GSU students honored for documentary

By Katrina Adams

GSU students, Seth McClellan and Liz Fruth, achieved excellence at the Education Channel’s 2006 Independent Film Festival. The documentary ‘Fading,’ received outstanding honors along with the number one spot for the category of student documentaries.

‘Fading,’ directed by Seth McClellan and edited by Liz Fruth is an emotional documentary of a family’s life after a tragic car accident. The film consists of intimate interviews from family members that were affected by the mother’s traumatic brain injury.

‘Fading’ allows the audience to view the effects of a tragic family crisis from the perspectives of a mother, father, and son.

The documentary’s creators illustrate and explain the emotions that follow a life-changing situation.

The motivation behind McClellan and Fruth’s production of ‘Fading,’ was to provide hope and encouragement to others that have or may experience a similar life-changing situation.

McClellan and Fruth are now collaborating on a documentary about the life of Dr. Martin Luther King Jr. This documentary will explore the different dimensions of Dr. Martin Luther King’s life as a civil rights leader, father, friend, and as a regular person.

You’re excited about working on their new documentary because this year marks the 40th year anniversary of the Chicago Freedom Movement.

Fruth attended the ceremony and accepted prestigious plaques along with the honor of having a clip of ‘Fading’ shown at the Film Festival ceremony.

The documentary aired in its entirety on Tampa’s very own Education Channel. Succeeding the award ceremony, Fruth attended a brief Q & A session regarding the trials and tribulations that lead to ‘Fading’s’ success.

Fruth stated that “the success of the documentary ‘Fading’ would not have been made possible without the support and professional advice of GSU Communications professor Daniel Nearing.”

McClellan and Fruth are now collaborating on a documentary about the life of Dr. Martin Luther King Jr. This documentary will explore the different dimensions of Dr. Martin Luther King’s life as a civil rights leader, father, friend, and as a regular person.

They are excited about working on their new documentary because this year marks the 40th year anniversary of the Chicago Freedom Movement.

University welcomes new international professors

By Elyse Burke

The College of Arts and Sciences has several new faces and accents this semester as new professors from around the globe join the faculty. Among the new international faculty are: Sanghoon Lee from South Korea, Bastien Desfriches Doria from France, and Dingbang Xu and Xiaoyong Chen, both from China.

Sanghoon Lee teaches Video Production Editing, Bastien Doria teaches digital photography, Dingbang Xu is in Computer Science and Xiaoyong Chen is a professor in the Biology Department.

Sanghoon Lee, originally from South Korea, immigrated to the United States with his wife six years ago. He began attending the Art Institute in Chicago 1999 and graduated with his Master’s in Fine Arts degree in 2002.

After completing his degree, Sanghoon’s first teaching position was part-time at the Art Institute. He taught some production classes while still pursuing a career in the film industry.

Professor Lee joined the ranks of full-time faculty at GSU this semester and he is teaching a video production editing class and a block 5 media workshop. He chose Governors State University because it was close to Chicago and a film project he is currently working on.

“When I first applied for the teaching position, it was perfect for me. I can work in my profession and still teach,” Lee said.

The diversity of the school was also a factor. He enjoys the different ranges of students, young students and working adult students, different cultures and races. He also noted that this is the perfect setting to develop his teaching style.

His family is truly his inspiration for getting involved in the film industry, however. “I believe filmmaking is innate inside me. I was born thinking of film. And my family nurtured that inside me,” Lee said.

He nostalgically recounted how when he was a young boy in South Korea, he and his family would watch movies together on Saturday and Sunday nights. It was something they enjoyed together.

His older sister was also influential in his decision to get involved in the film industry. He would spend hours listening to her stories of her career as an assistant director to the famous Korean Director Im Kwon-tak. She would amaze him with the stories of the different elements of filmmaking: the actors, sets, and technology.

“I first applied for the teaching position, it was perfect for me. I can work in my profession and still teach,” Lee said.

He would spend hours listening to her stories of her career as an assistant director to the famous Korean Director Im Kwon-tak. She would amaze him with the stories of the different elements of filmmaking: the actors, sets, and technology.

While teaching is very rewarding for him, Professor Lee does not hesitate to say that he does face some daily challenges. Everyday language is one of those challenges.

