"We mark with light in the memory the few interviews we have had, in the dreary years of routine and of sin, with souls that made our souls wiser; that spoke what we thought; that told us what we knew; that gave us leave to be what we inly were" (Emerson, 1838).

**FACULTY STUDIES COLLECTIVE BARGAINING...**The GSU faculty recently held an informational meeting on collective bargaining (CB) for the five BOG universities. A secret ballot referendum on May 6 will determine whether a majority of the full-time academic employees favors CB. The BOG Council of Faculties and Council of Presidents sponsored the open forum. Guest speaker was Dr. George Angell, head of the National Center of Information for Collective Bargaining and noted neutral national CB authority. His remarks were based on a book entitled "Unions on Campus" by Kemener and Baldrige. Dr. Angell outlined positive aspects and potential problems of CB. Some positive aspects were promoting economic benefits to faculty members, increasing job security, legitimizing faculty authority, increasing faculty influence in governance. Major potential problems included polarizing administrators and faculty, yielding disproportionate power to the unions, increasing centralization of power, and increasing participation by outsiders such as government and arbitrators. Dr. Angell also stated that little attention was paid to various costs of bargaining which are a burden to both the institution and faculty members. The vote to be held in May will determine if BOG faculties want collective bargaining. The GSU vote will be one fifty of the total decision. Should the majority favor CB, a second election will be held to determine the exclusive bargaining agent, if any.
