the investigation of functional and organic voice disorders, including causes, acoustic products, and physiologic correlates. Examines diagnostic and management procedures. Prerequisites: CDIS310, CDIS330, and CDIS345. FALL, WINTER.

CDIS 813 Language Disorders of Children (3)
Examines the major clinical syndromes associated with language disorders of children. Emphasizes diagnostic and remediation procedures. Prerequisites: CDIS310, CDIS322, and CDIS430. FALL, SPRING-SUMMER.

CDIS 816 History, Philosophy, and Professional Aspects of Communication Disorders (3)
Study of the history of the field, influences of related disciplines, and the current status of certification, licensure, and third-party payments. Prerequisites: CDIS345, CDIS410, CDIS430, CDIS810, and CDIS813. FALL, SPRING-SUMMER.

CDIS 818 Behavior Principles in Communication Disorders (3)
Applies behavior principles to the evaluation and remediation of speech and language disorders. Presents methods of analyzing and recording communicative behavior. Emphasizes techniques of writing behavioral objectives and individual education plans for therapeutic intervention. Prerequisites: CDIS350 and CDIS430. FALL, SPRING-SUMMER.

CDIS 820 Clinical Audiology (3)
Covers the concepts, administration, and interpretation of the basic audiologic evaluation. Topics include pure-tone air conduction and bone conduction threshold audiometry, assessment of speech recognition threshold and suprathreshold speech recognition ability, clinical masking procedures, and acoustic immittance measurements. Prerequisites: CDIS330, CDIS410, and CDIS420. FALL, WINTER.

CDIS 825 Stuttering Seminar (3)
Examines the various theories of stuttering and their corresponding therapies. Attention to current stuttering research, development, and implementation of a stuttering therapy program. Prerequisites: CDIS310 and CDIS350. FALL, WINTER.

CDIS 83A Anatomy, Physiology, and Pathology of the Auditory System (3)
Covers anatomy, physiology, and embryology of the peripheral and central auditory systems. Examines pathologies affecting the auditory system and associated audiological findings. Provides an overview of surgical/medical management. Prerequisites: CDIS330, CDIS345, CDIS820, or equivalents. Offered based upon demand.

CDIS 83B Pediatric and Geriatric Audiology (3)
Examines major etiologies underlying hearing impairment in the pediatric population. Discusses identification programs for neonates and children. Emphasizes differential diagnostic case history, behavioral observations, audiological test procedures, parent management, and counseling. Addresses audiological considerations of the aging population. Prerequisite: CDIS820 or equivalent. Offered based upon demand.

CDIS 833 Motor Speech Disorders (3)
Investigates the motor speech disorders resulting from neurological impairment. Emphasizes differential diagnoses and remediation of the dysarthrias and apraxia. Includes communication and related disorders of cerebral palsy. Prerequisites: CDIS345, CDIS350, CDIS401, CDIS515, and CDIS310. FALL, SPRING-SUMMER.
CDIS 836 Aphasia Seminar (3)
Examines the historical, neuro-anatomical, etiological, and linguistic aspects of aphasia. Analyses diagnostic and remediation procedures. Prerequisites: CDIS310, CDIS322, CDIS430, and CDIS575. FALL, SPRING-SUMMER.

CDIS 84A Differential Evaluation of the Auditory and Vestibular Systems (3)
Focuses on advanced behavioral methods designed to provide differential diagnosis of pathology in the peripheral and central auditory systems. Examines principles and clinical applications of electrophysiological evaluation of the auditory system with emphasis on electrocochleography, auditory brainstem response, and middle and late latency responses. Reviews anatomy and physiology of the vestibulo-ocular system. Covers principles and clinical applications of electronystagmography (ENG). Prerequisites: CDIS820, CDIS83A, or equivalents. Offered based upon demand.

CDIS 840 Communication Disorders in Craniofacial Anomalies (3)
Investigates the diagnostic and consultative aspects of communication disorders associated with cleft lip and palate, congenital palatopharyngeal insufficiency, and syndromes of the head and neck. Examines anatomy, physiology, and embryology of the craniofacial structures. Prerequisites: CDIS330, CDIS345, CDIS350, and CDIS401. WINTER, SPRING-SUMMER.

CDIS 845 Advanced Rehabilitative Audiology (3)
Examines theoretical aspects of normal and abnormal speech perception. Deals with hearing aid selection, counseling the hearing impaired client, material development and program development for aural rehabilitation. Prerequisites: CDIS330, CDIS410, and CDIS420. FALL, WINTER.

CDIS 848 Research Seminar in Communication Disorders (3)
Covers the processes and research designs most commonly used in communication disorders. Students review current research, design, and experiment in an area of individual interest. Prerequisites: STAT468 or PSYC560, graduate status in communication disorders. FALL.

CDIS 85A Amplification: Electroacoustics, Selection, and Use (3)

CDIS 850 Practicum in Audiology: Assessment (1)
External practicum in audiology assessment at a hospital or diagnostic center. Includes pure tone and speech tests, history taking and report writing. Prerequisites: CDIS820 and permission. FALL, WINTER, SPRING-SUMMER.

CDIS 852 Practicum in Audiology: Rehabilitation (2)
External practicum in rehabilitative audiology with hearing impaired elementary school or high school students or hearing-impaired retarded young adults. Includes diagnosis, lesson planning, therapy, and report writing. Prerequisites: CDIS830, CDIS845, and permission. FALL, WINTER, SPRING-SUMMER.

CDIS 854 Practicum in Speech Pathology: Public School (5)
Requires 100 clinical hours of speech pathology practicum in a public school setting. Included are group and individual therapy, screening, and diagnostics. Prerequisites: CDIS310, CDIS330, CDIS345, CDIS350, CDIS410, CDIS430, CDIS700, and permission. FALL, WINTER.

CDIS 856 Practicum in Speech Pathology: Mental Health Center (3)
Provides experience in individual and group therapy, diagnostics, consultations, training of paraprofessional, and interdisciplinary staffings in mental health setting. Prerequisites: CDIS350, CDIS813, CDIS854, CDIS700 if first CSU practicum and permission. FALL, WINTER, SPRING-SUMMER.
Communication Studies

CDIS 858 Practicum in Speech Pathology: Hospital (3)
Provides experience in individual and group therapy, diagnostics, consultations, and interdisciplinary staffings in a medical setting. Prerequisites: CDIS810, CDIS833, CDIS836, CDIS835, and permission. FALL, WINTER, SPRING-SUMMER.

CDIS 870 Independent Study: . . . (1-8)
Students independently review professional literature and materials in preparation for a written comprehensive examination (one credit). Otherwise, students arrange individual reading, research, and/or project in communication disorders under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

CDIS 880 Internship: . . . (1-8)
Designed to provide students in communication disorders with supervised practical experience in applied settings. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

CDIS 890 Graduate Thesis/Project: . . . (3)
Provides the student in communication disorders the opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student's interests in communication disorders. Prerequisite: Permission of advisor. FALL, WINTER, SPRING-SUMMER.

Communication Studies

COMS 310 Concepts in Communication (3)
Examines the communication process on the basic levels and contexts of communication. Analyzes theories and research techniques in communication science; examines verbal, nonverbal, and intercultural communication behaviors; and analyzes the vital electronic and mass communication processes in light of their significant broad ramifications. Students carry out a research project concerning a communication transaction. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

COMS 33A Interpersonal Skills (3)
Focuses on face-to-face interaction and inter-group relations combining knowledge about human communication with practice in interpersonal skills. Utilizes the laboratory method for learning to establish and develop communicative relationship with others. FALL, WINTER.

COMS 420 Communication Research (3)
Explores basic concepts, terms, and procedures of communication research. Surveys research methods and instruments, their strengths, weaknesses, and applications. Students prepare and implement a research proposal. FALL, SPRING-SUMMER.

COMS 450 Communication Dynamics in Organizations and Communities (3)
Examines communication networks and power structure of a real community. Studies assumptions needed to understand the relationship between public and interpersonal messages in the community. Students give reports to seminar after completing thirty hours of SIM and field survey work. WINTER; offered in SPRING-SUMMER based upon demand.

COMS 46A Argumentation and Public Advocacy (3)
Study of argumentation, that is, evidence, reasoning, and construction of briefs; practice in formal and informal forms of debate and public discourse on current public questions. Prerequisite: COMS460, a public speaking course or permission of instructor. WINTER.

COMS 460 Persuasive Speaking (3)
Examines major theories of persuasion especially as related to oral communication. Applies these theories to interpersonal, social, political, and organizational change. Students develop and present persuasive messages and study persuasive campaigns. Prerequisite: A basic communication skills course. FALL, WINTER; offered in SPRING-SUMMER based upon demand.
COMS 470 Independent Study: . . . (1-4)
Individual reading, research, and/or project in interpersonal communication under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

COMS 50A Communication Workshop: . . . (1-3)
Designed to apply concepts of human communication to a specific social/professional setting. Topics of this workshop vary according to the specific content areas being covered. Focuses on developing in workshop participants practical knowledge and skills of communication that are crucial to a given social/professional context. WINTER; offered in other terms based upon demand.

COMS 531 Listening (3)
Examines the styles of listening in communication and applies them in the different contexts of the communication process. Develops sensitivity and effective listening skills in human interaction. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

COMS 532 Nonverbal Communication (3)
Students examine nonverbal elements of human communication, consider body movement, space behavior, time orientation and management, and aesthetic and environmental factors. Students analyze nonverbal aspects of work, study, sports, leisure, or other interpersonal settings in terms of their function, value, and meaning. FALL.

COMS 533 Group Communication (3)
Examines principles of group interaction in the decision-making process, with emphasis on the dynamic effects of leadership style, risk taking, and feedback techniques. Involves theory and practice with groups. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

COMS 538 Conflict Management (3)
Explores constructive conflict to initiate change. Examines the channeling of spontaneous conflict to create resolution and the releasing of chronic conflict to aid in harmonious relations among people in work situations. Integrates theory and technique from behavioral sciences with insights about the work force. WINTER; offered in other terms based upon demand.

COMS 560 Communication and Social Change (3)
Surveys social/psychological theories and insights about social change. Analyzes methods and processes of communication in the diffusion process in education, agriculture, industry, social programs, business, and science. Explores social/cultural/ethical implications of social change. Designs a comprehensive communication program for introducing social change in a real community or an organization. FALL; offered in WINTER based upon demand.

COMS 561 Technology and Human Communication (3)
Examines communication and computer technology in terms of their influence on society and the day-to-day living of citizens of technological societies. Studies the impact of communication and computers in such areas as business, industry, education, and the home and considers future trends. SPRING-SUMMER; offered in FALL based upon demand.

COMS 565 Advertising as Communication (3)
Examines the nature and process of communication as it relates to advertising. WINTER; offered in other terms based demand.

COMS 567 Advertising Strategy (3)
Draws from behavioral sciences concepts to explain consumer behavior and decision process models. Uses application research techniques to examine psychological, sociological, and cultural aspects of the consumer as related to advertising strategy. FALL; offered in WINTER based upon demand.
COMS 570 Inter-cultural Communication (3)
Surveys communication transactions between members of differing cultures and studies of definitions, models, values, beliefs, customs and attitudes which affect intercultural communication. Relates culture to social perception and communication patterns. Examines culture-specific as well as universal modes of communication and identifies factors that impede effective intercultural understanding. FALL; offered in other terms based upon demand.

COMS 571 Culture and Communication Process (3)
Relates culture and verbal/nonverbal communication behaviors. Examines differences in customs, philosophy and religion, social institutions, language structure, values, and attitudes. Explores the future of intercultural communication. SPRING-SUMMER.

COMS 620 Content Analysis in Communication (3)
Analyzes framework for study of symbolic behavior. Includes acquisition comprehension and use of language; theory of message analysis; qualitative and quantitative methods; survey methods of content analysis; problems of inference, reliability, validity. Students write and implement research proposal. WINTER odd years.

COMS 630 Managing Communication Systems (3)
Students identify nine features, nine postulates, and four network diagrams of a functioning organization; apply at least one theoretical approach to improving the management of communication within an organization of their choice; and submit the suggestion for adoption by the members. Consists of simulations and seminar reports by students. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

COMS 631 Philosophy of Human Communication (3)
Examines how and why we communicate from the perspectives of objective and subjective philosophies. Studies various theories of communication and their philosophical foundations. Prerequisite: COMS 310 or equivalent background. FALL.

COMS 635 Interpersonal Communication (3)
Focuses on the importance of sensitivity to various communications. Examines feedback, empathy, levels of interdependence, perception, inference, observation, selectivity processes, and rumor transmission. WINTER, SPRING-SUMMER.

COMS 650 Organizational Communication, Change, and Development (3)
Analysis of the human elements in the functioning of an organization. Students will develop a plan to act as a change agent, apply organizational development techniques for instituting the change, and evaluate the results of the efforts. FALL, SPRING-SUMMER.

COMS 681 Semantics and Communication (3)
Describes language as a map of referent phenomena and objects and levels of abstraction in relation to thought, experience, and behavior; examines and assesses the impact of verbal and nonverbal communication behavior; indicates and develops clear and effective communication in terms of articulate patterns of speech and language usage. WINTER even years.

COMS 810 Communication Theory (3)
Identifies elements of human communication failures and synthesizes approaches to theory. Prerequisite: COMS 310. FALL, WINTER.

COMS 820 Graduate Communication Research (3)
Examines advanced methods of design and data analysis in communication research. Topics include field/lab research design, intercultural research problems, sampling reliability and validity tests, quantitative/qualitative analysis, bivariate/multivariate analysis, time series analysis, sociometric analysis, and report writing. Prerequisites: COMS 420, CPSC 515, COMS 620, or equivalent. FALL, WINTER.

COMS 853 Public Relations and Communication (3)
Study of public relations, its media, and messages. Students utilize case studies of public relations strategies in at least two organizations and design a campaign to improve the public image of an organization. Prerequisite: COMS 650 or equivalent. FALL, offered in WINTER based upon demand.
COMS 860 Communication Training (3)
Examines various approaches to developing and implementing communication training programs. Theories of interpersonal communication are utilized in identifying and evaluating interpersonal effectiveness. Particular emphasis is given to training programs that are designed to help individuals maximize effectiveness in dealing with members of different ethnic/cultural groups. SPRING-SUMMER.

COMS 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in interpersonal communication under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

COMS 880 Internship: . . . (1-4)
Designed to provide students in interpersonal communications with supervised practical experiences in applied settings. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

COMS 890 Graduate Thesis/Project: . . . (1-6)
Provides the student in interpersonal communication the opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student's interests in interpersonal communication. Prerequisite: Permission of advisor. FALL, WINTER, SPRING-SUMMER.

Computer Education—
See Education—Computer Education

Computer Science

CPSC 30A Introduction to Computer Technology (3)
Covers computer hardware, software, applications, and future technology. Presents an overview of all aspects of computer technology via readings, videotapes, and microcomputer lab exercises. Major topics include evolution of the computer industry, interactive and batch processing systems, input and output processes and devices, information systems interfaces, internal processing and data representation, file organization and database concepts, data communication, application software, programming languages, operating systems and systems software, systems analysis and design, and computers in society. Provides extensive hands-on use of microcomputers. Introduces students to the BASIC language. Prerequisite: MATH310, MATH320, or MATH325. FALL, WINTER, SPRING-SUMMER.

CPSC 320 Computer Programming: BASIC (3)
An introduction to computer programming in BASIC that includes writing numerous programs. Students will analyze problems, develop algorithms to solve these problems, and write well-documented BASIC programs corresponding to these algorithms using BASIC input/output operations, numeric and string constants and variables, control statements, arrays, functions and subroutine, and data files. Students should allow ample time in their schedules for programming outside of class. A substantial portion of this time must be spent at a computer facility. Prerequisite: MATH310, MATH320, or MATH325. FALL, WINTER, SPRING-SUMMER.

CPSC 330 Computer Programming: FORTRAN (3)
A first course in the use of the FORTRAN language. Technical and business applications will be studied. Students will write programs and solve them on both batch processing and time-shared computer systems. Prerequisite: MATH325. SPRING-SUMMER odd years.
CPSC 34C **Computer Programming: C** (3)  
Introductory study of C programming language. Covers data types, control flow, functions and program structure, pointers and arrays, input and output techniques. Involves extensive use of the Sage IV microcomputer under the UNIX operating system. Prerequisites: MATH325 and one prior computer language or permission. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

CPSC 340 **Computer Programming: Pascal** (3)  
Study of the Pascal programming language. Top-down structured programming technique will be taught. Topics include control statements, data types, control structures, arrays, strings, records and sets, nested structures and recursions. Prerequisites: MATH325 and one prior computer language or permission. FALL, WINTER, SPRING-SUMMER.

CPSC 351 **Computer Programming: COBOL** (3)  
Presents the fundamentals of computer programming and the ANSI COBOL computer language. These fundamentals will be applied to various business and/or statistical situations. The course will also cover discussion of input/output devices, software considerations, and basic forms design. Prerequisite: MIS301, CPSC320, or equivalent. FALL, WINTER.

CPSC 368 **Computer Programming: PC Assembler** (3)  
Introduces the 8088 microprocessor, information representation inside machine, 8088 assembly language (DEBUG, ASM, and MASM), the PC/DOS, and the use of some BDOS functions to do I/O and file manipulations. The environment to run the assigned program is IBM PC or XT. Prerequisite: At least have had one of any high level programming languages. WINTER; offered in other terms based upon demand.

CPSC 360 **Computer Programming: Basic Assembly Language** (3)  
Introduces IBM 370 mainframe assembly program language, the data representation inside the machine, the coding techniques, and debugging method. The environment to run the assigned homework is IBM 370 mainframe via network. Prerequisite: At least have had one of any high level programming language. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

CPSC 370 **Systems Analysis and Design** (3)  
Introduction to the systems development process. Covers the system life cycle, current system documentation through use of classical and structural tools and techniques for describing process flows, data flows, data structures, file designs, input and output designs, and program specifications. Also covers information gathering and reporting activities and transition into systems analysis and design. Prerequisites: CPSC30A, MIS301, or equivalent. FALL, WINTER; offered SPRING-SUMMER based upon demand.

CPSC 400 **Programming Methodology** (3)  
A fundamental course for all students majoring or minoring in computer science. Covers basic concepts of computer systems, problem-solving and algorithm development, program structures, data types, program development methods and style, elementary data structures, and elementary analysis of algorithms. Students should be prepared to spend a minimum of five hours per week in the computer lab to complete assignments for this course. Prerequisites: CPSC340, MATH340, and three hours of high level programming language in addition to CPSC340. FALL, WINTER, SPRING-SUMMER.

CPSC 420 **Software Engineering** (3)  
Develops an engineering approach to the software life cycle of planning, development, and maintenance. Covers system definition, software scoping and estimation requirements analysis, modularity, information hiding, cohesion and coupling, software complexity, data flow and structure, design methodology, software testing, and maintenance methodology. Students will participate in a software engineering project to provide an applied focus for study. Prerequisite: CPSC370 or concurrent enrollment. FALL, WINTER; offered in SPRING-SUMMER based upon demand.
CPSC 425 External File Processing (3)  
Introduction to the concepts and techniques of processing data on bulk storage devices and the application of data structures and file processing techniques. Prerequisite: CPSC440 or concurrent enrollment. FALL; offered in other terms based upon demand.

CPSC 43A Computer Architecture (3)  
Introduces the organization and structuring of major hardware components of computers, the mechanics of information transfer and control within a digital computer system and the fundamentals of logic design. Includes topics on: basic logic design, coding, number representation and arithmetic, and computer architecture. Prerequisites: MATH340 and CPSC360. WINTER; offered in other terms based upon demand.

CPSC 435 Operating Systems (3)  
Covers the major concept areas of operating system principles, the interrelationships between the operating system and the architecture of computer systems. Major topics are dynamic procedure activation, system structure, evaluation, memory management, process management, and recovery procedures. Prerequisite: CPSC440 or concurrent enrollment. FALL; offered in other terms based upon demand.

CPSC 44N Data Communication and Computer Networks (3)  
Study of communication systems and applications, common carriers; communication media, modes, and protocols; message formats, terminal types, network hardware, design of local area and distributed networks, transmission bandwidth, integrity, and communication system planning. Prerequisites: CPSC425 and CPSC435 or concurrent enrollment. WINTER; offered in other terms based upon demand.

CPSC 44P Computer Programming: Advanced PASCAL (3)  
This course covers advanced techniques for the creation of large application programs using Pascal. Emphasis will be placed on the design of the user interface. Topics will include operating system interrupts, inline assembly language, overlays, and other techniques for the development of complex applications. Selected Pascal programming utilities will also be covered. Prerequisites: CPSC340; CPSC368 recommended. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

CPSC 440 Data Structures (3)  
Advanced data structures with continuing emphasis on writing well-designed, structured programs. Major topics include arrays, stacks and queues, linked lists, trees, graphs, internal and external sorting, symbol tables, and files. Prerequisites: CPSC360 and CPSC400 or concurrent enrollment. FALL, WINTER, SPRING-SUMMER.

CPSC 445 Database Systems (3)  
Practical development of a database, i.e., requirement analysis, functional specifications, database design, and implementation are the main focus of the course. Topics include data redundancies and data independence, data access method, physical schema, conceptual schema, external schema, third normal forms, Boyce-Codd normal forms, rational model, network model, hierarchical model, entity-relationship model, database management systems, query languages, and application program development in a DBMS environment such as dBASE III PLUS or RIM or other equivalent DBMS. Lecture plus three hours per week of lab. Prerequisite: CPSC425. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

CPSC 45A Database Programming (3)  
Covers advanced programming in a database environment using block structured languages, database query language interfaces, and program development languages. Prerequisite: CPSC445 or concurrent enrollment. WINTER; offered in other terms based upon demand.

CPSC 45B Organization of Programming Languages (3)  
Covers the organization of programming languages, especially the run-time behavior of programs; introduces the formal study of programming languages, continues the development of problem solution and programming skills. Includes topics on language definition
structure, data types and structures, control structures and data flow, run-time considerations, interpretive languages, lexical analysis and parsing. Prerequisite: CPSC440. WINTER; offered in other terms based upon demand.

**CPSC 450 Design and Analysis of Algorithms (3)**
Development and analysis of algorithms for problem-solving in computer science. Emphasizes issues of complexity of algorithms, efficiency, and reliability. Includes as topics: sorting, searching, approximation methods, and heuristics. Prerequisites: CPSC440 and MATH355. Offered based upon demand.

**CPSC 46A Numerical Methods (3)**
Includes topics on floating-point arithmetic, direct and iterative methods for solving systems of linear equations, error analysis and norms, eigenvalues and eigenvectors, root-finding methods, polynomial interpolation, numerical differentiation and integration, and linear and nonlinear least squares. Introduction to subroutine packages. Students should allow ample time in their schedules for working with a computer outside of class. Prerequisites: MATH355 and either CPSC320, CPSC330, or CPSC340. Offered based upon demand.

**CPSC 46B Artificial Intelligence (3)**
Covers artificial intelligence frameworks, methodology, and applications. Includes topics on AI problems and problem spaces, basic problem-solving methods, game playing, knowledge representation, planning systems, expert systems, natural language processing, perception, learning, and AI languages and systems. Prerequisites: CPSC440 and MATH355. SPRING-SUMMER; offered in other terms based upon demand.

**CPSC 46G Computer Graphics and Computer Aided Design (3)**
A survey of hardware and software used for interactive computer graphics, with applications to various areas such as business graphics, art, and CAD systems. Topics include graphics hardware and packages for both mainframes and microcomputers, two- and three-dimensional graphics, windowing, clipping, transformations, hidden line removal, surface modeling, solid modeling, and graphics standardization (GKS, CORE, etc.). Students should be prepared to spend considerable time outside of class at a computer or terminal on homework assignments and the final project. Prerequisites: CPSC440 and MATH355. FALL; offered in other terms based upon demand.

**CPSC 46M Theory of Automata and Computability (3)**
An introduction to theoretical computer science topics and their hierarchical interconnections. Introduces basic results relating to formal models of computation. Includes topics on finite state concepts, formal grammars, computability, and Turing machines. Prerequisites: CPSC440 and MATH355. Offered based upon demand.

**CPSC 46P Computer Science Project Planning (1)**
For computer science majors in their next-to-last trimester of study. Provides an organized framework for planning the student's application project to be implemented in CPSC465 during the last trimester of study. Prerequisites: Permission and CPSC420 or concurrent enrollment. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

**CPSC 46S Computer Science Project Implementation (2)**
For computer science majors during the last trimester of study. Serves as a synthesizing focus for application of computer science concepts and methods to a real computer science problem. Projects which were planned in CPSC46P will be implemented. Prerequisites: CPSC46P and permission. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

**CPSC 470 Independent Study: . . . (1-4)**
Individual reading, research, and/or project in computer science under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

**CPSC 480 Internship: . . . (1-4)**
Designed to provide students in computer science with supervised experiences in applied settings. Prerequisite: Permission. Offered based upon demand.
CPSC 50C  Programming in LOGO (3)
Provides experience with use of the graphical (TURTLEGRAPHICS), character string, and numerical capabilities of the LOGO computer programming language. Emphasizes educational applications. Requires computer programming and substantial use of a computer outside of class. Prerequisite: MATH310 or MATH320. SPRING-SUMMER; offered in other terms based upon demand.

CPSC 510  Foundations of Computers and Information Systems (3)
Provides an appreciation of computer technology (hardware and software) with emphasis on business application. Enables students to logically structure simple business problems, represent them as flow charts, and/or decision trees. Includes discussion of elementary concepts of systems analysis, data structures, and business applications on microcomputers. Introduces students to various business-oriented computer languages, with a detailed study of either BASIC or RPG. Students solve a number of business problems on a computer. This course does not apply as a graduate level course toward the M.B.A. degree. Prerequisite: Graduate student status. FALL, SPRING-SUMMER.

CPSC 60A Computer Technology: Concepts and Applications (3)
A comprehensive introduction to computer hardware, software, applications, and future technology. Explores all aspects of computer technology via readings, videotapes, and discussions. Requires students to complete a research project or an application project. Not available for credit for computer science majors. Prerequisite: MATH310, MATH320, or MATH325. FALL, WINTER, SPRING-SUMMER.

CPSC 62A Programming in BASIC (3)
Provides a fundamental level of working knowledge of computers and computer programming. Presents a general introduction to computing concepts, operations, and programming. Requires completion of a project on a topic acceptable to the instructor. Prerequisites: MATH310, MATH320, or MATH325. FALL, WINTER, SPRING-SUMMER.

CPSC 64A Programming in Pascal (3)
Introductory study of the Pascal programming language. Focuses on top-down, structured programming techniques. Topics include control statements, data type control structures, arrays and subscripts, records and sets, nested structures, and recursion. Requires completion of a project. Prerequisites: MATH325 or equivalent; not open to undergraduates. FALL, WINTER, SPRING-SUMMER.

CPSC 64C Programming in C (3)
Introductory study of the C programming language. Focuses on modulized and structured programming techniques. Covers syntax detail of C; functions; storage classes of variables; arrays; structures and pointers. UNIX/OS will also be introduced. Students enrolled in CPSC64C will be required to do a project on a topic acceptable to the instructor. Prerequisites: MATH325 and CPSC340 or CPSC64A. FALL, WINTER, SPRING-SUMMER; offered in FALL based upon demand.

CPSC 655 Advanced BASIC and Graphics on Microcomputers (3)
Covers disk file I/O, cursor or addressing, manipulation of string variables and arrays, user written functions, and other features of a popular version of BASIC language. Discusses concepts of structured programming and techniques for the handling of large programs. Includes elementary programming of computer graphics. Prerequisite: CPSC320 or CPSC62A. Offered based upon demand.

CPSC 870 Graduate Research: 1-4
Individual reading, research, and/or project in computer science under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.
Counseling

COUN 470 Independent Study: . . . (1-6)
Individual reading, research, and/or project in counseling under the supervision of the faculty. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

COUN 470P Independent Study: . . . (1-6)†
Individual reading, research and/or project in counseling under the supervision of the faculty. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

COUN 50A Stress Control: Rational Emotive Therapy Techniques in Stress Reduction (3)
Helps students identify the self-defeating and destructive attitudes and behaviors that lead to burnout and other stress related symptoms. Focuses on development of a rational philosophy leading to emotional muscle rather than an analysis of the difficulties in today’s environment. Offered based upon demand.

COUN 500 Incest: Parent-Child Abuse (1)
Includes the effect on the victim, treatment issues in working with child and adult victims and the abuser, legal issues, curricula on sexual abuse for use in classrooms. Offered based upon demand.

COUN 510 Physical and Sexual Abuse of Children (3)
Provides an overview of the nature of child abuse. Includes legal and ethical issues involved in definition, identification and treatment, and current theories of causation and treatment. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

COUN 544 Family Counseling (3)
Provides a beginning understanding of the family as a social system and the concepts involved in family counseling. Students analyze their role in their own family system. Prerequisite: PSYC555, PSYC558, COUN630, or ALC505. FALL; offered in other terms based upon demand.

COUN 548 Alternate Approaches to Traditional Psychotherapy (3)
Introduces students to alternate therapeutic strategies such as body therapy, communication therapy, gestalt therapy, neurolinguistic programming, and psychodrama. FALL; offered in other terms based upon demand.

COUN 606 Evaluation of Human Services (3)
Study of strategies to plan and implement evaluation programs in human service systems. Offered based upon demand.

COUN 608 Guidance for Children (3)
A course for teachers to develop and implement guidance activities in the classroom. Includes value clarification procedures. Offered based upon demand.

COUN 630 Counseling and Psychotherapy: Introduction (3)
Introduces students to the field of counseling psychotherapy. Covers major theories and techniques, ethics, client population, and legal considerations. FALL, WINTER, SPRING-SUMMER.

COUN 633 Community Counseling (3)
Study of communities, their relationship to local, county, and federal governments, and their role in problem-solving. Students diagnose and assess community problems and attitudes and describe how the political power structure of the community affects human service systems. FALL, WINTER, SPRING-SUMMER.
COUN 636 Human Service Systems (3)
Examines organizational and administrative processes in human service systems. Considers various short- and long-range programs and their positive and negative effects. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

COUN 639 Behavior Problems (3)
Classification, analysis, and remediation of typical behavior problems experienced in the home and classroom. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

COUN 640 Career Education in Schools (3)
Examines current theories of career development. Includes collection, organization, and interpretation of educational and occupational data for personal career development. SPRING-SUMMER.

COUN 704 Reality Therapy for Counselors and Therapists I (2)
Contrasts how reality therapy differs from conventional psychotherapy. Presents various applications useful in working with juvenile delinquents, criminal offenders, the emotionally upset, alcohol and drug abusers, and others. Offered based upon demand.

COUN 705 Reality Therapy for Counselors and Therapists II (2)
This course, taught in workshop fashion, emphasizes advanced application of reality therapy techniques. Prerequisite: COUN 704. Offered based upon demand.

COUN 80A School Counselor Assessment (3)
 Presents the current status of school counseling in Illinois and a survey of the needed knowledge, skills, and ethics for school counseling. Covers typical organizational structures, job descriptions, and career opportunities. Includes a comprehensive assessment and examination schedule, based on course presentations and student work, to determine whether the student possesses the specific skills and knowledge required for certification in Illinois and readiness to enroll in a school-based practicum. Prerequisites: Currently employed by the Chicago Public School District; has a master's degree from a recognized teacher education institution; assigned by the Chicago School District to a counseling position; and does not qualify for certification as a school counselor by the state of Illinois. Offered based upon demand.

COUN 80B Counseling Skills (3)
Designed to develop and enhance counseling skills required for working with children and adolescents. Intended for students who are employed as counselors in the Chicago Public Schools. Prerequisite: COUN 80A. Offered based upon demand.

COUN 803 Information Services in Guidance (3)
Provides background for professionals (teachers, counselors, others) to organize vocational information, employment trends, and personal information for effective use by students and adults. Offered based upon demand.

COUN 805 Rational Emotive Therapy: Techniques for Counselors and Teachers (3)
Includes philosophy and theory of rational emotive therapy. Examines current innovations in rational therapy, the relation of RET to other areas of cognitive-behavior therapy, and supportive research. Includes working in a school situation, setting treatment goals, and designing homework assignments. Offered based upon demand.

COUN 810 Beginning Counseling and Human Relations Skills (3)
Designed to be taken simultaneously with COUN 630. Provides students with experience in human relations laboratory, focusing on basic communication skills and the development of beginning counseling skills. Prerequisite: COUN 630 or concurrent enrollment. FALL, WINTER, SPRING-SUMMER.

COUN 811 Community College Counseling (3)
Techniques and strategies of counseling in community colleges, area vocational centers, and professional schools. Students are expected to spend considerable time in an off-campus setting. Offered based upon demand.
COUN 818 Workshop on Depression (2)
Study of the causes and the cures of depression from the humanistic/holistic view of human nature. Specific attention to transactional analysis, the redemption model. Prerequisites: COUN630 and COUN810. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

COUN 826 Research Literature in Counseling and Psychotherapy (3)
Provides counselors and psychotherapists with methods and criteria to locate and evaluate research literature on counseling and psychotherapy. Emphasizes examination and understanding of research questions and findings. Prerequisites: PSYC544, PSYC560, or COUN630. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

COUN 837 Management of Counseling Programs (3)
Provides an overview of methods used in the management of counseling programs in schools, agencies, or businesses. Focuses on unique management skills needed by counseling practitioners. Offered based upon demand.

COUN 838 Counseling Employees in the Workplace (3)
Introduction to the concept of employee assistance programs. Deals with design, implementation, and evaluation of counseling programs in business and industry. Offered based upon demand.

COUN 840 Advanced Techniques: . . . (3)
Intensive study of specific advanced techniques or topics in the field of psychology and counseling. Allows students to work intensively in a specialized study area not normally available in the general curriculum. Topic dependent upon faculty expertise and student need. Prerequisite: COUN844 or COUN845 or permission. Offered based upon demand.

COUN 843 Advanced Theories in Counseling and Therapy (3)
Study of advanced readings and presentations on problems encountered in counseling and therapy. Includes the application of DSM III categories and key dynamic theoretical concepts. Examines the causes of emotional difficulties and the interventions recommended in the literature. Prerequisites: COUN630 and COUN810, or PSYC544; and an abnormal psychology course and a developmental psychology course. FALL, WINTER, SPRING-SUMMER.

COUN 844 Individual Counseling and Therapy: Child/Adolescent (3)
Focuses on the development and refinement of counseling skills required for working with children and adolescents. Emphasizes data gathering through observation, analysis of the counseling process, and the development of counseling and consultative strategies. Prerequisites: Minimum grade of B in COUN630 and COUN810; and an abnormal psychology course. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

COUN 845 Individual Counseling and Therapy: Adult (3)
Application of theory and practice in individual counseling and therapy with adults. Prerequisites: Minimum grade of B in COUN630 and COUN810; and an abnormal psychology course. FALL, WINTER, SPRING-SUMMER.

COUN 846 Reality Therapy (3)
Apply techniques and skills of reality therapy in counseling sessions with adults. Study concepts and orientations of Glasser, Harrington, and Haley toward mental health, including work with families. Prerequisite: COUN810 or COUN844. Offered based upon demand.

COUN 847 Group Dynamics and Intervention (3)
Application of basic knowledge of the roles, functions, and dynamics among group leaders and group participants; covers group process theory and the research pertaining to group process; students analyze the interaction within a group. Prerequisite: COUN810. FALL, WINTER, SPRING-SUMMER.
COUN 848 Practicum in College Counseling: Structure and Functions (3)
The first course of the college counseling practicum sequence focuses on the structure and function of the community college and its service to the community. Prerequisites: Candidacy, permission of instructor, and successful reapplication. Offered based upon demand.

COUN 849 Practicum in Prevention Skills (4)
A community-based practicum, the culminating experience for students interested in community counseling. Focuses on aspects of primary prevention. Prerequisites: COUN606, COUN633, COUN810, COUN864, and SOCW595. Offered based upon demand.

COUN 850 Group Therapy in Transactional Analysis (3+)
Study of and participation in the TA group therapy model created by Eric Berne. The student will be at times both the therapist and the client. The major focus will be here/now script work, awareness, and redecision by contracts. Prerequisite: PSYC518 or SEM101 by I.T.A.A. WINTER; offered in other terms based upon demand.

COUN 851 Consultation and School Staff Development (3)
Examines theories, functions, and skills required of consultants in schools and other settings. Students will use consultation skills with client. Prerequisite: COUN630. FALL; offered in other terms based upon demand.

COUN 852 Group Counseling: Child/Adolescent (3)
Study of major group counseling theories and approaches. Attention to major authors and specific group counseling techniques. Development and analysis of one ongoing group for children and one ongoing group for adolescents. Prerequisite: COUN844. FALL; offered in other terms based upon demand.

COUN 853 Adlerian Family Counseling (3)
Introduces students to Adlerian approach to family counseling. Using the Adlerian perspective, students conduct two family counseling sessions and analyze family interaction. Prerequisite: COUN844 or COUN845. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

COUN 854 Advanced Individual Therapy Techniques: Child (3)
Covers advanced skills in using verbal and nonverbal techniques in individual therapy with children. Includes study of relevant theory, application of treatment techniques, and evaluation of their effectiveness. Prerequisite: COUN844. WINTER; offered in other terms based upon demand.

COUN 855 Advanced Individual Therapy Techniques: Adult (3)
Covers advanced interviewing skills in individual therapy with adults. Includes study of relevant theory, application of treatment techniques, and evaluation of their effectiveness. Prerequisite: COUN845. FALL; offered in other terms based upon demand.

COUN 856 Group Counseling: Adult/Adolescent (3)
Study and practice of basic interviewing skills and treatment techniques in group counseling or group therapy with adolescents and adults. Prerequisites: COUN845, COUN847. FALL; offered in other terms based upon demand.

COUN 857 Behavior Therapy (3)
Advanced study and application of behavioral therapy techniques with adults and children. Prerequisite: COUN844 or COUN845. SPRING-SUMMER; offered in other terms based upon demand.

COUN 858 Administration of Student Personnel Services (3)
Study of rationale and program for guidance services. Special attention to analyzing, evaluating, and integrating administrative theory. Prerequisite: Should be taken immediately before or during practicum. WINTER; offered in other terms based upon demand.
COUN 859 Family Therapy Techniques (3)
Study and practice of concepts and techniques of family therapy. Students demonstrate system's techniques with actual clients. Prerequisites: COUN847 and COUN852; or COUN856. WINTER; offered in other terms based upon demand.

COUN 860 Marriage and Couple Therapy (3)
Deals with approaches to counseling which focus on couple interactions rather than individual pathology. Students demonstrate basic techniques of couple therapy with actual clients. Prerequisites: COUN845 and COUN847. WINTER; offered in other terms based upon demand.

COUN 861 Parent Study Group Leadership (3)
Student initiates, develops, conducts, and maintains a successful ten-week parent study group. Special emphasis on training parents to identify problems in the home and providing techniques to deal with them. Prerequisites: COUN639 and COUN853. WINTER; offered in other terms based upon demand.

COUN 862 Life Style Analysis (3)
Covers analysis of life style data of self and clients. Preparation of case study report on the life style diagnosis of practicum clients. Prerequisite: COUN853. SPRING-SUMMER; offered in other terms based upon demand.

COUN 863 Practicum in College Counseling: Clinical (3)
Application of counseling, consulting, assessment, and guidance skills in a college setting. Requires minimum of fifteen school days at sites arranged for by the university. Prerequisite: COUN848. Offered based upon demand.

COUN 865 Practicum in Elementary School Counseling (6)†
Application of counseling, consulting, assessment, and guidance skills in an elementary school setting. Requires minimum of fifteen school days. Prerequisites: Students must have achieved counseling competencies acceptable to the screening committee for practicum sites (see Division of Psychology and Counseling Student Handbook for details). All other coursework must be completed, with grades as specified for the degree program; or all work in skill building courses completed with grades as specified for the degree program, and sufficient progress made in remaining courses to clearly demonstrate to the practicum screening committee that completion is near. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

COUN 866 Practicum in Leadership in Transactional Analysis (1,2)†
A laboratory in transactional analysis. Students use knowledge of TA to act as group leaders. Prerequisites: Laboratory in TA or passing TA101 taught by a certified member of the I.T.A.A., and permission of the instructor. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

COUN 867 Practicum in Secondary School Counseling (6)†
Application of counseling, consulting, assessment, and guidance skills in a secondary school setting. Requires minimum of fifteen school days at sites arranged by the university. Prerequisites: Students must have achieved counseling competencies acceptable to the screening committee for practicum sites (see Division of Psychology and Counseling Student Handbook for details). All other coursework must be completed, with grades as specified for the degree program or all work in skill building courses completed with grades as specified for the degree program and sufficient progress made in remaining courses to clearly demonstrate to the practicum screening committee that completion is near. WINTER; offered in other terms based upon demand.