“In the film industry, communication and words are limited; it is my job to not say a lot. But with teaching, my words are my teaching media.” Lee’s goal is to learn perfect English in the next two years. If he had one piece of information to convey to students in the film/media field it would be, “Don’t worry so much about the future, make something by yourself. If you are interested in this field then see what happens. Don’t be scared, learn what you can.”

Another international faculty new to GSU is Professor Bastien Desfriches Doria. He teaches a digital photography course. Doria, originally from France, came to the U.S. as an international foreign exchange student in 1999 to pursue a Master’s Degree in Information and Communications Science.

After spending some time here and casually exploring an interest in photography with a make-shift developing lab in his bathroom, he decided to change his career path.

“You can’t study art in France, and the U.S. is a great place to study art and photography, there are so many wonderful opportunities here,” he said.

Professor Doria chose GSU for very specific reasons. “I love the fact that the student community is so mixed and diverse,” he stated. After teaching only four weeks he said he is amazed at the motivation and enthusiasm students exude on a daily basis.

Doria also acknowledges the daily challenges to teaching in English. “It takes a lot of energy to speak in English when it isn’t your primary language. At the end of a class I am exhausted from just speaking. But I guess it is common for any foreign person in any country.”

There are wedding bells in Doria’s future. He and his fiance plan on getting married in France next summer. She is also French, studied photography in the same program as he, and is a teacher as well.

Professor Xu is an assistant professor of Computer Science. He received his B.S. in Huazhong University of Science and Technology and M.S. in Tsinghua University. Both are in China. He received his Ph.D. in North Carolina State University in 2006.
GSU offers first doctoral program

By Robert Wolff
Editor

In Rebecca Wojcik's office, there is an orange folder nearly bursting at the seams. It's filled with advertisements and offers for the Governors State University physical therapy professor to work at various clinics and hospitals.

"The changing demographics point to the huge need for physical therapists," stated Wojcik.

"I'll get one phone call or one email in addition to the four notices I get in the mail from people wanting me to work for them."

Now, GSU students interested in physical therapy can take advantage of this demand with the university's first ever doctoral program. Courses for a clinical doctorate in Physical Therapy will be offered starting in the 2007 Spring/Sumer trimester.

"It prepares people for practice in physical therapy at the entry level," Wojcik stated.

"It prepares students to take the national examination to become entry level physical therapists."

She describes the discipline as very "hands on," explaining physical therapists examine and test patients to find, mechanical, development and physiological problems and work to fix them.

"Physical therapists also work on preventive practices, including injuries from overuse, actions which might cause chronic pain, patient education and promoting exercise."

Despite the high demand, however, the move for a doctoral program had more to do with the changing nature of the profession according to both Wojcik and GSU Physical Therapy Professor David Diers agrees.

"The profession itself is converting from a master's degree to a doctorate, so we [at GSU] are following in that direction," said Diers, who is also the admissions and advising counselor for those seeking entry into the program.

In 2000, there were only 19 doctoral programs in Physical Therapy, with 184 being master's programs. In 2005, Wojcik says those numbers "were virtually flipped."

"The program will be 119 credit hours and will take 8 and a half trimesters for students enrolled. The classes are set in a sequence and don't have the same options to take certain classes at various times."

Students will work with up to seven faculty members, not including a physiologist and an anatomist. "This is truly an outstanding faculty," stated Dr. Russell Carter in GSU's College of Health Professionals 2006 Annual Health Report. Carter, chair of the Physical Therapy department, went on to add, "They've grown with the program, earning degrees and certifications. They've conducted first-rate research and presented it nationally and internationally."

"They've become wonderful mentors to students and role models as well."

For more information about this program, contact Dr. Diers at 708-235-2232.

From campus crud to earthly treasure

By John Conrad
Contributing Writer

Governors State University (GSU) has seen an 83.3 percent reduction in garbage output since it started recycling in 1987.

The average GSU student produces .0183 tons (or 36.6 pounds) of refuse on campus every year, according to a 2006 waste audit. This adds up to a total of 124.4 tons of garbage produced by GSU annually.

However, most of this waste is not merely wasted, as the university recycled 62.8 tons of garbage last year alone. That's over half the total refuse produced.

"Its really good we're recycling more than we dispose of," stated Margaret Schiesher, who runs the Physical Plant Operation's (PPO) recycling program at GSU.

