NORTH CENTRAL VISITING TEAM...will be here Monday, Tuesday, and Wednesday, December 11, 12, and 13. JERRY BAYSORE is scheduling specific meetings, but the members of the team will be spending time visiting throughout the University, gathering data for their recommendations. This distinguished team represents a variety of areas of expertise and this will, undoubtedly, be reflected in their many areas of concern. Both the viewers and the viewees will find this visit interesting.

WATCH THE ROAD...and remember to use the new access road to the permanent site if you are going to the Planning Building or Hantack House. JOHN MINDER of B & PO indicates that the former access road is now in such a poor state of repair that it is being closed. The new road is 1,000 feet east of the old farm lane.

JAZZ CONCERT...will be held on the Commons at 8:15 p.m. on Wednesday, December 13. The College of Cultural Studies invites everyone to attend the concert of the GSU Jazz Ensemble. Featured will be both traditional and Big Band compositions. In addition, the concert represents the premiere of the Studio Reading Ensemble, a small group of advanced musicians who perform in straight rock, hard jazz, avantgarde and electronically produced sound.

STUDENT SOLVES PROBLEM...of communication through the use of graphics. JULIE HOPKINS (CCS student and a cooperative education student in ICC) has produced a unique solution called a "Bagalog." The problem lay in the many functions performed by the ICC and the uncertainty the University staff had as to procedures and personnel to contact. The "bagalog" provides an attractive, inexpensive way of providing the necessary information at one's fingertips.

COLLEGE INSTRUCTION: 10 MAJOR MYTHS...

"...we act as if these things were true:

1. That the specific knowledge acquired by the student is related to the long range educational goals that exist in the mind of the instructor.
2. That the aptitudes, achievements, and backgrounds of the students in a classroom are approximately equal.
3. That aptitude is more important than previous achievement for the attainment of knowledge.
4. That all people learn in the same way and take approximately the same amount of time to learn the same thing.
5. That listening to lectures and reading books are powerful means for changing student behavior.
6. That students retain knowledge without requiring much review and relearning.
7. That course grades tell us what a student knows and can do.
8. That a college professor is, by virtue of the title, a good professor of knowledge.
9. That teaching is an art that requires no tools and no underlying technology.
10. That the structure imposed upon knowledge by a discipline is the best structure for transmitting that knowledge to students."

BUSY WEEKENDS...around the University, it's now difficult to decide by the parking lots whether it's a week day or a weekend. The last CHLD Sunday Evening Drop-In had a record 125 people in attendance. At least 60 people participated in the first of the two Human Sexuality Workshops offered this Session. In addition to regular classes on Saturday, there are also the creative dramatics classes offered for children.