COUN 868 Counseling Psychology Practicum I: Agency Systems (3)†
Practice eight hours per week in an approved agency site. Development of critical analysis of the agency as a human service delivery system. Prerequisites: Candidacy, permission of instructor, and successful preapplication. FALL, WINTER, SPRING-SUMMER.
COUN 869 Counseling Psychology Practicum II: Clinical Skills (3)†
Continuation of COUN 868. Practice eight hours per week in an approved agency site.
Completion of final master project integrating academic and clinical skills. Prerequisite: COUN 868. FALL, WINTER, SPRING-SUMMER.

COUN 870 Independent Study: . . . (1-6)
Individual reading, research, and/or project in counseling under supervision of faculty. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

COUN 870P Independent Study: . . . (1-6)†
Individual reading, research, and/or project in counseling under supervision of faculty. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

COUN 890 Graduate Thesis/Project: . . . (6)†
A student works closely with advisor and/or three faculty members (principal advisor, secondary advisor in specialty area, scope advisor outside specialty area) developing and completing original thesis/project proposal. Prerequisites: Permission of advisor or committee. Offered based upon demand.

Criminal Justice

CIUS 310 Criminal Justice Organization and Process (3)
Studies current structures and procedures of American criminal justice. Presents various comprehensive theories useful for analysis and reform. FALL, WINTER.

CIUS 320 Correctional Process (3)
Examines research on the social psychological effects of confinement. Studies the prison as a social system with its own norms and peculiarities. Critically analyzes similarities between prisons and other sub-systems such as mental hospitals. FALL.

CIUS 330 Issues in Juvenile Justice and Delinquency (3)
Explores the development of the juvenile court and the system of juvenile justice in the U.S. Studies contemporary issues in juvenile justice and approaches to prevention, control, and treatment of delinquency. FALL, WINTER.

CIUS 340 Judicial Process and Issues for Criminal Justice (3)
Includes a survey of jurisdiction, organization, policies, and procedures of courts and the judicial system. Analyzes issues related to the administration of criminal justice from arrest to incarceration or release. Prerequisite: CIUS 310. WINTER.

CIUS 430 Communication in Public Administration (3)
Provides a conceptual framework to examine communication in public service agencies and other administrative settings. Explores ways to improve communication skills for persons in public service agencies. WINTER, SPRING-SUMMER.

CIUS 435 Law Enforcement and the Ghetto (3)
Examines past and present relations among ghetto dwellers and police in America and the causes of antagonism between the groups. WINTER.

CIUS 440 Crime Causation Theories and Social Control (3)
Examines historical and current criminology theory and practice. Analyzes concepts and practices of crime and criminal behavior and society's response to them. Examines the law, offenders, victims, forms of crime, and the criminal justice system. Students will consider various aspects of criminology theory and formulate their own perspective which takes into account societal pressures and research about crime, rehabilitation, and recidivism. FALL, SPRING-SUMMER.
CJUS 445 New Dimensions in Corrections (3)
Analyzes current approaches used in federal, state, and local correctional and related agencies. Examines discrepancies between new theories implemented by criminal justice decision makers, and the actual outcome of theoretical applications. Prerequisite: CJUS320. WINTER.

CJUS 450 Women in Prison (3)
Examines the unique problems faced by women in prison. Focuses special attention on their rehabilitation and integration back into the community. Prerequisite: CJUS320. SPRING-SUMMER.

CJUS 470 Independent Study: . . . (3)
Independent study is intended to provide better students the opportunity to study a topic of their choice in criminal justice under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within criminal justice and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

CJUS 480 Internship: . . . (3)
Designed to combine individual career counseling and work outside of the classroom in combination with institutional learning settings. Prerequisites: Permission of advisor and cooperative education coordinator. Offered based upon demand.

CJUS 555 Workshop in Criminal Justice Planning (3)
Explores the planning process and introduces students to the examination of critical issues in criminal justice planning. Not scheduled to be offered in AY87-88.

CJUS 560 Program Design and Change in Public Administration (3)
Development of a research study in a public service agency. Includes conceptualization, research methodologies, and skills to design and implement a social change strategy. Not scheduled to be offered in AY87-88.

Economics

ECON 301 Principles of Microeconomics (3)
Studies price formation, demand, and production decisions. Examines the individual and interrelated behavior of consumers, firms, and industries. FALL, WINTER, SPRING-SUMMER.

ECON 302 Principles of Macroeconomics (3)
Studies the economy as a whole, dealing with economic data, behavior, and theory at the aggregate level of the economy. Examines income, output, employment, prices, and other variables in terms of their measurement, determination, and policy implication. FALL, WINTER, SPRING-SUMMER.

ECON 310 Consumer Economics (3)
Study of the changing role of consumers, the consumption of goods and services and the alternatives open to the consumer in the economic environment. Prerequisites: ECON301 and ECON302. SPRING-SUMMER.

ECON 320 Economic Development of Minority Communities (3)
A survey of the literature with an emphasis on both understanding the issues surrounding the concept of ghetto economic development and the development of basic skills to analyze proposals that arise to meet this objective. Offered in SPRING-SUMMER based upon demand.

ECON 325 Comparative Economic Theory (3)
Comparative analysis of contemporary economic theories, their evolution and current impact. Prerequisites: ECON301 and ECON302. Offered in FALL and SPRING-SUMMER based upon demand.

<th>Course Description</th>
<th>Prerequisites</th>
<th>Terms Offered</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 350</td>
<td>Money and Banking (3)</td>
<td>Studies the U.S. monetary system in the areas of money, institutions, and policy. Concentrates on analysis of money and its functions, the mechanics of the commercial banking system and its determination of the money supply, federal reserve system's functions and policy instruments, the impact and effectiveness of monetary policy on the public, commercial banks, and the treasury, and its overall impact on the economy. Prerequisites: ECON301 and ECON302. FALL, SPRING-SUMMER.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 405</td>
<td>Public Finance (3)</td>
<td>Surveys the development and economic effects of government expenditures, revenues and indebtedness with special reference to selected tax and budgetary problems commonly faced by administrators and government officials. FALL; offered in other terms based upon demand.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 410</td>
<td>Intermediate Macroeconomics (3)</td>
<td>Deals with the aggregate level of economic activity. Analyzes the methodology of national income accounts, development of goods, money and labor markets, and the impact and effect of policy instruments. Uses models to develop the interdependence of markets in the determination of the aggregate level of economic activity. Prerequisites: ECON301 and ECON302. FALL, WINTER.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 420</td>
<td>Managerial Economics: The Economics of the Firm (3)</td>
<td>Deals with analysis and theoretical constructs of microeconomics applied to managerial decision making. Emphasizes consumer demand, production and cost analysis, business behavior, market performance, and growth equilibrium. Prerequisites: ECON301, ECON302, MATH355, and STAT362. FALL, WINTER.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 430</td>
<td>International Trade and Finance (3)</td>
<td>Examines theory of international trade and factor movements, international monetary relations, balance of payments, foreign exchange markets, and the development of alternative international money systems. Also covers theory of tariffs and current issues in U.S. trade policy. Prerequisites: ECON301 and ECON302. Not scheduled to be offered in AY87-88.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 435</td>
<td>Comparative Economic Systems (3)</td>
<td>Study of differences between popular political labels and sets of factors that actually distinguish working economic systems. Prerequisites: ECON301 and ECON302. SPRING-SUMMER.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 440</td>
<td>History of Economic Thought (3)</td>
<td>Deals with the evolution of economic concepts and tools of analysis. Studies mercantilism, physiocracy, and other economic problems as well as the contributions of leading economic thinkers—Smith, Malthus, Ricardo, Marx, Mill, Marshall, and Keynes. Prerequisites: ECON410 and ECON420. Not scheduled to be offered in AY87-88.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 450</td>
<td>Regional Economic Development (3)</td>
<td>Economic analysis of land allocation and other resources in the environment. Emphasizes global and local changes which accompany growth or decline of regions. Highlights the role of real estate-related occupations in the economic process. SPRING-SUMMER.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 470</td>
<td>Independent Study: . . . (3)</td>
<td>Independent study is intended to provide better students an opportunity to study a topic of their choice in economics under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within economics and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ECON 500</td>
<td>Workshop: Give and Take—An Economics Course for Teachers (1)</td>
<td>Designed to provide teachers with a variety of teaching techniques to teach high school students basic economics and consumer economics concepts. The give and take curriculum is a major priority of the Joint Council on Economic Education. Offered based upon demand.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
ECON 501 Foundations of Economics (3)
Study of the concepts of macro and microeconomics at an advanced level. Satisfies the economics prerequisites for the M.B.A. This course does not apply as a graduate level course toward the M.B.A. degree. Prerequisites: MATH325, graduate student status. WINTER.

ECON 502 Economics for Teachers (3)
Provides elementary and high school teachers with an overview of the concepts most essential to economic understanding and helps them develop teaching materials and strategies. Restricted to elementary and secondary educators. Prerequisite: Permission of instructor. Offered based upon demand.

ECON 533 Economic Development in Latin America (3)
Study of the economic struggles of the Latin American peoples through an analysis of the role the economy has played in the past, and is now playing in the modernization process, in the political process, and in the culture of Latin America. Offered WINTER based upon demand.

ECON 60A Workshop on Economic Development (1)
Examines the economic development situation in the south suburbs and suggests models and their usefulness for the subregion. Prerequisite: Previous background in economics and politics of development, or permission of instructor. Offered based upon demand.

ECON 60B Understanding Taxes: Whys and Hows (1)
Covers such topics as how taxes influence behavior, the criteria of a good tax, types of taxes, tax incidence, and the latest changes in the U.S. tax code. Teachers will work with a variety of instructional activities designed to show students how taxation influences decisions they made and how it affects people of all ages and from all walks of life. Offered based upon demand.

ECON 61A Improving High School Economics Instruction (3)
Focuses on economics teachers' evaluation and use of curriculum materials designed for high school economics instruction. Includes evaluation of films, videotapes, computer software, textbooks, workbooks, simulations, model lessons, and other instructional materials. Involves the design and development of lessons and units appropriate for high school economics courses. Offered based upon demand.

ECON 61B National Economic Issues Forum (3)
Examines differing points of view on a variety of national and international economic issues such as inflation, unemployment, international trade, health care, education, defense spending, social spending, the budget deficit, productivity, social security, and welfare reform. Includes outside speakers, examination of curriculum materials, and participation in consensus decision making with business, labor and community leaders. Offered based upon demand.

ECON 640 Economics for Business and Consumer Educators (3)
Presents basic economic concepts as well as business structure, consumer credit, and insurance. Includes guest speakers from businesses and government agencies. Intended for consumer and business educators. Restricted to elementary and secondary educators. Prerequisite: Permission of instructor. Offered based upon demand.

ECON 645 Trade-Offs: An Economics Course for Elementary Teachers (3)
Revolves around the film series Trade-Offs that was produced for elementary students. Lectures emphasize the concepts used in the films, and the teachers will develop lessons. Restricted to elementary and secondary educators. Offered based upon demand.

ECON 650 Consumer Economics for Teachers (3)
Features an in-depth study of consumer topics. Includes credit, purchasing, insurance, investments, money management, and an overview of the American economic system. Prerequisite: Nonteachers require permission of instructor. Offered based upon demand.
ECON 660 Economic Change and Career Opportunities (3)
Concentrates on structural changes in the U.S. economy, and how these changes affect career patterns and curriculum needs of schools. Designed for counselors and teachers. Focuses on how the economy works, and more about the careers of today and tomorrow. Offered based upon demand.

ECON 80B Macroeconomics for Teachers (3)
Provides in-depth coverage of macroeconomic concepts such as measuring economic performance, public finance, inflation, unemployment, fiscal policy, and monetary policy. Emphasizes various theories on controlling the economy such as Keynesian, Monetarist, supply management, and rational expectations. Prerequisites: ECON302, ECON640, or equivalent. Offered based upon demand.

ECON 80C Microeconomics for Teachers (3)
Provides in-depth coverage of microeconomic concepts such as markets and prices, supply and demand, competition and market structure, market failures and the role of government. Emphasizes methods of teaching these concepts to high school students. Prerequisites: ECON302, ECON640, or equivalent. Offered based upon demand.

ECON 800 Workshop on Secondary Economic Education (1)
Updates knowledge in key areas of economic and consumer education, and provides information on the latest innovations in curriculum development and evaluation techniques in consumer education and economic education. Designed for high school consumer education and economic education teachers. This course is limited to school districts that work with the Governors State University Office of Economic Education. Offered based upon demand.

ECON 801 Problems in Managerial Economics (3)
Applies microeconomics theories to the problem of most efficient use of resources within and between the organization, and the economic system. Utilizes macroeconomics theories to forecast the future economic environment. Studies compromising techniques to reach an optimum of objectives when maximization remains elusive. Prerequisites: ECON301, ECON302, MATH355, and STAT362. FALL, WINTER.

ECON 810 Labor Economics (3)
Study of the development and structure of the labor movement, wage determination, and public policy toward labor. Prerequisites: ECON301 and ECON302. SPRING-SUMMER.

ECON 815 Economic Development (3)
Deals with economic development as a progressive division of labor. Includes progressive technological specialization and its effect upon economic development. Prerequisites: ECON410 and ECON420. Not scheduled to be offered in AY87-88.

ECON 825 Monetary Economics (3)
Concerned with money, monetary institutions, and policy in a modern developed economy. Relates how money demand and supply behavior affect the economy and its impact on policy. Prerequisite: ECON350 or permission. Not scheduled to be offered in AY87-88.

ECON 870 Independent Study: . . . (3)
Independent study is intended to provide better students an opportunity to study a topic of their choice in economics under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within economics and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

ECON 890 Graduate Thesis/Project: . . . (6)
Provides an opportunity for intensive study of a problem chosen by the student. A candidate who is approved for the thesis option will be required to orally defend the thesis. The thesis option is limited to outstanding students who have been recommended by a
minimum of two faculty in the College of Business and Public Administration and approved by the dean. Students interested in pursuing the doctorate degree in business should select the thesis option. Prerequisite: Permission; last trimester of M.B.A. student's program of study. Offered based upon demand.

EDUCATION COURSES
Education—General (EDUC)
Education—Administration and Supervision (EDAD)
Education—Bilingual/Bicultural (BBED)
Education—Computer Education (EDCP)
Education—Elementary (ELED)
Education—Special Education (SPED)

EDUCATION—GENERAL
EDUC 310 Foundations of Education (3)
Presents an interdisciplinary and developmental overview of the historical, philosophical, and sociological factors that have influenced American education. Identifies and critically analyzes contemporary issues and trends such as teacher accountability, school desegregation, cultural pluralism, and bilingual/multicultural education. Includes ten hours of field experiences related to the learning disabled and other exceptional learners and those with culturally distinctive backgrounds. FALL, WINTER, SPRING-SUMMER.

EDUC 38A Clinical Experience I (1)
Provides opportunities for students to make, implement, and evaluate decisions under supervision in teaching reading and language arts. Students will work with individuals and small groups. Requires 30 clock hours of fieldwork. Prerequisites: PSYC 320, EDUC 310, and ELED 370; completion or concurrent enrollment in ELED 380 and ELED 426. FALL, WINTER.

EDUC 43A Methods of Teaching Mathematics in the Middle Grades (3)
Introduces prospective teachers to techniques of presenting mathematics to students in grade 6 through 8. Emphasizes the role of instructional materials, the applications of mathematics in the "real" world, and the types and levels of mathematical knowledge. Offered based upon demand.

EDUC 433 Principles of Science Education (3)
Surveys the role of science education in the total school curriculum. Students will become familiar with contemporary science curricula and methods for teaching science. Includes 35 hours clinical experience in secondary schools. FALL.

EDUC 434 Teaching Secondary School Science (3)
Science and science teaching are directly related by their goals and methods. Students examine the nature of science from historical, philosophical, and sociological perspectives, then elect to either develop skills in teaching science by inquiry or go more deeply into the ethics and sociological impact of science. Thirty-five hours of classroom observation are required. Prerequisites: EDUC 433, PSYC 320, and EDUC 310, SPED 510 or permission. WINTER.
EDUC 458 Clinical Experience II (2)
Provides opportunities for students to make, implement, and evaluate decisions under supervision in teaching math, science, and a unit in either reading and language arts, mathematics or social studies. Students will work with individuals, small groups, and whole classes. Requires 60 hours of fieldwork. Prerequisites: EDUC38A; completion or concurrent enrollment in ELED424, ELED422, ELED442, and ELED423. FALL, WINTER.

EDUC 465 Methods of Teaching English (3)
Focuses on the various components of the secondary school English curriculum in which students should develop competencies to meet the full range of responsibilities of the teacher of English. Includes study in the English language, literature, composition, listening, and reading emphases. This course is appropriate for those students who plan to teach English in the secondary school or teach language arts in the elementary school. Prerequisites: Twenty-five hours of English and/or literature courses. FALL; offered in WINTER based upon demand.

EDUC 470 Independent Study: . . . (1-6)
Individual reading, research, and/or project in education under the supervision of a faculty member. Deals with content not available in organized courses. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

EDUC 499 Student Teaching: . . . (5,9)
Provides the teacher candidate with directed experiences in planning, organizing, and instructing pupils within a regular classroom of an Illinois public school. A student is supervised by a Governors State University faculty member and a school-based cooperating teacher. Includes twelve weeks of full-time classroom experience. Prerequisite: Admission to student teaching; contact coordinator of field experiences. FALL, WINTER.

EDUC 502 Teaching Reading in High School (3)
Examines the vocabulary, comprehension, literature appreciation, and study skills which should be included in the reading component of the English curriculum. Provides students with skills for teaching reading in secondary school content subjects. Prerequisite: ENGL501 or ENGL592. SPRING-SUMMER; offered in other terms based upon demand.

EDUC 511 Sharing Nature with Children (1)
Develops awareness, understanding, and appreciation of nature while acquainting teachers and youth leaders with outdoor activities which can be used with groups. Through active participation in an extended outdoor education/recreation experience, teachers and youth leaders become familiar with a wide variety of activities. Offered based upon demand.

EDUC 535 Education of Minorities in the U.S. (3)
Examines the history of the schooling of ethnic and racial minority groups in urban America. Focuses on both the public and parochial schools in the acculturation of minority children and adults. Presents ethnic case histories of educational achievement and historical background of issues such as mental testing, desegregation, and tracking. Offered in FALL, SPRING-SUMMER based upon demand.

EDUC 565 Behavior Problems in the Classroom (3)
Deals with behavior and attitudes in the classroom. Emphasizes diagnosis and change of typical behavior problems experienced by teachers. FALL; offered in other terms based upon demand.

EDUC 603 Earth Science Methods: Glacial Geomorphology (3)
Designed to introduce earth science concepts associated with the Pleistocene Epoch. Local glaciation and its related glacial morphologies and the historical sequence of the Pleistocene Epoch (Ice Age) and its effect on the northern Illinois area are presented. A scheduled field trip allows first-hand observation of various glacial landforms and provides class members with rock and mineral samples for identification in the laboratory. Emphasis
is placed on adapting course content for the teaching of earth science in grades 6-12. Prerequisites: Undergraduate science experience or science teaching experience. Open only to teachers with grades 6-12 certificates. Offered based upon demand.

EDUC 604 Earth Science Methods: Fluvial Processes (3)
Designed to introduce earth science concepts relating to river movement, stream erosion, and deposition. The effects that streams play in local geology are emphasized. Stream table simulations are followed by two field trips which highlight the concepts discussed in class. Field data is collected, and follow-up activities allow participants to assimilate and synthesize the field data. Emphasis is placed on adapting course content for the teaching of earth science in grades 6-12. Prerequisites: Undergraduate science experience or science teaching experience. Open only to teachers with grades 6-12 certificates. Offered based upon demand.

EDUC 61A Field Experience in Bilingual Education (3)
Provides a supervised field experience in bilingual education for limited English proficiency students. Includes experiences in language proficiency assessment and development of curriculum in reading, teaching English as a second language, and other selected subject areas. Requires 90 hours fieldwork and fulfills the clinical experience requirements of the state for approval in transitional bilingual education. Prerequisites: BBED525, ENGL508, or permission. Offered based upon demand.

EDUC 62A Topics in Education: (1-3)
Experts in the field present selected topics covering new developments in the field of education. Includes discussion of the topics and the implications for theory and practice. Participants have an opportunity to discuss the new developments and, where appropriate, apply the techniques and skills. Prerequisites: Varies depending on topic. Offered based upon demand.

EDUC 620 Advanced Developmental Reading Instruction (3)
Examines the nature of the reading process and developmental influences on growth in reading. Examines instructional decision-making processes in reading curriculum development, student placement, and classroom practice. Explores the match between student reading needs and instruction and extends teachers' knowledge of best practice. Examines the place of reading instruction in overall literacy development. Prerequisite: EDUC816. FALL, WINTER, SPRING-SUMMER.

EDUC 630 Issues and Trends in Education (3)
Explores current issues and trends in education. Emphasizes structural, empirical, and decision-making processes in schools. FALL, WINTER, SPRING-SUMMER.

EDUC 632 Teaching Mathematics to Low Achieving Students (3)
Examines the characteristics and needs of low achieving students. Explores content and teaching strategies, and emphasizes diagnostic/evaluative procedures. Prerequisite: ELED424 or EDUC640. FALL, WINTER, SPRING-SUMMER.

EDUC 640 Teaching and Learning Mathematics (3)
Examines methods of teaching mathematical concepts in elementary and junior high schools based on learning theory, historical trends in mathematics education, and current research. Includes the roles of concrete materials, textbooks, and diagnosis in the teaching of mathematics. Prerequisite: ELED424 or equivalent. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

EDUC 70H Science of Teaching: Teaching Learning Processes (3)
Examines critical decisions teachers make, provides theoretical perspective to inform this decision-making, and provides opportunity to gain experience in identifying and critiquing elements of decision-making. Prerequisites: Practicing elementary and secondary teacher; limited to employees of cooperating school districts. Offered based upon demand.
EDUC 701 Science of Teaching: Teaching Learning Principles (3)
Focuses on the instructional process. Presents the concepts of motivation, reinforcement, and learning theory and the application of these concepts in classroom teaching. Prerequisite: EDUC70H or concurrent enrollment. Offered based upon demand.

EDUC 70K Science of Teaching: Application of Processes and Principles (3)
Focuses on application of theoretical and practical learning acquired in previous courses in this sequence. Focuses on developing the understanding and skills necessary to analyze teaching behavior with emphasis on predicting and evaluating teaching outcomes. Prerequisite: EDUC70J. Offered based upon demand.

EDUC 70M Science of Teaching: Conferencing Skills (3)
Focuses on the application of analytical skills and knowledge acquired in previous courses in this series to conferencing with other teachers regarding their teaching performance. Includes the application of communicative theory to conferencing. Prerequisite: EDUC70K. Offered based upon demand.

EDUC 712 Developmental Issues in Language Arts Instruction (3)
Presents the major theories and determinants of human development. Traces the course of cognitive and linguistic development. Focuses on instructional decision-making in language arts instruction. Prerequisite: EDUC816. FALL, SPRING-SUMMER.

EDUC 714 Observing and Evaluating Linguistic and Cognitive Growth (3)
Examines measurements of reading and writing performance and oral language development. Critiques instruments and applies approaches for measuring cognitive and linguistic growth in language arts contexts. Prerequisite: EDUC712. WINTER; offered in SPRING-SUMMER based upon demand.

EDUC 716 Developing Writing Models from Children's Literature (3)
Examines structural principles of literature; relates literary theory to the processes of comprehension and composition; develops alternate models for using literature as the center of classroom oral and written composition activities. Prerequisites: ENGL531 or equivalent and ELED710. SPRING-SUMMER.

EDUC 718 Teacher As Writer (3)
Introduces students to the domain of writing from a personal and professional perspective. Emphasizes teacher as model writer for students in schools. Develops successful written self-expression. Develops the ability to write for publication. Offered based upon demand.

EDUC 732 Issues in Math Curriculum and Instruction (3)
Examines selected issues relating to curriculum, instruction, and learning processes in school mathematics. Issues may include: the place of computation in mathematics curriculum, mathematics anxiety, and use of calculators and computers in mathematics instruction. Prerequisite: EDUC640 or equivalent. Not scheduled to be offered in AY87-88.

EDUC 733 Innovation Processes in Education (3)
Develops capabilities for successful application of the principles/strategies that facilitate and improve learning, and that introduce, implement, and manage innovation in educational systems. Offered based upon demand.

EDUC 742 Health Concerns of Classroom Teachers (3)
Presents concepts of preventive health and intervention based on ecological principles. Focuses on drugs, reproduction, nutrition, disease, and safety. Requires five to ten hours of fieldwork. Offered based upon demand.

EDUC 801 Child and Family in the Community (3)
Focuses on the experience in families, cultural differences, child raising practices, communication patterns, and life stress which will affect the young child, his/her view of self and others in his/her family, school, and community. Explores ways in which the schools can be relevant to the needs of varieties of families and identifies support networks in the community. Prerequisite: PSYC81A or permission of instructor. WINTER; offered in other terms based upon demand.
EDUC 81K  Science of Teaching: Internship I (3)
Provides students an opportunity to complete an assessment of a problem in the managing curriculum in their teaching area and an assessment of their teaching skills. Prerequisites: A grade of "A" in EDUC70M; written evidence of employing district's willingness to cooperate; and instructor's permission. Offered based upon demand.

EDUC 81M  Science of Teaching: Internship II (3)
Designed to provide students with supervised practical experience in implementing plans for improving curriculum and teaching performance. Prerequisites: EDUC81K and written evidence of willingness of student's employing district to participate. Offered based upon demand.

EDUC 810  Educational Research (3)
Develops literacy in use of the literature of educational research. Leads to development of research problems and methods to study the problems. FALL, WINTER, SPRING-SUMMER.

EDUC 815  Socio-Cultural Factors and Children's Learning (3)
Explores the interaction of sociological and cultural factors as these relate to children's ability to learn. Examines the implications for school administrators and teachers. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

EDUC 816  Applied Educational Psychology (3)
Examines behavioral and cognitive views of learning and motivation. Assists in understanding the views of learning underlying educational practices. Emphasizes application of knowledge of learning and motivation in educational settings. Prerequisite: three hours undergraduate educational psychology. FALL, WINTER, SPRING-SUMMER.

EDUC 818  Teaching Problem-Solving and Critical Thinking (3)
Examines problem-solving processes and critical thinking. Presents a variety of techniques for developing problem-solving ability, estimation and mental computation, and determining the reasonableness of results. Prerequisite: EDUC640 or equivalent. SPRING-SUMMER, even years.

EDUC 819  Improving Learning Environments (3)
Helps teachers examine and practice strategies for providing non-threatening and supportive learning environments. Emphasizes skills for improving interpersonal relationships and for fostering growth and expression of creativity and self-confidence. Not scheduled to be offered in AY87-88.

EDUC 82M  Supervision of Student Teaching (2)
Designed for experienced teachers and administrators associated with teacher education programs. Topics covered include background information on the purposes and rationale for student teaching components in teacher preparation programs, the roles and responsibilities of various persons involved in the supervision process, and intended outcomes of the clinical experience. Prerequisite: Three years teaching or administrative experience. Offered in SPRING-SUMMER based upon demand.

EDUC 823  Beyond Textbook Science (3)
Elementary and secondary teachers learn how to go beyond science textbooks and utilize inexpensive, simple devices for supplementary science teaching. Advanced methods related to inquiry science teaching are emphasized. Offered based upon demand.

EDUC 825  Curriculum Development (3)
Identifies factors and processes considered in curriculum planning, instructional design, and development. Includes the assessment of plans for organization of the curriculum and the theory and application of curriculum principles. Students participate in the curriculum development process both in groups and individually. FALL, WINTER, SPRING-SUMMER.
EDUC 827 Issues in Social Studies Education (3)
Examines developments and trends in teaching social studies. Evaluates controversial issues in social studies. Analyzes global education, problems of democracy, and the place of teaching the future in social studies. Offered based upon demand.

EDUC 83A Strategies and Resources for Teaching School Geometry (3)
Examines the scope and sequence of geometric content in the elementary and junior high school mathematics curriculum. Explores the strategies and resources currently available for teaching geometry and thinking skills at the junior high school level. Prerequisite: EDUC640 or equivalent. WINTER; offered in FALL and SPRING-SUMMER based upon demand.

EDUC 83B Academic Evaluation and Assessment (3)
Introduces the student to the selection and construction of classroom assessment instruments. The student learns how to write test items, how to match test items with learning behaviors and objectives, how to ensure objectivity, reliability, and validity in constructing tests, and how to compute test statistics. WINTER; offered in FALL based upon demand.

EDUC 832 Contemporary Issues in American Education (3)
Explores the following contemporary issues: financing public and private education, bilingual/multicultural education, quantity vs. quality in education, teacher accountability, equality of educational opportunity, school desegregation, traditional vs. non-traditional approaches to education, who should be educated and to what extent, and what is the purpose of education. Focuses on developing insights and strategies related to these issues. Not scheduled to be offered in AY87-88.

EDUC 833 Teaching Mathematics to Mathematically Able Students (3)
Examines the identification and teaching of mathematically able students. Explores appropriate teaching techniques, enrichment activities, and programs that meet the special needs of the mathematically able. Prerequisite: EDUC640 or equivalent. SPRING-SUMMER; offered in WINTER based upon demand.

EDUC 834 Developing and Supervising Reading Programs (3)
Discusses elements of the total reading program and responsibilities of educational personnel involved in reading instructional delivery. Strengthens strategies for identifying weaknesses in the reading program and for initiating reading improvements. Prerequisite: EDUC848. SPRING-SUMMER; offered in other terms based upon demand.

EDUC 835 Integrating Language Arts across the Curriculum (3)
Examines the ways in which students can use writing as a tool for content area learning; reviews research findings underlying an integrated approach to learning; illustrates specific language-across-the-curriculum methods. Prerequisites: EDUC712 and ELED710 or permission of instructors. SPRING-SUMMER, odd years.

EDUC 838 Supervising Language Arts Instruction (3)
Analyzes the characteristics of effective language arts instruction; presents curriculum development strategies for defining and evaluating language arts objectives; defines role expectations and builds competencies for the task of school language arts coordination; provides theory and practice in implementing professional growth experiences for classroom teachers. Prerequisites: EDUC825 and EDUC835 or permission of instructors. FALL odd years.

EDUC 839 Teaching Higher Order Thinking Skills through Language Arts (3)
Investigates the relationship between thinking and writing skills; explores teacher behaviors that stimulate higher order thinking skills; demonstrates classroom activities promoting generation and organization of ideas in oral and written composition assignments. Prerequisites: EDUC714 and ELED710. FALL.
EDUC 842 Reading Diagnosis (3)
Identifies factors which inhibit success in reading and analyzes resultant reading difficulties. Strengthens skills in diagnostic procedures in classroom settings. FALL, WINTER, SPRING-SUMMER.

EDUC 845 Quantitative and Qualitative Designs in Educational Research (3)
Provides students with a working knowledge of practical research design skills in qualitative methodologies. Emphasis is on developing a working proficiency in design techniques. Prerequisites: EDUC810 and competency in introductory statistics. FALL, even years.

EDUC 846 Reading Remediation in the Classroom (3)
Reviews and extends students' skills in the use and critical evaluation of teaching methods and materials for remediating reading difficulties in the classroom. Emphasizes development of teacher-made as well as the use of commercially produced materials. Prerequisite: EDUC842 or SPED619. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

EDUC 848 Teaching Reading in the Content Areas (3)
Examines text and reader qualities that make content area reading difficult for developing readers. Explores instructional strategies that can facilitate content area learning by reading. Develops procedures for diagnosing readiness for content area instruction and procedures for facilitating learning by reading. Prerequisite: One course in reading. FALL, WINTER, SPRING-SUMMER.

EDUC 852 Advanced Methods of Teaching Social Studies (3)
Prepares teachers to teach citizenship, functions of law, and legal concepts using mock trials and case studies. Includes analysis, preparation, and demonstration of the case study method of teaching; methods of decision-making; and observations of court trials. Not scheduled to be offered in AY87-88.

EDUC 86E Graduate Seminar in Education (3)
Reviews selected current topics in education. Culminating course for non-thesis option graduate students in education. Requires the writing of a research paper related to the student's field of study. Prerequisites: Completion of 27 semester hours of study and admission to candidacy in the M.A. in education. FALL, WINTER.

EDUC 860 Practicum in Reading (3)
Provides a supervised clinical practicum experience in diagnostic and remedial tutorial work for disabled readers in elementary schools. Meets the ISBE requirements for partial fulfillment of the reading specialist qualification. Prerequisites: EDUC842 and EDUC846. FALL, WINTER.

EDUC 869 Research Project in: (Specialization) (3+)
Provides students with opportunities to apply research skills in solving practical educational problems. Under faculty supervision in their specializations, students develop researchable problems related to their interests, review related literature, and collect and analyze data to answer the problems. Examples of acceptable projects are action research projects, case studies with individual learners, evaluation studies using defined criteria, and surveys that produce data for the analyses of problems. Prerequisites: Admission to candidacy, at least 24 hours in masters program, and advisor approval. See program options under M.A. in education for other prerequisites. FALL, WINTER.

EDUC 870 Independent Study: . . . (1-6)
Individual reading, research, and/or project in education under the supervision of the faculty. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

EDUC 890 Thesis I in: (Specialization) (3+)
Provides students with opportunities to initiate indepth, supervised research in their areas of interest. Complete proposals and Chapters 1 and 2 (including the review of literature) are required. Prerequisites: EDUC845 or concurrent enrollment, admission to candidacy, at least 24 hours in masters program, and advisor approval. See program options under M.A. in education for other prerequisites. FALL, WINTER.
EDUC 891 Thesis II in: (Specialization) (3)†
Allows students to complete their research initiated in Thesis I. Thesis II culminates with successful oral defense of the research. Prerequisite: EDUC890. FALL, WINTER.

Education—Administration and Supervision

EDAD 601 Curriculum Development and Learning Theories (3)
An analysis of the basic determinants of curriculum; factors influencing design, current trends, and school reforms, including experimental programs and practices. Theories and methods of learning and models of teaching in the classroom will be emphasized as they relate to sociological and cultural factors of all children and minority children from different social and ethnic backgrounds. Special education programs are included. Methods are outlined for evaluating the effectiveness of curricula and programs. Prerequisites: Graduate status and twelve hours of professional education. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

EDAD 618 The Adult Learner (3)
An examination of demographic changes fostering attention on adults as well as stages and phases of adult life and adult characteristics as a framework for effective planning, programming, and marketing of adult education. Prerequisite: Graduate status. Offered based upon demand.

EDAD 621 Foundations of School Administration and Organization (3)
Introduction to the study of educational administration with emphasis upon the nature of the administrative process, administrative theory, and long-range planning and personnel management: overview of structure, governance, policy of public education, and school reforms at the local, state, and federal levels including legal, business, financial, and the political, social, and cultural contexts of schools. Administration of schools and programs including multicultural student populations and exceptional children. Prerequisites: Graduate status and twelve hours of professional education. FALL, WINTER, SPRING-SUMMER.

EDAD 713 Human Relations and Leadership (3)
Study of basic concepts and principles of interpersonal relationships, dynamics of groups, and organizational leadership. Emphasis on theory and application. Student will learn to observe and assess interpersonal and group and organizational dynamics in multicultural settings, and learn effective interactions and problem-solving skills. Designed for teachers, trainers, supervisors, administrators, school service personnel, and community leaders. Prerequisite: EDAD621 or permission of instructor. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

EDAD 724 School Supervision (3)
An analysis of the components of supervisory behavior in education and their influence upon the participants in the process of supervision; human and technical skills in personnel management; organizational factors affecting the performance of the supervisor; problematic areas within educational institutions and their influence on supervisory behavior. Practical aspects of program and personnel evaluation; improvement of school learning climate and academic achievement will be emphasized as they relate to school reform and to both multicultural and exceptional populations. Prerequisite: EDAD621 or permission of instructor. FALL, WINTER, SPRING-SUMMER.

EDAD 729 Research in Educational Administration (3)
Develop skills in research design including problem statements, hypotheses formulation, population/sample selection, data collection, and statistical analysis and interpretation. Historical, descriptive, causal-comparative, correlational, and experimental studies will be developed as they relate to effective schools and administrative research. Prerequisite: EDAD621. FALL, WINTER, SPRING-SUMMER.
EDAD 731 Community Relations (3)
An analysis of the role of educational policy in the modern community, community power structure and resources, the social and political context, and the principles of community relations in the context of social change, including group processes, multicultural and multiethnic understanding, the needs of exceptional students, interagency cooperation, funding, and evaluation. Students are provided opportunities to develop materials for use in their institutions. Prerequisite: EDAD621. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

EDAD 80A Topics in Educational Administration: . . . (1-3)
Examines selected topics covering areas of current concern in the field of educational administration. Addresses implications for theory and applications to practice. Requires synthesis of plans and structures based on analysis and evaluation of contrasting views on the course topic. Prerequisites: Vary depending on topic. Offered based upon demand.

EDAD 820 The Community College (3)
Studies the community college as a unique type of educational institution. Surveys the historical development, philosophical bases, control, curriculum, and students in the community college system. Prerequisite: EDAD621 or permission of instructor. FALL.

EDAD 822 Elementary and Secondary School Administration and Supervision (3)
An examination of the elementary and secondary school with emphasis upon the role of the principal and his/her relationship with personnel: administrative behavior analyzed in terms of tasks and processes that aid in improving educational programs. School climate and quality learning environment and academic excellence, staff development, curriculum development, finance, action research; opportunity to solve problems with simulated material which includes an emphasis on program and personnel evaluation. Social and cultural factors and special education programs will be analyzed. Prerequisite: EDAD621. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

EDAD 823 Community College Administration (3)
Examines college administration in different areas of college operations. Focuses on policy-setting processes. Prerequisites: EDAD621 and EDAD820. WINTER.

EDAD 832 School Finance (3)
Primary focus on the financing of Illinois public schools. The theoretical background and legal bases of public school finance and the application of those theories to various school finance models. Budget analysis, state aid mechanisms, taxing and auditing processes, and legal foundations in relation to salary, transportation, contracts, liability, and managing facilities will be emphasized. Practicing consultants and school business managers, case studies, and simulated materials will be used to highlight practical applications. Prerequisites: EDAD621. Offered based upon demand.

EDAD 833 School Law (3)
Includes an analysis of selected general legal principles, case and statute law, and law-making agencies affecting Illinois public schools, including special education. Key content areas include the legal system; role of federal, state, and local governments; the legislative process: school governance; policies, rules, and regulations; church and state; civil rights; student and parent rights and responsibilities; teacher rights and responsibilities; collective negotiations, torts, and contracts; and legal research. Content is designed for the practical application of school law. Prerequisites: EDAD621 and EDAD729. WINTER; offered in other terms based upon demand.

EDAD 834 Practicum in Instructional Leadership and School Management I (3)
The major purpose of the practicum is to provide the student with a supervised experience in the functions and duties associated with instructional leadership and school management. Each student will participate in administrative activities related to instructional leadership one term and school management the other term. Examples of tasks include staff and curriculum development, pupil personnel services, establishing and maintaining effective learning environments, implementation of policy, business and facilities management, and community relations. Prerequisites: Completion of 21 hours of core requirements. FALL, WINTER.
EDAD 835 Practicum in Instructional Leadership and School Management II (3)
The major purpose of the practicum is to provide the student with a supervised experience in the functions and duties associated with instructional leadership and school management. Each student will participate in administrative activities related to instructional leadership one term and school management the other term. Examples of tasks include staff and curriculum development, pupil personnel services, establishing and maintaining effective learning environments, implementation of policy, business and facilities management, and community relations. Prerequisites: Completion of 24 hours of core requirements. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

EDAD 836 Administration of School Personnel (3)
Provides a general understanding of the personnel functions in education. Decision-making and problem-solving involving school personnel and supervision will be emphasized. Functions of recruitment, assignment, development, coordination, compensation, appraisal, negotiations, in-service education, motivation, and dismissal are included. Prerequisite: EDAD 621. Offered based upon demand.

EDAD 838 Collective Negotiations (3)
The development and establishment of collective bargaining with school district groups. Presentation of historical, sociological, and legal perspectives, and current issues in educational collective bargaining, roles of individuals in the bargaining process, and effects in public sector. Participation in simulated collective bargaining exercises to prepare for negotiations, the use of table tactics and strategies, and dealing with impasse resolution and the impact on school budgets. Prerequisite: EDAD 621. Offered based upon demand.

EDAD 845 Practicum in School Business Management (3)
The major purpose of the field practicum is to provide the student with a supervised experience in the functions and duties associated with school business management and operations. Students will participate in activities related to development and implementation of school business procedures, budget development, transportation, computer operations, and management of non-certificated personnel. Prerequisites: Completion of 24 hours of core requirements. FALL, WINTER, SPRING-SUMMER.