GSU started with an unofficial recycling program in 1987, which essentially consisted of depositing aluminum at a recycling facility. Then, due to a state mandate, GSU was required to reduce their waste by 40 percent and they called in the experts.

In 1995, Becker Associates, an Environmental Consulting Firm, was called upon to formulate a waste reduction plan for GSU. Although the state allotted five years for the decrease, GSU tackled it in three and has been exceeding the mandated 40 percent since 1998, according to Schiesher.

Items Governors State recycles include newspaper, cardboard, tin and aluminum cans, and plastic bottles. Keep reading your textbooks though, because the university does not recycle hard cover books. Another current non-recyclable is glass, but Schiesher is hopeful about including it in future recycling efforts.

"We find a lot of trash in the blue bins," commented Schiesher on a problem the recycling program faces. She would like to remind students to be sure their waste is disposed of in the proper receptacles in order to avoid problems surrounding sorting the trash.

McNair Scholarship reaches out to more GSU students

By Denise Guzman
Contributing Writer

The McNair Scholars program here at GSU offers more than help when it comes to students. The program, which was established in 1989, was done in remembrance of Ronald E. McNair, who was the first African American astronaut. McNair is a Post-Baccalaureate Program that helps first generation students who are financially disadvantaged, and students who are underrepresented from different backgrounds.

The purpose of the program is to have students continue to pursue college degrees.

"In a couple of years a bachelor's degree will be seen as a high school diploma, that's why we encourage students to 'want more,' and to get a degree as a doctorate," said Viola Gray, coordinator of the McNair program.

The program, which lasts two years, prepares students with academic advising in preparation towards the studied research that is being conducted.

The program not only motivates students to continue to pursue higher degrees, but also encourages them to be the best.

"You can do it, you can do anything you set out to do," McNair Scholars persevere," said Gray.

Students are paired with a faculty mentor, they receive guidance as to what research topics are available, and students can choose all options that are given to them, but if they have their own research topic they are more than encouraged to use their ideas.

"Students also benefit in different ways, the requirements are the same for the honors program, so you can kill two birds with one stone," said Gray.

This year was special because it was the first year that a GSU student won an award at the McNair Scholars Research Conference in Nashville, Tennessee.

Joseph S. Brown Jr. bought the award to GSU. "It's been a really good deal for us," says Gray.

"I have had students postpone graduation because they wanted to finish program," she added.

Another student returned to GSU because he was hit with the academic bug. "I realized how McNair can prepare me," said one criminal justice major.

The McNair Scholars Program is open to all areas of concentration. For more information you can contact Viola Gray at 708-235-3967.

GSU to hold 'All Majors Career Fair' Oct. 24

Press Release

The Office of Career Services at Governors State University will host an "All Majors Career Fair" on Tuesday, October 24, from 1 p.m. to 4 p.m. in the university gymnasium.

The career fair is open to GSU students, students from other colleges and universities, and members of the community.

"We're throwing the doors wide open," said Dr. Jim Howley, director of Career Services for GSU. "If you're looking to network, this is the place to be."

Howley said the career fair is an "all-majors" fair because opportunities for employment will be available to job-seekers no matter what their academic degrees or backgrounds might be.

"We have over 35 employers who will be represented at the fair," Howley said.

"There will be opportunities for job-seekers to meet employers from education, law enforcement, government, retail, healthcare, insurance, and banking, just to name a few."

Howley's best advice for job-seekers attending the All Majors Career Fair? "Dress in business attire. And bring lots of resumes."

Governors State University is located at 1 University Parkway in University Park. For information about the career fair, contact the Office of Career Services at (708) 235-3974, or e-mail career@govst.edu.

GSU responds to increased spending

Press Release

With increased competition in today's crowded marketplace, many organizations are spending more on improving their employee development and leadership training.

Governors State University's College of Business & Public Administration and School of Extended Learning have responded to the increased need for professional training by offering a graduate Certificate in Leadership & Organizational Development. The program will be offered at the Kankakee Education Center beginning with the Winter 2007 trimester.

This certificate is designed to prepare managers for leadership positions in public and private organizations. Students will be required to complete three courses totaling nine credit hours. Those courses are Foundations of Management & Marketing, Organizational Behavior in the Global Context, and Leadership Dynamics.

In addition to fulfilling the certificate requirements, two of the courses can also be applied toward the Master of Business Administration (MBA) degree program at Governors State University.

"The program provides managers with coursework that they can immediately apply in their current positions, provides them with a professional certificate, and gives them a taste of our MBA program as well," said Barbara Davis, liaison for the School of Extended Learning.

"We find that many students move on to pursue an MBA after completing a Certificate in Leadership & Organizational Development," added Davis.

The certificate can be completed at the university's Kankakee Education Center located in the Clock Tower Centre, 187 S. Schuyler Avenue, Kankakee, IL. For additional information, contact the School of Extended Learning at 708-534-4099, or visit www.govst.edu/apply/ctcert.htm.

Doctorate in physical therapy open house

Press Release

The College of Health Professions at Governors State University is hosting an open house on Thursday, October 10, from 4:30 to 7:30 p.m. to discuss the new Doctorate of Physical Therapy program. Advisors and professors will be on-hand to answer questions about this new degree program, review transcripts, and discuss the admissions process. Refreshments will be served.

The Open House will be held in Room D3400 on the University's main campus, 1 University Parkway, University Park. For more information, call Dr. David Diers, (708)-235-2232, or e-mail d-diers@govst.edu.

Childhood toys lead to creative arts

Press Release

At first, it may seem like a nostalgic trip into the toy box of childhood, but a closer look at artist Jerry Slowik's work reveals textures and digital manipulations that recreate the instant and impact of imagination in both children and adults.

At an opening reception on October 19 from 7 to 10 p.m. and during an exhibit that continues through October 30, Slowik's artwork will be on display at the Visual Arts Gallery at Governors State University.

Toys with wheels have long fascinated Slowik of Bourbonnais. His childhood joy in vehicles grew as he did and as he grew as an artist. As a student at Olivet Nazarene University in Kankakee and later as a professor there, Slowik has continued to merge his love of model cars with his art. His current exhibit captures the nostalgia of objects reminiscent of childhood. He hopes it will excite memories of those joyful times in observers of his art.

The Visual Arts Gallery is located in E-Wing, Governors State University, 1 University Parkway, University Park. The Gallery is open Monday through Thursday from 11 a.m. to 4 p.m. and is free and open to the public. For more information, call (708) 534-4021.

Palos Hills, IL 60465
North Carolina Central University is one of 3,900 U.S. colleges and universities that report to this database. Under the system, schools will work closely with immigration officials to make sure that foreign students remain in school and that they are not national security risks. "There have been cases where foreign students with student visas do enroll and drop out of school and never come back," said Emma C. Mosby of the university's Student Learning & Counseling Center. "And some don't even enroll at all." Participating schools supply federal immigration offices with names, addresses, majors and information on disciplinary action taken against visiting students, as well as a record of any classes they drop. Failure by a foreign student to enroll and take a full load of classes may result in the student being deported. Mosby said that her work not only helps the national security, but benefits the foreign students. "I will be the mother figure to the foreign students," said Mosby. "I will know what they will be doing. If I want to see any one of them, I should know where to find them. Just I have to know." Mosby said that her monitoring is not an invasion of privacy. She said she is working very hard to compile information on students and hopes to furnish immigration officials with all the required information by the end of April. Mosby said that she is going to have meetings with foreign students soon to clarify what the system calls for. She said that her door is open to all foreign students who want information on the system. Mosby has appealed to foreign students not to visit their home countries before talking with her, because they face the risk of being denied re-entry. Junior physics major Ibrahim Cisse of Niger, the president of North Carolina Central's International Students Organization, said he understands why the U.S. government is tracking foreign students. Besides, there's nothing he can do about it. "I am not comfortable with a situation where I am tracked all the time, but I understand why the U.S. government is fighting terrorism," said Cisse. "I don't vote in the American elections, so I feel that the American people are the ones who should have a say on what their government does. I value the American education."
An impressive cast and script drives this crime thriller to the brink with gritty action and dialog that pulls no punches. Set in Boston’s recent past, Jack Nicholson rules the town with a heavy fist as an Irish mobster. He takes a young man under his wing and starts to mold him into his future spy. Matt Damon plays this young man who is a rising star in the FBI. At the same time, Leonardo DiCaprio, who comes from a troubled home where his father worked under Nicholson, is in training to become a cop. DiCaprio is secretly ordered to go undercover and get close to Nicholson as they can finally arrest him after many years of alluding conviction. Damon and DiCaprio take center stage in this rat-hunting-rat tale while Nicholson steals the show as the eccentric and wildly dangerous Frank Costello.