EDAD 850 Seminar: Educational Policies and Issues (3)
Provides an understanding of educational policies at the state, local, and federal levels. Includes legal and political issues involving state and federal educational programs for bilingual and handicapped students. WINTER; offered in FALL and SPRING-SUMMER based upon demand.

Education—Bilingual-Bicultural

BBED 51A Introduction to Bilingual-Bicultural Communication (3)
Introduces students to issues of bilingualism, bidialectism, language development, language attitudes, non-verbal communication in bilingual settings, and language assessment. These issues are directly related to the student’s own experience through assessment of the student’s linguistic proficiency. Prerequisites: Successful completion of the GSU writing proficiency exam and the College of Education’s reading proficiency exam or permission. Students must have a minimum level of bilingual competency for participation in this course, as determined by the scores on the pre-test. FALL.

BBED 520 Foundations of Bilingual Education (3)
Presents an interdisciplinary overview of the history, philosophy, sociology, culture, psychology, and legislation of the field. Deals with current issues of importance to bilingual-bicultural education. Requires ten (10) hours of field experience. Prerequisites: EDUC 310 and BBED 51A or permission of instructor. FALL.

BBED 525 Assessment of Bilingual Students (3)
Studies current trends in testing and the specific role of tests in the bilingual classroom. Examines selection and interpretation of language, achievement, diagnostic, and intellectual assessments for limited English proficient students. Also discusses current trends and issues
relevant to assessment of bilingual students. Prerequisite: BBED520 or permission of instructor. WINTER.

BBED 530 Methods and Materials for Teaching in Bilingual Programs (3)
Prepares students to function effectively in a bilingual classroom. Identifies and examines specialized instructional strategies, materials, and evaluation stemming from various theories of teaching and learning. Introduces students to curriculum development including the development of culturally relevant units and lesson plans. Requires ten hours of field experience. Prerequisites: BBED520 and ELED370 or permission of instructor. WINTER.

BBED 535 Methods of Teaching Reading and Language Arts to Bilingual-Bicultural Students (3)
Prepares students to teach language arts and reading in Spanish as well as English as a second language to Spanish speaking, limited English proficient students. Focuses on planning and implementing reading strategies for the following three methods: onomatopoeic, global, and eclectic, and applies the principles of linguistics to the teaching of English pronunciation, structure, and vocabulary to non-native speakers of English. Ten hours of field work required. Prerequisite: BBED520. Offered based upon demand.

BBED 538 Ethnic Minorities in the United States (3)
An overview of the ethnic minority groups in the United States and their impact on the school curriculum. Reviews concepts, methods, techniques, materials, and resources as applied to school settings. Not scheduled to be offered in AY87-88.

BBED 740 Psychological Implications of Bilingual-Bicultural Education (3)
Identifies factors, problems, materials, and instructional strategies appropriate to the education of bilingual-bicultural children. Offered in FALL based upon demand.

BBED 793 Spanish Language Arts Instruction (2,3)
Develops Spanish language skills of listening, speaking, reading, and writing for Spanish-speaking children. Students diagnose and remediate language inference in the first and second language. Offered based upon demand.

BBED 797 Reading Strategies in the Bilingual Classroom (3)
Develops and enhances knowledge and skills associated with instruction of reading in the bilingual classroom. Students will plan and implement reading strategies. Requires five to ten hours of field work. Offered based upon demand.

Education—Computer Education

EDCP 500 Introduction to Microcomputers in Education (3)
Examines the impact and use of microcomputers in today's educational system, particularly as they apply to the introduction, use, and evaluation of the microcomputer as an instructional and managerial aid. Students discuss and apply strategies for assessing needs and the selection of hardware and software at an introductory level. FALL, WINTER, SPRING-SUMMER.

EDCP 610 Evaluating Software for Instruction (3)
Enhances the student's ability to select and use microcomputer software and hardware. Activities center around the development of selection criteria for software. Students experience a hands-on approach to judging and selecting microcomputer software to meet educational objectives and needs. Prerequisite: EDCP500 or permission of the instructor. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

EDCP 732 Educational Applications of the Microcomputer: Mathematics (3)
Provides the student with direct content and skill area applications of the microcomputer for use in mathematics education. Topics include: developmental, remedial, enrichment, corrective and adaptive instruction, assessing hardware and software needs, use of commercial and teacher-made materials. Prerequisite: EDCP610 or permission of instructor. FALL; offered in WINTER and SPRING-SUMMER based upon demand.
EDCP 735 Educational Applications of the Microcomputer: Reading and Writing Development (3)
Provides the student with instructional applications of the microcomputer for use in reading, language arts, and writing skills development. Topics covered span the range from developmental through remedial applications. Particular emphasis is placed upon the use of the microcomputer for the enrichment of the reading-writing connection. Prerequisite: EDUC610 or permission of instructor. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

EDCP 736 Educational Applications of the Microcomputer: Science (3)
Enables students to evaluate, utilize, and develop computer software for use in science classrooms. Involves reviewing available science software, testing software in the classroom, and developing programs for use with science courses. Prerequisite: EDCP610 or permission of instructor. Offered based upon demand.

EDCP 737 Educational Applications of the Microcomputer: Special Education (3)
Investigates the use of microcomputers in special education and the multitude of uses this technology offers the handicapped. Includes emphasis on user-oriented applications of the microcomputer, classroom problem-solving techniques, and computer assisted instruction (CAI). Prerequisite: EDCP610 or permission of instructor. FALL, SPRING-SUMMER, offered in WINTER based upon demand.

EDCP 75A Designing Microcomputer-Based Instruction (3)
Provides the student with advanced skill development in the design and utilization of computer assisted instruction and management. Students complete an extensive analysis of instructional tasks, microcomputer materials, design requirements, and the actual development of a complete software package. Prerequisites: I&TT755 and EDUC825. WINTER; offered in FALL based upon demand.

EDCP 770 Administrative Uses of Microcomputers (3)
An overview of the administrative uses of microcomputers in educational settings. Emphasis will be on data management functions. Focus on hardware and software for use with budgets, schedules, recordkeeping, data processing, and word processing. Also includes review of educational hardware and software packages. Prerequisites: Graduate standing. WINTER, SPRING-SUMMER; offered in FALL based upon demand.

EDCP 85A Integrating Microcomputer-Based Education (3)
Provides students with a synthesis of computer education issues. Topics include uses and abuses of microcomputers, future roles of microcomputers, educational staffing and training issues, hardware and software cost analyses, promoting computer literacy, and other related issues. Prerequisite: EDCP610. WINTER, SPRING-SUMMER.

EDCP 86A Practicum in Microcomputer Education (3)
Provides a supervised practicum experience in microcomputer education and instruction. Students work with learners in either a classroom, laboratory, or computer camp setting assisting the learners in developing proficiency in either the use of microcomputers or skill development in a subject area through the use of a microcomputer. Prerequisite: EDCP85A. SPRING-SUMMER; offered in WINTER based upon demand.

Education—Elementary

ELED 370 Methods of Teaching (3)
Provides the student with linkage between theory, philosophy, and methodology. Introduces the prospective teacher to the foundations of methodology and to the myriad of decisions that teachers have to make. Apprises students of a variety of approaches to lesson planning and unit planning, with special emphasis on the needs of culturally diverse students. Includes ten hours of field experience. FALL, WINTER, SPRING-SUMMER.
ELED 380  Methods of Teaching Language Arts (3)
Introduces the prospective teacher to programs of language arts instruction at the elementary level; including methods, materials, goals, and management strategies for teaching oral and written communication, spelling, composition, and handwriting. Prerequisites: Satisfactory completion of university requirements for writing, PSYC320, EDUC310, ELED370, and either ENGL501 or ENGL531. FALL, WINTER.

ELED 422  Methods of Teaching Elementary School Science (2)
Students explore science teaching methods and strategies for elementary school classrooms. Focuses on an inquiry model and associated teaching techniques. Prerequisites: PSYC320, EDUC310, ELED370, two science courses, and concurrent enrollment in ELED423. FALL, WINTER.

ELED 423  Methods of Teaching Elementary School Science Laboratory (1)
Provides laboratory experiences associated with methods emphasized in ELED422. Students do science activities to learn inquiry teaching strategies for elementary school science. Includes ten hours of clinical experience. Prerequisite: Concurrent enrollment in ELED422. FALL, WINTER.

ELED 424  Methods of Teaching Elementary Math (3)
Introduces prospective teachers to the content, methodology, and instructional materials for elementary school mathematics program. Emphasizes application of knowledge from learning theory, diagnostic/prescriptive teaching, and individual differences in selecting, organizing, and presenting mathematical content for elementary school children. Prerequisites: Satisfactory completion of university mathematics proficiency, EDUC310, PSYC320, ELED370, MATH320, or equivalent and college algebra. FALL, WINTER.

ELED 426  Methods of Teaching Reading (3)
Surveys the various phases of reading in their relation to a modern program of education and the place of reading in the curriculum. Emphasizes modern practices in the classroom teaching of reading. Prerequisites: EDUC310, PSYC320, and ELED370. FALL, WINTER.

ELED 442  Methods of Teaching Social Studies (3)
Examines learning materials which are useful for teaching social studies in grades K-9. Demonstrates how to teach social studies with a variety of materials and activities. Illustrates methods of teaching social science theories, concepts, and generalizations. Prerequisites: U.S. history and American government, PSYC320, ELED370, and EDUC310. FALL, WINTER.

ELED 528  Methods of Diagnosing and Remediating Reading Difficulties (3)
Familiarizes prospective teachers with formal and informal assessment procedures in reading. Students will analyze test data, administer and interpret tests, plan and implement remedial activities for several pupils in classroom settings. Requires a minimum of 20 hours of field work. Prerequisites: ELED380 and ELED426. FALL, WINTER.

ELED 60A  Workshop: Matching Teaching/Learner Styles (3)
Covers various methodologies in presenting material in the classroom. Involves matching teacher and learner styles, with awareness that children learn in different ways. Examines ways the curriculum can be synchronized with individual differences to maximize learner's effectiveness. Offered based upon demand.

ELED 61A  Writing across the Curriculum (1)
Examines the many ways in which elementary students can use writing as a tool for content area learning. Participants in the class will develop activities that allow students to write down observations, notes, and questions to write up field trips, class projects, and events, and to write out directions, explanations, and problems. Explores cross-disciplinary themes as a vehicle for integrating various content areas. Prerequisite: At least one undergraduate or graduate class in language arts. Offered based upon demand.
236  Education—Elementary

ELED  621  Seasonal Science Methods: Autumn (1)†
Examines the structures and patterns found in the natural world during autumn. Includes using dichotomous keys for plant and insect identification, astronomy of the fall skies, examination of a restored prairie, migratory bird identification, and mapping skills. Techniques for monitoring a natural site will be presented. Offers classroom activities in mathematics, literature, and related arts. A weekend field study course designed for elementary teachers. Offered based upon demand.

ELED  622  Seasonal Science Methods: Spring (1)†
An outdoor education workshop providing the background information and activities for exploring the emergence aspects of the spring season. Weather, astronomy, pond water, plant identification, animal studies, and literature related to spring will be covered. A weekend field study course designed for elementary teachers. Offered based upon demand.

ELED  623  Seasonal Science Methods: Summer (1)†
An outdoor education workshop providing background information and activities for exploring the emergence aspects of the summer season. Weather, astronomy, pond water, plant identification, animal studies, and literature related to summer will be covered. A weekend field study course designed for elementary teachers. Offered based upon demand.

ELED  624  Seasonal Science Methods: Winter (1)†
An outdoor education workshop exploring the unique opportunities for wonder, delight, and mystery allowed only by winter. Activities in tracking, winter literature, energy implications, astronomy, snow, ice, and tree and twig identification will be presented. A weekend field study course designed for elementary teachers. Offered based upon demand.

ELED  630  Advanced Methods of Teaching Elementary School Science (2) 
Outlines and applies the psychological and philosophical bases for teaching science to the elementary classroom. Describes teaching science through inquiry by using examples including questioning techniques and the use of science processes. Teachers can use the material from this course to evaluate elementary science programs. Prerequisites: Elementary teaching certificate and a lower level biology or physical science course. Offered based upon demand.

ELED  710  Teaching Writing in the Elementary Classroom (3)
Research based course designed to assist classroom teachers in developing a yearlong written composition program for elementary grade students. Class participants will work with a three step writing process that leads students from pre-writing experiences to finished compositions, stories, and reports. Knowledge of current theory and research in writing will be applied to classroom processes through which students acquire writing skills. Prerequisite: EDUC712. SPRING-SUMMER; offered in other terms based upon demand.

ELED  719  Survey of Early Childhood Education Programs (3)
Students observe and analyze different facilities for children from birth up to six years. Small groups will identify the needs of very young children, and site visits will provide the basis for student assessment of how young children's needs are being met. Offered based upon demand.

ELED  725  History and Philosophy of Early Childhood Education (3)
Examines historical and philosophical ideas about the nature and importance of early learning. Students will examine and discuss their own attitudes and goals for early childhood education. Prerequisite: PSYC81A. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

ELED  732  Piagetian Theories in Math Education (3)
ELED 736 Curriculum and Instruction in Early Childhood Education (3)
Examines unique qualities of early learning. Emphasizes development of curriculum and instruction in specific areas of learning including art, music, literature, reading instruction, math, and natural and social science for pre-kindergarten children. Includes fifteen hours of fieldwork. Prerequisite: PSYC81A. FALL; offered in other terms based upon demand.

ELED 738 Health and Nutrition for the Young Child (3)
Reviews the relevant literature and research on the effects of nutritional factors on physical and cognitive development. Examines educational implications. SPRING-SUMMER.

ELED 818 Early Childhood Assessment (3)
Studies the history and issues of early childhood assessment. Provides experiences in selecting, administering, and interpreting various assessment techniques and materials. Prerequisite: PSYC81A. SPRING-SUMMER; offered in other terms based upon demand.

ELED 830 Current Issues in Early Childhood Education (3)
Examines different viewpoints on several current issues. Emphasizes decision-making processes used in resolving issues. Offered based upon demand.

ELED 831 Teaching to Limited English Proficient Students (3)
Examines techniques and strategies for teaching various content areas to students with limited proficiency in English. Prerequisites: EDUC310, SPED510, and PSY232. Offered based upon demand.

ELED 832 Teaching Arithmetic Operations (3)
Study of the basic arithmetic which underlies the elementary school curriculum. Covers techniques of teaching basic arithmetic concepts to children. Examines current elementary school mathematical curricula and materials, including games and laboratory activities. WINTER; offered in other terms based upon demand.

ELED 834 Individualizing Prekindergarten Curriculum and Instruction (3)
Analyzes techniques for individualizing instruction in specified content areas. Examines, selects, and applies techniques for assessing levels of functioning, selecting activities and materials for each content area, and devising/selecting methods for evaluating student progress. Requires fifteen hours of fieldwork. Prerequisite: ELED736. SPRING-SUMMER; offered in other terms based upon demand.

Education—Special Education

SPED 510 Survey of Exceptional Students (3)
Introduces study of various exceptionalities including learning disabilities and their impact on classroom learning. Focuses on methods for mainstreaming exceptional children and considers legal requirements, policies, and directions in special education. Requires fifteen hours of fieldwork. FALL, WINTER, SPRING-SUMMER.

SPED 560 Methods of Teaching the Handicapped Student in the Regular Classroom (3)
Prepares classroom teachers to provide individualized instruction for students with learning and behavior problems. Assists classroom teachers in working cooperatively with special education teachers. Requires ten hours of fieldwork. Prerequisite: SPED510. Offered based upon demand.

SPED 600 Identification and Characteristics of Gifted Students (3)
Identifies the most common characteristics of gifted and talented students. Analyzes the reliability and validity of various techniques used in gifted student identification. Presents an overview of fundamental gifted teaching philosophies. Proposes problems encountered in gifted programs as well as possible solutions. Stresses the need and importance of gifted programs to the current educational system. Requires ten hours of fieldwork. Offered based upon demand.
SPED 61A Survey of Teaching-Learning Models for Gifted Education (3)
Presentes teaching-learning models that can be used in the development of a program for the gifted. Discusses the role of critical enrichment education programs. Evaluates the appropriate use and proper application of various program models. Requires ten hours of field work. Offered based upon demand.

SPED 619 Psychological Diagnosis of Exceptional Learners (3)
Examines basic assumptions, assessment procedures, techniques, and instruments in the evaluation of individuals with special needs. Emphasizes prescriptive ability, assessment, and potential level of functioning. Requires 20 hours of fieldwork. Prerequisite: SPED 51. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

SPED 62A Methods in Gifted Programming (3)
Proposes the concept of curriculum differentiation for the gifted. Outlines a program initiation framework. Provides a step-by-step procedure for planning and implementing gifted programming. Requires ten hours of field work. Prerequisites: SPED 600 and SPED 61A. Offered based upon demand.

SPED 650 Topics in Special Education: . . . (1)
Involves experts in special education addressing selected topics of current concern in the field. Discusses implications both for theory and practice. Participants have an opportunity to discuss the topics and, where appropriate, apply the techniques and skills. Offered based upon demand.

SPED 805 Administration and Supervision of Special Education (3)
Provides an overview of the functions, responsibilities, and problems in the organization, administration, and supervision of special education programs at the federal, state, and local levels. Prerequisites: Major in multicaegorical special education, educational administration, or school psychology; approval or certification in an area of special education. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

SPED 820 Learning Characteristics of LD, EMH, and S/ED Students (3)
Investigates the cognitive and psychomotor abilities of students who are learning disabled, educable mentally handicapped, or social/emotional disordered. Emphasizes the characteristics of the mildly handicapped. Requires 30 hours of fieldwork. Prerequisite: SPED 510; open to majors only. FALL; offered in WINTER based upon demand.

SPED 831 Behavioral Characteristics of LD, EMH, and S/ED Students (3)
Examines the social-affective development across the continuum of behaviors of learning disabled, educable mentally handicapped, or social/emotional disordered. Emphasizes the mildly handicapped. Requires 30 hours of fieldwork. Prerequisite: SPED 820; open to majors only. FALL; offered in WINTER based upon demand.

SPED 835 Methods for Teaching LD, EMH, and S/ED Students (3)
Investigates advanced methods and teaching techniques for use with learning disabled, educable mentally handicapped, and social/emotional disordered students. Emphasizes the mildly handicapped in the least restrictive educational environment. Examines strategies for curriculum development and writing IEPs. Requires 20 hours of fieldwork. Prerequisite: SPED 831; open to majors only. WINTER; offered in other terms based upon demand.

SPED 840 Special Education Practicum I (1)
Participation in tutoring and staffing activities in special education settings. Requires preparation of a case study and 30 hours of fieldwork. Prerequisite: SPED 835; open to majors only. WINTER; offered in other terms based upon demand.

SPED 850 Special Education Practicum II (1)
Provides advanced professional experience in implementing management techniques and individualized study plans for exceptional children in multicaegorical special education settings. Requires 30 hours of fieldwork. Prerequisite: SPED 840; open to majors only. FALL, SPRING-SUMMER; offered in WINTER based upon demand.
SPED 860 Consultative Techniques for Special Education (3)
Provides an overview of parent involvement programs and their service components. Reviews the roles and responsibilities of the classroom teacher, ancillary staff, and parents in program development and evaluation. Examines methods and techniques for communicating with parents. Requires fifteen hours of fieldwork. Prerequisite: SPED 510. FALL, WINTER.

SPED 863 Special Education Practicum III (1)
Provides advanced professional experience in discipline and behavior management with an emphasis on educating adolescents with exceptionalities in secondary programs. Requires participation in the implementation of behavioral management activities and 30 hours of fieldwork. Prerequisites: SPED 840 and SPED 850; open to majors only. SPRING-SUMMER.

SPED 865 Graduate Seminar on Multicategorical Special Education (4)
Examines current trends and issues in multicategorical special education. Explores contemporary philosophies of educating mildly handicapped students, instructional alternatives, and service delivery programs. Prerequisites: SPED 835 and EDUC 810; open to majors only. WINTER; offered in other terms based upon demand.

English and Literature

ENCL 310 Writing Principles (3)
Emphasizes principles, techniques, form, and style in writing. FALL, WINTER, SPRING-SUMMER.

ENCL 311 English Literature I (3)
Surveys a selection of literary masterpieces from Anglo-Saxon origins through the Middle Ages and the English Renaissance to the Restoration and eighteenth century. FALL.

ENCL 312 English Literature II (3)
Surveys a selection of literary masterpieces in English literature from the Romantic period through the Victorian and Modern periods to the present. WINTER.

ENCL 321 American Literature I (3)
Focuses on the major writers, works, and related background in American literature before 1865. FALL.

ENCL 322 American Literature II (3)
Focuses on the major writers, works, and related background in American literature after 1865. SPRING-SUMMER; offered in WINTER based upon demand.

ENCL 330 Studies in Literature (3)
Brings literature into the life of the educated citizen. Students will study consequential works of English, American, and world literature as a prologue to a lifetime of reading. WINTER; offered in other terms based upon demand.

ENCL 381 Advanced Writing (3)
Covers form, style, and the mechanics of writing persuasive, informative essays and other documents. Designed as an upper-division writing course to enhance and improve student writing ability. FALL, WINTER, SPRING-SUMMER.

ENCL 382 Technical and Professional Communications (3)
Examines through case-studies and professional documents the numerous and varied forms of written and spoken communication in business and the professions. Emphasizes the importance of all aspects of communication in contemporary industry, business, and, where applicable, health sciences, computer technology, and other professions. Prerequisite: ENCL 381 or equivalent. FALL; offered in other terms based upon demand.
ENGL 41A Studies in Rhetoric (3)
Emphasizes a singular aspect of rhetoric: classical rhetoric; the relationship of composition theory and literature; research in rhetoric, composition, and computing; and so on. Focuses also on the student's ability to write analytically about the readings. Not scheduled to be offered in AY87-88.

ENGL 470 Independent Study: . . . (1-4)
Individual reading, research, and/or project in English under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

ENGL 501 Introduction to Linguistics (3)
Provides a comprehensive introduction to the ways in which linguistics describe language, focusing especially on English. Explores all levels of linguistic structure from sound (phonetics and phonology) to meaning and use (semantics and pragmatics). Examines major issues and subdisciplines in the systematic study of language, including dialects, prescriptivism, and language abuse, style, historical change, usage and definitions of standards, and the differences between speech and writing. FALL, WINTER, SPRING-SUMMER.

ENGL 508 Teaching English As a Second Language (3)
Application of linguistic principles and various methods of language instruction to the teaching of English language skills to individuals learning English as a second language. Emphasizes techniques for effective utilization of first language skills in second language learning. Curricula and materials will be examined. Offered in WINTER based upon demand.

ENGL 510 Major English Authors: . . . (3)
Concentrated study of selected authors. Students may take course for credit more than once, because the authors selected change from year to year. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

ENGL 511 African Novel (3)
A critical analysis of the literature written by selected major African writers. Not scheduled to be offered in AY87-88.

ENGL 512 Black Literature I: 1760-1900 (3)
Generally surveys black prose from colonial period to 1900. Covers a wide variety of works from several genres, with a major emphasis on prose embracing the slave narratives and early black fiction. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

ENGL 513 Black Literature II: 1900-1941 (3)
Provides a model for approaching black literature from a variety of literary and sociocultural perspectives, with a special emphasis on the Harlem renaissance and major authors, including Paul Laurence Dunbar, Charles Chesnutt, and James Weldon Johnson. Offered in FALL and SPRING-SUMMER based upon demand.

ENGL 514 Black Literature III: 1941-Present (3)
Continuation of Black Literature II. Embraces all genres and extends chronologically from World War II to the present. The main focus is on authors such as Wright, Baldwin, Ellison, Margaret Walker, Alice Walker, and Toni Morrison, as well as black writers of the civil rights movement. Offered in WINTER and SPRING-SUMMER based upon demand.

ENGL 515 Major Black Authors: . . . (3)
Individual black writers will be studied in depth. Students may register in this course for credit more than once as the authors studied vary from year to year. FALL, SPRING-SUMMER.

ENGL 520 Major American Authors: . . . (3)
Individual American writers will be studied in depth. Students may take course for credit more than once, as the authors studied vary from year to year. FALL, WINTER, SPRING-SUMMER.
ENGL 521 Comparative Latin American Literature (3)
Studies the Latin American novel. Covers major writers of different Latin American countries and the poetry of protest and revolution in the 20th century. FALL; offered in SPRING-SUMMER based upon demand.

ENGL 531 Children's and Adolescents' Literature (3)
Introduces the student to the variety of literature available for children and adolescents. Examines establishing criteria for selection of literature for children and adolescents, including criteria related to reading levels, student interests, quality of materials, and psychological, cultural, and social issues. FALL, WINTER, SPRING-SUMMER.

ENGL 532 Literature of Immigrant Children (3)
Readings and analysis of fiction produced by the immigrant children, the white ethnics, who emigrated to the U.S. in the late 19th century. Set in context with mainstream American writers and American black literature. Offered in SPRING-SUMMER based upon demand.

ENGL 535 Literature and History: . . . (3)
Explores the relationships among ideas which have political, social, and historical importance and the developments in history for which these ideas have consequences. Topics include the 1920s and modern Europe (19th and 20th centuries) and will vary from year to year. WINTER.

ENGL 54A Literary Criticism (3)
Examines major approaches to criticism as a means of critiquing literature from a variety of perspectives on a variety of levels. Offered in FALL based upon demand.

ENGL 540 Bible As Literature in Social Context (3)
Introduces the diverse literary genres of biblical literature in their social/cultural setting. Utilizes the recent knowledge of archaeology, linguistics, and Near Eastern studies. WINTER.

ENGL 541 Chinese Literature and Culture (3)
Introduces Chinese culture through the progress and splendor of its literature. Emphasizes the different literary genres presented by the major writers of China, the structures of the language, and their varying influences on Chinese culture. FALL.

ENGL 545 Persuasion Analysis (3)
Studies modern persuasion techniques used by advertising, political parties, and the government. Examines specific counter-propaganda techniques. Designed primarily for high school teachers who teach persuasion and propaganda analysis, consumer education, and the like. Offered in FALL based upon demand.

ENGL 551 Shakespeare's Plays (3)
Reading and analysis of Shakespeare's plays, including history plays, comedies, tragedies, and romances. Graduate students will address textual problems. FALL; offered in WINTER based upon demand.

ENGL 56A Literary Genre: . . . (3)
Examines the form, content, and history of the development of the various genre of literature in English, including poetry, dramatic literature, narrative fiction, the essay, and modern variations. This is a variable offering and may be taken more than once under different subtitles. Not scheduled to be offered in AY87-88.

ENGL 560 Philosophical Themes in Contemporary Literature (3)
Examines philosophical ideas embodied in literary works of art and presents a methodology of thematic studies in literature. FALL; offered in SPRING-SUMMER based upon demand.

ENGL 57A Computers and Composition (3)
Focuses on the use of word processing and computer-aided instruction as part of the writing process. Where possible, students will review available software (CAL) packages. Offered in SPRING-SUMMER based upon demand.
ENGL 570  Rhetorical Theory and Practice (3)
Examine the history of rhetoric and composition and contemporary issues in rhetorical theory and pedagogical practice. Develops the student's abilities as a writer. Prerequisite: ENGL381 or equivalent. WINTER.

ENGL 58A  Special Topics: . . . (1-3)
Experts in the field present selected topics in writing, language, and literature. Includes the discussion of the topics and the implications for theory and practices. Because of varying topics, this course may be taken more than once. Offered based upon demand.

ENGL 590  Research Techniques (3)
Instruction and practicum in research techniques ranging from basic library skills to advanced methods of information storage and retrieval. SPRING-SUMMER.

ENGL 592  Historical Studies in the English Language (3)
Focuses on the historical development of English language studies. Emphasizes the major contemporary theories of grammar including structural, transformational, tagmemic, and traditional. Also examines two major approaches to language-psycholinguistic and sociolinguistic. WINTER.

ENGL 620  Women in Latin American Literature (3)
Studies literary works produced by women in Latin America. Includes a critical analysis of other works which reflect the role women play in society. Offered in SPRING-SUMMER based upon demand.

ENGL 690  Workshop for Teachers of Writing (1-3)
Emphasizes the method and practice of teaching writing. Focuses on methods of motivating students, pre-writing, free writing, style development, revision, and evaluation. Prerequisite: Graduate student status. FALL, SPRING-SUMMER.

ENGL 820  Critical Analysis: Latin American Literature (3)
Studies the major approaches to criticism with emphasis on critical writing. Includes the study of Spanish and Latin American literary criticism. Offered in FALL and WINTER based upon demand.

ENGL 830  Seminar: Advanced Composition and Rhetorical Theory (3)
Focuses on extensive readings in a major area of composition, rhetorical, and critical theory. Where appropriate, seminar participants will investigate the relationship of theory to college-level practice. WINTER.

ENGL 835  Seminar: Social Novel (3)
Studies the indigenous novel as an expression of and reaction to the social, political, and economic conditions of select cultural groups. Offered in FALL based upon demand.

ENGL 840  Seminar: Philosophy in Literature (3)
Focuses on philosophical themes in literature. Offers a forum at an advanced level where thematic studies are the focus of investigation in literary works. WINTER.

ENGL 845  Seminar: English Literature (3)
Studies a selected period of English literature including: Medieval, English Renaissance, Restoration and Eighteenth Century, Romantic and Victorian, Modern and Post Modern. Literature of a period is related to historical, political, social, and religious currents of the times. Students concentrate on a period of their choice. FALL.

ENGL 850  Seminar: American Literature (3)
Focuses on extensive readings on one period in American literature. Typically, students read both primary literary works and secondary critical and historical analyses. FALL; offered in SPRING-SUMMER based upon demand.
ENGL 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in English under the supervision of the faculty.
Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

ENGL 890 Graduate Thesis/Project: . . . (3)
Provides the student in English the opportunity to synthesize graduate coursework by
developing and completing a thesis or project specific to the student's interests in English.
Prerequisite: Permission of advisor. FALL, WINTER, SPRING-SUMMER.

Finance

FIN 301 Principles of Financial Management (3)
Deals with theory and practice of the financial management function in planning, raising,
and directing the efficient allocation of funds within the firm. Prerequisites: ACCT302,
ECON301, and STAT361. FALL, WINTER, SPRING-SUMMER.

FIN 340 Survey of the Real Estate Industry (3)
A survey course for degree-seeking students without a real estate background. Examines
relationships of real estate to the business community. Introduces brokerage operations,
finance, investment, valuation, and property management. Reviews the legal framework of
the industry and introduces other facets of real estate for further study or specialization.
Note: Students who have completed six hours of real estate should not enroll for credit.
FALL; offered in other terms based upon demand.

FIN 341 Fundamentals of Real Estate Lending (3)
Examines real estate loans as a significant part of the investment portfolio for financial in­
stitutions. Discusses these institutions and their procedures for investment, and govern­
mental activities affecting these activities as well as other changes in the financial markets
that affect them. Not scheduled to be offered in AY87-88.

FIN 342 Fundamentals of Real Estate Valuation (3)
A study of the nature of real property and value, influences of value on real property, the
appraisal process, city and neighborhood data analysis, highest and best use, building in­
spection, and three approaches: value-cost, market data, and income. Attention will also
be given to the appraisal report and professional standards and practices. Not scheduled to
be offered in AY87-88.

FIN 343 Sales Techniques and Real Estate Brokerage (3)
Focuses on training a salesperson in the practical application of innovative sales
psychology as well as other operational problems for managers of a residential and com­
mercial real estate brokerage including listing, assessing, selling, and financing real estate.
Prerequisite: FIN340 or equivalent. Not scheduled to be offered in AY87-88.

FIN 344 Construction Scheduling and Cost Estimating (3)
Improves ability to control and properly cost the construction process. Coursework in­
cludes terminology, methods and materials, measurement and the typical sequences of
construction projects, reading, and working from plans and specifications. Examines stan­
dard cost data sources and how they are used in the development or valuation of real
estate. Not scheduled to be offered in AY87-88.

FIN 430 Financial Institutions (3)
Explores the development and role of financial intermediaries in the savings-investment
process and compares investment and/or loan policies of the major financial institutions.
Prerequisites: FIN301 and ECON301. WINTER, SPRING-SUMMER.
FIN 435 Estate Planning (3)
Covers basics needed for developing and updating an estate plan, its creation, conservation, and disposition. Includes topics on identifying and harmonizing life goals and life styles, investment options, life insurance, guardianships, trusts, wills, and the newly revised federal estate and gift tax law. WINTER.

FIN 440 Insurance and Risk Management (3)
Analyzes the nature and scope of the various risk exposures generally facing individuals and profit and nonprofit organizations. Examines alternate methods of dealing with risk exposures, including the use of insurance as a risk-handling device. Features topics on personal risks, property risks, third-party liability risks, and the nature and types of insurance contracts. Students will learn to apply risk management techniques to their professional and personal affairs. SPRING-SUMMER.

FIN 441 Real Estate Property Management (3)
Focuses on the application of management techniques to the specialized field of real estate. Covers historical background and operating techniques, as well as the scope of professional real estate management. Prerequisite: FIN 340. Not scheduled to be offered in AY87-88.

FIN 442 Single Family Residential Appraisal (3)
Emphasizes the application of appraisal fundamentals in the residential field including condominiums and cooperatives. Covers the process of collecting and analyzing city, neighborhood, site, and market data as well as the use of property inspections. Emphasizes current practical applications through extensive use of problems and case studies. Reviews narrative techniques as well as current forms used in appraisal reports. Prerequisite: FIN 342 or equivalent. Not scheduled to be offered in AY87-88.

FIN 445 Analysis of Financial Statements (3)
Uses computer simulation to facilitate understanding and application of certain tools and techniques of analysis. Includes flow of funds, forecasting, and discounted cash flow. Prerequisite: FIN 301. WINTER, SPRING-SUMMER.

FIN 448 Real Estate Investment Analysis (3)
Combines the skills from federal income tax accounting and financial mathematics and uses these for a formal analysis of real estate investments. The completion of this course places the student's knowledge equivalent to the content offered with course CI 101 by the Realtors National Marketing Institute. Prerequisite: FIN 340 or equivalent. Not scheduled to be offered in AY87-88.

FIN 450 Financial Markets (3)
Deals with analysis of the flow of funds through financial institutions and markets with the purpose of understanding and predicting market conditions. Covers types of financial instruments, term structure of interest rates, investment policies of financial institutions, efficiency of financial markets, and the effects of monetary and fiscal policies upon financial markets. Prerequisite: FIN 301. FALL, WINTER.

FIN 460 Investments (3)
Involves study of the principles of investment securities with varying degrees of risk and return. Includes topics on investment risk, historical risk-return relationships, valuation of alternative financial instruments, technical analysis, procedures of the securities industry, formula investing, tax considerations, investment companies, and personal investment policy. Prerequisite: FIN 301. FALL.

FIN 470 Independent Study: . . . (3)
Independent study is intended to provide better students with the opportunity to study a topic of their choice in finance under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within finance and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.
FIN 801 Problems in Financial Management (3)
Covers the problems faced by the financial officer in management of funds in the business firm. Emphasizes developing skills and techniques to implement capital expenditure policies, solving short-term and long-term financing problems, and establishing dividend policies. Prerequisites: FIN301, MATH355, and STAT361. FALL, SPRING-SUMMER.

FIN 830 Financial Markets (3)
Covers analysis of the financial markets with emphasis on understanding and predicting interest rates and stock prices. Includes topics on structure and behavior of interest rates, flow of funds analysis, operation of security markets, portfolio policies of financial institutions, effect of monetary and fiscal policies of financial markets, capital market theory, and measurement of market efficiency. Prerequisite: FIN801. FALL.

FIN 850 Investments (3)
Studies the principles of investment in securities with varying degrees of risk and return. Includes topics on investment risk, historical risk-return relationships, valuation of alternative financial instruments, technical analysis, procedures of the securities industry, formula investing, tax considerations, investment companies, and personal investment policy. Prerequisites: FIN301 and STAT361. Not scheduled to be offered in AY87-88.

FIN 855 Analysis of Financial Statements (3)
Emphasizes external accounting rather than internal or managerial. Covers analytical tools and techniques of financial analysis, bases which underlie the preparation of financial statements, distortions to which income determination and asset and liability measurement are subject, and processes and methodology of financial statement analysis. Prerequisites: FIN301, ACCT351, and ACCT352. Not scheduled to be offered in AY87-88.

FIN 860 Financial Institutions (3)
Presents a detailed study of the total financial sector of the economy from the point of view of individual financial institutions. Provides analysis of policies, practices, and regulation of commercial banks; savings and loan associations; financial, insurance, and investment companies; relevant governmental agencies; and others. Prerequisite: FIN801. WINTER.

FIN 865 Advanced Financial Management (3)
An intensive study of theories and analytical tools with emphasis on their application to the solution of various financial problems of business firms. Includes topics on working capital management, capital expenditure decisions, estimation of the cost of capital and dividend policy decision. Prerequisites: FIN801 and STAT362. Not scheduled to be offered in AY87-88.

FIN 870 Independent Study: . . . (3)
Independent study is intended to provide better students with the opportunity to study a topic of their choice in finance under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within finance and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

FIN 890 Graduate Thesis/Project: . . . (6)
Provides an opportunity for intensive study of a problem chosen by the student. A candidate who is approved for the thesis option will be required to orally defend the thesis. The thesis option is limited to outstanding students who have been recommended by a minimum of two faculty in the College of Business and Public Administration and approved by the dean. Students interested in pursuing the doctorate degree in business should select the thesis option. Prerequisite: Permission of advisor or committee. Offered based upon demand.
Geography

GEOG 31A Physical Geography (3)
Features investigations into the natural systems of the earth and their relationship to human activities. Includes examinations of the earth’s energy, water, and nutrient balances and how these balances influence and are influenced by human activities. Examines soils, climates, hydrology, tectonic activity, landforms, vegetation from a global as well as urban perspective. Emphasizes understanding the various natural systems and how they relate to the built environment. FALL.

GEOG 32A Economic Geography (3)
Examines the spatial and environmental aspects of economic activity. Covers the economics of prehistory and continues through the origin of agriculture and cities. Investigates aspects of the global and regional economy including urban systems, agricultural systems, forestry, mineral resources, and ocean resources. Not scheduled to be offered in AY87-88.

Geology

GEOL 322 Geological Science Foundations (2)
Describes the earth’s physical environments in terms of geologic processes. Emphasizes weathering, erosion, deposition, glaciation, tectogenesis, and volcanism. Explores developmental history and possible future of landforms. Designed for nonscience majors. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

GEOL 323 Geological Science Foundations Laboratory (2)
Covers laboratory and fieldwork associated with GEOL322. Prerequisite: GEOL322 or concurrent enrollment. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

GEOL 533 Geological Field Studies: Upper Mississippi Valley (3)
A field study of the physical and historical geology of the Upper Mississippi Valley and drift-free area. Emphasis is on site history and developmental processes. This is a five-day trip with on-campus work preceding and following. Prerequisites: Eight hours of earth science and eight hours of biology or permission of instructor. Offered based upon demand.

GEOL 544 Geological Field Studies: Grand Canyon Area (3)
A six-day field trip with preparatory classwork and laboratories. Focuses on dry-land processes of geochemical alteration of rocks and erosion, and the historical development of the Grand Canyon area. Prerequisites: Eight hours of earth science and eight hours of biology or permission of instructor. Offered based upon demand.

GEOL 585 Soil Ecology (3)
A study of soils in Illinois in relation to their taxonomy, ecology, and land-use planning. Examines characteristics of the great soil groups, associations and series in relation to soil forming processes, and vegatational ecology. Lab and field surveys include identification and mapping of soils in Illinois. Includes a discussion of the management of Illinois soils as a natural resource important in land use decisions. Prerequisite: BIOL322 or equivalent. Offered based upon demand.

GEOL 602 Environmental Education: Earth Science (2)
Field course offered at Camp Sagawau. Emphasizes relationships between land forms and geologic processes. Uses local examples and includes mapping skills. Offered based upon demand.

GEOL 622 Landforms of the Chicago Area (3)
Provides environmentalists an understanding of geological processes which have acted on the Great Lakes region. Emphasizes geologic history and present day landforms of the Chicago area and the Great Lakes region. Includes fundamentals of glaciation, erosion, soil development, and environmental implications of geologic processes. Prerequisite: A course in earth science is recommended but not required. Offered based upon demand.
Health Administration

HLAD 325 Health Care Organization (3)  
Provides an understanding of how health care is organized in the United States and the way it is provided to consumers. FALL, WINTER, SPRING-SUMMER.

HLAD 330 Medical Ethics (3)  
Presents some of the major ethical problems confronting society, the health care system, and the health care administrator. Each student will be encouraged to synthesize a personal professional philosophy to deal with the ethical dilemmas inherent in health services delivery. FALL, WINTER.

HLAD 340 Medical Sociology (3)  
Applies sociological knowledge, concepts, and methodologies to health care processes for the purpose of enhancing the understanding of health administrators on the dynamics of interaction between patients and providers. FALL, WINTER.

HLAD 355 Health Care and Politics (3)  
Study of federal, state, and local legislative, regulatory, and political processes, and their effect on the health care system and its professions. Deals with ways to interact with those processes. FALL, SPRING-SUMMER.

HLAD 430 Ambulatory Care System Management (3)  
Provides technical knowledge to organize, direct, coordinate, plan, and control ambulatory care programs. Focuses on medical group management. Prerequisite: MGMT301. WINTER.

HLAD 445 Mental Health Administration (3)  
Describes the unique environmental and organizational context of mental health and developmental disabilities programs. Discusses problems related to applying traditional management techniques. WINTER.

HLAD 450 Health Planning (3)  
Introduces students to health planning concepts, methods, and data sources useful in developing community and institutional health plans. Prerequisite: HLAD325. SPRING-SUMMER; offered in WINTER based upon demand.

HLAD 455 Management in the Hospital Setting (3)  
Examines the management, environment, and personnel of short-term hospitals. Emphasis is placed upon applying descriptive information to various operational situations and problems encountered by junior or mid-level managers. Prerequisites: HLAD325 and MGMT301. FALL; offered in SPRING-SUMMER based upon demand.

HLAD 460 Health Care Economics (3)  
Applies economic analysis to health and health care services. Examines the concept of health as human capital. Investigates special features of the supply, demand, distribution, and economic impact of health care delivery. Prerequisite: ECON301 or equivalent. SPRING-SUMMER; offered in WINTER based upon demand.

HLAD 465 Health Care: Legal Aspects (3)  
Discusses legal implications and ramifications of conduct in health services administration. Introduces principles of administrative law which form the foundation of decision-making processes in the health services arena. FALL, SPRING-SUMMER.

HLAD 470 Independent Study: . . . (1-8)  
Individual reading, research, and/or project in health administration under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.
248 Health Administration

HLAD 480 Internship: ••• (1-8)
Designed to provide students in health administration with supervised practical experiences in applied settings. **Prerequisite:** Permission. Offered based upon demand.

HLAD 490 Health Administration Practicum (3)
Designed to provide students with terminal experiences integrating classroom learning and the field of practice. Reinforces and reviews competencies gained in health administration and gives students an opportunity to achieve professional growth and administrative skills. **Prerequisites:** Permission of instructor at least three months in advance and completion of all core courses. Offered based upon demand.

HLAD 503 Current Topics in Health Administration: ••• (1-3)
Provides continuing education for hospital administrators. Covers components of management such as budgeting, finance, personnel, planning, task analysis, team building, and the changing work force. Offered based upon demand.

HLAD 506 Institutional Management: Health Administration (3)
Discusses reading and research in the areas of health care, as well as direct investigation of an administrative problem fundamental to hospital/nursing home administration. **Prerequisite:** Instructor at least three months in advance and completion of all core courses. Offered based upon demand.

HLAD 520 Introduction to Long-Term Care (3)
Provides a basic orientation to the long-term care continuum, including both nursing homes and noninstitutional alternatives such as home health agencies and adult day care. Examines the long-term care needs of the elderly and actual and proposed public policy responses to those needs. FALL, SPRING-SUMMER.

HLAD 525 Nursing Home Administration (3)
Examines principles in the management of skilled nursing facilities and related institutions for the chronically ill and disabled elderly. Explores issues in the regulation and reimbursement of nursing homes in Illinois. WINTER, SPRING-SUMMER.

HLAD 648 Health Administration: Marketing for Health Care Services (3)
Deals with market research principles for health care organizations. Covers approaches to strategic planning, implementation, and promotion. FALL, SPRING-SUMMER.

HLAD 801 Health Care Sociology (3)
Overview of the field of medical sociology focusing on the social and behavioral aspects of the personal health system. Covers such topics as sociological perspectives on health and illness, the utilization of health services, the social roles occupied by patients and practitioners, and epidemiology. FALL, WINTER, SPRING-SUMMER.

HLAD 805 Applied Research Methods for Health Administration (3)
Examines the application of research methods to the administrator’s decision-making process. Topics covered include the relevance of research for policy decision-making, common measures and statistics used by health administrators, the application of various research methods to health administration, an introduction to computer statistical software packages, and an introduction to information systems. **Prerequisite:** Statistics or permission of instructor. FALL, WINTER.

HLAD 810 Health Care Organization: Problems and Policies (3)
Deals with current issues in modern health care delivery systems. Addresses issues from both theoretical and pragmatic perspectives. **Prerequisite:** Health administration graduate students and others with instructor’s permission. FALL, WINTER.

HLAD 815 Economics of Health Administration (3)
Application of basic economic tools of analysis to the study and solution of health care delivery problems. **Prerequisite:** Competency in basic economic concepts or permission of instructor. FALL, WINTER; offered in SPRING-SUMMER based upon demand.
HLAD 818 Health Care Policy (3)
Enables the student to describe, analyze, evaluate, and apply basic policy approaches to both American and international health care issues. Presents students with implementation skills for ethically managing power relations in a turbulent health care marketplace. Prerequisite: HLAD801 or HLAD810. FALL, WINTER.

HLAD 820 Health Care Program Evaluation (3)
Study of specific topics in evaluating health care programs. Special attention to the concept of program, analysis of evaluation system models, measurement, causality, advantages and disadvantages of internal and external evaluation, and analysis and critique of published evaluations. Prerequisite: HLAD805 or permission of instructor. WINTER.

HLAD 823 Quality Assurance for Health Care (3)
Examines various medical care quality assessment approaches. Students plan institutional quality assurance programs for hospitals, ambulatory care settings, long-term care facilities, and other health care facilities. Prerequisite: HLAD810 or permission. SPRING-SUMMER.

HLAD 828 Ambulatory Care: Issues and Problems (3)
Examines the changing health care policy framework and the shift towards ambulatory care services. Discusses HMOs and other alternative delivery systems. Prerequisite: HLAD818. FALL.

HLAD 830 Health Administration: Lecture Series (3)
Health practitioners discuss many of the issues and problems of the contemporary American health care delivery system. Major topics include the role of government, value and ethical considerations, the hospital and the consumer, and issues of manpower, financing, and quality of care. Prerequisite: Graduate standing in health administration or permission. Auditors are encouraged and welcome. FALL.

HLAD 835 Health Care: Human Resource Management (3)
Focuses on human resource management, programs, and policies. Addresses recruitment of health professionals, manpower requirements, staffing, training, development, examination of qualifications standards, performance appraisals, and employee morale. Examines methods of developing leadership in supervisory health managers, issues of wage and salary administration, and labor relations issues in health care. Prerequisite: Principles of Management or permission of instructor. FALL, WINTER, SPRING-SUMMER.

HLAD 837 Health Care Law (3)
Focuses on corporate administrative and regulatory law significant for hospital and health services administration. Examines types of corporate structuring, the concepts of holding companies with both for-profit and not-for-profit subsidiaries, and the complexities of multi-institutional corporations. Prerequisites: HLAD810 and degree candidacy. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

HLAD 840 Health Care: Financial Management (3)
Provides an overview of the primary facets of health care financial management. Includes such topics as capital finance, working capital management, intermediate reimbursement theory, financing indigent care, and cost containment. Prerequisites: ACCT402 and degree candidacy. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

HLAD 845 Organizational Theories in Health Administration (3)
Studies organizational and managerial theories relevant and unique to effective administration of health care institutions. Organization is perceived as an open system which requires constant interaction with environment. Prerequisites: Principles of Management and degree candidacy. FALL, WINTER.

HLAD 850 Strategic Planning for Health Administration (3)
Covers the strategic planning process in the competitive health care field, including definition of mission, external analysis, goal development, and generation of alternatives and their selection. Prerequisites: HLAD805, degree candidacy, and completion of 25 or more graduate credit hours. FALL, WINTER; offered in SPRING-SUMMER based upon demand.
HLAD 855 Hospital Management (3)
Focuses on the effective administration of short-term hospitals. Covers the administrator’s role in the application of such areas as: finance, law, quantitative methods, and human resource management. Also covered are administrator/medical staff relations. Case studies are used. Prerequisites: Principles of Management, degree candidacy, and completion of 25 or more graduate credit hours. FALL, WINTER.

HLAD 865 Health Administration Field Experience (5)
Capstone course in health administration. Students apply theories and principles of classroom learning in health care facility. The field experiences provide opportunities for development, integration, and reinforcement of competence. Prerequisites: Permission of instructor at least three months in advance and having successfully passed the comprehensive examinations. Offered based upon demand.

HLAD 870 Independent Study: . . . (1-8)
Individual reading, research, and/or project in health administration under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

HLAD 880 Internship: . . . (1-8)
Period of structured, preceptor-directed experience in the practice of health administration in a setting appropriate to the student’s career goals. The course is taken after completion of all other coursework, but before conferring of the degree. Prerequisites: Permission of instructor at least four months in advance and successful completion of the comprehensive exam. FALL, WINTER, SPRING-SUMMER.

HLAD 890 Graduate Thesis/Project: . . . (1-8)
Provides the student in health administration an opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student’s interests in health administration. Prerequisite: Permission of advisor. Offered based upon demand.

Health Professions Education

HLPE 315 Health Professions Education Instruction (3)
Designed to introduce health professions students to the skills and processes involved in health professions education in both clinical and didactic settings. Develops skills in planning health professions education programs, delivering health professions education programs, and evaluating health professions education programs. Prerequisite: Enrollment in health sciences or nursing majors. Offered based upon demand.

HLPE 620 Current Trends and Issues in Health (3)
Explores current trends and issues in health education. Focuses upon present and projected educational policy issues affecting educational institutions. Examines the effectiveness of health promotion and health occupational training programs. Offered based upon demand.

HLPE 630 Special Issues in Community Health (3)
Emphasizes organizational patterns and functions of voluntary and government health agencies. Details role of the school health team in the analysis of community health programs in the greater Chicago area. SPRING-SUMMER.

HLPE 802 School Health Programs (3)
Presents an overview of the principles, philosophy, and development of school health programs in the U.S. Emphasizes the concepts of “healthful school living” and community participation in school health programs. Focuses on developing a team framework among teachers, health service personnel, parents, and pupils. Prerequisite: Students must be certified teachers enrolled in the health professions education major or have permission of the instructor. WINTER.
HLPE 810 Health Education Program Planning (3)
Exposes the school health education student to current approaches in the development and evaluation of health education curricular designs. Discusses curriculum assessment techniques. Focuses on the philosophical and historical foundations of health education. FALL.

HLPE 815 Assessment of Health Instruction (3)
Examines assessment procedures employed in health education and allied health training programs. Emphasizes the development of valid and reliable instruments to assess health behaviors, attitudes, and skills. Prerequisite: HLPEB 10 or permission of instructor. SPRING-SUMMER.

HLPE 820 Continuing Education in Health (6)
Focuses upon how the rapid pace of new discoveries in health, disease, treatment, and rehabilitation makes continuing education essential for everyone working in health fields. Develops skills in planning, delivering, and evaluating continuing education in health. Emphasis upon developing change agent skills, motivation of others to update their knowledge and skills, involving colleagues in continuing education activities. Prerequisites: Students must meet the qualifications for graduate student status. WINTER.

HLPE 825 Values Clarification Techniques in Health (4)
Utilizing people's attitudes, values, and beliefs in the process of health education. Teaching techniques for involving learners' motivation and values in health education with opportunity to develop and try them out. Class meetings in which students develop and present value clarification applications for review and appraisal. Values clarification is now widely recognized as an essential tool in health education. Prerequisites: Students must meet the qualifications for graduate student status. FALL.

HLPE 860 Practicum in Health Professions Education (4)
Designed to provide health professions education majors with supervised practical experiences in appropriate settings. Students planning to enroll should contact the instructor at least one month in advance of enrolling so that a suitable placement can be arranged. Prerequisite: Permission of instruction. WINTER; offered in other terms based upon demand.

Health Sciences

HLSC 305 Contemporary Health Issues (3)
Identifies and examines major health issues of our time. Designed to counteract apathy, dispel myths, and provide accurate information upon which to make decisions affecting individual and social health. National leaders representing a range of thought and documentary film footage are utilized. FALL, WINTER, SPRING-SUMMER.

HLSC 470 Independent Study: . . . (1-8)
Individual reading, research, and/or project in the health sciences under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

HLSC 480 Internship: . . . (1-8)
Designed to provide students in the health sciences with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

HLSC 50A A Survey of DRGs (1)
Provides basic information regarding the Diagnosis Related Group (DRG) method of payment with emphasis on impact of DRGs on the health care industry. Formal presentations from a diverse group of leaders, practitioners and policymakers, panel discussions, and structured group discussions are used to facilitate an understanding of the problems facing health care professionals as well as the approaches employed by other professionals to offset the impact of DRGs. Offered based upon demand.
HLSC 51A  Dynamics of Health and Illness (3)
Focuses on analysis of problems and issues regarding attainment and maintenance of health and how to take control of one's life during illness. Emphasizes how to negotiate for professional health/illness care for self and family, what to do when catastrophic illness occurs, how to implement health self-care principles and practices, how to survive hospitalization, and how to cope with conflicting values regarding health and illness. Not scheduled to be offered in AY87-88.

HLSC 510  Death and Dying for the Health Care Professional (3)
Examines current attitudes toward death and dying. Explores ways in which the professional helps the patient and family deal with a terminal illness. Offered based upon demand.

HLSC 600  Health Promotion (3)
Explores the factors influencing our current concepts of health and wellness. Examines new developments in maintaining optimal levels of wellness in society. Focuses upon health promotion programs in business and industry designed to reduce health risk. WINTER; offered in FALL based upon demand.

HLSC 610  Nutrition (3)
Provides knowledge necessary for nutrition and diet therapy. Discusses cultural, economic, and social factors of food habits. FALL, WINTER, SPRING-SUMMER.

HLSC 830  Epidemiology (3)
Advanced health concept course covering human ecology of diseases in groups and communities, consumer health sources for dealing with epidemiologic problems, indices of community health and their usefulness to health centers, schools, and community health programs and promotion of healthful living on a group and community basis. Prerequisite: Students must meet the qualification for graduate student status. FALL.

HLSC 870  Independent Study: . . . (1-8)
Individual reading, research, and/or project in the health sciences under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

HLSC 880  Internship: . . . (1-8)
Designed to provide students in the health sciences with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

HLSC 890  Graduate Thesis/Project: . . . (1-8)
Provides the student in the health sciences an opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student's interests in the health sciences. Prerequisite: Permission of advisor. Offered based upon demand.

History

HIST 310  American Economic History (3)
An historical examination of the development of the American economy with special emphasis on the process of modernization and its effect on agriculture, commerce-industry, worker-employer relationships, and the value system of the people. FALL.

HIST 311  U.S. History I (3)
Provides an historical examination of the United States from the founding of the colonies through the Civil War with special emphasis on religion, nation building, economic development and modernization, and the sectional conflict. FALL; offered in other terms based upon demand.

HIST 312  U.S. History II (3)
Provides an historical examination of the United States from the Civil War through World War II with special emphasis on industrialization, immigration, urbanization, reform, and World War I and II. WINTER; offered in SPRING-SUMMER based upon demand.
HIST 470  Independent Study: . . . (1-4)  
Individual reading, research, and/or project in history under the supervision of the faculty.  
Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

HIST 50B  Family History: Genealogical Studies (3)  
Provides an overview of the field of genealogy and family history. Focuses on the historical  
method of conducting original research including principles and procedures related to  
survey, interviewing, and historical research. Not scheduled to be offered in AY87-88.

HIST 501  The History of Illinois and Its Constitution (3)  
A survey of the political, constitutional, and social history of the state of Illinois from 1700  
to the present. Offered based upon demand.

HIST 505  Modern African History (3)  
This course will survey the significant themes in African history since 1800, examining pre­colonial African societies, European mercantilism, colonial political economies, resistance and the rise of African nationalism, and questions concerning liberation and revolution in  
Africa today. Historical texts, novels, films, and guest speakers will be used to promote a  
deeper understanding of the continent, its people, and their struggles. FALL; offered in  
other terms based upon demand.

HIST 51A  Ethnic in the Chicago Region (3)  
Surveys the history of ethnic groups in the Chicago area with attention to both the national  
and local context of ethnic interaction and the impact of ethnicity on the economic, social,  
political, and religious development of the metropolitan area. Not scheduled to be offered  
in AY87-88.

HIST 511  Ancient Greece I (4)  
A study of Greek civilization from the end of the Persian War to the rise of Macedon,  
centering on Athens. Not scheduled to be offered in AY87-88.

HIST 512  Ancient Greece II (4)  
Continuation of HIST 511. Not scheduled to be offered in AY87-88.

HIST 520  American Urban History (3)  
Presents an historical examination of the process of modernization and its effect on the  
American city and people. Emphasizes migration and mobility, family roles, machine  
politics, and various reform movements. Offered in WINTER and SPRING-SUMMER based  
upon demand.

HIST 525  Readings in American History: . . . (3)  
Student selects a topic in American history from a prescribed list, reads a number of  
designated works on that topic, and answers several essay-type final examination ques­ 
tions. Offered in WINTER and SPRING-SUMMER based upon demand.

HIST 53A  Russian History Since 1900 (3)  
Examines the history of Russia in the twentieth century. Major topics include the revolu­ 
tion, the Stalin era, World War II, and the cold war. Focuses in part on contemporary  
social history of the Russian people. Though there are no prerequisites, a basic understand­ 
ing of the chronology of world history in the twentieth century would be helpful. Offered  
based upon demand.

HIST 53B  Modern Islamic History (3)  
Examines Islamic civilization since the age of European expansion, imperialism, wester­ 
nization, nationalism, and modernization; covers Arab countries and Israel, Iran, and  
Turkey. FALL; offered in SPRING-SUMMER based upon demand.

HIST 540  Black Experience in the U.S. (3)  
Surveys black experience from 1500-1941. Emphasizes the various aspects of slavery, the  
Civil War, reconstruction, and the black experience during World War I and World War II  
periods. Offered based upon demand.
HIST 541 Black Women in American History (3)
A socio-historical study of the black woman from slavery to 1970. An examination of the role she has played in the black struggle and her contributions to their survival. Offered in SPRING-SUMMER based upon demand.

HIST 542 Caribbean History (3)
Studies comparative colonial patterns in the Caribbean. Emphasizes the development of slave populations, social systems, and the concept of hierarchy in the Caribbean. Offered in SPRING-SUMMER based upon demand.

HIST 544 History of Civil Rights (3)
Examines the black struggle to secure human and civil rights in the United States. Black protest, court decisions, and legislation after 1953 are emphasized. FALL; offered in other terms based upon demand.

HIST 545 American Negro Slavery (3)
A general survey of the traditional interpretations of black slavery in America and an attempt to assess them in the light of recent studies. FALL; offered in SPRING-SUMMER based upon demand.

HIST 547 Latin American History (3)
Surveys the major periods in Latin American history. Describes and analyzes the major economic, political, social, and cultural structures of pre-Columbian, colonial, and modern Latin America. FALL; offered in SPRING-SUMMER based upon demand.

HIST 550 Women in American History (3)
Examines the history of American women from the colonial period to the present with special emphasis on how and in what ways the status of women has changed. FALL.

HIST 601 Vietnam, a Television History (3)
Provides a background on Vietnam and its people from 1945 to 1975. Analyzes societal and external influences on U.S. foreign policy in relation to the historical and political context of the period. Examines the impact of the war on American society. FALL, WINTER.

HIST 720 Philosophy of History (3)
Deals with patterns in the history of mankind. Explores nature of historical change, value, purpose, and meaning of various historical phases. Not scheduled to be offered in AY87-88.

HIST 780 Local History: Resources and Methods (3)
An examination of basic resources and methods for local and community history. Students will be involved with specific research projects. Offered in SPRING-SUMMER based upon demand.

HIST 830 Graduate Seminar in Historical Studies (3)
Examines the nature of history by reading and evaluating two or more designated works on selected topics in American history. Offered in SPRING-SUMMER based upon demand.

HIST 840 Research in African-American History (3)
Addresses serious research upon significant topics and issues related to the black experience in the United States and Western hemisphere. Offered in WINTER based upon demand.

HIST 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in history under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.
## Instructional and Training Technology

### I&TT 510 Introduction to Instructional and Training Technology (1)
This course enables students to analyze the field of educational technology, human resource development, instructional development, and training. Includes what professionals do, definitions, associations, periodicals, current issues, self-assessment on competencies. The course requires (1) visit to a local instructional and training technology department in business and industry organizations, (2) joining a professional association related to the field, (3) attending local meetings of a professional association related to the field. FALL.

### I&TT 52A Training Topics . . . (1-3)
Offers study in various topics as applied to the training field. Subject matter may include stand-up training techniques, identifying and analyzing performance problems, examining the role of the computer in the training field and television and its use in training. Offered based upon demand.

### I&TT 520 Training Product Design (3)
Students design, produce, and evaluate a half-hour instructional product. Includes goal analysis, learner entry characteristics, behavioral objectives, criterion-referenced tests, instructional strategy, media selection, prototype production, prototype tryout and revision. FALL.

### I&TT 755 Computer Based Training I (3)
Enables student to analyze the components of a system; evaluate different types of computer systems; analyze and compare CAI and CMI; write a CAI lesson and flowchart; includes broad exposure to theories. FALL, WINTER, SPRING-SUMMER.

### I&TT 760 Computer Based Training II (3)
Enables students to evaluate flowcharts; write frame material from CAI lesson and flowchart; perform cost-benefit analysis of a CAI course, write report documenting development, implementation, and evaluation of cost benefits of CAI course. Prerequisite: I&TT755. Offered based upon demand.

### I&TT 810 Training Course Development (3)
Enables students to develop specifications for a complete training course, including all components from I&TT520 plus needs analysis; setting constraints; detailed job/task analysis; concept elaboration; learning hierarchy; enabling objectives; course, unit, and lesson maps; events of instruction; implementation plan including instructor's manual; and course development documentation report. Prerequisite: I&TT520 or equivalent. WINTER.

### I&TT 815 Training Techniques (3)
Enables students to conduct instructor-led training sessions including following predesigned instructor roles and tasks, developing lesson plans, applying appropriate training techniques for individual and group situations and selecting and using media in training presentations. FALL.

### I&TT 820 Principles of Message Design (3)
Applies principles of message design to instructional strategies, media selection, and materials specifications. Emphasizes perception, memory, attitude change, adult learning, and text design. Prerequisites: I&TT510 and I&TT520. WINTER.

### I&TT 825 Research in Instructional and Training Technology (3)
This course will enable students to evaluate the status of instructional and training technology as a field and profession including: current research, organizational, societal, ethical, and value issues raised. It requires attendance at a national ID/Training/HRD related professional society conference. Prerequisite: eighteen credit hours in I&TT. WINTER.
I&TT 830 TV for Training and Instruction (3)
Involves the development and production of a televised unit of instruction specifically for training settings and aimed at solving learning and/or performance problems. Small studio production includes instructional design principles, message design principles, graphics, and special effects. Prerequisites: I&TT 520, MCOM 530, or equivalent. SPRING-SUMMER; offered in WINTER based upon demand.

I&TT 840 Evaluating Human Resource Development Systems (3)
Examines techniques of evaluation of human resource development systems. Includes analysis of philosophy, personnel, management, policies, budget, and facilities. Students will design a human resource development system on the basis of evaluation study. Prerequisites: I&TT 510 and I&TT 520. WINTER even years.

I&TT 843 Managing Human Resource Development Systems (3)
Study of how to produce HRD/training management plan. Includes a philosophy of training and development, an analysis of training needs, training policies, procedures, programs, schedules and structures, and organizational charts. Prerequisites: I&TT 510, I&TT 820, I&TT 840, and I&TT 860. FALL odd years.

I&TT 847 Evaluation/Cost Benefit Analysis in Instructional and Training Technology (3)
Focuses on evaluation of a training product or course. Includes formative and summative evaluation. On basis of evaluation students prepare report, calculate cost benefit, and revise course or product. Prerequisites: I&TT 510 and I&TT 810 or I&TT 840. FALL.

I&TT 852 Solving I&TT Performance Problems (3)
Enables students to identify and analyze problems in I&TT that are performance rather than training based; develop and synthesize data instrumentation, incentives, and motive solutions to performance problems; apply and evaluate performance engineering theory; and write a report explaining the process used and problems and solutions identified. Prerequisites: I&TT 847, and I&TT 840 or I&TT 880. SPRING-SUMMER.

I&TT 856 Consulting Teamwork in I&TT (3)
Student works as a member of an instructional development team to develop and evaluate an ID/training package. Includes working closely with subject matter expert. Prerequisites: I&TT 810 and I&TT 847 or I&TT 840. FALL.

I&TT 858 Project Management in Instructional and Training Technology (3)
Examines role of project management in the organization. Emphasizes defining the project, developing time management network, estimating costs, planning timetables, scheduling resources, writing management plan, and writing project proposal and report. Prerequisites: I&TT 810, I&TT 847, and I&TT 852 or I&TT 840. WINTER.

I&TT 860 Seminar: Instructional and Training Technology in Business (1)
Enables students to analyze how the business and industry environment is affected by the bottomline-profit motive and how instructional and training techniques must be modified and adapted to that context. Analyzes the roles each professional plays in the development of training/HRD programs in a business and industry environment. Prerequisites: At least three I&TT courses. SPRING-SUMMER.

I&TT 865 Advanced Field Project (1)
Provides students in instructional and training technology with opportunities to apply specific career skills/interests in a business/industrial/medical/education setting. Prerequisites: Minimum nine graduate hours in I&TT and permission. Offered based upon demand.

I&TT 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in instructional and training technology under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.
Intercultural Studies 257

I&TT 880 Internship: . . . (1-4)
Designed to provide students in instructional and training technology with supervised practical experiences in applied settings. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

I&TT 891 I&TT Masters Project I (2)
Includes design of a project in a real setting including proposal and appropriate design components. Covers synthesis and application of theory and advanced methods learned in the curriculum. Prerequisites: At least 25 graduate hours in I&TT. FALL, WINTER, SPRING-SUMMER.

I&TT 892 I&TT Masters Project II (2)
Further development of synthesis and application of methods begun in I&TT891. Prerequisite: I&TT891 or concurrent enrollment. FALL, WINTER, SPRING-SUMMER.

Intercultural Studies

ICS 320 Dynamics of the Spanish Language (3)
Study of the Spanish language at both beginning and advanced levels of understanding. Focuses on different approaches and techniques to increase fluency in a second language. Offered in WINTER and SPRING-SUMMER based upon demand.

ICS 470 Independent Study: . . . (1-4)
Individual reading, research, and/or project in intercultural studies under supervision of faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

ICS 480 Internship: . . . (1-4)
Designed to provide students in intercultural studies with supervised practical experiences in applied settings. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

ICS 530 Third World Conference (1-3)†
Weekend conference using workshops and seminars to focus on sociopolitical, humanistic, and historical policy problems and issues of “third world” communities in national, interregional, and international contexts. WINTER, SPRING-SUMMER.

ICS 532 African Politics (3)
Examines the problem of social and political change on the African continent. Evaluates selected paradigms and concepts in terms of the historical scope and range of national and interregional situations. Offered in WINTER based upon demand.

ICS 533 Education and Development in the Third World (3)
Addresses the broad concept of development from the educational perspective. Examines the colonial educational legacy and post-colonial reform efforts to introduce new programs and approaches in education which aim at closing the resource gap between urban and rural sectors. Not scheduled to be offered in AY87-88.

ICS 535 Third World in Perspective: An Interdisciplinary Survey (3)
Uses distinguished guest lecturers to survey the broad range of issues confronting the third world’s struggle to escape from the cycle of poverty. Focuses on the major forces that have contributed to the underdevelopment of this sector of the globe. Evaluates alternative strategies and models for resolving the crisis of third world underdevelopment. Offered in FALL based upon demand.

ICS 540 Hispanic Experience in U.S. (3)†
Examines the historical process that led to Latino migration to the United States. Focuses on the economic, political, social, and cultural conditions which shape the life of the Latino in American society. Offered based upon demand.
ICS 541 Ethnicity, Culture, and Politics (3)
Explores the interrelations between ethnicity, culture, and politics in American political life. Examines these concepts in an effort to understand culture, society, race, ethnicity, and their relationship to politics and society. Offered based upon demand.

ICS 546 Caribbean Cultures (1,2)
A comparative study of the Afro-French, Hispanic, and commonwealth Caribbean. Emphasizes history, art, music, language, and cultures from a Caribbean perspective. Offered in SPRING-SUMMER based upon demand.

ICS 547 Cultural Geography (3)
Includes a discussion of the nature of culture and surveys the main distribution of the populations of the human race and their broad distinguishing characteristics and cultures. Traces the global movement of populations together with the movement of their cultural influences among other peoples and cultures. Offered in WINTER and SPRING-SUMMER based upon demand.

ICS 548 African Civilizations (3)
A study of African people and their various cultural differences. Focuses on correcting misconceptions of Africa and the Africans through readings from a wide selection of publications. Offered based upon demand.

ICS 562 Philosophical Foundations of Third World Societies (3)
Examines philosophical foundations of third world societies. Not scheduled to be offered in AY87-88.

ICS 571 Psychology of Latinos (3)
A study of Latino ways of thinking, feeling, and behaving. Examines problems of intercultural communication involving Latinos and members of other ethnic groups. Not scheduled to be offered in AY87-88.

ICS 572 Problems of Latino Family (3)
A study of the main characteristics of the Latino family and the ways in which these influence the adaptation of Latinos to Anglo society. Not scheduled to be offered in AY87-88.

ICS 575 Church and Politics in Latin America (3)
Examines the role of the Catholic Church in the dynamics of political power in Latin America from an historical as well as sociological perspective. Focuses on the impact of religious beliefs on the movements espousing social justice. Not scheduled to be offered in AY87-88.

ICS 810 Seminar: Comparative Research Methods (3)
Examines the logic of comparative and cross-cultural analysis and a variety of standard research techniques. Applies the comparative method to the data of the different disciplines in the social and behavioral sciences. FALL; offered in SPRING-SUMMER based upon demand.

ICS 820 Comparative Latin American Cultures (3)
Surveys societal as well as regional patterns of social organization and culture that exist today in Latin America. Emphasizes processes of change and cultural contact and isolation. Offered in WINTER based upon demand.

ICS 821 Spanish Language and Culture (3)
Emphasizes development of reading, writing, and oral skills and acquisition of new vocabulary. Provides an introduction to Latin American culture and society. Not scheduled to be offered in AY87-88.

ICS 825 Seminar in Comparative Urbanization (3)
Discussion and analysis of the social, economic, and political problems of urbanization in technically advanced and less advanced societies. Offered in FALL and WINTER based upon demand.
ICS 830 Seminar: Comparative Race Relations (3)
Analysis and comparison of the genesis and consequences of racial conflict and cooperation in the United States and selected industrial societies. Offered in FALL based upon demand.

ICS 840 Modern Olympism (3)
Focuses on the values and symbols associated with Olympism. Traces the history and growth of Olympism as a world concept. Not scheduled to be offered in AY87-88.

ICS 845 Seminar: International Law and Organization (3)
Studies the fundamental rules of international law and organizations in relation to the state, nonpolitical organizations, and individuals. Discusses cases, statutes, and treaties. Offered in WINTER based upon demand.

ICS 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in intercultural studies under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

ICS 880 Internship: . . . (1-4)
Designed to provide students in intercultural studies with supervised practical experiences in applied settings. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

ICS 890 Graduate Thesis/Project: . . . (1-6)
Provides the student in intercultural studies an opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student's interests in intercultural studies. Prerequisite: Permission of advisor. FALL, WINTER, SPRING-SUMMER.

Management

MGMT 301 Principles of Management (3)
Introduces classical management, behavioral, and management science. Reviews the fundamental functions of management emphasizing the interrelationships between planning, organizing, directing, and controlling different models of organizational behavior. Both the impact of organizations upon participants and the impact of participants upon organizations are studied. Examines the management science approach to solving production and operational management problems. FALL, WINTER, SPRING-SUMMER.

MGMT 320 Personnel Management (3)
Designed for first line supervisors and students interested in becoming personnel specialists. Views personnel planning, selection, placement, and follow-up as part of the overall management process. Guest speakers are utilized extensively. The course concludes with the opportunity for the student to practice using personnel tools and basic tests. Prerequisite: MGMT301. FALL, WINTER.

MGMT 340 Production Management (3)
Discusses applications of management science and analysis to the production function. Emphasizes operations management as it relates to product development, plant location and layout, production cost analysis, work measurement, work simplification, safety management, and quality control. Prerequisite: STAT361. FALL, WINTER.

MGMT 342 Job Design and Measurement (3)
Presents the underlying theory and basic methodology for the most commonly used work measurement techniques. A systems approach is developed through the study of methods, materials, tools, and equipment for the purpose of determining the most economical way of doing the job, for standardizing methods, and determining time requirements. Prerequisites: MGMT340 and STAT362. WINTER.
MGMT 401 Organizational Behavior (3)
Analyzes the behavior of people in organizations. Discusses organizational motivation, leadership, group behavior, communication, and decision-making. This is an extension and intensification of the behavioral portion of MGMT301 Principles of Management. Prerequisite: MGMT301. FALL, WINTER, SPRING-SUMMER.

MGMT 410 International Business (3)
Presents an introduction and overview of the economic, social, and political aspects of international/multinational business theory and practice. Provides a foundation for students who wish to acquire greater knowledge and expertise in this rapidly expanding field. Not scheduled to be offered in AY87-88.

MGMT 421 Labor Relations (3)
Introduces the study of management-union relations and the problems that arise for the enterprise in the managing of the union relationship as part of the personnel function. Considers the structure, aims, and objectives of the union institution; the manner in which management deals with unions, management structure, and objectives in collective bargaining; the resolution of management-union disputes; and government regulation of collective bargaining. Prerequisite: MGMT301. FALL, SPRING-SUMMER.

MGMT 422 Behavioral Research in Business (3)
Designed to assist students who have had only a limited background in research and statistics. Emphasizes the language of research and the practical application of research designs to business. Prerequisite: STAT361. Not scheduled to be offered in AY87-88.

MGMT 423 Compensation and Incentive Systems (3)
Deals with a wide range of pay theories together with certain precise methods of building compensation scales. Introduces the pay survey and requires development of an individual project. Considers problems of compensation and fringe benefits in times of high inflation. Prerequisite: MGMT320 or MGMT421. WINTER.

MGMT 424 Selection and Placement of Personnel (3)
Deals with recruiting, selecting, placing, and evaluating personnel. Concentrates on effective matching of people to jobs. Sample job specifications are developed, and closed circuit TV role playing is used. Prerequisite: MGMT320. FALL.

MGMT 425 Labor Markets (3)
Analysis of labor force, labor supply, wages, and unemployment in terms of labor marketing experience and current theories. Appraisal of effects of unions and government policies on the economic position of labor. Prerequisites: ECON301 and ECON302. WINTER.

MGMT 426 Personnel Training and Management Development (3)
Reviews the various internal and external sources and techniques of training the work force. Prerequisite: MGMT320. WINTER.

MGMT 43A Purchasing (3)
Provides a comprehensive approach to the purchasing function and responsibilities for maintaining the four major procurement factors of quality, quantity, time, and price. Emphasizes the scope of authority and responsibility of purchasing in an organization, including objectives, relationships to other departments, procedures, sources of supply, determination of price, make, buy, or lease decisions, value analysis, systems contracting, operations, research, and legal and ethical aspects of procurement. Prerequisite: MKTG301. WINTER.

MGMT 43B Quality Management (3)
Provides an introduction to the economic and management aspects of quality control of products and processes. Statistical concepts and tools related to the design and implementation of acceptance sampling plans and control charts for statistical process control will be discussed. Topics covered include control charts for variables (x- and r-charts), control charts for attributes (p-charts and c-charts), operating characteristic (OC) curves, producer and consumer risks, lot tolerance percent defective, acceptance quality level, quality circles, quality assurance, etc. Prerequisite: STAT361. WINTER.
MGMT 430 Small Business Administration (3)
Focuses on understanding the principles and techniques of management in relation to a small business. Studies fundamental aspects of the managerial process, including planning, organizing, staffing, directing, and controlling. Studies marketing, finance, and computers as they relate to small business. FALL, WINTER.

MGMT 442 Materials and Logistics Management (3)
Focuses on purchasing, operations, and transportation/physical distribution management functions. Prerequisite: MGMT340. FALL.

MGMT 443 Production and Inventory Control Systems (3)
Considers the concepts and methods for planning, scheduling, and controlling manufacturing operations. Includes machine loading, applications for short-run production and continuous production. Studies tooling, equipment, and production of manufactured and processed products. Presents applications of the management science method including forecasting demand, scheduling production, controlling inventories, linear programming, waiting line, simulation, and statistical techniques for controlling production. Prerequisite: MGMT340. WINTER.

MGMT 445 Seminar in Production and Operations Management (3)
Focuses attention on the application of quantitative analysis, systems analysis, and other dynamic techniques to current operations problems. Readings, problems, classroom discussions, and group participation are required of all students. Individualized projects are possible, which will be presented and evaluated in group sessions. Open to seniors only. Prerequisite: MGMT340. WINTER.

MGMT 448 Business and the Public Interest (3)
Explores the role of the corporation in modern society and its responsibilities to the public, government and the economic and social well-being of the nation. SPRING-SUMMER.

MGMT 469 Business Policy (3)
This capstone course of the undergraduate business administration curriculum is designed to integrate the various functional areas of business administration through case discussion that applies management, finance, production, marketing, economics, and accounting principles to solving business problems. Prerequisite: Last course in undergraduate program; open to degree seeking CBPA students only. FALL, WINTER, SPRING-SUMMER.

MGMT 470 Independent Study: ... (3)
Independent study is intended to provide better students the opportunity to study a topic of their choice in management under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within management and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

MGMT 50A People and Organizations I (3)
Explores the structure and purpose of power in organizations and how sociological approaches can give new insights to people and organizations. Examines problem-solving in organizations and how to relate them to reality and everyday use. Offered based upon demand.

MGMT 50B People and Organizations II (3)
Continuation of MGMT50A. Offered based upon demand.

MGMT 501 Foundations of Management (3)
Analyzes human behavior in organizations, the management function and the application of management science to the production process. Introduces the analysis of organization as systems. This course is designed for graduate students who have not taken MGMT301 and MGMT340 or their equivalents. Does not apply as a graduate level course toward the MBA degree. Prerequisite: Graduate student status. FALL, SPRING-SUMMER.
MGMT 51A Administration of Non-Profit Organizations (3)
Stresses the relationship between the principles of business administration management and institutional management. Emphasizes the differences in goal setting and attainment and dependence upon different sources for their funds. Discusses the importance of volunteerism for a broad base of support and validation of need. SPRING-SUMMER.

MGMT 510 Foundations of Managerial Statistics (3)
Provides the graduate student with sufficient statistical background for the graduate major in business administration. Includes descriptive statistics, sampling procedures, interval estimations, significance testing, correlation, regression, and the analysis of variance. The course is fast-paced and intensive. Students desiring a more leisurely introduction to the subject should take Statistics for Management I and II. Prerequisite: MATH325. FALL.

MGMT 511 Statistical Data Processing for Business (3)
Deals with the systematic collection, analysis, and interpretation of business data. Topics include principles of measurement, concept of statistical design of experiments, sampling methods, handling missing data, efficient coding, and analysis using package programs. Approximately 50 per cent of course time will be devoted to computer applications. Prerequisite: STAT361, MGMT510, or permission. FALL.

MGMT 516 Production Problems and Analysis (3)
Production planning, machine operations, and materials for the manufacture of a product. Problems include the analysis of the elements of production scheduling and control, balancing work stations on production lines, and simulating plant layout. Prerequisite: MGMT340 or permission. WINTER.

MGMT 525 Collective Bargaining (3)
The study of collective bargaining is approached through the analysis of two situations: handicraft industry and craft unionism, massive production industry, and industrial unionism. Differences are noted in the distributive, extractive, and service industries and among professional associations. Prerequisite: MGMT320 or permission. WINTER.

MGMT 530 International Management (3)
Study of complexity of the problems of international management. Deals with organization structure, technology, behavioral systems, institutional differences, and future of international management. FALL.

MGMT 601 Stress Management (3)
The course medium is any IBM, Apple, or Commodore computer with disk drive and modem. It examines the internal and external sources of stress on administrators and teachers. It contains self-awareness scales and provides individualized student-instructor interaction. Offered based upon demand.

MGMT 810 Problems in Organizational Behavior (3)
Study of the development of organization theory and critical examination of its value for explaining organizational change and phenomena. Prerequisite: MGMT301 or MGMT501. FALL, WINTER.