Beyond the three main characters, Martin Sheen, Alec Baldwin, Mark Wahlberg, Vera Ferrigna, and Ray Winston flesh out the movie and are just as excellent as the main attractions. This has one of the best ensemble casts since Ocean’s Eleven. Also much like that movie, the script was very sharp from beginning to end. The interactions between these characters were so real and pure that it felt like I was watching reality TV, and actually enjoying it. One draw back was a slow down after one of the more important events in the film. Without giving anything away, it was obvious where the next step was but the movie took some time getting there. This was a phenomenal movie. The acting was superb and the action was just as hard and furious as the script. 4 ½ stars out of 5 – Mike Kurnat

Thomas Kyles from the Student Life department shows some support for the Chicago Bears with this pencil on paper drawing.

To have your photo, painting, cartoon, drawing, poem, song, or short story featured in the Art Ark, please submit your work with caption to the Phoenix by stopping by the office in E1500 or email your submissions to phoenix@govst.edu

20 Questions with...

What's your name? Adelle Sanders.
What do you do at GSU? I'm the director of the Bachelors of Social work program and am part of the faculty in social work.
How long have you been at GSU? Since August, 2002.
What got you interested in social work? I came to social work as a result of my activism in the 1960's. I've had many experiences that created a passion for social justice.
What's your favorite color? Red.
If we were to look through your music collection, what would we find? You'll find a lot of jazz, a lot of blues, Christmas music done in the jazz and blues style, and American Indian music.
What's your ideal vacation? I just went on one. I went on a cruise to the Virgin Islands, from Puerto Rico. From there I also went to Dominica, Barbados, and Aruba. It's something to get away from work and enjoy music, people and culture.
What's the last good book you read? Oh, it's been a while since I read a book for social pleasure. I read so much technical stuff, but I read the whole Maya Angelou collection. It was outstanding.
Last good movie you saw? It would be Whale Rider.

Crossing cultures; traveling abroad

By Edie Imoge
Contributing Writer

In this time and age, it is striking to find out that a huge amount of everyday Americans, ranging from students to professionals, are hardly aware of the world outside of their own.

According to a 2005 household study report prepared for the Canadian Tourism Commission, 34 percent of the American population own American passports—an attestation to the notion that very few Americans travel out of the country.

Traveling abroad presents a challenging and exciting learning experience with endless benefits. It prepares one to deal with the demands of daily life.

From Asia to Africa, and the rest of the continents, each stands as its own with a wide variety of values, culture, beliefs, lifestyles, different forms of transportation, currency, job opportunities, and so forth.

International travel leaves life-changing effects upon you and exposes you to new societies, cultures, food, and social situations. It provides an intense sense of self-discovery at the same time that it is an opportunity to learn lessons learned from the experience.

Different systems operate under different structures and it becomes fascinating as you learn to adjust to a life outside of your own. This experience expands your horizon as one begins to gain a new orientation for understanding the world and his or her role in it.

It gives you the opportunity to become an independent thinker as you find a sense of self, respect, and tolerance for these different and colorful cultures; some of which are not as flamboyant, developed, or wealthy as the American society, but still rich in its every essence.

During the course of my travels to Europe, Africa, and Asia, it comes as a surprise to realize the amount of information the people from these outer worlds have got on us. They take the time to travel and experience our world more than we take advantage of our freedom.

We cannot afford to depend alone on what kind of education the media has to offer us. We must take the time to find out for ourselves. It doesn’t take much. Fear of stepping out of our comfort zone only leaves us at a huge loss and in a more state of ignorance.

It is essential that we take the time to educate and equip ourselves for the world outside of ours. It is highly beneficial that we open our minds to learning new ideas and ways of living from these other worlds in an attempt to embrace and create profound respect for these “others.”

Moreover, it is just about time we change the minds of the outside world who view America as an insular nation. These people do not bite. They are just as normal, accepting, and as friendly as we Americans are.

North Korea's actions fall short of goal

By Susie Penman
Daily Mississippian (U. Mississippi)

Imagine a country slightly smaller than Mississippi. Now put slightly more than 23 million people in it—arm it with nuclear weapons, make it angry and you have, in essence, North Korea.