MGMT 820 Problems in Personnel Management (3)
Includes exploration of the various theories of personality development and motivation. Examines factors, both internal and external, to the organization and their influence on personnel planning. Deals with current issues and research in the area of personnel management. Prerequisite: MGMT320. SPRING-SUMMER.

MGMT 825 Problems in Industrial Relations (3)
Deals with problems arising from employer-labor relationship. Studies theories of work, problems in organization, manpower management and industrial relations research. Prerequisite: MGMT320 or MGMT810. FALL.

MGMT 840 Problems in Production Management (3)
Includes the study of analytical methods in production and design of production systems. Emphasizes the major economic problems of production management, mathematical programming, statistical analysis, inventory analysis, and certainty models. Prerequisites: MGMT340 or MGMT501; STAT362. FALL, WINTER.
MGMT 845 Small Business Management (3)
Includes techniques applicable to the operation of most small businesses. FALL.

MGMT 849 Business Policy and Strategy (3)
Capstone course of the graduate business administration curriculum designed to integrate the various operating functions of a business. Shows the business as a system and demonstrates those special coordinating skills and knowledge which are necessary at the upper-levels of an organization. Uses case analysis and assigned readings. Prerequisite: Last trimester of student's program; open to degree seeking BPA students only. FALL, WINTER, SPRING-SUMMER.

MGMT 870 Independent Study: . . . (3)
Independent study is intended to provide better students an opportunity to study a topic of their choice in management under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation in management and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

MGMT 890 Master's Thesis (6)
Provides an opportunity for intensive study of a problem chosen by the student. A candidate who is approved for the thesis option will be required to orally defend the thesis. The thesis option is limited to outstanding students who have been recommended by a minimum of two faculty in the College of Business and Public Administration and approved by the dean. Students interested in pursuing the doctorate degree in business should select the thesis option. Prerequisites: Permission; last trimester of MBA student's program of study. Offered based upon demand.

Management Information Systems

MIS 301 Introduction to Management Information Systems (3)
Provides an overview of business data processing and management information systems. Covers introductory concepts of computer technology, nature of computer application in business systems analysis techniques, and problem-solving. Includes introduction to and use of BASIC computer programming in business-related problems. FALL, WINTER, SPRING-SUMMER.

MIS 39A Business Microcomputer Applications (3)
Introduction to the major business applications available for use on microcomputers including hands-on experience with various software packages. Focuses on student use of electronic spreadsheet, word processing, database and graphics programs as well as accessing other computer sources through telecommunications. Prerequisite: MIS301. FALL, WINTER, SPRING-SUMMER.

MIS 410 Software Evaluation (3)
Deals with methodologies and strategies for the review and evaluation of selected applications packages. Emphasizes the procedures to evaluate packages and the related costs and efficiencies in the business context. Prerequisites: CPSC351 and CPSC370. Not scheduled to be offered in AY87-88.

MIS 451 Computer Systems Management (3)
Provides a complete overview of the major issues, topics, and problems confronting the data processing manager. Topics covered include planning and organization, staffing, security control, standards and documentation, working with consultants, and financial and legal considerations. The course attempts to provide a broad understanding of data processing management concepts. Prerequisites: MIS301, CPSC320, or equivalent, and CPSC370. Not scheduled to be offered in AY87-88.
MIS 46A Business Information Retrieval and Database Management (3)
Introduction to the management of the database systems. Management problem-solving will be related to the output of the databases to include: the development of business strategies, competitive analysis, internal analysis of cost, and other selected business subjects. Commercial software will be reviewed for performance and advantage. This course will cut across functional management lines and show a relationship between the external and internal environment and the business firm. Prerequisite: CPSC370. FALL, WINTER.

MIS 46B Business Simulation and Modeling (3)
Introduction to the uses of computers and microcomputers in creating models of business systems and simulations of business system outcomes. Covers the place of management gaming and the development of heuristic models. Introduces use of simulation languages, such as GPSS. Prerequisite: STAT362 and MIS301. FALL, WINTER.

MIS 46C Telecommunications and Distributed Data Systems (3)
Discussion of the fundamental terminology and operations of a data communication network including interactive systems, distributed data processing, word processing, and local area networks. Prerequisites: MIS46A and CPSC370. FALL.

MIS 46D Introduction to Management Sciences (3)
Surveys the fundamentals of quantitative approaches to management decisions including linear programming, forecasting, queuing, and inventory systems. Applications focus on business problems at an elementary level. Prerequisite: STAT362. WINTER.

MIS 51A Introduction to WordStar (1)
Introduces WordStar, a screen-oriented word processing system with integrated printing. Both initial entry of text and alteration of text previously entered are displayed directly on the screen. Most formatting functions take place immediately, resulting in the display printout. Prerequisite: Familiarization with the Apple II Computer. Not scheduled to be offered in AY87-88.

MIS 51B Introduction to Multiplan (1)
An introduction to Multiplan, an electronic worksheet that contains a large grid of entries (255 rows long and 63 columns wide) for words, numbers, and formulas. Prerequisite: Familiarization with the Apple II Computer. Not scheduled to be offered in AY87-88.

MIS 51C Introduction to dBase II (1)
Introduces dBase II, a relational database management system that runs on microcomputers. Demonstrates use for straightforward data recording and retrieval applications, or for highly sophisticated integrated database applications. Prerequisites: Familiarization with the Apple II Computer and review of the June 1984, issue of Popular Computing articles on database software. Not scheduled to be offered in AY87-88.

MIS 512 Management Information Systems (3)
Presents the basic concepts of design, development, and implementation of MIS in organizations. Develops an appreciation of modern computer systems and information processing technology. Studies methods to identify information requirements, factors to be considered in designing reporting systems, information system structures, relationship between information structures and organizational variables. Students develop an information processing perspective of organizations. Prerequisite: MIS301 or CPSC370. FALL.

MIS 515 Forecasting Techniques (3)
Presents modern forecasting methods including horizontal, trend, quadratic, adaptive smoothing, trigonometric and seasonal forecasting models, adaptive control, and Box-Jenkins models. Examines forecast errors and tracking models and uses and abuses of forecasting. Prerequisite: STAT362 or MGMT510. WINTER.

MIS 825 Management Information Systems for Health Administration (3)
Investigates the current status of MIS in health administration. Prepares students for the computer assisted management process of the future. Includes microcomputer applications for administrators, systems analysis and design, and computer selection strategies. Knowledge of basic computer science is desirable. Prerequisites: HLAD805, HLAD810, and degree candidacy. FALL, WINTER.
MIS 830 Problems in Management Information Systems (3)
Studies the application of the computer to managing the information system of organizations. Examines information requirements and systems and use of the information structure as a basis for the most effective use of the computer. Prerequisite: MIS301. WINTER, SPRING-SUMMER.

Marketing

MKTG 301 Principles of Marketing (3)
Introduces the managerial approach to marketing. Includes study of markets, institutions, and the environment in which business and nonbusiness enterprises operate. Emphasizes marketing decision process regarding the marketing mix, marketing program, and selected applications. Prerequisite: ECON301. FALL, WINTER, SPRING-SUMMER.

MKTG 320 Consumer Behavior (3)
Draws on the behavioral sciences to provide insight into consumer needs, wants, and behavior in the marketplace. Emphasizes how the manager in business and nonbusiness organizations can build an understanding of the individual consumer into the marketing decisions of goods and/or services. Provides an overview of the role of consumer research. Prerequisite: MKTG301. FALL, WINTER.

MKTG 430 Marketing Management: Product and Price Strategies (3)
Considers the need to generate and evaluate product and price strategies. Topics typically include market analysis, market segmentation and positioning, market measurement and forecasting, product life-cycles, new product, product line and portfolio decisions, brand and warranty decisions, pricing for seasonal demand shifts, pricing to deter entry of rivals, pricing for segmented markets and for multi-market and multi-product firms, internal pricing, and after-product pricing. Psychological considerations in retail pricing. Lectures are supplemented by problems, cases, and/or a simulation exercise. Prerequisite: MKTG301. FALL, WINTER.

MKTG 431 Retailing Operations and Management (3)
Study of retailing as an integral part of the economic system. Examines retailing from the manufacturer's perspective, considering the retailer as a distribution channel. Focuses on the management of the retail firm based on the substantial body of economic and behavioral theories. Prerequisite: MKTG301. Not scheduled to be offered in AY87-88.

MKTG 433 Retailing Policies (3)
Reviews the retailing decision process and the formulation of retailing policies. Emphasizes the strategic variables in the retailing mix. Considers the role of environmental factors in the development and implementation of retailing policies. Uses cases to apply theory and practice. Prerequisite: MKTG301 or MKTG430. WINTER.

MKTG 435 Retail Location Planning Strategy (3)
Discusses selection of the location of individual stores, location arrangements for multi-unit chains, response to changing business conditions, the planning of shopping centers, and the redevelopment of downtown areas. Emphasizes the study of the trade areas and market potential of retail stores and shopping centers in terms of geography of market centers. Prerequisites: MKTG301 and MKTG430. Not scheduled to be offered in AY87-88.

MKTG 440 Marketing Logistics and Distribution (3)
Deals with the role of distribution in the marketing mix of product, price, and promotion, with emphasis on channel structure and logistical decisions. Topics include exchange and market intermediaries, types of channels and their use, structure of retailing and wholesaling, selectivity and the degree of directness in channel decisions, customer service decisions, inventory management, transportation modes, warehousing decisions, and sales forecasting. Lectures will be supplemented by problems and/or cases. Prerequisites: STAT361 and MKTG301. FALL, WINTER.
MKTG 450 Promotional Strategies (3)
Considers the development and implementation of the various elements of the marketing communications program. Advertising, personal selling, publicity, public relations, and sales promotion are examined as the base for developing effective policies and strategies for communicating with markets. Opportunities are provided to examine the marketing communications problems of nonbusiness as well as business operations. Prerequisite: MKTG301. FALL, WINTER.

MKTG 460 Marketing Research (3)
Studies the research process as an aid to planning and decision-making in marketing management. Topics include the role of research and information systems in defining and planning research needs, obtaining marketing information, and identifying target markets. Attention also given to product and advertising research and market and sales analysis. Prerequisites: MKTG301 and STAT361. WINTER.

MKTG 470 Independent Study: . . . (3)
Independent study is intended to provide better students the opportunity to study a topic of their choice in marketing under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within marketing and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

MKTG 570 Sales Organizations (3)
Concerned with the design, development and analysis of sales organizations, sales department relations, personnel management in the selling field, sales budgets and cost analysis and their impact on the sales organization, and sales territories and quotas. Includes the role of the sales executive in coordinating and controlling the marketing mix. Considers current issues related to sales organizations. Prerequisite: MKTG301. WINTER.

MKTG 572 Industrial Marketing (3)
Examines planning, organizing, and controlling industrial marketing activities. Studies industrial products and services and how they are marketed. Includes classification of industrial products and customers, buying procedures, applications of new product development and planning procedures, sales engineering, marketing research, pricing practices, promotion applications, logistics, after sale service, and other topics. Prerequisite: MKTG301. WINTER.

MKTG 580 Marketing for Nonprofit Organizations (3)
An introduction to marketing concepts and tools and their applications to nonprofit organizations. Compares and contrasts different aspects of nonbusiness and business marketing. Considers the impact of publics and the environment in developing nonbusiness marketing programs. Prerequisite: MKTG301. SPRING-SUMMER.

MKTG 801 Problems in Marketing Management (3)
Reviews the marketing decision process with emphasis on recognition and analysis of marketing problems, generation and evaluation of alternative solutions, and development of plans and strategies for implementing chosen solutions. Provides an overview of current issues and developments in marketing. Prerequisite: MKTG301. FALL, WINTER.

MKTG 805 Buyer Behavior (3)
Review of the literature of buyer behavior with emphasis on central concepts and methods. An advanced treatment of motivations, perceptions, demographics, buyer search for information, models of buyer behavior, consumerism, and public policy is provided. Prerequisite: MKTG430 or MKTG801. Not scheduled to be offered in AY87-88.

MKTG 810 Marketing Information: Methods and Analysis (3)
An advanced treatment of the various methods in which a marketing research problem can be addressed. Develops recognition and appreciation of the environmental factors and their impact on marketing information. Focuses on the creative application and critical evaluation of the procedures of marketing information through the use of case method and research projects. Prerequisite: MKTG460 or MKTG801. SPRING-SUMMER.
Mathematics 267

MKTG 815 Retailing Structure and Policies (3)
Reviews the literature of retailing with emphasis on structure and policies. Offers an advanced treatment of major topics, including the marketing concept, consumer and environmental dynamics, strategic planning, and marketing strategy, organizational structure, personnel management, retail pricing, vendor relationships, store location, design and layout. Prerequisite: MKTC430 or MKTG801. SPRING-SUMMER.

MKTG 820 International Marketing (3)
Examines the role of marketing in economic development. Covers several contemporary issues in international marketing, including the impact of multi-national corporations on the world economy. Discusses different techniques of entering international markets, the basic elements underlying the development of an international marketing mix, and the forms of organization used in international marketing. Prerequisite: MKTG801. FALL.

MKTG 870 Independent Study: . . . (3)
Independent study is intended to provide better students an opportunity to study a topic of their choice in marketing under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within marketing and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

MKTG 890 Graduate Thesis/Project: . . . (3)
Provides an opportunity for intensive study of a problem chosen by the student. A candidate who is approved for the thesis option will be required to orally defend the thesis. The thesis option is limited to outstanding students who have been recommended by a minimum of two faculty in the College of Business and Public Administration and approved by the dean. Students interested in pursuing the doctorate degree in business should select the thesis option. Prerequisites: Permission; last trimester of MBA student’s program of study. Offered based upon demand.

Mathematics

MATH 310 Intermediate Algebra (3)
Covers the real number system, linear and quadratic equations, polynomials, rational expressions, exponents and radicals, graphing functions and relations, systems of equations, exponential and logarithmic functions. Prerequisites: high school algebra and geometry. FALL, WINTER, SPRING-SUMMER.

MATH 320 Mathematical Structures and Concepts I (3)
An introductory content-oriented mathematics course including sets, number systems, integers, rational and irrational numbers, and some algebraic structures. Prerequisite: MATH310. FALL, WINTER, SPRING-SUMMER.

MATH 322 Mathematical Structures and Concepts II (3)
Continuation of MATH320. Topics include: ratios and proportions, percentages, polygons and polyhedra, angles, transformation geometry, tessellations, measurement, probability, and statistics. Prerequisite: MATH320. Offered based upon demand.

MATH 325 College Algebra (3)
Review of algebra including: factoring and operations with polynomials; exponents and radicals; first and second degree equations and inequalities; absolute value; rational, exponential, logarithmic, inverse functions, and graphs. Designed to prepare students for statistics and/or applied calculus courses. Prerequisite: MATH310 or equivalent. FALL, WINTER, SPRING-SUMMER.
MATH 330  Geometry (3)
Covers topics in geometry selected from modern elementary geometry, including transformations, Euclidean constructions, introduction to projective and non-Euclidean geometries and geometric aspects of plane trigonometry. Prerequisites: High school geometry, MATH320 and MATH325. WINTER, odd years; offered in other terms based upon demand.

MATH 340  Discrete Mathematics (3)
An introduction to mathematical induction, sets, relations, functions, Venn diagrams, truth tables, propositional calculus, combinatorics, graphs, directed graphs, Boolean algebra, lattices, difference equations, recursion, discrete probability, random numbers, queues, algorithms, and representations of algorithms. Prerequisite: MATH320 or MATH325. FALL, WINTER, SPRING-SUMMER.

MATH 355  Applied Calculus (3)
A survey course for business students and others needing only one course in calculus. Covers basic concepts, methods, and applications of differential and integral calculus. The entering student should have a solid command of algebraic and graphical methods. Theory is presented and illustrated with examples drawn from business, economics, and natural systems. The course provides a foundation for more advanced courses in calculus, economics, science, and operations research. Prerequisite: MATH320 or equivalent. FALL, WINTER, SPRING-SUMMER.

MATH 36A  Theory of the Calculus of One Variable (3)
Second course in calculus, emphasizing the theoretical foundations of the differential and integral calculus of a single independent variable. Topics include graphs and functions; limits, continuity, and the derivative; techniques of differentiation; applications of derivatives and antiderivatives; the integral and its applications; natural logarithm and exponential functions; hyperbolic and circular trigonometric functions; conic sections and polar coordinates; techniques of integration; L'Hospital's rule; Taylor series; introduction to ordinary differential equations. Prerequisite: MATH355. WINTER; offered in other terms based upon demand.

MATH 36B  Multivariable Calculus (3)
Third course in calculus, with emphasis on the differential and integral calculus of several independent variables. Topics include vectors; vector-valued functions; curves and surfaces; functions of several variables; partial differentiation; multiple integration; vector analysis; introduction to differential forms; Taylor series for several variables; introduction to partial differential equations. Prerequisite: MATH36A. SPRING-SUMMER; offered in other terms based upon demand.

MATH 440  Linear Algebra (3)
An introduction to linear algebra and matrices. Topics include systems of equations, determinants, vector spaces, subspaces, linear independence and bases, linear transformations and matrices, rank, nullity, diagonalization, quadratic forms. Includes discussion of applications of matrices in economics, linear programming, graph theory, game theory, statistics, and/or numerical analysis. Prerequisite: MATH355 or equivalent. WINTER, even years; offered in other terms based upon demand.

MATH 450  Principles of Operations Research (3)
Introduction to the principles and methods of operations research. Draws upon calculus, statistics, and probability as prerequisites. Topics include the systems approach, linear programming, queuing theory, inventory theory, decision analysis, PERT/CPM, integer programming, and simulation. Prerequisites: MATH340, MATH355, and STAT521. WINTER; offered in other terms based upon demand.
MATH 455  Differential Equations (3)
A basic course in differential equations covering existence, uniqueness, homogeneous equations, first order and some higher order equations, linear constant coefficient equations, and simultaneous equations. Introduction to numerical analysis concepts and available computer packages for numerical solutions. Prerequisite: MATH 355; MATH 440 is recommended. FALL, odd years; offered in other terms based upon demand.

MATH 470  Independent Study: . . . (1-4)
Individual reading, research, and/or project in mathematics under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

MATH 500  Mathematics, Applications and Methods (3)
Examines some of the important concepts in science and mathematics as they are applied to technology. Emphasizes algebra, trigonometry, and geometry and the application of these concepts. Prerequisite: MATH 325 or equivalent. Offered based upon demand.

MATH 610  Treatment of Experimental Data (3)
Covers types of measurement, choice of suitable instruments, resolution and accuracy of instruments, estimation of precision and accuracy of measurements, systematic and random errors, scientific notation, operations with significant figures, distribution of random errors, standard error, identification of doubtful measurements, correlation and propagation of random errors, error analysis, factor analysis, representation of data by tables, graphs, and equations, identifying the form of equation, method of least squares, graphical and numerical interpolation, differentiation, and integration. Designed for chemistry majors. Prerequisites: MATH 355 and STAT 520 or equivalent. MATH 440 is recommended. FALL, odd years; offered other terms based upon demand.

MATH 870  Graduate Research: . . . (1-4)
Individual reading, research, and/or project in mathematics under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

Media Communications

MCOM 420  Media and Society (3)
Surveys the development and influence of the mass media including print, broadcasting, and film. Examines psychological, social, cultural, political, and economic impact of media. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

MCOM 440  Television Production (4)
Presents fundamental production techniques in color studio. Students design, write, and produce basic formats increasing in complexity; crew all positions including camera, lighting, audio, video switcher, and demonstrate creative ability. FALL, SPRING-SUMMER.

MCOM 450  Writing for Print Media (3)
Presents basic skills relevant to working for weekly or daily newspapers, magazines, house organs, and public relations channels. Emphasizes conventional journalistic style and structure and includes editing, copy editing, and writing of captions and headlines. WINTER.

MCOM 455  Writing for Radio and Television (3)
Exercises and script writing for radio and television. SPRING-SUMMER; offered in WINTER based upon demand.

MCOM 470  Independent Study: . . . (1-4)
Individual reading, research, and/or project in media communications under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.
MCOM 480 Internship: . . . (1-4)
Designed to provide students in media communications with supervised practical experiences in applied settings, both on and off campus. Students may work in specialized areas in Governors State University's Instructional Communications Center under supervision of ICC staff. May be repeated. Prerequisites: Prior production courses in area of work and permission. Offered based upon demand.

MCOM 505 Media Symposium: . . . (1)†
A workshop exploring selected issues in depth. Faculty of the media program are joined by media professionals, social critics, community leaders, and public officials as well as other university faculty. FALL; offered in WINTER based upon demand.

MCOM 510 Theory and History of a Free Press (3)
Examines theories of a free press and evolution of the First Amendment. Considers contemporary notions of mass media freedoms, limits and responsibilities, and relevance of Milton, Mill, Jefferson, and other free press thinkers to current media problems. Also considers media ethics. WINTER, odd years; offered in other terms based upon demand.

MCOM 535 Television: Remote Color Techniques (3)
Considers nonstudio production using portable video equipment. Provides practical experience in both remote shooting and editing. Prerequisite: MCOM440 or permission. FALL; offered in SPRING-SUMMER based upon demand.

MCOM 539 Advanced Color Television Production (4)
Emphasizes sophisticated uses of production skills in color facility. Particular attention is devoted to lighting, audio, and beginning post production. Prerequisite: MCOM440 or permission. WINTER.

MCOM 540 Film Seminar: . . . (3)
Presents selected topics in film aesthetics, history, and genre analyses. May be repeated for credit under different topics. FALL; offered in other terms based upon demand.

MCOM 542 Film and TV Documentary (3)
Examines style and influence of key documentary filmmakers. Identifies film techniques used to document events. Analyzes issues in documentary filmmaking. Describes effects documentary film has on perception of events and issues. WINTER.

MCOM 544 Video Editing Techniques (3)
Provides students with in-depth experiences in mechanical and electronic video editing. Covers the aesthetic and technical aspects of editing with specific emphasis on the demonstration of skills in different forms of editing such as assemble editing, insert editing, match frame editing, editing without decks, and computer editing. Editing machines used include 3/4", 1/2", VHS, and 1" formats. Offered based upon demand.

MCOM 550 Newswriting and Reporting (3)
Emphasizes interviewing and research skills. Covers speeches and meetings, single and multi-source articles. FALL.
MCOM 555 Broadcast Journalism (3)
Principles and practices for the broadcast journalist. Translates theory into practical experience by covering stories for radio and television. Laboratory experiences, including Electronic News Gathering (ENG), are an essential part of the course. Prerequisite: Prior media or journalism course. SPRING-SUMMER; offered in FALL based upon demand.

MCOM 560 Women in the Media (3)
Examines historical and contemporary role of women communicators—reporters, publishers, editors, broadcasters, filmmakers. Analyzes image of women as expressed in American media, both general and women's media, from 17th century to present. SPRING-SUMMER, odd years.

MCOM 565 Broadcasting in America (3)
Examines the development, structure, content, context, and influences of the broadcast media. WINTER.

MCOM 567 Children and Television (3)
Explores children's television programming and its impact. Evaluates such programming in terms of its production quality, social values, and educational entertainment values. Identifies resources of children's television viewing in relation to development of the child. FALL.

MCOM 570 Media Workshop: . . . (1-4)†
Specific media technologies, skills and issues are considered in a series of workshops using outside resources. Workshops may be repeated for different subjects. Prerequisites: Will vary depending upon specificity of particular workshop. Offered based upon demand.

MCOM 575 Creative Dramatics (4)
Explores techniques and skills of guiding people through improvisational experiences and theatre games. Encompasses material both conceptually and experientially. Students participate in a number of different class activities. Offered in SPRING-SUMMER based upon demand.

MCOM 580 Chicago Media Laboratory (2)
Uses the Chicago media environment for on-site seminars and observation of production processes at various television, radio, film, and print media outlets. Students develop their own case study and participate in a class planned seminar. Offered in FALL and WINTER based upon demand.

MCOM 590 Media Team Field Project (4)†
Advanced production students apply and are selected for a media team. The team develops an interrelated set of media projects around a specific environment. A week or more is spent on location at additional cost to the student. Final projects are then presented for public exhibition and display. Prerequisite: Permission. SPRING-SUMMER.

MCOM 601 Creative Dramatics Workshop (1-3) (2)
Enterprises the creative dramatics process to classroom teachers for use in many subject areas. Includes explanation, demonstration, and discussion of theatre games, exercises, and other techniques that will help provide sensory experiences for children and contribute to a more humanistic approach to education. Prerequisite: Graduate standing or permission of instructor. FALL, WINTER, SPRING-SUMMER.

MCOM 610 Media Communications Law (3)
Identifies, details, and evaluates various contemporary issues in media law from the perspective of the communicator. Includes free speech principles, First Amendment issues, libel, broadcast regulation, right of privacy, copyright, fair trial/free press. FALL.

MCOM 631 Writing for Film/Video (3)
Advanced script writing class for students who understand terminology, production fundamentals, and creating visual sequences for film. Prerequisite: Writing class in film and television or experience in script writing for film or television. WINTER.
MCOM 651 Investigative and Specialized Reporting (3)
Analyzes and applies investigative reporting approaches and techniques, emphasizing inter­viewing and scientific research methods. Covers several beats including education, science, business, crime, politics, and urban affairs. Prerequisite: Prior journalism coursework or experience. SPRING-SUMMER.

MCOM 660 Non-Broadcast Media Operations (3)
Provides students with experience in non-broadcast TV in corporate operations, including services provided by departments in businesses, industries, educational institutions, medical facilities, and government departments (including the military). Emphasizes the uses of non-broadcast TV for instruction, information, promotion, public relations training, employee orientations, production controls, and corporate communication. Incorporates several field trips and guest speakers to address issues. Offered based upon demand.

MCOM 702 Workshop: Instructional Television (1)
Regards television as a communication medium and educational tool. Practical projects center around the design and development of instructional programs for classroom use and utilization of various television and media equipment. Offered based upon demand.

MCOM 730 Television Directing (4)
Studio-oriented course on the techniques of television directing. Focuses on television aesthetics and unique aspects of medium. Prerequisites: MCOM 440, MCOM 539, or permission. FALL.

MCOM 740 Trends in Communications Technologies (3)
Examines the emerging communications technologies, including communications satellites; video distribution systems, including cable, instructional television fixed service, low-power television; pay television; videotex and teletext; video cassettes and discs; editing systems and other increasingly miniaturized and computerized camera and tape equipment. Focuses on the utilization of the technology and, in the case of programming as we have known it, the content available or planned and the quality of production. Offered based upon demand.

MCOM 750 Feature and Review Writing (3)
Advanced writing for students interested in staff or free-lance careers in professional journalism. Lab work may be published and emphasizes the inter-relationship of style and content. Covers profiles, color stories, and reviews of various arts and media. Prerequisite: Prior journalism coursework or experience or permission. WINTER.

MCOM 755 Telecommunication Management (3)
Focuses on qualitative and quantitative methodologies and designs appropriate for media research, including content analysis, survey research, experimental design, institutional analysis, and market research. Prerequisite: COMS 5420 or equivalent. Offered based upon demand.

MCOM 760 Mass Media and Politics (3)
Investigates the use and impact of mass media, particularly the electronic broadcast media upon the political process. Considers both the role and function of media through specific case studies with particular attention given to current political campaigns. Offered based upon demand.

MCOM 765 Topics in Popular Culture (2)
Examines the nature of popular culture through major topics or themes including movies, music, sports, and politics. Examines how popular culture fosters political and social change. SPRING-SUMMER even years.

MCOM 803 Contemporary Issues: . . . (3)
A graduate seminar exploring a selected issue in media, communication, or popular culture. May be repeated for credit. FALL, WINTER, SPRING-SUMMER.
MCOM 830 Graduate Seminar in Media Communications (3)
Examines classic literature in mass communications as way of understanding origins and theoretical bases of the discipline, and as way of assessing its current status. Considers the teaching of communications at various levels. FALL.

MCOM 845 Graduate Media Research (3)
Examines management of broadcasting, cablecasting, and corporate media. Focuses on management functions in various sized markets, including personnel, programming, community relations, and promotion. Also considers emerging challenges to managers, such as impact of new technologies and changing laws and regulations. FALL.

MCOM 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in media communications under supervision of faculty. Prerequisite: Permission. Offered based upon demand.

MCOM 880 Internship: . . . (1-4)
Designed to provide students in media communications with supervised practical experiences in applied settings, both on and off-campus. Students may work in specialized areas in Governors State University’s Instructional Communication Center. May be repeated. Prerequisites: Permission and experience in medium of work. Offered based upon demand.

MCOM 890 Graduate Thesis/Project: . . . (1-6)
Provides the student in media communications an opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student’s interests in media communications. Prerequisite: Permission of advisor. Offered based upon demand.

Medical Technology

MEDT 310 Introduction to Clinical Laboratory Science (1)
This course is an introduction to the profession of clinical laboratory science. Topics include history of medical technology, role definition, ethics, safety, accreditation, licensure, and certification. Prerequisite: Enrollment in medical technology. FALL.

MEDT 320 Practicum I (3)
One of a series of practicums in clinical laboratory science. Includes quality assurance, instrument maintenance, performance of basic diagnostic tests, problem-solving, and test interpretation. Prerequisites: Enrollment in medical technology and evidence of health insurance coverage. FALL.

MEDT 321 Hematology I (1)
Emphasizes the function and morphological characteristics of the various cellular elements of the blood. Also covers components of the complete blood count, hematopoiesis, morphology, function, cytochemistry of the cellular components of blood tissue, and benign pathologic conditions. Prerequisite: Enrollment in medical technology. FALL.

MEDT 322 Clinical Chemistry I (3)
This course provides an overview of fundamental principles of clinical chemistry techniques, mathematics, and instrumentation. Selected disease states are presented along with pertinent clinical laboratory data. Quality control procedures are explained. Prerequisite: Enrollment in medical technology. WINTER.

MEDT 323 Clinical Microbiology I (2)
Emphasizes the characteristics of and diseases caused by the following organisms: gram positive cocci, gram negative cocci, gram positive bacilli, negative bacilli, acid fast bacilli, spirochetes, rickettsia, and chlamydia. Also covers the collection and handling of specimens and antibiotic susceptibility testing. Prerequisite: Enrollment in medical technology. FALL.
MEDT 330 Practicum II (3)
One of a series of practicums in clinical laboratory science procedure. Includes quality assurance, instrument maintenance, performance of basic diagnostic tests, problem-solving, and test interpretation. Prerequisites: Enrollment in medical technology and evidence of health insurance coverage. WINTER.

MEDT 331 Renal Physiology and Body Fluid Analyses (1)
Urinary tract structure, function, and pathology are presented and correlated with urine laboratory findings. Introduces urine pregnancy testing, analyses of several body fluids, and the principles of their testing. Prerequisite: MEDT321. WINTER.

MEDT 340 Immunology (2)
Introduces the basic concepts and terminology of immunity. Includes immune responses, antigenicity, antibody structure, antibody reactions, mechanisms of cellular immunity, and hypersensitivity reactions. Prerequisites: College biology and college chemistry. WINTER.

MEDT 350 Practicum III (3)
One of a series of practicums in clinical laboratory science procedure. Includes quality assurance, instrument maintenance, performance of basic diagnostic tests, problem-solving, and test interpretation. Prerequisites: MEDT330 and evidence of health insurance coverage. SPRING-SUMMER.

MEDT 351 Blood Bank I (1)
An introduction to immunohematology, the blood group systems, donor procurement, and compatibility testing. Study of the immunohematological concepts and their application to the appropriate selection of blood or blood components for patient administration. Prerequisite: MEDT340. SPRING-SUMMER.

MEDT 353 Phlebotomy Techniques I (1+)
Focuses on methods for obtaining blood specimens skillfully and properly in various health area environments and emphasizes appropriate professional behavior while performing this task. Also covers blood specimen quality and associated prelaboratory and laboratory variables. Prerequisites: Enrollment in medical technology and evidence of health insurance coverage. SPRING-SUMMER.

MEDT 410 Hematology II (2)
A continued study of the cellular elements of blood with an emphasis on the hematologic disorders of erythrocytes, leukocytes, thrombocytes, and their precursors. The anemias and leukemias are emphasized with case studies to correlate laboratory results with pathophysiology. Prerequisite: MEDT321. WINTER.

MEDT 420 Practicum IV (4)
One of a series of practicums in clinical laboratory science procedure. Includes quality assurance, instrument maintenance, performance of diagnostic tests, problem-solving, and test interpretation. Provides supervised clinical laboratory experience in a health care setting. Prerequisites: MEDT330 and evidence of health insurance coverage. FALL.

MEDT 421 Hemostasis (1)
Presents the theoretical concepts of hemostasis and coagulation testing. Inherited and acquired disorders are discussed as well as the principles of anticoagulant therapy. Prerequisite: MEDT321. SPRING-SUMMER.

MEDT 423 Clinical Microbiology II (2)
Emphasis is on theoretical principles of the methods used for the isolation and identification of anaerobic bacteria and fungi. The disease patterns produced by the anaerobes and fungi groups are studied. Course also covers parasitology, serology, and virology with emphasis on the correlation of the human immune response with laboratory procedures. Prerequisite: MEDT323. WINTER.
MEDT 430 Practicum V (4)
One of a series of practicums in clinical laboratory science procedure. Includes quality assurance, instrument maintenance, performance of diagnostic tests, problem-solving, and interpretation. Provides supervised clinical laboratory experience in a health care setting. Prerequisites: MEDT420 and evidence of health insurance coverage. WINTER.

MEDT 432 Blood Bank II (2)
The immunohematological concepts covered in Blood Bank I will be applied to problems in compatibility testing, antibody identification, hemolytic disease of the newborn, and prenatal testing. Prerequisite: MEDT351. FALL.

MEDT 433 Clinical Chemistry II (2)
Explores advanced topics in clinical chemistry. Prerequisite: MEDT351. FALL.

MEDT 435 Topics in Clinical Laboratory Science Education (2)
Students will have the opportunity to develop skills in teaching didactic and clinical areas. Skills in cognitive, psychomotor, and affective evaluation will be explored. Prerequisite: Enrollment in medical technology or permission. SPRING-SUMMER.

MEDT 440 Practicum VI: Special Project (2)
This course is the last in a series of practicums which cover the skills and theory of clinical laboratory science. Students will design, participate in, and evaluate a laboratory practicum project individually tailored to each student's career interests. Prerequisites: MEDT430 and evidence of health insurance coverage. SPRING-SUMMER.

MEDT 441 Phlebotomy Techniques II (1)†
Involves practice of the basic techniques learned in Phlebotomy I and expands upon them to assess difficult venipuncture situations. Emphasizes the use of standard and specialized phlebotomy equipment and the drawing of special procedures. Prerequisites: MEDT 353 and evidence of health insurance coverage. WINTER.

MEDT 450 Professional Issues in Clinical Laboratory Science (1)
Students will discuss and develop strategies to deal with interpersonal conflicts and explore leadership styles. Certification, employment trends, and other professional issues will be reviewed. An overview of research methods will be given. Prerequisite: Enrollment in medical technology. FALL.

MEDT 465 Laboratory Management (2)
Addresses important areas within the scope of today's clinical laboratory manager. Prerequisite: MEDT 430 or permission. WINTER.

MEDT 466 Certification Review (1)†
The course is a series of review classes designed to prepare the student for certification examinations in the field of clinical laboratory science. Course also may be used as method for updating knowledge of current clinical laboratory practice. Prerequisite: Enrollment in medical technology or permission. SPRING-SUMMER.

Music

MUS 303 Survey of Music History (3) [20]
Designed to give students a basic grasp of the historical periods of music and to provide understanding of the types, forms, and styles of music literature. The history of music is approached in a quasi-chronological framework beginning with the common practice period, working through Baroque, classical, romantic and 20th century periods. Medieval and Renaissance periods are studied selectively. Offered based upon demand.

MUS 305 Music Theory for Non-Music Majors (3)
Covers basic theory that provides for practical application in order to improve music performance and listening skills. Course activities include lecture/discussion, writing of scale, intervals, key signature, triads, chords, and the playing, singing, and harmonization of simple melodies at the keyboard. For non-music majors. FALL.
MUS 310 Materials of Music I: Keyboard (1)
Designed to facilitate improvisation and aural skills through the piano keyboard. For music students with limited background in piano. Not scheduled to be offered in AY87-88.

MUS 311 Piano Proficiency I (2)
Designed to acquaint music education students and others with the keyboard skills necessary for classroom teaching. Emphasis will be placed on functional piano skills, sight reading, harmonization, and transposition. Prerequisite: Permission of instructor. FALL.

MUS 312 Piano Proficiency II (2)
Continuation of MUS311. Prerequisite: Permission of instructor. WINTER.

MUS 315 18th and 19th Century Music (3)
Presents a survey of style and form of classical and romantic composers of the 18th and 19th centuries. FALL.

MUS 320 20th Century Music (3)
Studies music during the early history of the 20th century. Includes post-romanticism, impressionism and nationalism. WINTER.

MUS 330 Harmonic Techniques (3)
Studies advanced harmony including polychords, nontertial sonorities, bimodulity, parallelism, cluster (sound mass technique), and other common 20th century harmonic techniques. FALL.

MUS 335 Contrapuntal Techniques (3)
Exploration of the polyphonic conception of atonality and twelve-tone technique by way of counterpoint. Prerequisite: Permission. WINTER.

MUS 380 Brass Methods (2)
Designed to give students both theoretical and "hands on" experiences with brass instruments. Includes methods and materials for instruction and pedagogical approaches for heterogenous and homogeneous instrumental classes. Prerequisites: Music major and permission of instructor. WINTER odd years.

MUS 382 Woodwind Methods (2)
Studies techniques to teach woodwind instruments, including embouchre, posture, materials and group organization. Students will be required to play each of the instruments studied. Covers ranges, transpositions and specific problems of teaching/learning each instrument. WINTER odd years.

MUS 384 String Methods (2)
Provides both theoretical and "hands on" experiences with string instruments. Emphasizes methods and materials for instruction and pedagogical approaches for heterogenous and homogeneous instrumental classes. Prerequisites: Music major and permission of instructor. WINTER odd years.

MUS 386 Percussion Methods (2)
Provides theoretical and "hands on" experiences with the four major types of percussion instruments (keyboard, tuned, untuned, and auxiliary). Reviews percussion performance literature, method books, mallets, and "grip" approaches. WINTER, odd years.

MUS 410 Afro-American Music (3)
A survey of various modes of musical expression characterizing the black man's contributions to American culture. Covers west African sounds (1619-1800), jazz, spiritual, gospel, and contemporary soul. FALL; offered in other terms based upon demand.

MUS 415 Orchestration (3)
Examines ranges and specific problems in scoring for each family of instruments, woodwinds, brass, percussion, and strings. SPRING-SUMMER.
MUS 440 Instrumental Methods and Conducting (4)
Investigates baton technique and score reading from instrumental music. Phrasing, meter, and diagnosis are investigated. WINTER.

MUS 445 Choral Arranging (3)
Covers principles of writing for voices. All facets of vocal writing are covered, including the techniques of writing piano and instrumental accompaniments for the voices. Proper manuscript preparation for vocal arrangements is included. SPRING-SUMMER.

MUS 45A Instrumental Arranging (3)
Provides students with techniques and skills of arranging for various instrumental combinations. Focuses on the concert band, jazz ensemble, and manuscript preparation. WINTER.

MUS 467 Music Methods for Elementary Teachers (3)
Covers the role of the elementary classroom teacher in the development of the elementary general music program. Includes demonstration and practice of methods and study of materials used in this process. Prerequisite: Open only to music students. FALL.

MUS 470 Independent Study: . . . (1-4)
Individual reading, research, and/or project in music under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

MUS 480 Internship: . . . (1-4)
Designed to provide students in music with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

MUS 501 Topics in Music: . . . (3)
A series of presentations workshops utilizing outside resources. Considers developments, skills, new creative approaches, and issues in music. May be repeated for different subjects. Prerequisites: Specific prerequisites will vary depending on particular workshop. Offered based upon demand.

MUS 518 Choral Methods and Conducting (4)
Designed for students who may be directing either a church or high school choir. Covers vocal techniques, choral literature, rehearsal techniques, and error detection. WINTER.

MUS 52A Instrument Repair (2+)
Covers basic and general introduction to instrument repair, including the understanding of instrument maintenance. Not scheduled to be offered in AY87-88.

MUS 525 History of Jazz (3)
Traces the developments of jazz from its earliest antecedents through Dixieland, the blues, swing, bebop, cool, to the present avant-garde development. Attention given to both the major forms and specific jazz innovations. Offered based upon demand.

MUS 540 Applied Music: . . . (1)
Private instruction is provided on one instrument or in voice for one hour per week. Prerequisites: Permission, music students only. FALL, WINTER, SPRING-SUMMER.

MUS 541 Applied Music: Percussion (1)
Private music study is provided in this area for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 543 Applied Music: Voice (1)
Private music study is provided in voice for one hour per week. Prerequisites: Permission, music students only. FALL, WINTER, SPRING-SUMMER.