The country, which has long caused tension to the rest of the world much concern with its development of nuclear weapons, said it tested its first atomic bomb in an underground explosion Monday morning.

Though the test, which was detected on seismometers all over the world, produced a relatively small blast and might not have been a nuclear one, its significance lies in North Korea's tendency to ignore the advice of the rest of the world, a fact evident in its blatant denial to listen to the recommendations, threats and requests of the U.N. Security Council.

"I think the North Korean test gives additional evidence that the Bush invasion of Iraq has been a huge mistake," said Peter Frost, a visiting professor of history and a senior research associate in the Croft Institute.

"Initially, it made countries like North Korea and Iran even more anxious to get nuclear bombs to protect themselves. Now, because we are badly bogged down in Iraq, countries like North Korea and Iran have been emboldened." and

While North Korea’s actions are technically unprovoked, what they will do, but I do think that they will cut their non-humanitarian aid somewhat.”

According to the CIA World Factbook, North Korea is currently suffering through its 11th year of food shortages because of a lack of good farmland, farming practices, and shortages of tractors and fuel.

The factbook also stated "long-standing military spending eats up resources needed for investment and civilian consumption," a crucial fact, seeing as the possible withdrawal of South Korea's aid might put the country in dire economic straits.

"It could have dramatic effects on the region," Shannon said, adding that she thought China would take some punitive measures if the explosion proved to be nuclear.

But the question of how the world will respond to the country's behavior is one that has yet to be thought about, especially since it seems hard for countries to balance the delicate issue of how to be firm without provoking North Korea.

Another question is whether or not the potentially nuclear tests are as much a threat as they are an attempt at bolstering national pride in North Korea.

"Yes, it's working politically, but not economically," Frost said of the tests. "North Korea will get the attention and security that it wants, but not the economic aid that it so badly needs.

There before me was nothing more than a crater, an exposed subway station, a construction site, earth and steel, and on that unusually warm October day, as I peered through the chain link fence, I realized that time truly does heal all wounds.

Like Ground Zero will be rebuilt, new skin will grow over old wounds, and while things may never look quite the same, the truth is that times change, life goes on, but life can also end in a heartbeat.

No more missed opportunities, no more unspoken words; it is time to start living, instead of dying.
**Capitol Steps**
Saturday, October 21, 2006, 8 p.m.
Center for Performing Arts, GSU
The famous congressional staffers-turned-comedians return to The Center this election season to poke fun at familiar figures through skits and songs in this night of politically hilarious fun. Tickets range from $34 to $43.

**GSU Communication Degree Info Session**
Thursday, October 19, 6 p.m.
Kankakee Education Center, 187 S. Schuyler Ave., Kankakee, Rm. 310
GSU will hold an information session for the Bachelor of Arts in Communications program. A degree in Communications opens doors for work in advertising, public relations, counseling, customer service, sales, human resources and training, media management, media writing and public affairs. This session is free and open to the public.

**5th Annual Harvest**
Friday, October 27, 5:30 - 8:30 p.m.
GSU Cafeteria Annex
Join GSU faculty, students and other staff for food, games, prizes, music and fun! Free admission. Sponsored by the Student Senate.

**Distinguished Lecture Series, Chris Gardner**
November 2, 2006, 5 p.m.
Sherman Recital Hall
The College of Arts and Sciences presents Chris Gardner, CEO of Gardner Rich & Company, a multi-million dollar brokerage firm, to discuss his journey from homeless single father to self-made millionaire. His story comes to the big screen in December 2006 with actor Will Smith portraying Gardner. This event is free and open to the public. For more information, call Sherre Sanderson at 708-228-3856, or contact her at s-sanderson@govst.edu.

A gripping memoir by a university professor in totalitarian Iran who loses her freedom to teach, yet clings to her identity as a woman and comes to a fuller understanding of the role of art in our lives. Stanley Kubrick's Lolita will be shown at Engbreston Hall on Tuesday, October 17, at 5 p.m. There will be roundtable book discussions about Nafisi's book on October 16, 18 and 19 at 5 p.m., 8 p.m. and 6 p.m., respectively. These events are free and open to the public. For more information, call Dr. Jim Howley at 708-534-7893.