MUS 544 Applied Music: Strings: . . . (1)
Private music study is provided on these instruments for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 544A Applied Music: Violin (1)
Private music study is provided on the violin for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.
MUS 544B Applied Music: Viola (1)
Private music study is provided on the viola for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 544C Applied Music: Cello (1)
Private music study is provided on the cello for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 544D Applied Music: Bass (1)
Private music study is provided on this instrument for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 544E Applied Music: Guitar (1)
Private music study is provided on the guitar for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 545A Applied Music: Piano (1)
Private music study is provided on the piano for one hour per week. Prerequisites: Permission, music students only. FALL, WINTER, SPRING-SUMMER.

MUS 545B Applied Music: Organ (1)
Private music study is provided on the organ for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 546 Applied Music: Brass: . . . (1)
Private music study is provided on the trumpet for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 546A Applied Music: Trumpet (1)
Private music study is provided on the trumpet for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 546B Applied Music: Trombone (1)
Private music study is provided on the trombone for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 546C Applied Music: Tuba (1)
Private music study is provided on the tuba for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 546D Applied Music: Baritone (1)
Private music study is provided on the baritone for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 546E Applied Music: French Horn (1)
Private music study is provided on the French horn for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 548 Applied Music: Woodwinds: . . . (1)
Private music study is provided on these instruments for one hour per week. Prerequisites: Permission, music students only. FALL, WINTER, SPRING-SUMMER.

MUS 548A Applied Music: Clarinet (1)
Private music study is provided on the clarinet for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 548B Applied Music: Bassoon (1)
Private music study is provided on the bassoon for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 548C Applied Music: Flute (1)
Private music study is provided on the flute for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.
MUS 548D Applied Music: Oboe (1)
Private music study is provided on the oboe for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 548E Applied Music: Saxophone (1)
Private music study is provided on the saxophone for one hour per week. Prerequisites: Permission, music students only. Offered based upon demand.

MUS 552 Chamber Music Ensemble (1)
Provides performance experience for students interested in small ensemble literature. May lead to participation in public concerts and/or recitals. Prerequisite: Permission. Offered based upon demand.

MUS 556 Symphonic Band (1)
The GSU Symphonic Band consists of individuals from both the university and surrounding communities. The band provides an opportunity for students to become familiar with the problems and techniques involved in the performing of symphonic band literature. The band performs at least once each trimester of the school year. Prerequisite: Participants must audition. FALL, WINTER, SPRING-SUMMER.

MUS 558 Jazz Ensemble (1)
A large instrumental organization engaging in the performance of traditional and contemporary jazz and/or rock music. Participation will be determined by audition. Prerequisite: Permission. FALL, WINTER.

MUS 560 University Singers (1)
An advanced vocal ensemble of twelve to eighteen vocal music majors and other talented music students that performs during the trimester. Prerequisites: By audition and invitation only. FALL, WINTER.

MUS 562 University-Community Chorale (1)
The GSU chorale meets from September to April and is a choral organization devoted to performing major choral works. Prerequisite: Permission. FALL, WINTER.

MUS 571 Electronic Music: ••• (3)
Study of the techniques of 20th century orchestral composition and electronic media. Each student is required to create compositions in music concrete, electroacoustic, classical studio, and synthesizer studio styles. May be repeated for up to six credit hours. Prerequisite: Permission. FALL, WINTER.

MUS 575 Composition (3)
Students compose in 20th century styles. A practicum for advanced students in music. Prerequisites: MUS571 and permission. WINTER.

MUS 579 Studio Recording Techniques (3)
Provides students with the applied techniques of the recording studio from both the technical and performance aspects of studio recording. SPRING-SUMMER.

MUS 581 Vocal Pedagogy (3)
Study of vocal mechanics as they apply to breath control, intonation, and resonance. SPRING-SUMMER.
MUS 582 Vocal Literature (3)
Examines the development of the art song by 19th and 20th century composers of the United States, England, Germany, France, Russia, and South America. Prerequisite: One year of lower-division studies in applied voice. FALL, even years.

MUS 804 Black Composers (3)
Familiarizes the student with the lives and works of black musicians in areas other than popular music. Not scheduled to be offered in AY87-88.

MUS 808 Twentieth Century Harmony (3)
Studies in advanced harmony including polychords, nontertial sonorities, bimodality, parallelism, cluster (sound mass technique), and other common 20th Century harmonic techniques. WINTER.

MUS 809 Form and Analysis (3)
Examines the origin and meaning of form, motif, phrase and the period along with two-and three-part forms and the large binary and ternary forms: rondo and sonata, concerto, variations, and the suite. FALL.

MUS 810 New Frontiers in Music (3)
Explores the history of music from 1917-1945. Includes neoclassicism, expressionism, surrealism, and the twelve-tone school. Emphasizes the cities of Paris, Berlin, and Vienna. FALL.

MUS 811 Contemporary Composers (3)
Examines the history of music since 1945. Includes experimentalism, electronic music, musique concrete, the Cologne School, America during the 1950s, and current trends in music composition. WINTER.

MUS 824 Advanced Conducting (3)
Emphasizes baton technique and score reading of major instrumental and choral compositions. Phrasing, meter, and style are closely investigated. Designed for the advanced graduate music student. Offered based upon demand.

MUS 830 Research Techniques in Music (3)
Includes research methods in music, learning theories, statistical procedures, curriculum development, educational objectives, and media in education. WINTER.

MUS 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in music under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

MUS 890 Graduate Thesis/Project: . . . (1-6)
Provides the student in music an opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student's interests in music. Prerequisite: Permission of advisor. Offered based upon demand.

Nursing

NURS 304 Nursing: Concepts and Processes (3)
Designed to provide students with knowledge of the professional issues and trends in nursing, the legal aspects of nursing, the nursing process, and certain nursing theories. The nursing process is the scientific method used to develop a client care plan. This course constitutes the theoretical foundation for subsequent nursing courses. It also begins the resocialization process for reentry into nursing education. Prerequisite: Fulfillment of requirements for admission to the nursing major or classification as a conditional degree-seeking or special nondegree-seeking student. FALL, WINTER.

NURS 306 Gerontological Nursing: Health Promotion for Older Adults (3)
This course focuses on theories, concepts, and practices of primary and tertiary prevention among aging adults living in community settings. Physiological and psychosocial changes of aging as well as chronic illnesses that affect people in later maturity are explored. The nursing process with the aging adult is emphasized and resources that assist the elderly in health care are examined. Prerequisite: Admission to the nursing program. FALL, WINTER.
NURS 311 Nursing: The Collaborative Role (3)
Focuses on collaboration among health care professionals in the delivery of health care and its impact on professional nursing practice. Further examines the role of the professional nurse functioning in the health care delivery system in a changing society. Explores the emerging role of the nurse from an historical perspective. Prerequisite: NURS304. FALL, WINTER.

NURS 320 Nursing: Teaching of Clients/Families (3)
Designed to develop the knowledge and skills of the teaching/learning process in nursing as applied to various client-centered health problems. Objectives are prepared for teaching and evaluating client learning. Prerequisite: NURS304. FALL, WINTER.

NURS 330 Nursing: Health Assessment (5)
Designed to develop skill in the physical, social, and psychological assessment of clients. Provides both theoretical and technical background in examination and diagnosis. Faculty supervised on-campus laboratory practice is done weekly using models and students in the course as subjects. Off-campus clinical component allows students, under faculty supervision, to validate learned skills on well clients in selected health care settings. Prerequisites: BIOL444, BIOL445, BIOL446, BIOL447, NURS311, NURS320, and permission of instructor. FALL, WINTER, SPRING-SUMMER.

NURS 400 Nursing Research: Analysis and Utilization (3)
This course provides an introduction to the methods, development, accomplishments, needs, and trends of nursing research. Emphasis is placed on developing the student's ability to analyze and apply the products of nursing research. Prerequisites: STAT468 and NURS304. FALL, WINTER.

NURS 410 Nursing: Principles of Management of Client/Patient Care (3)
A study of contemporary theories and principles of management as used in professional nursing practice. Analyzes a variety of leadership/management styles in relation to the needs of organized nursing care systems. Studies techniques of personnel management in relation to their effects on client/patient care and discusses group process. Prerequisite: NURS330. FALL, WINTER.

NURS 420 Nursing: Care in Distributive Settings (7)
This senior level course focuses on the family, the community, public health, and nursing service directed to meet the needs of each of these entities. Faculty supervised clinical experiences are conducted through local community health nursing agencies and other community health settings. Concepts of adaptation, change, communication role, and others are emphasized within a systems framework. Prerequisites: NURS330, NURS410, or concurrent enrollment and permission of instructor. FALL, WINTER.

NURS 430 Nursing: Care in Episodic Settings (7)
Emphasis on the development of the nurse's role and function in episodic settings where patients of all ages are experiencing life-threatening illnesses. Theories of stress, psychosocial support systems, communication, and role development constitute the foundation for clinical practice. Prerequisites: NURS330, NURS410, or concurrent enrollment and permission of instructor. WINTER, SPRING-SUMMER.

NURS 440 Nursing: Senior Seminar and Practicum (4)
Students engage in terminal integrating experiences. Emphasis is on the use of a variety of learning experiences for initiating and implementing change in nursing practice and client care in an episodic or distributive setting. Students develop and present a project demonstrating integration and proficiency in all nursing program areas. Research findings are used. Prerequisites: All major nursing courses, STAT468, and permission of instructor. FALL, WINTER, SPRING-SUMMER.

NURS 470 Independent Study: . . . (1-8)
Individual reading, research, and/or project in nursing under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.
NURS 480 Internship: . . . (1-8)
Designed to provide students in nursing with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

NURS 710 Nursing: Theories and Models (3)
Systematic examination of theories and concepts common to all nursing practice. Analysis of the general systems approach as a basis for developing a theoretical framework for nursing practice. Prerequisite: Admission to the graduate nursing major. FALL, WINTER.

NURS 720 Theoretical Foundations of Role Preparation in Nursing (3)
Contrasts the expanded professional role as educator, administrator, clinician, or consultant in the delivery of nursing care. Studies the application of concepts and principles of role theory. Prerequisite: Admission to the graduate nursing major. FALL, WINTER.

NURS 730 Nursing Research (3)
Integration of research methodology, nursing theory, and statistics to formulate nursing research problems. Emphasizes measuring variables, studying designs, and tools for data collection and evaluating hypotheses. Students critique published research reports and prepare an original proposal for a research project. Prerequisites: NURS710 and NURS720. FALL, WINTER, SPRING-SUMMER.

NURS 740 Concepts for Advanced Nursing Practice (3)
Studies the pathophysiological and psychosocial nursing concepts for the purpose of formulating a conceptual framework for advanced nursing practice. Emphasis is placed on the development of a conceptual framework using nursing modalities. Prerequisites: NURS710 and NURS720. WINTER, SPRING-SUMMER.

NURS 800 Seminar and Practicum in Advanced Clinical Nursing (4)
Application of nursing models using theories, concepts, and research for interventions in caring for clients/patients, families, and groups with health/illness problems. Prerequisites: NURS730, NURS740, and permission of instructor. FALL, SPRING-SUMMER.

NURS 820 Clinical Specialist in Restorative Nursing (3)
In-depth study of restorative nursing with emphasis on family nursing theory, health/illness problems requiring restorative nursing intervention/therapy, clinical teaching strategies, and the clinical specialist as an entrepreneur. Students refine their clinical practice models in preparation for testing in a practicum. Prerequisite: NURS800. FALL.

NURS 827 Oncology Nursing (3)
A broad conceptual foundation for advanced clinical nursing practice in oncology which includes pathophysiology, medical treatments, nursing theories, nutritional support, management of emergencies, pain control, ethical considerations, psychosocial support, coordination of resources for dying patients and their families, and caretaker burn-out. Prerequisites: Admission to the graduate program in nursing. Students already holding a master’s degree in nursing may be admitted to the course as students-at-large after obtaining permission of instructor. SPRING-SUMMER.

NURS 830 Curriculum and Instruction in Nursing (3)
Provides preparation for teaching nursing in a variety of institutional settings. Includes topics on the nature of higher education, nursing education, and faculty roles. Explores curriculum designs, the instructional process, evaluation, and issues in nursing education. Prerequisite: NURS800. FALL.

NURS 835 Nursing Administration (3)
Explores the history and trends in nursing administration. Emphasizes theoretical approaches to the process of nursing administration. Analyzes elements of administration within the organizational framework of nursing services utilizing the decision-making process and the concepts of human behavior. Prerequisite: NURS800. FALL.
NURS 845 Seminar and Practicum in Restorative Nursing (4)
Focuses on implementation of the clinical practice model of restorative nursing as a clinical specialist. Investigates the applicability of the model to effective advanced nursing practice. Concurrent seminars focus on functions unique to the clinical nursing specialist. Prerequisites: NURS820 and permission of instructor. WINTER.

NURS 850 Seminar and Practicum in Teaching Nursing (4)
Involves students experimenting with various teaching/learning theories and strategies in selected nursing education settings. Focuses on implementation of the role of teacher and its application to nursing education systems. Concurrent seminars focus on functions unique to the nurse educator. Prerequisites: NURS830 and permission of instructor. WINTER.

NURS 855 Seminar and Practicum in Nursing Administration (4)
Focuses on the implementation of the role of nursing administrator in selected health care agencies. Concurrent seminars focus on functions unique to nursing administrative roles. Prerequisites: NURS835 and permission of instructor. WINTER.

NURS 870 Independent Study:... (1-8)
Individual reading, research, and/or project in nursing under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

NURS 880 Internship: ... (1-8)
Designed to provide students in nursing with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

NURS 890 Graduate Thesis/Project: ... (1-8)
Provides the student in nursing the opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student's interests in nursing. Prerequisite: Permission of advisor. FALL, WINTER, SPRING-SUMMER.

Office Administration

OFAD 320 Records Administration (3)
Deals with records creation, use, maintenance, and destruction; records storage facilities; classification of records; development of file patterns, forms and reports control; protection of vital records. FALL.

OFAD 410 Human Relations of the Office (3)
Deals with the development of the creative and productive potential of employees. Emphasizes those within the office environment. WINTER.

OFAD 42A Microcomputer Uses in the Office (3)
Emphasis is placed on applications of various software for word processing, database development, and for other office service functions. Also includes electronic spreadsheets, programming applications, and the relationships between the use of the various types of software. Prerequisite: MIS301. WINTER, SPRING-SUMMER.

OFAD 430 Office Organization and Management (3)
Deals with applying the principles of management organization to office administrative cases, planning the office environment, and defining the systems and subsystems of the office. FALL.

OFAD 51A Office Systems Technology (3)
Provides in-depth study of the human design factors in the selection and use of office technology. Considers the kinds and functions of electronic equipment used in various combinations to form electronic support systems, and the guidelines for developing and implementing such systems. Prerequisites: MIS301 and OFAD430 or equivalent; or permission of instructor. FALL.
OFAD 52A Managing Automated Office Systems (3)
Applies principles of management and organization to automated (electronic) offices. Addresses the effects of integrated office systems on the organizational structure, basic office functions, employees, and physical environment of the office. Prerequisites: MIS301 and OFAD430 or equivalent; or permission of instructor. WINTER.

OFAD 53A Electronic Records Management (3)
Applies principles of records management to automated systems. Studies the technologies involved in the electronic records systems, and the integration of various technology into automated records systems. Identifies elements revealed in feasibility studies to determine the appropriate needs of designing automated systems. Prerequisites: MIS301, MIS39A and OFAD320 or equivalent; or permission of instructor. SPRING-SUMMER.

Philosophy

PHIL 301 Studies in Philosophy (3)
Explores basic judgments on the nature of man, society, government, and the universe with a view toward clarifying the issues that lie at the core of controversy. WINTER.

PHIL 311 Studies in Religion (3)
A review of various approaches to religion: philosophical, theological, sociological, psychological. Discussion of the differing forms of religion, theories on their origins, and comparative views of the major world religions. Offered in FALL and SPRING-SUMMER based upon demand.

PHIL 371 Theory of Knowledge (3)
Designed specifically to assist students in achieving knowledge related to the philosophical and scientific view of knowledge. Organized into two distinct parts: Part I, the nature of knowledge, considers the various philosophical interpretations of knowledge and the process of knowing; Part II, evolution, is devoted to a study of the history of evolutionary thought as an example of the development of scientific knowledge. Offered in WINTER based upon demand.

PHIL 386 Logic (3)
A study of the basic structure and principles of valid deduction and warranted induction and application of such knowledge in the analysis and assessment of public issues found in the mass media. FALL, WINTER, SPRING-SUMMER.

PHIL 470 Independent Study: . . . (1-4)
Individual reading, research, and/or project in philosophy under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

PHIL 501 Age of Enlightenment I (3)
Explores the culture of the eighteenth-century Age of Reason at its height through the close study of a number of major texts and of certain leading figures. The “texts” consist not only of works of literature, philosophy, and history, but also of paintings and musical compositions. Offered in FALL and WINTER based upon demand.

PHIL 502 Age of Enlightenment II (3)
Continuation of PHIL501. Offered in FALL and WINTER based upon demand.

PHIL 524 Chinese Thought (3)
A study of the major Chinese thinkers and their writings. Offered in FALL and SPRING-SUMMER based upon demand.
PHIL 533 Aesthetics (3)
Analyzes the concepts of meaning, communication, and truth in art. Deals with the identification and definition of a work of art, the criteria or judgment of excellence, the nature of the aesthetic experience, and the place of art in human experience. Offered in FALL and SPRING-SUMMER based upon demand.

PHIL 542 Ethics (3)
An in-depth examination of the controversial moral dilemmas perplexing modern Americans. Eight scholarly writers explore the dilemmas surrounding such issues as crime and punishment, political and business ethics, and individual behavior. SPRING-SUMMER; offered in other terms based upon demand.

Photography

PHOT 30A Photographic Communication (2)
An introductory level course utilizing the photographic image as a means of individual expression. Open to any student who has a camera with manual aperture, shutter, and focus adjustments. No darkroom work is involved; students use the medium of color transparencies to solve particular visual problems and explore the potentials of the photographic image. An overview of the various applications of photography in contemporary society is presented. Offered based upon demand.

PHOT 30B Darkroom Workshop (2)
Designed for students who have taken PHOT30A and wish to continue advanced study of photography. Introduces the student to black and white film processing, printing, and print presentation through a series of assignments based on camera skills acquired in PHOT30A. Both PHOT30A and PHOT30B are required before advanced courses may be taken. Prerequisite: PHOT30A or permission. Offered based upon demand.

PHOT 30C Intermediate Photography (3)
Intended for students who have had at least one college-level black and white photography course. Designed to expand technical skills and involve students in more advanced aesthetic problem-solving. Prerequisites: PHOT300 or equivalent. Offered in WINTER based upon demand.

PHOT 300 Photography (3)
Introductory level course in the art and science of photography. Covers black and white film processing and printing, camera operation, exposure, and print presentation. Presents an overview of historically significant photographs and photographers. Students must have access to a fully adjustable camera. FALL, WINTER.

PHOT 305 Advanced Photographic Techniques (3)
Studies in practical sensitometry as utilized in the zone system. Includes chemical formulas, view camera techniques, and archival presentation. Prerequisite: PHOT300 or equivalent. FALL.

PHOT 410 Photographic Theory (3)
Presents the theoretical basis of modern photographic technology. Investigates the physical and chemical foundations of the photographic process including the nature of light, human vision, optics and image formation, light sensitive materials, sensitometry, photographic chemistry and processing, and the reproduction of color. Prerequisite: PHOT305 or permission. WINTER.

PHOT 440 Studio Photography (3)
Study of the use of artificial light sources, view camera techniques, and object placement as it relates to a controlled studio environment for both commercial and noncommercial applications. Course is a prerequisite for specialized commercial workshops. Prerequisites: PHOT305 and 530 or 531 or equivalent. WINTER.
PHOT 443 Portraiture (3)
Studies in the photographic replication of the human likeness in commercial portraiture, advertising, documentary, and fine art. Course is a prerequisite for specialized commercial workshops in advanced portraiture and fashion. Prerequisites: PHOT300 and either 530 or 531 or equivalent. WINTER.

PHOT 450 Location Photography (3)
Applied studies in photographing in various out-of-studio situations. Covers camera selection, lighting, use of electronic flash, filtration, and other technical considerations of use to photojournalists, public relations, architectural, and industrial photographers. Prerequisite: PHOT305 or equivalent. SPRING-SUMMER odd years.

PHOT 470 Independent Study: . . . (1-4)
Individual reading, research, and/or project in photography under the supervision of the faculty. Prerequisite: Permission. Offered based upon demand.

PHOT 480 Internship: . . . (1-4)
Designed to provide students in photography with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

PHOT 495 Photographic Portfolio (3)
Concentrates on thematic evolution. Involves students in historical research and the production of a limited edition aesthetic portfolio using any photographic process. Graduate level portfolio is expected to have a more sophisticated theme and complete control of print quality. Prerequisite: At least fifteen hours of advanced photography. FALL.

PHOT 500 History of Photography (3)
Surveys significant events, movements, and practitioners in the history of photography from 1830 to the present. Discusses technical and aesthetic issues. FALL.

PHOT 530 Color Photography: Positive Processes (3)
Detailed investigation of several color photographic methodologies including transparency processing, Cibachrome, and Polaroid. Emphasizes both technical and aesthetic development. Prerequisite: PHOT300 or equivalent. SPRING-SUMMER.

PHOT 531 Color Photography: Negative Processes (3)
Detailed investigation of several negative color photographic methodologies. Includes Kodak process C-41, and color printing by tray, tube, model-11 processor, and the Ektaprint system. Attention to both technical and aesthetic development. Prerequisite: PHOT300 or equivalent. FALL.

PHOT 535 Non-Silver Photographic Processes (3)
Aesthetic exploration of several experimental photographic processes. Includes cyanotypes, Van Dyke brown printing, gum bichromate and their related methodologies. Prerequisite: PHOT300 or equivalent. SPRING-SUMMER.

PHOT 541 Photo-Graphics (3)
Introduces various graphic applications of photography. Areas covered may include high contrast films, photographic registration systems, halftone reproduction, posterization, tone-line and bas relief printing, and color proofing using 3M color key or Kwik Print materials. Prerequisite: PHOT300 or permission. WINTER.

PHOT 555 Documentary Photography (3)
Exploration of one of photography's mainstream traditions, the photographic document. Students will work as groups or individually to produce a photographic document of a subject of their choice. Prerequisite: PHOT300 or equivalent. SPRING-SUMMER even years.

PHOT 560 Photographic Equivalence Studies (3)
Investigates the sophisticated concept in vision of Alfred Stieglitz and Minor White. Emphasizes the emotional equivalent of the photograph, rather than the subject matter portrayed. Explores emotional equivalents including the photographic studies of time/space relationships advocated by Wynn Bullock. Prerequisite: Permission. WINTER even years.
PHOT 570 Photography Workshop: . . . (1-3)
Specific aesthetic, technical, and/or commercial applications are considered in a series of organized workshops utilizing outside or on-campus resources. Photography workshops may be repeated for different subjects. Prerequisites: Vary depending upon specific workshop topic. Offered based upon demand.

PHOT 760 Photographic Criticism (3)
Advanced studies in the critical analysis of photography and photographic exhibitions. Includes a survey of historical and contemporary critical thought. Prerequisites: PHOT305 and PHOT500 or permission. WINTER.

PHOT 780 Internship: Curatorial Studies (1)
Provides students with experience in gallery management and maintenance and the organization and production of exhibitions. Prerequisites: History of art or photography courses; permission. Offered based upon demand.

PHOT 830 Graduate Photography (3)
Provides opportunity for advanced work to students involved in long-term or specialized projects. Students are expected to work with the instructor through class sessions and individual critiques in meeting the graduate photography competence. Individual student proposals will determine the nature of the work to be undertaken. Course may be repeated with instructor’s permission. Prerequisite: Permission. WINTER.

PHOT 895 Photographic Portfolio (3)
Concentrates on thematic evolution. Involves students in historical research and the production of a limited edition aesthetic portfolio using any photographic process. Graduate level portfolio is expected to have a more sophisticated theme and complete control of print quality. Prerequisite: At least 15 hours of advanced photography. FALL.

Physics

PHYS 302 Physical Science Foundations (3)
Covers major principles and concepts in physical science that govern the universe and help the nonscience major gain experience with scientific processes and problem-solving. Topics include measurement, forces, motion, work and energy, heat, electricity, and nuclear physics. SPRING-SUMMER; offered in other terms based upon demand.

PHYS 352 Intermediate Physics I (3)
Topics include kinematics, forces, energy, rotational motion, fluid properties, thermodynamics, and wave properties. Prerequisite: MATH325. FALL.

PHYS 353 Intermediate Physics I Laboratory (1)
Deals with planning and conducting measurements, forces, motion, pressure, heat, surface tension, and waves. Prerequisite: Concurrent enrollment in PHYS352. FALL.

PHYS 362 Intermediate Physics II (3)
The areas of physics covered in this course include electricity, magnetism, light, and optics. Prerequisite: PHYS352. WINTER.

PHYS 363 Intermediate Physics II Laboratory (1)
Laboratory investigation is necessary to give the student experience in obtaining answers by making first-hand observations and appropriate measurements. The investigation may involve finding the value of a physical quantity, or it may involve the search for a relationship between two or more variables' quantities. Prerequisite: PHYS362 or concurrent enrollment. WINTER.
PHYS 402 Medical Physics (4)
Provides students in the health sciences with a background in physics that is general in scope and emphasizes applications which will be important in their professional work. Includes a knowledge of light microscopes, centrifuges, electron microscopes, radiation detection systems, and the physical laws relating to chemical, biochemical, and physiological applications. Prerequisite: MATH325 or permission. Offered in WINTER based upon demand.

PHYS 500 Survey of the Night Sky (1)
Introduces methods of locating major constellations, bright stars, and planets as well as determining distances to planets, stars, and galaxies. Offered based upon demand.

PHYS 501 Astronomy in the Classroom (1)
This survey workshop on astronomy includes the major physical components of the universe including planets, stars, constellations, and galaxies. Discusses and demonstrates methods for including astronomy in the science curriculum. Identifies sources for obtaining free and inexpensive astronomy materials. Offered based upon demand.

PHYS 502 Introduction to Archaeoastronomy (1)
Introduces concepts related to lunar and solar eclipses, appearance of the night sky at varying latitudes from the North Pole to the equator, apparent uses of Stonehenge, and ancient astronomies of North America and Central America. Offered based upon demand.

PHYS 504 Planets and Moons (1)
Focuses on man's early concepts about the solar system and why planets orbit the sun. Comets and meteorites are included for information they give about early history of the solar system. Also explores latest results of space probes to the planets as well as the discovery of the outer solar system. Offered based upon demand.

PHYS 506 Stars and Nebulas (1)
Covers the laws of nature that govern the behavior and properties of stars and the universe. Includes how stars are born, live, and die. Offered based upon demand.

PHYS 508 Galaxies and Quasars (1)
Focuses on the historical and current theories about the origin and structure of the universe. Examines properties of galaxies and quasars. Offered based upon demand.

PHYS 51B Inner Solar System: The Terrestrial Planets (1)
This course will focus on the inner solar system, the planets Mercury, Venus, Earth, Mars, and their natural satellites. Results from the space probes to the planets will be presented. Methods for determining the diameter, mass, density, and chemical composition of each planet as well as the chemical composition of the planet's atmosphere will be illustrated. There will also be a study of the structure of the magnetic field of each planet. Offered based upon demand.

PHYS 51C The Outer Solar System: The Jovian Planets (1)
This course will focus on the outer solar system, the planets Jupiter, Saturn, Uranus, Neptune, and their natural satellites. Results from the space probes to the planets will be presented. Methods for determining the temperature, diameter, mass, density, and chemical composition of each planet as well as the chemical composition of the planet's atmosphere will be illustrated. There will also be a study of the structure of the magnetic field of each planet. Offered based upon demand.

PHYS 510 Black Holes, Quasars, and the Universe (1)
Covers the deaths of stars, from white dwarfs and neutron stars to black holes. Also included will be a study of the violent explosions that rock the central regions of many galaxies as well as the relationship of exploding galaxies to quasars. Offered based upon demand.
PHYS 512 Intelligent Life in the Universe (1)
Explores questions such as: What is meant by life? Does life exist on other planets? Do we have planetary neighbors? Who will be the first to make contact? What will their interest in us be? Offered based upon demand.

PHYS 514 Telescopes and Observatories (1)
Introduces concepts related to optics and operation of reflecting and refracting telescopes. Students learn how to determine the resolving power and light gathering ability of a telescope. Offered based upon demand.

PHYS 516 Halley's Comet (1)
A study of the early ideas about comets, origin and behavior of comets, and Halley's comet. Offered based upon demand.

PHYS 525 Energy, Resources, and Society (3)
Covers various methods of energy production and the environmental effects of each. Discusses the extraction and utilization of the world's major mineral resources and effects of their use. Examines the effect of various energy sources upon our environment, U.S. standards of living and energy and resource utilization. Designed for nonscience majors. Offered based upon demand.

Political Science

POLS 301 Principles of Political Science (3)
Comprehensive analysis of the nature of politics, contemporary approaches to the study of political science, issues in political geography, and a review of the issues and problems faced by federal, state, and local governments under the impact of modern conditions. FALL, WINTER, SPRING-SUMMER.

POLS 302 American National Government (3)
Examines U.S. government institutions, the informal pressures which influence them and the policies produced by the governing process. FALL, WINTER, SPRING-SUMMER.

POLS 305 Contemporary Political Thought (3)
Provides an overview of nineteenth and twentieth century political thought including socialism, nationalism, fascism, libertarianism, and feminism. Not scheduled to be offered in AY87-88.

POLS 310 International Organizations (3)
Deals with the complexities of international affairs and those factors that affect them. Focuses on the role of governmental and nongovernmental organizational mechanisms in the relations of nations. Not scheduled to be offered in AY87-88.

POLS 311 International Relations (3)
Integrated analysis of processes and issues in international politics, with emphasis on substantive topics in selected sections of the world. WINTER; offered in SPRING-SUMMER based upon demand.

POLS 320 Local Governmental Systems (3)
Examines local government in the United States. Emphasizes the legal basis and functioning of local jurisdictions in Illinois. FALL.

POLS 440 Constitutional Law: Civil Liberties (3)
Uses U.S. Supreme Court decisions to examine the fundamental civil liberties guaranteed to the American people. Emphasizes how the court accommodates constitutional doctrines to changing public values. Prerequisite: CIU3340 or POLS302. WINTER.
POLS 460 Political Theory (3)
Introduces the fundamental questions of politics and the state as developed by selected political philosophers from the Greeks through the present. Emphasizes concepts of democracy, power, individual freedom, the state, and obligations of citizens and rulers with relevance to current political developments. SPRING-SUMMER.

POLS 470 Independent Study: . . . (1-4)
Individual reading, research, and/or project in political science under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

POLS 480 Internship: . . . (1-4)
Designed to provide students in political science with supervised practical experiences in applied settings. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

POLS 50A Topics in Political Science (1-3)
Involves political and social scientists presenting typically in a lecture or workshop situation on a limited topic of current interest. Course will present several aspects of the topic using a variety of methodologies from the discipline of political science. Provides the occasion for students to come into personal contact with noted scholars and practitioners. Offered based upon demand.

POLS 520 U.S. and Illinois Elections (3)
Studies elections in Chicago, the suburbs, the state, and the nation. Examines current trends and includes participation of past or present elected officials. WINTER.

POLS 53A The Chicago Political Tradition (1)
Examines past and current politics in the city of Chicago. Analyzes thoroughly twentieth century Chicago mayors. Offered based upon demand.

POLS 531 Readings, Black Politics, and the American Political System (3)
A study of the patterns of black politics in the development of Afro-American participation in the American political and economic systems. SPRING-SUMMER.

POLS 538 Urban Politics (3)
Analyzes critical issues of urbanization confronting American political institutions. Provides an overview of the nature and scope of the urban polity and provides a conceptual framework for analyzing and evaluating the critical issues in American urban areas. Offered based upon demand.

POLS 542 Seminar in Social Change and Public Policy (3)
Uses tools of public policy analysis to focus on how public policy promotes or impedes social change in contemporary American society. Assesses the impact of public policies on such problems as poverty, inequality, unemployment, race relations, crime, health, housing, environmental pollution, and urban congestion. Offered in FALL and SPRING-SUMMER based upon demand.

POLS 545 American Foreign Policy (3)
Addresses post-World War II trends in American foreign policy. Deals with the east-west dichotomy, the third world, and nonalignment. Emphasizes the structural constraints of U.S. foreign policy in the 1980s and the role of ethnicity in the decision-making apparatus. SPRING-SUMMER.

POLS 550 Law and Social Justice (3)
An analysis of the social conditions as well as the social function of the law as an institution. Emphasis is given to the economic and political factors that affect legislative processes and the impact of the law upon society and its problems. Offered in WINTER and SPRING-SUMMER based upon demand.
POLS 563 Seminar: Comparative Urban Future (3)
Analyzes problems of urban processes and redevelopment as they relate to central city minorities. Discussed within a comparative and futuristic perspective. Offered based upon demand.

POLS 632 Political Sociology (3)
Examines the social, economic, and political bases of power in America. Emphasizes pluralist and elitist theories, class analysis, community power, social control, and structural approaches to studying power. Focuses on analysis of the American political system as a resource for change and an obstacle to change with particular reference to contemporary social movements. Not scheduled to be offered in AY87-88.

POLS 710 Public Opinion Trends (2,4)
Analyzes attitudes on a selected topic based on a series of national surveys. Compares groups (i.e., urban and suburban residents, men and women, blacks and whites) in relation to psychological traits, sociopolitical positions, or voting patterns over a number of years. Students learn to assess and interpret the data on the computer using a statistical program. Not scheduled to be offered in AY87-88.

POLS 720 Elites and American Democracy (3)
Examines theories and justification of elitism. Deals with comparative political elites, the interrelationship between recruitment, circulation, and democratic accountability in American politics. Not scheduled to be offered in AY87-88.

POLS 730 Political Psychology (3)
Examines personality factors which affect political behavior. Covers self-esteem, power motivation, Machiavellianism, authoritarianism, liberalism, and conservatism. Not scheduled to be offered in AY87-88.

POLS 806 Comparative Urban Redevelopment (3)
Analyzes the redevelopment of older American cities in comparative context. Draws upon examples of older non-American cities for theoretical understanding and conceptual clarity. Offered in WINTER and SPRING-SUMMER based upon demand.

POLS 810 Seminar: Labor Force Participation (3)
Uses conventional labor market techniques to show jobs minorities hold and why they hold these jobs. Examines the adequacy of concepts to accurately portray the labor market circumstance of minority Americans. Offered in FALL and WINTER based upon demand.

POLS 815 Seminar: Politics and Society (3)
Analyzes and compares critical policy issues confronting selected political systems. Focuses on governance, science, and technology and at least two contemporary issues from an international perspective. SPRING-SUMMER.

POLS 840 Seminar: Comparative Political Systems (3)
Examines comparative approaches to political systems of post-industrial, industrial, and emerging states. Includes topics on the nature of power structure, political development and culture, economic strategy, and leadership. WINTER.

POLS 863 Seminar in American Institutions and Values (3)
Examinesnormative issues as they relate to American public administration. Prerequisite: POLS302 or POLS320. WINTER.

POLS 870 Graduate Research: . . . (1-4)
Individual reading, research, and/or project in political science under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

POLS 880 Internship: . . . (1-4)
Designed to provide students in political science with supervised practical experiences in applied settings. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.
Psychology

PSYC 320 Educational Psychology (3)
Helps teachers and educators develop a better understanding of how children develop and learn and how teachers/educators facilitate these processes. Systematic testing of learning theories is explored with particular reference to effects of culture on learning. Improves the students' ability to identify, select, organize, and evaluate instructional methods and materials. Students are expected to spend ten hours in classroom situations exclusive of class time. FALL, WINTER, SPRING-SUMMER.

PSYC 340 Industrial Psychology (3)
Introductory course in industrial psychology which examines psychological research and theory that relates to the following topics: personnel evaluation, personnel selection, personality and interest factors, equal employment opportunity, personnel training, and work motivation, human factors in job design and leadership. WINTER; offered in other terms based upon demand.

PSYC 420 Principles of Psychology (3)
Provides a comprehensive overview of psychology. Presents concepts, theories, and data from various subfields in psychology, including sensation-perception, learning, memory, personality, abnormal, social, developmental, and physiological. FALL; offered in other terms based upon demand.

PSYC 430 Abnormal Psychology (3)
Covers the recognition, classification, development, and prognosis of the range of human problems usually defined as psychiatric disorders. Focuses on difficulties in currently used systems of defining and classifying human problems in adaptation and adjustment. Examines the medical model assumptions underlying the most widely used diagnostic system. Prerequisite: PSYC420 or equivalent. FALL, WINTER, SPRING-SUMMER.

PSYC 435 Personality and Patterns of Adjustment (3)
Examines how various schools of psychology differ in their explanation and treatment of the many forms of psychological distress that confront us in our personal lives, in the workplace, and in society. Guides the potential user in asking the right questions and making intelligent decisions in seeking professional mental health assistance. FALL; offered in other terms based upon demand.

PSYC 470 Independent Study: (1-6)
Individual reading, research, and/or project in psychology under the supervision of the faculty. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

PSYC 470P Independent Study: (1-6)
Individual reading, research, and/or project in psychology under the supervision of the faculty. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

PSYC 500H Understanding Men (3)
Draws upon knowledge from social sciences, history, and other fields to understand male sex roles and stereotypes and their effects upon men's health, emotional development, male-female relationships, sexuality, fatherhood, friendships, and work. Offered in SPRING-SUMMER based upon demand.

PSYC 501 Introduction to Stress Management (3)
Focuses on identifying and assessing the various causes of physical, mental, and emotional stress at home and on the job, recognizing the body's early warning signals of stress overload, understanding the impact of stress on physical and mental disorders, and learning effective methods of reducing stress. FALL; offered in other terms based upon demand.
PSYC 50K Laboratory in Personal Stress Management (2)
Focuses on the individual's internal and external stressors and theories and methods of reducing stress such as lifestyle, exercise, and nutrition. Offered based on demand.

PSYC 502 Psychodrama Workshop (1)
Students will be introduced to the theoretical framework underlying psychodrama and experiential work in psychodramatic techniques. Offered based on demand.

PSYC 51A Brain and Behavior (3)
Provides a comprehensive understanding of the human brain and its functions. It is particularly suited for psychology majors and others who are interested in brain behavior relationships. Prerequisite: PSYC420. FALL, WINTER, SPRING-SUMMER.

PSYC 510 Adolescence (3)
Investigates the major issues of adolescence and questions the stereotypic view. Critically reviews research with special attention to identity, intimacy, sex roles, and family dynamics. Focuses on normal adolescent development, but also surveys pathological outcomes. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 512 Child Development (3,4)
Covers theories related to cognitive, emotional, and physical growth of children. Focuses on prenatal issues and the availability of children's resources in the community. FALL, WINTER; offered in other terms based upon demand.

PSYC 515 Adulthood (3)
Presents theories of adult development as they relate to major problems of adulthood. Investigates the availability of resources for adult development in local communities. WINTER; offered in other terms based upon demand.

PSYC 517 Life Cycle Development (3)
Exploration of theories of human development throughout the life span and the application of these to selected examples. Offered based upon demand.

PSYC 518 Laboratory in Transactional Analysis (2)
Students learn the major theory and concepts of transactional analysis and apply these to their own behavior. FALL, WINTER, SPRING-SUMMER.

PSYC 519 Psychosocial Aspects of Aging (3)
Studies basic concepts and theories of aging. Evaluates the impact of social, biological, and psychological variables on aging adults. Analyzes lifestyle of older adults and examines community resources for the aged. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

PSYC 520 Learning Cognition I (4)
Examines limitations of short-term memory, transfer of information to long-term memory, organization of knowledge, and the nature of cognitive processes. Prerequisite: PSYC420 or equivalent. FALL, WINTER, SPRING-SUMMER.

PSYC 521 Cognitive Psychology Applied to Instruction (3,4)
Relates current theories of comprehension and knowledge acquisition to instructional materials and procedures. Offered based on demand.

PSYC 523 Cognitive Development (4)
Examines modes of representation, relation of language and thought, comprehension, and meaning as they develop from childhood to adulthood. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

PSYC 524 Principles of Behavior Change (3)
Study of theory and procedures of behavior modification. Includes case materials from psychology, education, and special education. Prerequisite: PSYC420 or equivalent. FALL, WINTER, SPRING-SUMMER.
PSYC 527 Laboratory in Personal Growth (2)†
Identification of personal growth issues in terms of life goals and priorities. Intrapersonal
communication processes identify and examine meaning assigned to various objects or
events in student's life. FALL, WINTER, SPRING-SUMMER.

PSYC 528 Laboratory in Personal Power and Self-Management (2)
Designed to help individuals take responsibility for their own self-management. Students
develop and follow plans or goals for themselves. SPRING-SUMMER; offered in other
terms based upon demand.

PSYC 529 Psychology of Women (3)
Study of the effects of physiological and psychological variables on the behavior of
women. Includes dependence, aggression, self-esteem, and motive to achieve. Discusses
social and mental health issues currently affecting women's welfare. FALL; offered in other
terms based upon demand.

PSYC 530 Personality Theories (3) †
Involves the comparative study of nineteenth and twentieth century psychodynamic,
behaviorist, and humanist theorists on the nature of the person. Considers personality from
a variety of theoretical viewpoints. Prerequisite: PSYC420 or equivalent. FALL, WINTER,
SPRING-SUMMER.

PSYC 531 Laboratory in Interpersonal Growth (2)†
Students identify their interpersonal communication strengths and areas of difficulties and
examine the interpersonal communication processes through which they initiate, main­
tain, and terminate relationships. FALL, WINTER, SPRING-SUMMER.

PSYC 532 Laboratory in Assertiveness Training (3)†
Examines concepts of assertion training and development of cognitive and behavioristic
skills to replace maladaptive responses. Provides reinforcement and social networks to en­
sure the continuity of newly acquired behaviors. Prerequisite: Permission. SPRING-
SUMMER; offered in other terms based upon demand.

PSYC 533 Advanced Experimental Psychology (3)
Includes selected readings of published research from various content areas in psychology,
memory, learning, social psychology, and perception. Offered based upon demand.

PSYC 535 Social Psychology (3)
Evaluation of methods of inquiry and identification of levels of analysis as applied to pro­
blems of thought and behavior in American society. Study of interpersonal relations and
communications, social power, persuasion, decision-making, attitude change, and group
membership. Graduate students will also identify and describe community applications of
social psychology. Prerequisite: PSYC420 or equivalent. FALL, WINTER; offered in
SPRING-SUMMER based upon demand.

PSYC 536 Motivation and Emotional Development (4)
Examines and applies theories of motivation, moral development, and emotional develop­
ment. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 537 Psychology of Human Consciousness (3)
Study of the nature and functioning of the human mind. Considers major modes of human
consciousness, means of extending human consciousness, and therapeutic applications.
WINTER; offered in other terms based upon demand.

PSYC 538 Laboratory in Hidden Feelings and Meanings (3)
Study of understanding and responding to confusing communication. Activities clarify hid­
den meanings and feelings and teach more honest communication in school, medical,
business, and social settings. SPRING-SUMMER; offered in other terms based upon de­
mand.
PSYC 539  Institution and Experience of Motherhood (3)
Covers both historical and contemporary writing on mothers and motherhood. Considers the variety of ways in which the role of motherhood has been viewed. Studies the impact of motherhood on the psychology of the individual. Includes case material, field interviews, and (for graduate students) the development of a research design. Prerequisite: An introductory course in psychology or other social science. Offered based upon demand.

PSYC 540  Professional Standards in Human Service and Research (3)
Focuses on ethical principles and standards in human service and research professions. Deals with application to hypothetical situations involving professionals, research subjects, and clients. Studies various values, philosophical positions, and legal cases. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

PSYC 541  Rights of Mental Patients (1)
Explores the issues and values toward mental patients, the retarded, and developmentally disabled, the problems they face, and rights they have. Readings range from philosophy to case studies, from the national picture to the mental health code for Illinois. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

PSYC 542  Psychological Issues and Values (2)
Discussion and exploration of social values, psychological issues, and personal responses to a variety of social issues. Includes cross-cultural differences in values, living with a life-threatening illness, death, unemployment, child abuse and neglect, battered women, divorce, substance abuse, mental illness, and others. FALL; offered in other terms based upon demand.

PSYC 543  Eastern Perspectives on Psychotherapy (3)
Offers Eastern perspectives on such perennial questions as the nature of consciousness, personal identity, mental, emotional, and spiritual well-being. Explores therapeutic implications in the Western context. Prerequisite: A course in therapeutic communications, human consciousness or theories of counseling or permission of instructor. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 544  Theories and Treatment of Emotional Disturbance (4)
Integrates human relations experiences with theoretical work in abnormal development and basic approaches to treatment. Includes readings on therapist bias and life crises. Deals with client-centered, rational emotive, gestalt, and psychoanalytic theories. FALL, WINTER; offered in other terms based upon demand.

PSYC 547  Characteristics of Human Sexuality (2)
Focuses on general aspects of human sexuality with an emphasis on interpersonal relationships and psychosocial functions. FALL; offered in other terms based upon demand.

PSYC 555  Theories and Treatment of Emotional Disturbance in Children I (4)
Introduction to emotional difficulties and life stresses in children in various settings. Emphasis on clinical interview and play therapy. Naturalistic observation of children in various settings. Relevant to psychology, special education, education, and psychiatric nursing. Prerequisite: PSYC544. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 556  Theories and Treatment of Emotional Disturbance in Children II (4)
Reviews the relevant literature on etiology and treatment. Students work with children with emotional difficulties under close supervision. Includes case consultations and case conferences. Prerequisites: PSYC555, PSYC544, and permission. Offered based upon demand.

PSYC 558  Theories and Treatment of Emotional Disturbance in Adults (4)
Discusses psychopathology and life crises in adults. Participation in weekly peer counseling. Emphasis on therapeutic interaction with adults and relevant theories of psychopathology and treatment. Prerequisite: PSYC544. WINTER; offered in other terms based upon demand.
PSYC 559  Psychodrama (3)
Presents psychodramatic techniques utilized for resolving emotional and interpersonal difficulties. Prerequisites: PSYC 527, PSYC 531, or permission. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 560  Research Methodology (3)
Introduces the basic principles of research. Focuses on basic knowledge about research methods and the development of analytic skills. Covers finding a researchable problem, developing a testable hypothesis, search of the literature, developing an appropriate research design, and selecting appropriate measuring devices. FALL, WINTER, SPRING-SUMMER.

PSYC 570  Research in Adolescence and Sex Roles (3)
Review and critique of current literature on adolescent development and sex-role learning. Special emphasis on identity formation and intimacy issues. Preparation and analysis of a research project. Prerequisite: PSYC 510 or concurrently. Offered based upon demand.

PSYC 573  Laboratory in Alternative Lifestyles and the Helping Professions (3)
Examines alternative lifestyles occurring in our culture. Provides opportunities to meet people living alternative styles and to explore personal feelings and reactions and their implications for professional work. Prerequisite: Permission. Offered based upon demand.

PSYC 585  Human Values (3)
Examines the concept of value and explores the student's own value structure. Examines the resultant behavior patterns and the differences among value systems subscribed to by different people. WINTER; offered in other terms based upon demand.

PSYC 605  Tests and Measurements (3)
Covers the selection, administration, and interpretation of psychological and educational tests. Deals with concepts of validity, reliability, norms, standardization, standard scores, and item analysis. Examines legal and ethical issues. Prerequisite: Statistics. FALL, WINTER, SPRING-SUMMER.

PSYC 63A  Topics in Psychology . . . (1-3)
Involves experts in psychology presenting selected topics covering new developments in the field. Includes discussion of the topics and the implications for theory and practice. Participants have an opportunity to discuss new developments and, where appropriate, apply techniques and skills. Offered based upon demand.

PSYC 810  Cultural Aspects of Mental Health (3)
Study of mental health as a culture-bound concept. Compares and contrasts American cultural assumptions about mental health with those from at least one other culture. Offered based upon demand.

PSYC 815  Learning Processes: Adults (3)
Investigates the factors influencing attitudinal and behavioral change in adulthood. Includes an overview of current learning theories of three major schools of psychology. Examines how these learning theories affect the adult learning process. Prerequisite: Three hours of psychology or learning theory. WINTER; offered in other terms based upon demand.
PSYC 816 Community Mental Health Seminar (3)
Explores personal and interpersonal dynamics involved in mental health for students, teachers, and human service workers. Defines and analyzes characteristics of communities and their relevance to community mental health. Offered based upon demand.

PSYC 818 Learning Theory (3)
Applies psychological principles and data to educational practice in the classroom. Provides a constructive and detailed analysis of modern learning theories and priorities. Examines the psychological processes in learning, conditions affecting learning, and strategies for learning. Prerequisite: PSYC320. FALL, WINTER, SPRING-SUMMER.

PSYC 820 Graduate Seminar in Psychoanalytic Theory (3)
Offers advanced students the opportunity to explore current thinking in psychoanalytic theory and treatment. Emphasizes the application of ego psychology and self psychology to therapeutic technique. Provides a brief review of classical Freudian theory, but students are expected to have had some introduction to this material. Prerequisite: PSYC544, COUN630, PSYC430, or PSYC530. FALL; offered in other terms based upon demand.

PSYC 821 Graduate Seminar in Abnormal Psychology (3)
Diagnostic categories selected for in-depth study of the literature conceptualizing a problem, its development, and various treatment recommendations. Focuses on evaluation of research approaches and findings. Prerequisite: Either one of the following: PSYC544, COUN630, PSYC843, PSYC430; or overview of diagnostic categories. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 822 Seminar in Human Memory (3)
Provides students with an in-depth exposure to a single substantive area in the domain of experimental psychology. Studies research and theory in the area of human memory. Offered based upon demand.

PSYC 824 Graduate Seminar in the History of Psychology (3)
Covers a wide range of systems of psychological thought responsible for modern conceptions of human learning and development, clinical psychology, and social psychology. Offered based upon demand.

PSYC 825 Imaging Process in Psychotherapy (3)
Examines imagery as a basic capacity possessing enormous potential for therapeutic communication. Includes topics on relationship between imagery, fantasy, and other basic psychological processes. Students study the nature and structure of imaging process, explore the implications of guided as well as spontaneous imagery for therapeutic communication, apply imaging process to selected therapeutic contexts, and assess effectiveness of such applications. Prerequisite: COUN844, COUN846, or permission. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 826 Graduate Seminar in Social Psychology (3)
Integrates theories and principles of social psychology with emphasis on the effect of ecological factors on the behavior of individuals, groups, and corporations. Prerequisite: PSYC333 or equivalent. SPRING-SUMMER.

PSYC 827 Human Sexuality (3)
Examines sexual dysfunctions in terms of interpersonal and intrapersonal communication disturbances: personal, social, and cultural norms and values in the area of interpersonal sexuality. Prerequisite: COUN810 or permission. FALL; offered in other terms based upon demand.

PSYC 828 Graduate Seminar in Cognitive Psychology (3)
Examines recent theoretical developments in cognitive psychology. Emphasizes the areas of visual perception, concept formation, and language comprehension. FALL.
PSYC 829 Graduate Seminar in Human Development (3)
Prepares students with up-to-date research in the developmental area. Integrates developmental issues at all stages of life. Provides students with links between theoretical and applied issues of development. Prerequisite: One developmental course or permission of instructor. WINTER.

PSYC 830 Consultation Seminar in School Psychology I (1)†
Offers continuing learning experiences in the practice of school psychology consultation. Includes model case conferences, case presentations, and individual educational plan formulation. FALL; offered in other terms based upon demand.

PSYC 831 Therapeutic Communication (3)
Defines psychopathology in terms of interpersonal and intrapersonal communication disturbances. Identifies therapeutic interventions that improve the quality of interpersonal communication. Prerequisite: PSYC830 or permission. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 840 Consultation Seminar in School Psychology II (1)†
This seminar is a continuation of PSYC830. Prerequisite: PSYC830. FALL; offered in other terms based upon demand.

PSYC 843 Nonbiased and Pluralistic Assessment of Children (3)
Introduction to the basic theories of nonbiased assessment of children. Study of both nonbiased devices as well as pluralistic tests such as SOMPA. Prerequisites: PSYC605. WINTER; offered in other terms based upon demand.

PSYC 850 Consultation Seminar in School Psychology III (1)†
This seminar is a continuation of PSYC840. Prerequisite: PSYC840. FALL; offered in other terms based upon demand.

PSYC 852 Personality and Vocational Assessment (3)
Covers selection, administration, and interpretation of measures of intelligence, aptitude, vocational, and educational choice used by community college and vocational counselors. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 853 Human Neuropsychology I: Brain Function (3)
Explores the theories and analysis of brain function, structure, and brain behavior relationships. Prerequisite: PSYC605. SPRING-SUMMER; offered in other terms based upon demand.

PSYC 854 Human Neuropsychology II: Clinical Assessment (3)
Covers the administration, scoring, and interpretation of standardized procedures in diagnosis of brain damage. Integrates findings with other assessment techniques. Trains students in the Halstead-Reitan and/or Luria methods. Prerequisite: PSYC853. Offered based upon demand.

PSYC 855 Individual Assessment I: Intelligence (3)
Intensive, culminating training in individual assessment including necessary skills and knowledge to conduct a complete case study of problems typically referred to the school psychologist. Includes recommendations for treatment or remediation. Special attention to the Wechsler and Binet scales. Prerequisite: PSYC605. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

PSYC 856 Human Neuropsychology III: Rehabilitation (3)
Study and application of concepts of human neuropsychology to programs of rehabilitation for persons with various kinds of brain damage and related personality disorders. Prerequisites: PSYC853 and PSYC854. Offered in SPRING-SUMMER based upon demand.
PSYC 857 Individual Assessment II: Personality (3)
Intensive, culminating training in individual assessment including necessary skills and knowledge to conduct a complete case study of problems typically referred to the school psychologist. Includes recommendations for treatment and remediation. Covers objective tests and projective techniques. Prerequisites: PSYC 605 and PSYC 850. FALL, SPRING-SUMMER; offered in WINTER based upon demand.

PSYC 860 Consultation Seminar in School Psychology IV (1)*
This is the final consultation seminar, a continuation of PSYC 850. Prerequisite: PSYC 850. FALL; offered in other terms based upon demand.

PSYC 865 Practicum in School Psychology (4)*
Practice in a school setting: diagnosis of psychological, social, learning problems. Participation in counseling sessions, guidance activities, individual and group diagnostics and referral of students with learning problems. Prerequisites: PSYC 853, PSYC 855, PSYC 857, and successful review in the practicum screening procedure. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

PSYC 870 Independent Study: . . . (1-6)
Individual reading, research, and/or project in psychology under the supervision of the faculty. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

PSYC 870P Independent Study: . . . (1-6)*
Individual reading, research, and/or project in psychology under the supervision of the faculty. Prerequisites: Permission of instructor and division chairperson. Offered based upon demand.

PSYC 880 Internship: . . . (1-6)*
Designed to provide students in psychology with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

PSYC 890 Graduate Thesis/Project: . . . (4)*
Student works closely with advisor and three faculty members (principal advisor, secondary advisor in specialty area, scope advisor outside specialty area) developing and completing original thesis/project proposal. Prerequisite: Permission of advisor or committee. Offered based upon demand.

PSYC 920 Internship in School Psychology (6)*
The internship will be taken after completion of the M.A. in school psychology and can be enrolled in only after acceptance by an approved internship site. Prerequisite: M.A. in psychology. FALL; offered in WINTER based upon demand.

Public Administration

PADM 301 Introduction to Public Administration (3)
Examines theories, history, and current issues of administration in government. FALL, WINTER, SPRING-SUMMER.

PADM 420 Public Personnel Administration (3)
Studies and evaluates principles, practices, and problems of personnel administration in government. WINTER.

PADM 430 Planning Theory (3)
Seminar discussion of the various practical, theoretical, and ethical problems and issues now facing the design professions. Includes demands for greater concern for “user behavior” and “user needs,” collaboration between design professionals and behavioral scientists, and control of behavior through design. Offered based upon demand.
PADM 435 Public Policy Analysis (3)
Introduces students to conceptual models for understanding government policymaking and implementation. Provides information about various governmental policies. FALL.

PADM 445 Administrative Law (3)
Introduces the legal principles underlying administration in government. Concentrates on basic administrative procedures affecting government under the constitution. Offered based upon demand.

PADM 450 Introduction to Urban Planning (3)
Provides an introduction to urban planning, a history of its efforts, and a review of the elements in professional practice today. SPRING-SUMMER.

PADM 455 Local Government Planning (3)
Study and analysis of current methods, techniques, and practices of land use oriented urban planning. Emphasizes current land use control in urban planning, including zoning, subdivision control, site planning, transportation planning, and the general plan. Offered based upon demand.

PADM 470 Independent Study: . . . (3)
Independent study is intended to provide better students an opportunity to study a topic of their choice in public administration under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within public administration and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

PADM 480 Internship: . . . (3)
Designed to combine individual career counseling and work outside of the classroom with institutional learning settings. Prerequisite: Permission. Offered based upon demand.

PADM 50A Workshops on Zoning and Planning: . . . (1)†
 Designed for citizen planners and professional zoning administrators to provide introduction to key concepts and to develop basic skills. Includes special topics on zoning and planning. Offered based upon demand.

PADM 503 Citizen Planner's Workshop (2)
Designed for citizen planners—planning commissioners, environmental commissioners, zoning boards of appeals, local elected officials, and interested citizens. Deals with planning topics such as the citizen role in planning, innovations in zoning and subdivisions, economic development, historic preservation, land use law, and others. Not scheduled to be offered in AY87-88.

PADM 505 Economics of Urban Planning (3)
Analyzes various economic factors impinging on the planning process. Includes economics of urbanization, forces of supply and demand in urban lands, the building industry, the real estate market, cyclical fluctuations, rents and prices, problems of housing, urban redevelopment, real estate investment, economic notions of welfare, and counteraction of market failure in the supply of public goods. Offered based upon demand.

PADM 508 Using Microcomputers in Planning (2)
Introduces the use of microcomputers in planning. Emphasizes the use of existing application programs and the microcomputer as a tool to assist planners and other local government officials with the performance of their duties. Covers word processing, database management, and spreadsheet analysis as related to planning. Offered based upon demand.

PADM 510 Government and the Public (3)
Studies the communication and human relations problems between government and the people it serves. Emphasizes efforts to alleviate the problems. Offered based upon demand.
PADM 520 Urban Growth Management (3)
Investigates how communities control the rate, timing, location, and size of development. Includes review of a series of community growth management plans and regulations. Offered based upon demand.

PADM 521 Suburban Policy Issues (3)
Studies the substance of federal, state, and regional public policies as they affect suburban communities. Includes techniques used by municipal officials to deal with these issues and other strictly local issues. Ordinarily, public and private sector experts participate. SPRING-SUMMER.

PADM 536 Environmental Land Use Planning (3)
Examines ecological design methods and land use control techniques for resolving the conflict between land development and environmental protection. Considers use control and preservation techniques for sensitive lands. Offered based upon demand.

PADM 540 Planning Methodology (3)
Reviews and explores the role of selected planning and evaluation methods in the overall planning process. Includes topics on goals and attitude surveys; assessing probability and utility; frameworks for land use; environmental, economic, and social impact of development plans; cost-benefit analysis; and the planning balance sheet. Offered based upon demand.

PADM 545 Regional Planning (3)
Broad coverage of regional planning, its basic concepts, techniques of analysis, and planning methods. Offered based upon demand.

PADM 580 Public Safety Administration (3)
Studies the administration of public safety departments, especially police departments. Includes topics on organization structure, personnel, communication, community relations, and relations among police and fire services. Offered based upon demand.

PADM 584 Law Enforcement and the Constitution (3)
Examines the requirements and limitations imposed upon the law enforcement process by the constitution. Emphasizes the U.S. Supreme Court's interpretations of the 4th, 5th, 6th, and 14th Amendments. FALL.

PADM 585 Practicum in Urban Planning (3)
An experiment in concentrated planning education for advanced students in planning. A workshop based, problem-solving experience designed to consist of supervised field research and development projects on behalf of community groups who have requested specific technical assistance. Provides enhanced professional education through the clinical application of professional planning skills. Offered based upon demand.

PADM 801 Concepts and Issues in Public Administration (3)
Provides an overview for the study of public policy and administration. Designed to develop an appreciation for the vocabulary of the field, to increase the student's understanding of public agencies and their role within the American democratic structure, and to develop an increased awareness and understanding of the individual role within public agencies. Offered based upon demand.

PADM 812 Seminar in Public Budgeting (3)
Examines advanced questions about budgeting in government, including various budgeting systems and how to prepare a realistic budget in the public sector. Considers revenues, expenditures, and intergovernmental aid. Prerequisite: ECON405. FALL, SPRING-SUMMER.

PADM 820 Seminar in Urban Government (3)
Examines advanced questions about the functioning of urban governments in America. SPRING-SUMMER.
PADM 835 Seminar in Public Organization Theory (3)
Examines advanced questions about organization theory as it applies to government, highlighting the distinctive nature of public organizations. WINTER.

PADM 840 Seminar in Public Policy (3)
Examines advanced questions about the development of public policy. WINTER, SPRING-SUMMER.

PADM 850 Seminar in Public Management (3)
Examines advanced questions about management in government. Prerequisite: PADM301. FALL, SPRING-SUMMER.

PADM 851 Seminar in Public Planning (3)
Deals with a series of case study problems reflecting contemporary planning issues. Uses a multidisciplinary approach to case study analysis. Emphasizes energy, environmental, social, and economic planning. FALL.

PADM 852 Seminar in Research Methods (3)
Introduces students to a variety of standard research methods. Deals with developing research instruments and analyzing research techniques. Prerequisites: STAT468 and 21 graduate hours in M.P.A. degree program. WINTER.

PADM 855 Master's Research Paper (3)†
For M.P.A. students who are working on their research projects. Advanced standing as an M.P.A. student required for registration. Prerequisite: Permission of instructor. FALL, WINTER, SPRING-SUMMER.

PADM 870 Independent Study:. . . (3)
Independent study is intended to provide better students an opportunity to study a topic of their choice in public administration under professional supervision. Only students prepared to devote considerable time and effort should undertake an independent study. Students contemplating an independent study should first choose a definite area for investigation within public administration and an instructor to sponsor the work. Prerequisites: Permission of instructor and dean. Offered based upon demand.

PADM 880 Internship: . . . (3)
Designed to combine individual career counseling and work outside of the classroom in combination with institutional learning settings. Prerequisite: Permission. Offered based upon demand.

PADM 890 Graduate Thesis/Project: . . . (3)†
Provides an opportunity for intensive study of a problem chosen by the student. A candidate who is approved for the thesis option will be required to orally defend the thesis. The thesis option is limited to outstanding students who have been recommended by a minimum of two faculty in the College of Business and Public Administration and approved by the dean. Prerequisite: Permission of advisor and/or committee. Offered based upon demand.

Social Sciences

SOSC 311 Survey of Social Science (3) 
Examination of the organizing principles and methods of the basic social sciences. Offered on-campus and also as an independent study course for BOG students. FALL, WINTER, SPRING-SUMMER.
SOCSC 450 Social Science Research: Design and Methodology (3)
Overview of methods that political scientists and sociologists employ to collect and analyze current data. Ethics in social research, formulating research questions, survey and experimental design, interviewing, sampling, direct observation, content analysis, evaluation research and critiques of science methods. Prerequisites: POLS301, SOC301, or equivalents. FALL; offered in other terms based upon demand.

SOCSC 470 Independent Study: . . . (1-4)
Individual reading, research and/or project in social sciences under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

SOCSC 480 Internship: . . . (1-4)
Designed to provide students in social sciences with supervised practical experiences in applied settings. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

SOCSC 50A Social Trends in the Soviet Union (1)
Examines current social, political, and economic trends in the Soviet Union. Places particular emphasis on problems of perception and understanding of these from American perspectives. Involves attendance at an all-day conference and participation in follow-up research and review. Not scheduled to be offered in AY87-88.

SOCSC 510 Women's Resource Laboratory (3)
Students learn referral procedures, staff the Women's Resource Center, and meet for group discussion about topics related to sex-role issues, family violence, and options available to women in contemporary society. Offered based upon demand.

SOCSC 525 Ascent of Man (4)
Based on an award winning B.B.C. television series written and narrated by the late scientist Jacob Bronowski. Provides a panoramic view of nature and the forces that led to the emergence of human intelligence with its cultural and intellectual achievements. Offered in FALL and SPRING-SUMMER based upon demand.

SOCSC 530 Urban Studies: Introduction to the City (3)
Appraisal and analysis of urban growth and dynamics in relation to government and politics, social and economic life, environmental issues, and the structure of the urban environment. An interdisciplinary approach to the study of American urban environments. WINTER.

SOCSC 535 Idea of Community (3)
Interdisciplinary study of the idea of community in western society using approaches from the social sciences and from religious-theological studies. Offered in SPRING-SUMMER based upon demand.

SOCSC 560 Computer Applications in Social Science Research (3)
Use of the computer for political and social analysis and research. Introduction to computing equipment and operating procedures, utilization of select programs, general data processing applications for political and social research. Prerequisite: SOCSC 450 or equivalent. Offered based upon demand.

SOCSC 801 Human Systems Change (3)
Covers philosophy and history of human systems change. Students present a diagnosis of a system strategy for change. Offered based upon demand.

SOCSC 802 Aesthetics of Sports (3)
Introduces students to alternative values associated with sport through the analysis of sport documentary films and related texts. Examines differences between subjective and objective aesthetics. Not scheduled to be offered in AY87-88.
SOCW 320 Fields of Welfare Services (3)
Examines the broad field of social welfare services and the techniques used in the professional practice setting. FALL.

SOCW 340 Social Policy (3)
Focuses on the legal basis for social policy in the United States. Examines historical and philosophical antecedents. Includes field research. WINTER.

SOCW 350 Social Work Perspectives on Human Behavior (3)
Designed to help students to integrate and apply to professional practice situations those social science concepts dealing with human behavior. Prerequisite: SOCW320 or concurrent enrollment. FALL.

SOCW 355 Theories of Social Work Practice (3)
Provides an introduction to currently recognized social work practice theories relevant to direct service generalist practice. Includes psychosocial, problem-solving, and functional theories. Designed to provide students with basic theoretical tools which contribute to effective, holistic oriented social work practice. Prerequisites: SOCW320 and SOCW350. WINTER.

SOCW 420 Community Organization (3)
Provides a conceptual framework for examining community organization practice. Examines the intervention process at the community level to effect change. Prerequisite: SOCW355. FALL.

SOCW 445 Methods of Social Casework (3)
Examines the approaches and strategies for providing a wide range of social services to individuals. Students engage in interviewing, collecting data, diagnosing, and planning treatment for selected individuals. Prerequisite: SOCW355. FALL.

SOCW 450 Social Group Work (3)
Examination of the goals and values of the group setting, group preparation, leaders and leadership, group processes and activities. Emphasis on using group work processes in selected practice issues. Prerequisite: SOCW355. WINTER.

SOCW 459 Social Work and the Law (3)
Includes the study of legal issues, procedures, and selected legislation relevant to the practice of social work in varied settings. Examines the use of legal authority in the provision of services in the areas of income maintenance, justice, child protection, family services, divorce counseling, and other areas requiring knowledge of legal issues and processes. WINTER.
SOCW 460 Proseminar in Social Work I (2)
Provides students with an opportunity to explore agencies, identify desirable field placements, and become thoroughly familiar with policies and procedures relating to the practicum. Students engage in self-assessment and the development of personal goals for their practicum experience. This seminar is to be taken during the trimester before the field practicum. Prerequisites: Successful completion of practicum application and approval process. FALL, WINTER.

SOCW 468 Proseminar in Social Work II (2)
Synthesizes practice in the field practicum setting and theory provided through coursework in the human services curriculum. Attendance is required. Prerequisite: This seminar must be taken concurrently with the practicum experience. FALL, WINTER.

SOCW 470 Independent Study: . . . (1-8)
Individual reading, research, and/or project in social work under supervision of faculty. Prerequisite: Permission. Offered based upon demand.

SOCW 480 Internship: . . . (1-8)
Designed to provide students in social work with supervised practical experiences in applied settings. Prerequisite: Permission. Offered based upon demand.

SOCW 490 Practicum in Social Work (6)
Students apply and integrate theoretical knowledge and skills of social work in a human services setting. Prerequisites: SOCW460 and approval by degree program faculty. FALL, WINTER.

SOCW 50A Topics in Social Work Practice: . . . (1-4)
Specific topics and issues, treatment and service approaches, and new developments in social work and related areas are considered in a series of workshops using outside resources. Workshops may be repeated for different topics. Prerequisite: Permission of instructor or program coordinator of social work major. FALL, WINTER; offered in SPRING-SUMMER based upon demand.

SOCW 530 Urban Dynamics (3)
Identifies and analyzes the social, political, economic, psychological, and physical forces in an urban community and how these affect the lives of the people who live there. FALL, WINTER, SPRING-SUMMER.

SOCW 565 Teamwork in Organizations (3)
Designed for the student interested in delivery of human services through the team model, especially interdisciplinary teams. Introduces a conceptualization of generic teamwork which is applicable to a wide variety of work settings. Identifies and describes the varied constellations of human services teams, and analyzes the team process, including factors which contribute to team effectiveness and those which restrict its functioning. Field visits required. FALL.

SOCW 570 Social Work in Health Care (3)
Focuses on how social workers in hospitals and clinics assist people in making better use of health care facilities, in preventing illness, in dealing with the impact of illness and disability on themselves and their families, and in preserving their health. Emphasizes the necessity for effective collaboration with other health professionals on interdisciplinary health teams for optimum services. WINTER.

SOCW 575 Social Services for Children (3)
Examines the organization of child welfare programs and the existing set of social services designed to help the child and his/her family. Considers the effects of economic, social, and political developments upon the past and present services. Explores future planning of services for children. SPRING-SUMMER.
SOCIOW 590 Social Work Practice with Minorities (3)
Examines the assumptions, myths, beliefs, stereotypes, techniques, and strategies necessary to facilitate interracial relationships between workers and clients. SPRING-SUMMER.

SOCIOW 595 Management and Supervision in the Human Services (3)
Examines administrative theories and processes which are basic to all human service agencies. SPRING-SUMMER.

Sociology

SOC 301 Principles of Sociology (3)
Comprehensive analysis of concepts and methods of sociology applied to social issues and processes, characteristics of social organizations, issues in demography and geography, and principles of stability and change. FALL, WINTER, SPRING-SUMMER.

SOC 310 Principles of Urban Studies (3)
Presents an interdisciplinary study of basic principles and dynamics in the development of our increasingly urban world. Features focus on the worldwide process of urbanization, urban lifestyles, and some of the common elements in the cities in America and other areas of the world. This is an off-campus, independent study course. Offered in FALL and SPRING-SUMMER based upon demand.

SOC 345 Sociology of Sex Roles (3)
Examines the biological, social, and cultural theories of sex role differences. Deals with interpersonal and sociocultural mechanisms by which beliefs about sex roles are maintained, and consequences of existing beliefs about sex roles. Offered in FALL based upon demand.

SOC 430 Sociology of Racism (3)
Explores the dynamics of individual and institutional racism in America and traces the origin and manifestation of racism throughout history. FALL; offered in SPRING-SUMMER based upon demand.

SOC 470 Independent Study: . . . (1-4)
Individual reading, research and/or project in sociology under the supervision of the faculty. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

SOC 51A Topics in Sociology: . . . (3)
Indepth analysis of special issues in contemporary society from a sociological perspective will be the focus of this course. Guest lectures, field trips, and document analysis will supplement research and reading assignments. Projected topics include: The Family and State Policy; Late Capitalism and The Welfare State; Contemporary Sociological Theory; Legal and Social Implications of Reproductive Technologies. Offered based upon demand.

SOC 514 Sociology of Sport (3)
Studies influences of sport on society and psychosocial aspects of spectators and participants in sport. Not scheduled to be offered in AY87-88.

SOC 520 Technology and Social Change (3)
Examines the impact of significant technological changes upon social structures, lifestyles, institutions, and communities. Starts with the neolithic agricultural revolution and culminates in contemporary urban systems. Offered in WINTER based upon demand.

SOC 525 Community Organization/Community Development (3)
Analyzes notions of power, community structure, community development, and their implications for community organization and renewal. Not scheduled to be offered in AY87-88.
SOC 535  Population and Demographic Analysis (3)
Considers population data, sources, uses, and limitations. Emphasizes mortality, fertility, and migration. Includes exploration of data processing techniques and practical implications. Examines the role of population processes in urban development and change. Not scheduled to be offered in AY87-88.

SOC 540  Sociology of the Family (3)
Examines the historical roots of changes in contemporary family life. Focuses on class variation in American family life, implications of beliefs about sex roles for marital and parental roles, manifestations of pathology in family life, and connections between political issues and changes in family life. WINTER.

SOC 551  Sociology of Ethnic Relations (3)
Analyzes ethnicity as a dimension of social stratification and its implications for inter- and intra-group conflict. WINTER.

SOC 585  Work and Family Life (3)
Examines historical and contemporary ideologies about the relation between work and family life. Explores effects of constraints of work roles on family life and of family life on work roles. Emphasizes issues associated with labor market segmentation, class variation, distinctions between dual- and one-career families, and alternatives to traditional family/work patterns. SPRING-SUMMER; offered in WINTER based upon demand.

SOC 60A  Sexual Assault: Investigation and Initial Intervention (1)
A conference for service and law enforcement professionals who work with sexual assault victims and offenders. Focuses on the dynamics of the sexual assault offender and the impact of assault on the victim. Review changes in laws concerning sexual assault offenders and the implications of these changes for service professionals. Not scheduled to be offered in AY87-88.

SOC 650  Readings in Contemporary Sociological Thought (3)
Acquaints the student with contemporary classics in sociological thought. Major works of C. W. Mills, David Reisman, Kim Erickson, Erving Goffman, Christopher Lasch, and others will be covered. Prerequisites: Introductory social science course and at least one specialized course in social science or history. Not scheduled to be offered in AY87-88.

SOC 706  Work and Leisure (3)
Examines various aspects of the relationship between work and leisure. Deals with elements of stress in leisure and analyzes the work-leisure dichotomy. Not scheduled to be offered in AY87-88.

SOC 805  Seminar: Sociological Theory (3)
Analyzes the contributions of major theorists and schools in sociology starting with Marx, Durkheim, and Weber and moving on to later developments in structural-functionalist, symbolic interactionist, neo Marxist, phenomenological, ethnomethodological, exchange, and other theories. Prerequisites: Undergraduate coursework in social theory, research, and methods or equivalent. FALL; offered in SPRING-SUMMER based upon demand.

SOC 810  Readings in Feminism (3)
An examination of alternative theories of women's positions in society and prescriptions for social change. Offered in FALL and SPRING-SUMMER based upon demand.

SOC 815  Seminar: Social Organizations and Institutions (3)
Examination of recent research on selected aspects of social organization (e.g., stratification) and institutions (e.g., religion, family, government). Prerequisite: SOC805 or permission. SPRING-SUMMER.
SOC 825 Seminar: Social Change and Modernization (3)
An historical examination of the processes of social change and modernization in American life. Particular emphasis on migration and mobility, family roles, and the growth of urbanization. Prerequisite: SOC805 or permission. WINTER; offered in other terms based upon demand.

SOC 835 Seminar: Sociological Research (3)
Course will cover theory construction literature from sociology, varieties of research involving human subjects, and substantive varieties of social research. SPSS and related programs will be utilized as tools for participating in directed research activities. Prerequisites: STAT468 or equivalent, SOC805, and either SOC815 or SOC825 or permission. SPRING-SUMMER; offered in WINTER based upon demand.

SOC 870 Graduate Research: . . . (1-4)
Individual reading or research in sociology under the supervision of the faculty. Prerequisite: SOC835 or permission. FALL, WINTER, SPRING-SUMMER.

SOC 880 Internship: . . . (1-4)
Designed to provide students in sociology with supervised practical experiences in applied settings. Prerequisite: Permission. FALL, WINTER, SPRING-SUMMER.

SOC 890 Graduate Thesis/Project (3)
Provides the student in sociology the opportunity to synthesize graduate coursework by developing and completing a thesis or project specific to the student's interests. Prerequisites: Permission of advisor and thesis/project director and SOC870. FALL, WINTER, SPRING-SUMMER.

Special Education—See Education —

Special Education

Statistics

STAT 361 Statistics for Management I (3)
Covers the basic topics of applied statistics including the sample mean and variance, random variables, elementary finite probability, the binomial and normal distributions, sampling, point and interval estimation, control charts, and hypothesis testing as they apply in business situations. Prerequisite: Intermediate algebra or passing computational examinations. FALL, WINTER, SPRING-SUMMER.

STAT 362 Statistics for Management II (3)
A continuation of STAT361. Topics covered include analysis of variance, regression, correlation, time series, indexing, nonparametric statistics, bivariate distributions, and chi-square tests. Students make extensive use of a statistical computer package in the analysis of data and application of statistical tests as they apply in business situations. Prerequisite: STAT361. FALL, WINTER, SPRING-SUMMER.

STAT 468 Statistics (3)
Provides an introduction to statistics and covers such topics as the standard normal distribution, descriptive statistics, chi-square, t-test, correlational techniques, and one-way analysis of variance. Focuses on analysis of data most often collected by individuals in psychology, education, special education, and other social sciences. FALL, WINTER, SPRING-SUMMER.

STAT 510 Statistical Process Quality Control (3)
Concentrates on process control relying heavily upon control charts as tools to improve quality and productivity. Prerequisite: Algebra or written permission of instructor. Not scheduled to be offered in AY87-88.
STAT 52A Advanced Topics in Statistical Process Quality Control (3)
Designed to enable each student to use advanced application techniques of the simple but powerful quality control tools with which the Japanese captured the world markets. Relies heavily upon control chart techniques to handle such situations as tool wear, measurement error, testing for bias and validity of data, etc. Prerequisite: STAT510 or equivalent. Not scheduled to be offered in AY87-88.

STAT 520 Statistical Methods (3)
A survey for graduate and undergraduate students with sufficient statistical background for professional programs in which basic familiarity with statistics is needed. The topics covered include descriptive statistics, probability, sampling, estimation, hypothesis testing, regression and correlation, analysis of variance and chi-square. The course is fast paced and intensive. Prerequisite: MATH325 or equivalent. FALL, WINTER, SPRING-SUMMER.

STAT 521 Statistical Methods Laboratory (1)
Introduces the use of statistical analysis packages on the computer. Provides laboratory experiences associated with STAT520. Prerequisite: Concurrent enrollment in STAT520. FALL, WINTER, SPRING-SUMMER.

STAT 530 Multivariate Statistics (3)
Covers a variety of methods for analysis of multivariate data including multiple regression and correlation, canonical correlation, discriminant analysis, multivariate analysis of variance, factor analysis, and multigeneric data analysis. Makes use of computer based statistical packages such as MINITAB and SPSS. Prerequisite: STAT520, STAT362, or STAT468. Offered based upon demand.

STAT 611 Data Analysis in the Social Sciences Using SPSS (3)
An introduction to accessing and analyzing quantitative data for students in the social and behavioral sciences. Offered based upon demand.

STAT 860 Advanced Statistics in Behavioral Science (3)
Reviews briefly regression analysis and one-way analysis of variance. Focuses on multiple regression and other analyses of variance. Prerequisite: STAT468 or equivalent. WINTER: offered in other terms based upon demand.
Appendix
Board of Governors Regulations
Section IV.C. Residency

For the purpose of this regulation an "adult" is considered to be a student eighteen years of age or over; a "minor" student is a student under eighteen years of age. The term "the state" means the state of Illinois. Except for those exceptions clearly indicated in this regulation, in all cases where records establish that the person does not meet the requirements for resident status as defined in this regulation, the nonresident status shall be assigned.

Residency Determination—Evidence for determination of residence status of each applicant for admission to the university shall be submitted to the office responsible for admissions at the time of application for admission. A student may be classified at any time by the university upon the basis of additional or changed information. However, if the student is classified in error as a resident student, the change in tuition shall be applicable beginning with the term following the reclassification. If the student is classified in error as a nonresident, the change in tuition shall be applicable to the term in which the reclassification occurs, provided the student has filed a written request for a review in accordance with this regulation.

Adult Student—An adult, to be considered a resident, must have been a bona fide resident of the state for a period of at least six consecutive months immediately preceding the beginning of any term for which he/she registers at the university, and must continue to maintain a bona fide residency in the state, except that an adult student whose parents (or one of them if only one parent is living or the parents are separated or divorced) have established and are maintaining a bona fide residence in the state and who resides with them (or the one residing in the state) or elsewhere in the state will be regarded as a resident student.

Minor Student—The residence of a minor shall be considered to be, and to change with and follow:

1. That of the person's parents, if they are living together, or living parent, if one is dead; or
2. If the parents are separated or divorced, that of the parent to whom the custody of the person has been awarded by court decree or order, or, in the absence of a court decree or order, that of the father unless the person has continuously resided with the mother for a period of at least six consecutive months immediately preceding his/her registration at the university, in which latter event the person's residence shall be considered to be that of his/her mother's; or
3. That of the adoptive parents, if the person has been legally adopted and, in the event the adoptive parents become divorced or separated, that of the adoptive parent whose residence would govern under the foregoing rules if that parent had been a natural parent; or
4. That of the legally appointed guardian of the person if the minor resides with such guardian; or
5. That of a "natural" guardian, such as a grandparent, adult brother or adult sister, adult uncle or aunt, or other adult with whom the person has resided and has been supported by for a period of at least six consecutive months immediately
preceding his/her registration at the university for any term if the person's parents are dead or have abandoned him/her and if no legal guardian of the person has been appointed and qualified.

**Parent or Guardian**—Except as provided in paragraph ten of this regulation, no parent or legal or natural guardian will be considered a resident of the state unless the parent or guardian (a) maintains a *bona fide* and permanent place of abode within the state; and (b) lives within the state, except when temporarily absent from the state, with no intention of changing his/her legal residence to some other state or country.

**Emancipated Minor**—If a minor has been emancipated, is completely self-supporting, and actually resides in the state, the minor shall be considered to be a resident even though his/her parent or guardian may reside outside the state. An emancipated minor who is completely self-supporting shall be considered to "actually reside in the state of Illinois" if he/she has maintained a dwelling place within the state uninterruptedly for a period of at least twelve consecutive months immediately preceding the beginning of any term for which he/she registers at the university. Marriage or active military service shall be regarded as effecting the emancipated minor whose parents (or one of them, if only one parent is living or the parents are separated or divorced) have established and are maintaining a *bona fide* residence in the state and who resides with them (or the one residing in the state) or elsewhere in the state will be regarded as a resident student.

**Marriage of Students**—If a resident student marries a nonresident, then the resident student shall continue to be classified as a resident unless the student requests reclassification to a nonresident status.

If a nonresident student marries a resident, then the nonresident student shall continue to be classified as a nonresident unless the student executes a declaration of residency, in such form as may be prescribed by the office responsible for admissions, and requests reclassification to resident status.

**Persons Without United States Citizenship**—A person who is not a citizen of the United States of America to be considered a resident must have permanent resident status or must hold "refugee-parolee" or "conditional entrant" status with the United States Immigration and Naturalization Service and must also meet and comply with all of the other applicable requirements of this regulation to establish resident status.

**Armed Forces Personnel**—A person who is actively serving in one of the armed forces of the United States and who is stationed and present in the state in connection with that service and submits evidence of such service and station, as well as such person's spouse and dependent children, shall receive a waiver of the nonresident portion of tuition as long as such person remains stationed and present in Illinois and the spouse or dependent children of such person also live in the state. If such a person is transferred to a post outside the continental United States, but such person or the spouse and/or dependents of such person remain(s) registered at the university, then such waiver shall continue until such time as the person in service is stationed in another state within the continental United States.

**Minor Children of Parents Transferred Outside U.S.**—The minor children of persons who have resided in the state for at least twelve consecutive months immediately before a transfer by their employers to some location outside the United States shall be considered residents. However, this shall apply only when the minor children of such
parents enroll in the university within five years from the time their parents are transferred by their employer to some location outside the United States.

Staff Members of the University, Allied Agencies, and Faculties of State Supported Institutions in Illinois—Staff members of the university and of allied agencies, and faculties of state supported institutions of higher education in Illinois, holding appointment of at least one-quarter time, and their spouses and dependent children, shall be treated as residents.

Teachers in Public and Private Illinois Schools—Teachers in the private and public elementary and secondary schools in Illinois shall, if subject to the payment of tuition, be assessed at the resident rate during the term in which the staff member or teacher holds such an appointment at least one-quarter time. This privilege also extends to the summer session or off-term vacation immediately following the term for which such appointment was effective.

Definition of Terminology—To the extent that the terms “bona fide residence,” “independent,” “dependent,” and “emancipation” are not defined in this regulation, definitions shall be determined by according due consideration to all of the facts pertinent and material to the question and to the applicable laws and court decisions of the state of Illinois.

Voter registration, filing of tax returns, proper license and registration for the driving or ownership of a vehicle, and other such transactions may verify intent of resident in a state. Neither length of university attendance nor continued residence in the university community during vacation period shall be construed to be proof of Illinois residence.

A term “staff member” as used in this regulation shall mean a person appointed to an established position for a specific amount of time at a salary commensurate with the percentage of time required, under an appointment requiring service for not less than three-fourths of the term. The term “staff member” as defined herein shall not apply to persons employed on an hourly basis in either an academic or nonacademic capacity, nor to persons on leave without pay. Persons appointed to established civil service positions, whose rate of pay is determined by negotiation or prevailing rates, shall not be considered as being paid on an hourly basis.

Procedure for Review of Residency Status—A student who takes exception to the residency status assigned and/or tuition assessed shall pay the tuition assessed but may file a claim in writing to the director of admissions for a reconsideration of resident status and/or an adjustment of the tuition assessed. The written claim must be filed within 30 calendar days from the date of assessment of tuition or the date designated in the official university calendar as that upon which instruction begins for the academic period for which the tuition is payable, whichever is later, or the student loses all rights to a change of status and/or adjustment of the tuition assessed for the term in question. If the student is dissatisfied with the ruling in response to the written claim made within said period, the student may appeal the ruling by filing a written appeal with the office responsible for admissions within 20 days of receipt of notice of ruling. Such written appeal shall be forwarded by the office responsible for admissions to board legal counsel, who shall consider all evidence submitted in connection with the case and render a decision which shall be final.
Policy on Credit through Evaluation of Prior Experiential Learning (CEEL)

Purpose
The purpose of this policy is to provide a process whereby students may obtain college credit for prior experiential learning that can be equated to college coursework.

Policy

I. Experiential Learning Assessment

A. Prior experiential learning may be determined to be equivalent to credit earned for college courses based on documentation of:
   1. Satisfactory performance on formal or professionally-normed examinations (e.g., College Level Examination Program—CLEP, Proficiency Examination Program—PEP, Defense Activity for Non-Traditional Education Support—DANTES, etc.);
   2. Satisfactory completion of established training or certification programs (e.g., American Council of Education: Program on Non-Collegiate Sponsored Instruction—PONSI);
   3. The acquisition of knowledge and skills which approximate the content and outcomes of college courses.

B. The assessment of prior experiential learning shall be conducted through the Office of Assessment and shall consist of a process for the evaluation and review of the documentation presented in support of the experiential learning which minimally includes:
   • individual faculty with expertise in the areas in which credit is being sought;
   • the respective collegial committee responsible for assessing CEEL packages;
   • the university-wide CEEL Review Committee;
   • the director of assessment; and
   • the provost (or designee).

C. Individuals having documented experiential learning which can be equated to college courses after appropriate evaluation and review by faculty will be awarded credit by the colleges subject to the approval of the provost and the conditions of this policy.

D. Academic credit for (the same) experiential learning may be awarded only once.

E. Only after a student has been admitted to and enrolled in a degree program will credit approved through the CEEL process be recorded on his/her transcript. Credit will be recorded by the end of the trimester in which credit was awarded and the enrollment condition satisfied.

II. Application of CEEL Credit toward Requirements

Credit awarded for prior experiential learning may be applied toward admission and/or degree requirements within the limits specified below for undergraduate and graduate levels. Subject to the approval of the provost, colleges may establish further restrictions on the application of credit awarded through the CEEL process.

A. Undergraduate Level

1. Admission Requirements: Only five percent (5%) of the total undergraduate admissions for any trimester may be admitted through the application of credit awarded through the CEEL process. Applicants may use
credit awarded through the CEEL process to meet, in whole or in part, the university requirement of 60 credit hours for admission. Applicants who, after evaluation of prior experiential learning, are not eligible for admission to the university will have a record of the evaluation kept on file. No credit will be awarded, however, until such time as they become eligible for admission, are admitted to, and enroll in a degree program.

2. **Degree Requirements:** A student may apply credit awarded through CEEL to the degree requirements specified on his/her study plan subject to the approval of his/her advisor and collegial policies.

**B. Graduate Level**

1. **Special Admission for Applicants without a Bachelor's Degree:** Up to one percent (1%) of the total graduate admissions for any trimester may be admitted, through the application of credit awarded through the CEEL process, to graduate degree programs with permission of the appropriate dean and of the provost. Such applicants will apply directly to collegial graduate degree programs and will be admitted if the credit awarded through the CEEL process is judged to be equivalent to that required of a baccalaureate degree holder.

2. **Degree Requirements:** Only five percent (5%) of the total graduate students for any trimester may be awarded credit through the CEEL process. A student may apply a maximum of eight credit hours awarded through CEEL to the degree requirements specified on his/her study plan subject to the approval of his/her advisor and collegial policies.

**C. Residency**

Credit awarded through the CEEL process may not be used to meet the university residency requirement of 24 credit hours.

**Grading Policy**

At the completion of the work for a course, a letter grade will be determined by the instructor. The method(s) of evaluation shall be described in the course syllabus.

The following letter grades shall be used:

- **A** - Superior performance
- **B** - Above average performance
- **C** - Average performance
- **D** - Marginal performance
- **F** - Failure
- **P** - Pass
- **NC** - No credit earned in a course taken under the pass/no credit grading option.

Other codes may be used to identify the status of the student in the course.

- **W** - Student initiated withdrawal
- **X** - Administrative withdrawal
In Complete
E - Extended incomplete
M - Grade missing at time of processing
R - Repeated course
V - A student may register as a "visitor" to a class during the add/drop period upon paying the required fee. The registration will not appear on the transcript. Registration requires instructor approval. All attendance and work is voluntary.

Degree programs may request to use the pass/no credit grading option for all students for a specific course if the giving of grades can be demonstrated as a problem for the learning environment. The request must be approved by a university-wide committee as designated by the governance system. These courses will not be included in the grade point average computation.

An undergraduate degree-seeking student may choose to take a graded course on a pass/no credit basis only if the course is an elective in the student's degree program. The maximum number of elective hours which may be taken on the pass/no credit basis is twelve (12). A graduate student may not elect the pass/no credit grading option for regularly graded courses which are used to fulfill any degree requirements. Grades shall be given by the instructor for students selecting this option and permanently recorded by the Registrar's Office. However, the grade will not be entered on the student's transcript but will be available if the student transfers to another degree program in which a grade is required. Courses taken on a pass/no credit option will not be included in the grade point average computation.

Any student wishing to change his/her grading option for a course(s) must do so by the end of the add/drop period for the trimester in which the course(s) is(are) offered.

The completion of coursework shall be within the following limits:

Incomplete—Upon written request by a student, an instructor may assign a grade of incomplete (I) to a student provided that reasons for the noncompletion of the coursework are acceptable to the instructor. The time allowed for completing unfinished coursework will be determined by the instructor but will not go beyond the twelfth week of the subsequent trimester.

Extension of Incomplete—A student may petition the instructor in writing for an extension of time beyond the time allotted by the instructor for the completion of unfinished work. An extension on the basis of extenuating circumstances beyond the student's control and/or for valid academic reasons may be recommended by the instructor subject to the dean's approval. The extension shall not go beyond the twelfth week of the subsequent trimester.

To be eligible for graduation, all grades of incomplete (I or E) must be removed by the graduation processing date.

After the deadline for submitting work has passed, an incomplete (I) or an extended incomplete (E) will become an "F" for graded courses and an "NC" (no credit) for pass/no credit courses.

Once a grade has been recorded on the student data base, additional work cannot be submitted to raise the grade. Furthermore, once a grade has been recorded by the
registrar, corrections may be made only as the result of either:

1. a formal grievance proceeding completed within the time lines set forth in the university grievance procedures; or

2. a grade correction petition approved by the faculty member, division chairperson, dean, and provost and filed with the registrar on or before the end of block 2 of the trimester subsequent to that in which the erroneous grade was given.

A student may reregister for a course. Upon completion of a repeated Governors State University course and upon filing a request with the registrar, the transcript will reflect the most recent grade for the course which will be included in the grade point average computation; grades for prior attempts will be replaced by an "R."

A graduate student must maintain a "B" (3.0) average to be in good standing. An undergraduate student must maintain a "C" (2.0) average to be in good standing. The academic standing shall be determined three times a year, after the deadlines for submission of grades for each trimester. Students cannot graduate if not in good standing. A student not in good standing for two consecutive trimesters while enrolled shall be suspended for academic reasons for one year. The grade point average will only be computed on the basis of A - 4, B - 3, C - 2, D - 1, and F - 0. These grades will be used to compute the grade point average.

An official transcript lists all coursework registered for, corresponding grades or status, and grade point average. Students who graduated before September 1979 or who have been continually enrolled since spring/summer 1979 may request a transcript listing only coursework completed.

Withdrawal Policy

1. Official Withdrawal from Courses
   A. A student may officially withdraw from any or all course(s) through the end of the tenth week of classes for any block 1 course or through the end of the fifth week in any block 2 or block 3 course by completing the official Governors State University Withdrawal Form, which must be submitted to the Registrar's Office on or before the specified deadlines. Specific dates for official withdrawal are to be published in the Catalog and in each trimester's Schedule of Classes and Information Bulletin.

   B. The registrar may officially withdraw a student from any or all courses consistent with established Board of Governors Regulations and university policies.

2. Academic Record
   Official withdrawals will not be included in calculating a student's cumulative grade point average or academic standing.

3. Refunds and Procedures
   Official student or university withdrawals will be subject to the university's tuition refund policy and withdrawal procedures, which are to be stated in the Catalog and Schedule of Classes and Information Bulletin.

4. Deadline for Withdrawals
   No withdrawals will be accepted after the specified deadlines, unless approved by the registrar. A student must petition for exception in writing to the registrar.
If the appeal is rejected, the student may appeal to the appropriate collegial dean/director.

Procedures for Withdrawal from Courses

Student Initiated Withdrawal from Courses
1. The request for withdrawal must be made in writing by the student by completing the withdrawal form available in the Registrar's Office.
2. Such withdrawals will appear on the student's academic record as "W."
3. A student receiving any form of financial aid who withdraws from a course(s) (partial or total withdrawal) must see a representative of the Office of Financial Aid for a review of his/her award.
4. A student who totally withdraws from all courses must have an exit interview with a designated representative of the Student Development Office. A student receiving any form of financial aid or who has an outstanding indebtedness with the university must also have an exit interview with a representative of the Business Office.

University Initiated Withdrawal from Courses
1. The registrar may withdraw a student from all courses for nonpayment of tuition and fees, written and verified notification of illness, disciplinary reasons, and for other reasons within established university policy.
2. The Registrar's Office will notify the Student Development Office, Business Office, Financial Aid Office, and faculty member(s) of the withdrawal as appropriate. The appropriate offices will contact the student regarding the withdrawal.
3. Such withdrawals will appear on the student's academic record as "X" (administrative withdrawal) and with an appropriate message, e.g., cancellation for nonpayment of fees.
4. Administrative withdrawals (X's) do not appear on the official transcript.

University Policy and Procedures on Student Records

The Family Educational Rights and Privacy Act of 1974 was signed into law by the president of the United States effective November 19, 1974. This federal law states that a written institutional policy must be established and a statement of adopted procedures covering the privacy rights of currently enrolled students be made available.

Governors State University wishes to comply fully with this law and, therefore, accords every student all the rights described under the Family Educational Rights and Privacy Act of 1974.

1. No one outside of Governors State University shall have access to nor will this institution disclose any information from a student's educational record without the written consent of the student, except to authorized personnel within the institution, to persons or organizations providing financial aid, to accrediting agencies carrying out their accreditation function, to persons in an emergency to protect the health or safety of a student or other persons, to officials of other institutions in which the student seeks to enroll, and to persons in compliance with a judicial order. All of the above listed exceptions are permitted under the Family Educational Rights and Privacy Act.
320  Appendix

Procedure
A. When Governors State University receives a request for disclosure of the educational record from officials of other institutions in which the student wishes to enroll or in compliance with a judicial order or a lawfully issued subpoena, the student will be notified of such a request by mail at his/her last known address. (Notice of Release of Student Record /FERP-7.)

B. When in the absence of a signed release from the student, any person, agency, or firm, other than the previously listed exceptions, requests disclosure of any student's educational record, the requester must file a formal request (Request for Release of or Access to Student Records /FERP-2). The Registrar's Office will forward a copy of the Request for Release of a Student Record to the student at his/her last known address. The Registrar's Office will withhold action on the request until the student replies to the request. (Consent or Denial of Request for Release of Student Record /FERP-3.) Upon receiving written instructions from the student, the Registrar's Office will communicate with the requestor. When any person, agency, or firm presents a signed release from the student allowing disclosure of information to the bearer, then the Registrar's Office will release the educational record without notification to the student.

2. Within the Governors State University community only those members individually or collectively acting in the student's educational interest are allowed access to the student's educational record. These include members from the following units: Office of the Vice President for Academic Affairs, Office of Admissions, Registrar's Office, Office of Financial Aid, appropriate collegial and program personnel, and other university personnel within the limitation of their need to know.

3. Directory information pertaining to individual students may be released by Governors State University at the discretion of the Registrar's Office. Governors State University includes only the following in the category of directory or public information: name, address, major field of study, participation in officially recognized activities, dates of attendance, and degrees and awards received.

A definition of directory or public information shall appear in the Catalog. Directory information shall never knowingly be disclosed for commercial purposes.

Procedure
A. All requests for disclosure of directory information must be made in person or in writing to the registrar.

B. During registration students are given an opportunity to notify the registrar that they do not want any directory information disclosed without prior written consent (Request to Prevent Disclosure of Directory Information /A&R Form 412). The request for nondisclosure of directory information will be honored by the university until otherwise notified by the student in writing.

4. Governors State University students have the right to physically inspect and review the information contained in their educational records. The review must be done in the presence of a university representative. Request for review must conform to the policies and procedures as established by Governors State (and where necessary, interpretation of the educational record can be provided by appropriate qualified university personnel). Original records may not be removed from any office where they are maintained.
Appendix

Procedure

A. Governors State University maintains the educational record in the Registrar’s Office, the College of Business and Public Administration, the College of Arts and Sciences, the College of Education, the College of Health Professions, the Board of Governors degree office, and the office of the dean of Student Affairs and Services.

B. Students wishing to review their educational records must present identification to the registrar, the appropriate dean, or director. (Request to Inspect and Review Student Records / FERP-1.) Only records covered under the Family Educational Rights and Privacy Act will be made available as soon as possible but not later than 45 calendar days following the request.

C. Students may have copies made of their educational record as permitted by law; however, certified copies will be provided only if there are no administrative holds on their record. Copies will be made at the student’s expense at the current rates established by the university.

5. Exceptions

A. Students may not inspect and review the following elements of the educational record: financial information submitted by their parents; confidential letters and/or recommendations associated with admissions, assessment of experiential learning, employment or job placement, or honors to which the student has waived his right of inspection and review; or an educational record containing information about more than one student, in which case the institution will permit access only to that part of the record which pertains to the inquiring student. Students are not permitted to inspect and review confidential letters of recommendation placed in the educational record before January 1, 1975 (provided they have not been used for purposes other than for which they were collected).

B. The educational record does not include records of institutional, administrative, and educational personnel, which are the sole possession of the maker and not disclosed or revealed to any other individual except a temporary substitute, records of the Department of Public Safety, student health records, employment records, or alumni records.

6. A student has the right to challenge the educational record on the grounds that its contents are inaccurate, misleading, or otherwise in violation of his/her privacy or other rights.

Procedures

To initiate a challenge to the educational record, the student shall, within 60 days after he/she has inspected and reviewed the record in question for the first time, file with the university office responsible for maintaining such records, a written request for a hearing or correction on the form specified by the university and provided by the Registrar’s Office (Request for Hearing on or Correction to Student Record / FERP-4). Within 30 days following receipt of such a request the head of said unit, or his designated representative, shall review the records in question and either (1) order the correction or deletion to the inaccurate, misleading, or otherwise inappropriate data as specified in the request, or (2) notify the student of the right to a hearing at which the student and other persons directly involved in the establishment of the record shall have an opportunity to present evidence to support or refute the contention that the data
specified in the request is inaccurate, misleading, or otherwise inappropriate. The student shall be given written notice (Notice of Hearing on, or the Correction of Student Record /FERP-5) of the unit head’s decision. If a hearing is necessary, the student shall be notified not less than ten days in advance. The student shall have the right to attend the hearing, be represented by another person, including a lawyer at the student’s expense, and to call witnesses in his/her behalf. The student shall be notified in writing (Notice of Decision in Hearing on Student Record /FERP-6) of the decision within ten days following the hearing. Such decisions are final.

If the decisions are unsatisfactory to the student, the student may place in the educational record statements commenting on the information in the records, or statements setting forth any reasons for disagreeing with the decisions of the hearing panels. The statements will be placed in the educational record, maintained as part of the student’s record, and released whenever the record in question is disclosed.

Students who believe that the procedures relating to adjudication of their challenge were unfair or not in keeping with the provisions of the act, may request in writing, assistance from the president of Governors State University. Furthermore, students who believe that their rights have been abridged may file a complaint with the Family Educational Rights and Privacy Act Office (FERPA), Department of Education, Washington, D.C. 20201, concerning the alleged failure of Governors State University to comply with the act.

Affirmative Action Policy

Governors State University recognizes and is fully committed to both its moral and legal obligations to provide equal opportunity to its employees as well as its students. Recognizing these obligations, the university will not discriminate on the basis of race, color, religion, sex, age, national origin, or handicap in any area of university employment or in services to its students. Furthermore, this university is pledged to the affirmative action process to ameliorate patterns of growth or employment which indicate under-utilization of members of minority groups and women whether in the faculty, the civil service, or among the students.

In addition to its legal and moral obligation to deal with persons as individuals, there is a strongly held belief in this university that the educational process is enhanced by a faculty, staff, and student body composed of persons from different ethnic groups, backgrounds, and experience. The Affirmative Action Plan explains more fully the university’s commitment and may be reviewed by all concerned in the University Library. The plan and its policies represent an attempt to foster provision of equal opportunity and affirmative action by the university in its roles of educator, employer, and purchaser of goods and services.

Auxiliary Aids Policy for Handicapped Students

Governors State University complies with its responsibility under Section 504 of the Rehabilitation Act of 1973 not to discriminate against handicapped students in its federally-assisted programs or activities. The following information is provided to explain auxiliary aids available to students admitted to the university.
1. Inquiries about resources to meet special needs should be directed to the Office of Student Development, through which the appropriate academic and service areas will be notified. Provision of such services will be based upon the individual student's need, campus resources budgeted and available, and existing academic requirements. However, if requests for auxiliary aids create an undue hardship on the university or necessitate a modification of academic standards, the request may be denied.

2. To be considered for auxiliary aids or other academic adjustments, the student must accede to and fulfill all of the following requirements:
   A. The student must be admitted to and/or enrolled in the university.
   B. The student must be handicapped and submit current evidence of the impact of this handicap on his/her access to learning in a specific learning environment, if so requested. If necessary, the student shall submit to any diagnostic procedures required to ascertain the student's eligibility for auxiliary aids.
   C. The provision of auxiliary aids is the primary responsibility of the State of Illinois Department of Rehabilitation Services (DORS). If the request for assistance is denied by DORS, Governors State University's provision of auxiliary aids will be based on a case-by-case analysis of an individual student's need and campus resources budgeted and available. Students should apply to their local department of rehabilitation services office at least three months before attending the university to allow time for DORS funds to be allotted.

3. Students who believe they will need assistance to participate in coursework should notify the Office of Student Development at least six (6) weeks before the first day of classes. Such notice is required to give the student and the various academic and service areas a reasonable period of time in which to determine whether the request is necessary for the student's participation in the coursework desired, to identify the resources for the necessary aid, and ascertain whether the requirements of Section II of this policy have been fulfilled.

Reasonable Accommodation for Students' Religious Observances Policy

Governors State University will not discriminate against students for observing religious holidays and will reasonably accommodate the religious observance of individual students regarding admissions, class attendance, and the scheduling of examinations and academic work requirements.

1. It is the responsibility of the student to notify in writing the GSU administrator/faculty member involved at least three class periods in advance of the date of the religious observance.
2. Accommodations considered unreasonable are those which would necessitate the modification of academic standards or create undue hardship on the university or its staff.
3. If a student feels he/she has been discriminated against, redress can be sought through the Student Grievance Procedure.
4. This policy must be published annually in the Student Handbook and the Catalog.
Sexual Harassment Policy

As part of the university’s affirmative action plan to ensure equal education and employment opportunity, the following sexual harassment policy has been adopted.

Definition

Sexual Harassment: any unwelcome sexual advance, request for sexual favors, and other verbal or physical conduct of a sexual nature when:

A. Submission to such conduct is made either explicitly or implicitly a term or condition of an individual’s employment or education;
B. Submission to or rejection of such conduct by an individual is used as a basis for academic or employment decisions affecting that individual; and
C. Such conduct has the purpose or effect of substantially interfering with an individual’s academic or professional performance or creating an intimidating, hostile, or offensive employment, educational, or living environment.

Policy

Governors State University will not tolerate sexual harassment of students or employees and will take action to provide remedies when such harassment is discovered. The university environment must be free of sexual harassment in work and study.

To eliminate sexual harassment, the university will distribute this policy to all units of the institution and will process complaints in the manner set forth below. Where sexual harassment is found to exist, appropriate disciplinary action will be taken.

Procedures

A. Consultation

Individuals who believe they have been sexually harassed may seek the counsel of a number of university units or offices. Each of these counseling sources can discuss alternatives, provide information, and act as a referral source to other units and offices. All discussions will be confidential.

1. Women’s Resource Center
2. Student Counseling Center
3. Deans, Division Chairpersons, Director of Personnel
4. Affirmative Action Officer

B. Conciliation

In addition to providing advice and information, the deans, division chairpersons, director of personnel, and affirmative action officer may undertake conciliation in an effort to resolve the complaint.

C. Using the Grievance Process

If individuals desire to pursue resolution of the matter beyond the conciliation stage, they should utilize appropriate and existing grievance procedures for claims of discrimination. The following guidelines apply:

1. The University Professionals of Illinois campus representative will receive complaints from faculty members in the UPI bargaining unit in accordance with the provisions of the grievance procedure specified by the UPI collective bargaining agreement.
2. The director of personnel will receive complaints from civil service employees who are not members of a bargaining unit in accordance with the provisions of the Civil Service Grievance Procedures.

3. The director of personnel will advise civil service employees who are members of a bargaining unit on the submission of complaints in accordance with the provisions of the appropriate collective bargaining agreement.

4. The appropriate vice president will receive complaints from administrative and professional employees in accordance with the provisions of the Professional Grievance Procedures.

5. The dean of student affairs and services will receive complaints from students in accordance with the provisions of student grievance procedures.

6. The affirmative action officer will receive complaints from individuals not covered by paragraphs 1 through 5 above.

Sanctions and/or Disciplinary Action

The university will take disciplinary action if, as a result of the complaint process described above, it is determined that sexual harassment has occurred. Disciplinary action shall include (but shall not be limited to) counseling, written reprimand, transfer, modification of duties, demotion, suspension without pay, and termination of employment.

Coordination and Implementation

Academic and nonacademic administrators work with the affirmative action officer to assure compliance with the provisions of the policy. Inquiries should be directed to the affirmative action officer.

Mary Eleise Jones  
University Professor of Communication Disorders, CHP  
B.S.Ed., Memphis State University, 1972  
M.A., Michigan State University, 1975  
Ph.D., University of Pittsburgh, 1980

Jay Kahn  
Associate Vice President, A&P  
B.A., Northern Illinois University, 1973  
M.A., Sangamon State University, 1976

Jeffrey Kaiser  
University Professor of Educational Administration, CE  
A.A.S., State University of New York, Buffalo, 1964  
B.S., State University of New York, Buffalo, 1966  
Ed.M., State University of New York, Buffalo, 1969  
S.E.A., State University of New York, Buffalo, 1972  
Ph.D., State University of New York, Buffalo, 1973

Marybeth Montgomery Kasik  
University Professor of Special Education, CE  
B.S., Southern Illinois University, 1973  
M.Ed., University of Illinois, 1978  
Ph.D., Southern Illinois University, 1983

Robert E. Kelley  
University Professor of Business Administration, CBPA  
B.A., University of Washington, 1948  
M.S.W., University of Washington, 1950  
Ph.D., University of Oklahoma, 1970

Thomas J. Kelly  
University Professor of Urban History, CAS  
B.A., John Carroll University, 1962  
M.A., University of Illinois, 1965  
Ph.D., University of Illinois, 1971

Joyce Kennedy  
University Professor of Communication, CAS  
B.A., Harris Teachers College, 1963  
M.Ed., St. Louis University, 1968  
Ph.D., Michigan State University, 1975

Young Y. Kim  
University Professor of Communication, CAS  
B.A., Seoul National University, Korea, 1969  
M.A., University of Hawaii, 1972  
Ph.D., Northwestern University, 1976

Mohammed Kishta  
University Professor of Science Education, CAS  
B.A., Moorhead State University, 1966  
M.S., North Dakota State University, 1968  
Ph.D., University of Iowa, 1974

Diane Kjos  
Outreach Counselor, Student Development  
University Professor of Counseling in Student Development  
B.S., Syracuse University, 1973  
M.A., Governors State University, 1974  
Ph.D., Loyola University of Chicago, 1980

Phyllis Klingensmith  
University Professor of Animal Physiology, CAS  
B.S., The Pennsylvania State University, 1979  
M.S., Ohio State University, 1981  
Ph.D., Purdue University, 1984

Louise T. Kohl  
University Planner, Academic Affairs  
B.A., Michigan State University, 1971

Ana C. Kong  
University Professor of Communication, CAS  
B.S., Far Eastern University, Manila, 1962  
M.S., University of Illinois, 1969  
Ph.D., University of Illinois, 1973

Daniel Kreidler  
University Research Associate, FA  
B.S., Governors State University, 1984

Rosemary Krol  
Librarian, UL  
University Professor of Library Science, UL  
B.S., Southeastern Massachusetts University, 1976  
M.L.S., Simmons College, 1986

Ralph Kruse  
Director, Instructional Communications Center  
University Professor of Television, ICC  
B.S., State University of New York, New Paltz, 1964  
M.A., University of Pennsylvania, 1965

Joyce Kennedy  
University Professor of Communication, CAS  
B.A., Harris Teachers College, 1963  
M.Ed., St. Louis University, 1968  
Ph.D., Michigan State University, 1975

Young Y. Kim  
University Professor of Communication, CAS  
B.A., Seoul National University, Korea, 1969  
M.A., University of Hawaii, 1972  
Ph.D., Northwestern University, 1976

William J. Kryspin  
Director, Institutional Research, A&P  
B.A., St. Mary’s College, 1964  
M.S., Purdue University, 1972  
Ph.D., Purdue University, 1974

Anthony Labriola  
University Professor of Television Production, ICC  
B.A., University of Illinois, 1972  
M.A., Ohio University, 1978
Joseph Lavely  
Dean, College of Business and Public Administration  
University Professor of Finance, CBPA  
B.S., Northern Illinois University, 1960  
M.S., Illinois State University, 1966  
Ph.D., University of Iowa, 1970

Michael D. Lewis  
University Professor of Psychology and Counseling, CE  
B.S., Eastern Michigan University, 1962  
M.A., Eastern Michigan University, 1964  
Ph.D., University of Michigan, 1969

Annie L. Lawrence  
Chairperson, Division of Nursing, CHP  
University Professor of Nursing, CHP  
Certificate Public Health Nursing, Loyola University of Chicago, 1952  
B.S.N.Ed., DePaul University, 1953  
M.S.N.Ed., DePaul University, 1957

V.K. Chris Liebscher  
Chairperson, Division of Economics/Marketing, CBPA  
University Professor of Economics, Management, and Urban Planning, CBPA  
B.S., Staatsbauschule, Munich, 1953  
M.S., Southern Illinois University, 1971  
Ph.D., Southern Illinois University, 1972

Otis O. Lawrence  
Director of Assessment and Coordinator of BOG B.A. Degree Program  
University Professor of Science Education, CAS  
B.A., University of Iowa, 1948  
M.S., University of Iowa, 1951  
Ph.D., University of Oklahoma, 1971

Robert Lawson  
University Professor of Marketing, CBPA  
B.S., University of Pittsburgh, 1967  
M.A., Indiana University, 1968  
Ph.D., State University of New York at Buffalo, 1974

James Lohman  
Assistant Registrar  
University Professor of Education, CE  
A.B., Washington University, 1953  
M.Ed., Harvard University, 1956  
Ed.D., Boston University, 1968

Daphne Lee  
University Lecturer, CBPA  
B.A., Spalding College, 1960  
M.A., Northwestern University, 1963  
M.A., Northwestern University (J.L. Kellogg Graduate School of Management), 1980

Norman Love  
Director, Department of Public Safety  
B.A., Chicago State University, 1974  
M.A., Governors State University, 1976  
Ed.D., Nova University, 1980

Grace Lefevbre  
Continuing Education Coordinator, SP&CE  
A.S., Thornton Community College, 1977  
B.A., Governors State University, 1979  
M.B.A., Governors State University, 1982

Benjamin Lowe  
University Professor of Education, CE  
B.A., University of Birmingham, 1966  
M.S., University of Wisconsin, 1968  
Ph.D., University of Wisconsin, 1970

Robert E. Lefthwich  
University Professor of Nursing, CHP  
B.S.N., Baylor University, 1963  
M.S., Northern Illinois University, 1970  
Ph.D., Clayton University, 1977

John Lowe III  
Dean, College of Health Professions  
University Professor of Communication Disorders, CHP  
B.S., Eastern Illinois University, 1964  
M.A., University of Illinois, 1966  
Ph.D., University of Illinois, 1969

Judith A. Lewis  
University Professor of Alcoholism Sciences, CHP  
B.A., University of Michigan, 1960  
M.A., Eastern Michigan University, 1963  
M.A., Eastern Michigan University, 1965  
Ph.D., University of Michigan, 1970

Jay Lubinsky  
Chairperson, Division of Communication Disorders, CHP  
University Professor of Communication Disorders, CHP  
B.A., Brooklyn College, 1967  
M.S., Brooklyn College, 1972  
Ph.D., Case Western Reserve University, 1977
Brian Malec  
University Professor of Health Administration, CHP  
B.S.Ed., Northern Illinois University, 1966  
M.A., Northern Illinois University, 1970  
Ph.D., Syracuse University, 1978

Zafar A. Malik  
University Professor of Management, CBPA  
Dip., Institution of Mechanical Engineers, 1955  
M.S., Union College, 1967  
Ph.D., Rensselaer Polytechnic Institute, 1974

James Massey  
University Professor of Health Administration, CHP  
B.A., McMurry College, 1963  
M.P.A., University of Missouri, 1969

Eileen Massura  
University Professor of Nursing, CHP  
B.S.N., DePaul University, 1963  
M.S.N., St. Xaviers College, 1971

David Matteson  
University Professor of Psychology and Counseling, CE  
B.A., Alfred University, 1960  
B.D., Colgate Rochester Divinity School, 1964  
Ph.D., Boston University, 1968

Dale F. Max  
University Professor of Business Administration, CBPA  
B.S., Wartburg College, 1966  
M.S., University of Wisconsin, 1968  
Ph.D., University of Iowa, 1972

Richard McCreary  
University Professor of Composition and Electronic Music, CAS  
B.S., Florida A & M University, 1966  
M.A., Southern Illinois University, 1970  
Ph.D., University of Iowa, 1974

William P. McLemore  
University Professor of Education, CE  
B.S., Kent State University, 1957  
M.Ed., Kent State University, 1963  
Ph.D., Northwestern University, 1971

Douglas McNutt  
Assistant Director/Coordinator of Veterans Affairs, Financial Aid  
B.A., Governors State University, 1977  
M.A., Governors State University, 1979

Cheryl Mehta  
University Professor of Alcoholism Sciences, CHP  
B.S., Bradley University, 1973  
M.A., Bradley University, 1974  
Ph.D., Illinois Institute of Technology, 1981

Jon E. Mendelson  
University Professor of Environmental Science, CAS  
M.A., University of Wisconsin, 1968  
Ph.D., University of Wisconsin, 1972

Sheldon Mendelson  
University Lecturer, CBPA  
B.S., Rochester Institute of Technology, 1962  
M.S., Syracuse University, 1967  
Ph.D., Colorado State University, 1974

Daniel Mendoza de Arce  
University Professor of Latino Studies, CAS  
Ph.D., University of Uruguay, 1969

Sandra Mensch  
Continuing Education Coordinator, SP&CE  
B.A., Hunter College, 1958  
M.A., Governors State University, 1978

John H. Meyer  
University Lecturer, CE  
B.S., Findlay College, 1971  
M.Ed., University of Toledo, 1976

Emil Milacek  
University Professor of Accounting, CBPA  
B.A., University of Maryland, College Park, 1972  
M.B.A., University of Maryland, College Park, 1973  
Ph.D., North Texas State University, 1986

C. Edward Miller  
University Professor of Life Science, CAS  
B.A., Northern Illinois University, 1966  
M.A., Northern Illinois University, 1969  
Ph.D., Northern Illinois University, 1972

Donald W. Miller  
University Professor of Economics, CBPA  
A.B., Indiana University, 1964  
M.B.A., Roosevelt University, 1969  
Ed.D., Northern Illinois University, 1978

Irwin Miller  
University Professor of Health Administration, CHP  
B.A., New York University, 1966  
M.A., The University of Chicago, 1970  
M.P.H., University of North Carolina, 1973

B.A., University of Nevada, 1967
Ph.D., University of Nevada, 1971

Bonnie Winkofsky
Assistant Director of Student Life, SAS
B.A., Governors State University, 1983

Lonn A. Wolf
University Professor of Psychology and Counseling, CE
B.A., The University of Chicago, 1970
M.S., Yale University, 1973
Ph.D., Yale University, 1973

Peggy G. Woodard
Outreach Counselor, Student Development
University Professor of Counseling in Student Development
B.A., Southern Illinois University, 1973
M.S.E., Northern Illinois University, 1979

Addison Woodward
Chairperson, Division of Psychology and Counseling, CE
University Professor of Psychology, CE
B.S., C.W. Post College, 1964
M.A., Connecticut College, 1966
Ph.D., University of Toronto, 1968

William S. Yacullo
University Professor of Communication Disorders, CHP
B.S., Elmhurst College, 1974
M.A., Northwestern University, 1976
Ph.D., University of Iowa, 1982

Leon J. Zalewski
University Professor of Science Education, CE
B.S., California State College, 1965
M.Ed., Indiana University of Pennsylvania, 1969
Ph.D., University of Iowa, 1974

Pamela Zener
Learning Assistance Center Counselor, CLA
B.A., Indiana University, 1969

Carl Ziemann
University Lecturer, CBPA
B.S., Case Institute of Technology, 1954
M.B.A., University of Illinois, Chicago, 1982

Linda K. Ziemann
University Professor of Nursing, CHP
B.S.N., Ohio State University, 1962
M.S.N., Governors State University, 1978
State of Illinois Board of Higher Education

William B. Browder, Chairman, Lincolnshire
Diego Redondo, M.D., Vice Chairman, Deerfield
Warren H. Bacon, Chicago
Rey Brune, Moline
Carol K. Burns, Peoria
William S. Campbell, Ashland
Nancy Froelich, Hudson
John Gilbert, Carbondale
George W. Howard III, Mt. Vernon
Rise Jones, Urbana
Carol C. Lohman, Springfield
David J. Paulus, Chicago
Robert Powers, Decatur
Jane Hayes Rader, Cobden
Harris Rowe, Jacksonville
Jane T. Williamson, Kenilworth

Alternates
David Agazzi, DeKalb
James Althoff, McHenry
Toussaint L. Hale Jr., Chicago
Carol Kimmel, Moline
Ann E. Smith, Chicago
Harry L. Wellbank, Crystal Lake

State of Illinois Board of Governors of State Colleges and Universities

Nancy Froelich, Chairperson, Hudson
Thomas D. Layzell, Chancellor, Springfield
James Althoff, McHenry
Dominick J. Bufalino, Norwood Park Township
Lowell Fisher, Fairview
William Hoffee, Fairfield
Evelyn Kaufman, LaSalle
Robert Ruiz, Chicago
Wilma Sutton, Chicago
D. Ray Wilson, Dundee

Student Board Members
Eddie Kemp, Chicago State University
Michael Ashack, Eastern Illinois University
Larry Lulay, Governors State University
Tom Shaw, Northeastern Illinois University
Stephen Eckhart, Western Illinois University
Campus Map

Individual wings of the main building, offices, and classrooms have letters and room numbers. To locate an office or classroom, first note the letter designation (A-F) which indicates the wing of the building. The wings and rooms contained therein are color coded to help identify their location: A-red, B-orange, C-yellow, D-green, E-blue, and F-purple. The first numeral indicates the floor and the remaining numerals the room number. For example, D2105 would be in D Wing (green background on signage) on the second floor.

The outline of the main building below indicates the location of the individual wings.
